How to Bid

Internet Absentee or Proxy Bidding

Place absentee bids now at www.StacksBowers.com or use our iOS or Android apps on your mobile device or tablet. Proxy bidding is enabled at midnight the day before the auction session closes live and is located on the lot description page. Visit our Frequently Asked Questions page at www.StacksBowers.com/FAQ/OnlineBidding.aspx for more information.

Stack's Bowers Galleries iBid Live

Bid live anywhere in the world, on your computer at www.StacksBowers.com or use our iOS or Android apps on your mobile device or tablet.

Live Telephone Bidding

Phone Bidding must be arranged 24 hours before your session begins. Stack's Bowers Galleries will ask for the lot numbers of interest and will call you during the auction so you can place bids with our representative in real time. We regret that we can only offer this service for lots estimated at \$2,500 or more. If you wish to arrange live bidding by phone, contact Customer Service at 800-458-4646 or 949.253.0916 or email info@StacksBowers.com.

Email, Fax and Mail Bidding

Use the enclosed bid sheet and email, mail or fax it to us. Email bids to info@StacksBowers.com. If sending by mail, please allow sufficient time for the postal service. Fax bids must be received 24 hours before your session begins. Fax bids to 844.645.7624. Please check that your fax bids are received by Stack's Bowers Galleries.

Mail: Attn. Auction Department

> Stack's Bowers Galleries 1550 Scenic Avenue, Suite 150 Costa Mesa, CA 92626

United States

Fax: 844.645.7624 Email: info@stacksbowers.com

Live Bidding

In person live bidding will be allowed in accordance with COVID-19 directives and local mandates at the time of auction. Reservations required.

Payment Information

Please send all check, money order or cashier's check payments to:

Stack's Bowers Galleries 1550 Scenic Avenue, Suite 150 Costa Mesa, CA 92626 United States

For bank wire instructions, see information at right or contact our Accounting Department at 800.458.4646 or 949.253.0916.

Bank Wire Information:

For Domestic (U.S.) Banks, please direct your bank wire transfer to:

Bank Name: CIBC Bank USA Account Name: Stacks-Bowers Numismatics, LLC

ABA/Routing#: 0710-0648-6 Address: 120 South LaSalle Street

Account Number: 2612038 Chicago, IL 60603

For Foreign Banks*, please direct your bank wire transfer to:

Bank Name: CIBC Bank USA Account Name: Stacks-Bowers Numismatics, LLC

International Swift Code: PVTBUS44 Address: 120 South LaSalle Street

Account Number: 2612038 Chicago, IL 60603

*Bank wires sent from a foreign bank are subject to an international bank wire fee of \$35. If an international order will be settled using a different form of payment, please contact us by phone or email to have the wire fee removed. If the wire will be sent in any currency other than USD, Stack's Bowers Galleries needs to be contacted prior to the transfer in order to arrange for an intermediary bank.

> IMPORTANT: Please have your bank add the <u>Invoice Number</u> or <u>Your Name</u> on the wire information.

Welcome to the Stack's Bowers Galleries

June 2022 Showcase Auction featuring the Lucy Collection and other important properties

I am proud to present our exciting June 2022 Showcase Auction, the official Auction for the Whitman Coins & Collectibles Summer Expo. This sale marks our first return to the Whitman Summer Expo since 2019 and we anticipate tremendous excitement from both collectors and dealers. The Live Bidding sessions will be hosted at Griffin Studios in our Costa Mesa, California headquarters on June 14 and 15. Our Internet Only sessions will begin on the afternoon of June 15, and continue on June 16 and 17. This sale is highlighted by several impressive collections, as well as numerous individual rarities across a wide range of categories.

An exciting offering of Numismatic Americana is led by a selection from the legendary Cardinal Collection Educational Foundation, which is famous for its focus on top-quality Early American coins and medals. This group is highlighted by an incredible pair of Libertas Americana medals including a silver specimen graded MS-63+ (PCGS) and a bronze example graded MS-65 BN (PCGS). A historic offering of medals awarded to Apollo Astronaut Buzz Aldrin is presented from the Harris and Wendy Lefkon Collection, highlighted by a 1969 Apollo 11 Moon Landing gold medal and a 1969 Pontifical Academy of Sciences gold medal awarded to Aldrin by Pope Paul VI.

Highlighting the United States coinage in the sale is the magnificent Lucy Collection which spans virtually every category of the *Red Book*. Its diversity is only surpassed by the quality and rarity, with a focus on keydate issues including an AU-55 (NGC) 1795 Flowing Hair half dollar, a Proof-65+ Ultra Cameo (NGC) 1876 gold dollar, a Proof-63 (NGC) CAC 1909 Indian quarter eagle, a Choice MS-64 (NGC) 1907 High Relief Saint-Gaudens double eagle, and many more.

We are also thrilled to present a selection of Liberty Head gold coins from the now-legendary Fairmont Collection, which has become the source for gold coins that are prized for their superior eye appeal and quality. The current offering focuses on half eagles and includes a MS-62 (PCGS) CAC 1891-CC, a MS-61 (PCGS) CAC 1892-CC, and a MS-62 (PCGS) CAC 1893-CC.

Concluding the Live Bidding portion of the sale is an exciting selection of Bitcoins and other physical cryptocurrency, a genre that has been earning incredibly strong premiums among traditional coin collectors and crypto enthusiasts alike. This selection is highlighted by MS-67 (PCGS) examples of the 2011 Casascius "CASACIUS ERROR" 1 Bitcoin, as well as a Top Pop MS-68 (PCGS) 2013 Casascius 1 Bitcoin that was acquired directly from the series creator Mike Caldwell.

Beyond these selections, there are numerous individual treasures that would each serve as a crowning jewel in an advanced collection of their respective series. Of note are a unique Proof-64 BN (NGC) 1819/8 Matron Head cent, a MS-68 RD (PCGS) 1902 Indian cent, an incredible Proof-66 (PCGS) OGH CAC 1849 Liberty Seated dime, a fresh and stunning MS-64 (PCGS) CAC 1892-S Morgan dollar, a Proof-67+ (PCGS) CAC 1894 Morgan dollar, a Proof-64 Deep Cameo (PCGS) CAC 1897 Liberty Head eagle, a MS-67 (PCGS) 1904 Liberty Head double eagle, and many more.

On behalf of the entire Stack's Bowers Galleries team, I thank you for your interest in our June 2022 Showcase Auction and wish you the best of luck in your bidding!

Sincerely,

Brian Kendrella

Sun Kerdude

The Lucy Collection

A major portion of our June 2022 Showcase Auction comes from a single consignor, who wishes to dedicate it to his fabulous pup, LucyFurr, who was his sidekick for over 15 years. A portion of the proceeds will be donated to Queen of Hearts Rescue, to further the good work done on behalf of cats and dogs.

The magnificent Lucy Collection spans virtually every category of the *Red Book*. Its diversity is only surpassed by the quality and rarity, with a focus on keydate issues. Within the large selection of desirable coins will be found an AU-55 (NGC) 1795 Flowing Hair half dollar, a Proof-65+ Ultra Cameo (NGC) 1876 gold dollar, a Proof-63 (NGC) CAC 1909 Indian quarter eagle, and a Choice MS-64 (NGC) 1907 High Relief Saint-Gaudens double eagle.

LOTS 1001-1548

NUMISMATIC AMERICANA

EARLY AMERICAN AND BETTS MEDALS

1001

1736 Jernegan's Cistern Medal. By John Tanner. Betts-169, Eimer-537, MI III:72. Silver. MS-62 (PCGS). 38.7 mm. A richly toned and handsome piece awash in deep steely-charcoal, copperrusset and pewter-gray. Underlying hairlines are noted for accuracy, but sharp striking detail and a semi-reflective finish provide plenty of appeal. The Jernegan's Cistern was a massive vase of wrought silver that proved impossible to sell and was disposed of by lottery. Some

early American coin dealers tried to link this medal to the division of the Colony of Carolina into North and South, no doubt seeking aid in their bid from the inclusion of palmetto trees in the reverse design. In reality, however, the medal had no such intent. Approximately 30,000 examples were produced and distributed to purchasers of lottery tickets, who paid five or six shillings for their entry.

1002

"1747" French Fleet Defeated Off Cape Finisterre / Lord Anson's Voyage Around the World Medal. By Pingo. Betts-382, Eimer-616. Silver. AU-58+ (PCGS). 43.3 mm. 375.3 grains. An exceptionally pretty example of this popular British medal, marking the contributions of one of the great naval figures of the mid-18th century. Both sides are nicely reflective and boldly lustrous, with a wealth of multicolored toning against light gray surfaces. Pale blue, faint violet, sea green, and rich gold tones dominate. Only trivial

hairlines are present, and a careful examination will find a single thin hairline scratch at the tip of Anson's nose. This is something of a dual commemorative. The obverse celebrates Anson's victory at the first battle of Cape Finisterre, off the Spanish coast, in 1747. The reverse marks Anson's circumnavigation from 1740 to 1744.

From Christie's sale of March 1, 1966, part of lot 128; our (Stack's) sale of the John J. Ford, Jr. Collection, Part XIV, May 2006, lot 443; our sale of the E Pluribus Unum Collection, November 2021 Baltimore Auction, lot 10007.

Superb Betts-549 Franklin American Beaver Medal

1003

"1776" (post-1807) Franklin American Beaver Medal. Betts-546, Julian CM-8, Greenslet GM-80. Bronzed Copper. Specimen-66 BN (PCGS). A superb example of one of the most popular early U.S. Mint medals, depicting the beloved Dr. Franklin on the obverse with a Continental Currency-inspired beaver and the date 1776 on the reverse. Nicely bronzed with some mottling and a patch of golden patina near the marsh reeds of the lower right reverse. Very sharp and free of significant flaws, with just a single tiny rim nick at the base of the reverse.

Listed in Betts by virtue of its 1776 date, these dies are actually from about 1807. The Philadelphia Mint continued to produce examples from the original dies through most of the 19th century, but few survived in this kind of grade. The absence of a reverse rim break below 9 o'clock places this as a slightly earlier strike than many.

PCGS Population: 1, none finer.

From the Cardinal Collection Educational Foundation. Earlier from Heritage's sale of August 2014, lot 5051.

1004

"1776" (post-1807) Washington/Franklin American Beaver Medal. Betts-549, Julian CM-4, Musante GW-93, Baker-54A, Greenslet GM-83. Bronzed Copper. Specimen-64 BN (PCGS). A charming and attractive example of this U.S. Mint medal, struck from dies produced for Joseph Sansom's abbreviated ca. 1805-7 Medallic History of the American Revolution series. This variety is a muling of dies Sansom did not intend to be mated, marrying John Reich's anepigraphic obverse of Franklin and Washington (intended to be married to a 1783-dated reverse of an eagle over the globe) to Reich's handsome 1776-dated American Beaver reverse, which

was conceived to be paired with an obverse of Franklin alone. The bronzing is well accomplished and even, and the surfaces are attractive and nearly pristine. The reverse shows a rim break below 9 o'clock, a common site on this variety, which probably dates from the late 1850s or after. Unknown in silver and quite elusive in copper, this medal is rarely found so fine. Baker's lovely example, which realized \$6,000 in our November 2019 offering, was graded Specimen-63 (PCGS).

PCGS Population: 1, none finer.

1782 Frisian Recognition of American Independence Medal. By B.C.V. Calker. Betts-602. Silver. MS-63 (NGC). 44 mm. Boldly toned in deep steel-olive, direct lighting calls forth antique gold and powder blue undertones, as well as a bright semi-reflective finish. Frisia was the first of the Dutch states to recognize American

independence from Britain. Quite symbolic, this medal illustrates a Frisian in ancient armor holding the hand of a young Indian Maiden representing America while holding back Britain who, while holding out an olive branch, stands with her lion at her side and a snake in the grass at her feet.

1006

1783 Peace of Versailles "Libertas Americana" Medal. Betts-608. Tin, with Copper Scavenger. Specimen-61 (PCGS). An unusually nice example of this popular medal, struck in Europe to mark the end of the American Revolution and the associated conflicts. Bright and lustrous, with deeply reflective and untoned fields. The scavenger, a plug of copper inserted at the exergual line before striking, has done its job, attracting corrosion and toning to dark brown. The scavenger's presence has allowed the tin to remain boldly brilliant, which is exactly why it's there. The detail is sharply rendered on both sides, and the concentric lathe lines remaining from the machining of the unstruck planchet are still subtly visible. The fields show trivial handling marks and lines, but none are terribly significant.

Probably struck in Germany for a principally Dutch and French audience, this medal borrows the "Libertas Americana" legend from the popular medal conceived by Ben Franklin, placing it with two allegorical scenes. One depicts King Louis XVI gesturing to a pole topped with a Dutch style "free hat" that displays a 13-striped shield, representing the new United States. The reverse shows a goddess of Victory holding the shields of four European powers — England, France, Spain, and the Netherlands — while a Gorgon-faced shield of war is cast aside.

1783 Peace of Versailles "Libertas Americana" Medal. Betts-608. Tin, with Copper Scavenger. MS-61 (PCGS). Another example of this important medal, contemporary to the end of the American Revolution and to the more famous medal that uses the same obverse legend. Boldly lustrous and untoned, with a scattering of small marks

on both sides and a hint of oxidation haze in the fields. A lovely example of a type that should be in any focused collection of medals of the Revolutionary War.

From the Cardinal Collection Educational Foundation.

Rare Silver Washington/Franklin Sansom Medal

1008

"1783" (post-1807) Washington/Franklin Peace of 1783 Medal. Betts-617, Julian CM-5, Musante GW-92, Baker-58, Greenslet GM-82. Silver. Specimen-63 (PCGS). A beautiful and important early American medal, struck at the Philadelphia Mint about 1807 as part of the first generation of Sansom's brief series illustrative of events and personages of the American Revolution. John Reich's designs are struck up to their intended majestic detail, rising from lightly reflective surfaces that are mostly light silver gray with highlights of pale blue. Some trivial hairlines are present, along with a few minor marks and a long thin hairline scratch hidden on the central device between Washington's hair and his epaulet. The visual appeal is excellent, particularly for a medal struck for the unsophisticated collector base of the early 19th century, who were not quite as savvy to finer points of preservation as those buying medals from the U.S. Mint after the Civil War. Ford owned three of these. One was sold with his Washingtoniana (Ford II), and two others were sold with his Franklin and Betts material (Ford XIV). We

resold the other example from Ford XIV (later in the Brent Pogue Collection), graded PCGS Specimen-64 in our sale of March 2020 at \$28,800. Baker owned two, and we sold both in November 2019 as lots 20078 (PCGS Specimen-62) and 20079 (PCGS Specimen-64). We also sold LaRiviere's in 1999 and Steinberg's in 1992. In addition to the seven we've sold, Heritage has sold one; Steinberg's reappeared in the Donald Partrick sale, graded NGC AU-58. It brought \$19,200 in March 2021. With its popular and evocative designs celebrating the peace treaty that ended the Revolution, as well as the two leading lights of the era, this medal is found in a wide array of cabinets. Very few ever get to own one in silver, however, as we estimate the population to be perhaps a dozen, at most.

PCGS Population: 1, 2 finer (Specimen-64 finest).

From the Cardinal Collection Educational Foundation. Earlier ex Godfrey Weiners, October 25, 1960; John J. Ford, Jr.; our (Stack's) sale of the John J. Ford, Jr. Collection, Part XIV, May 2006, lot 341.

FRANCO-AMERICAN JETONS

1009

1755 Franco-American Jeton. The Argonauts and the Golden Fleece. Lecompte-160. Bronze. AU-53 (PCGS). 28 mm. 9.47 grams. With glints of steel-olive to a base of light rose-brown patina. The detail is sharp to full in most areas, and nowhere less than bold,

with both the obverse and reverse designs fully appreciable. We have offered several examples of this popular Argonauts and Golden Fleece type in recent years, but this is the first paired with the 1741-dated Marine die.

Comitia Americana & Revolutionary Era

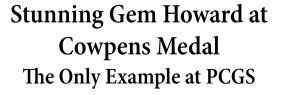

1010

"1776" (ca. 1910-1930) Washington Before Boston Medal. Sixth Paris Mint Issue. First Issued Obverse (In Repaired State) / Fourth Issued Reverse. Adams-Bentley 3, Musante GW-09-P5, Baker-Unlisted, Julian MI-1. Silver. Plain Edge. MS-63 (NGC). 68.8 mm. Uniform pearl-gray surfaces with an evenly applied matte finish and,

in the protected areas around the design elements and at the borders, warmer steel-olive highlights. Just a couple of minor marks in the fields and slight lightening on the high points. Pretty powder blue and champagne-apricot undertones are discernible with the aid of direct lighting.

Choice William Washington at Cowpens Medal Ex Ford and Adams

1011

"1781" Lieutenant Colonel William Washington, Battle of the Cowpens Medal. Original Paris Mint Striking. By Pierre Simon DuVivier. Adams-Bentley 11, Betts-594, Julian MI-8. Bronze. Plain Edge. Specimen-64 (PCGS). 45.9 mm, 3.5 - 3.7 mm thick. 657.8 grains. Plain concave edge, witness line or collar mark at 11 o'clock. An exceptional early die state specimen, with more deeply reflective fields than usually seen and superb visual appeal. Dark chocolatebrown surfaces are enlivened by gold, blue and violet highlights. The devices are perfectly struck and well detailed. An ancient India ink 17 is seen in shadow in the upper left obverse field, and a similar 20 retains its ink in the upper left reverse. The rims are barely filed, just at the outermost portion of the obverse rim and similarly subtly and deftly along the right side of the reverse. The fields are mostly free of marks, though we note a diagonal dig left of VIRTUTIS and a little rim tick above the letter T in PRAEFECTO. While the spalling marks align with Adams-Bentley State 2, the collar mark on the edge dates this piece's production rather early in the striking sequence, as do the deeply mirrored fields. The triangular break on the collar is noted on the obverse side of the edge at the collar mark, just above the letter G in WASHINGTON. This is among the earliest state copper strikings your cataloger (JK) has seen. A handsome piece, and a particularly desirable one. It was last appeared publicly in our November 2019 John W. Adams sale where it was offered uncertified as "Choice Mint State". Now confirmed as SP-64 by PCGS, we expect tremendous excitement when this piece crosses the auction block in our June 2022 sale. A similar MS-64 (PCGS) example brought \$5,760 in our recent November 2021 sale of the E. Pluribus Unum Collection.

PCGS# 684292

PCGS Population: 3; none finer.

Ex John J. Ford, Jr., acquired from a source in Paris; Ted Craige, acquired September 25, 1966; Ted Craige estate, 1983; John W. Adams; our sale of the John W. Adams Collection, November 2019 Baltimore Auction, lot 2065.

1012

"1781" John Eager Howard at Cowpens Medal. Original Paris Mint Striking. By Pierre Simon DuVivier. Adams-Bentley 12, Betts-595, Julian MI-9. Bronze. Plain Edge. Specimen-65 (PCGS). 46 mm. A lovely example of this classic type, both sides are richly toned in dominant autumn-brown with warmer steel-olive outlines to many of the design elements. The detail is razor sharp to full throughout the design and, in fact, this piece is nicely double struck. Evidence for the latter is best appreciated with the aid of the loupe, and then again while examining the central motifs on the obverse. There is a bold witness line on the edge, and typical Paris Mint rim filing is seen on both sides. The fields are faintly prooflike and also reveal pretty powder blue and pale rose undertones at direct viewing angles. This is the only metallic composition in which the John Eager Howard at Cowpens is considered common, but most bronze examples in numismatic hands are post-1830 Paris Mint restrikes from original dies. Those are distinguished by Paris Mint edge markings. This original striking with a plain edge is decidedly scarce, however, the Adams-Bentley survey (2007) reporting 26 examples of this type. A similar original striking sold for \$5,040 in our November 2019 John W. Adams sale, and we expect very strong interest in this Specimen-65 that sits as the only example graded by PCGS in this category. Adams-Bentley Die State 1.

PCGS# 715027

PCGS Population: 1; none finer. The only piece graded in this category. Acquired from John Kraljevich Americana, privately.

Unique "Intans" Libertas Americana Medal Cliche The Piece that Kept Franklin from Making a Mistake Struck in January 1783

1013

"1781" (before January 23, 1783) Libertas Americana Medal. Reverse Cliché. Original. Workshop of Augustin Dupre. As Betts-615. White Metal. Specimen-61 (PCGS). 47.0 mm x 46.8 mm, 0.5 mm to 1.5 mm thick. 214.0 grains. Plain trimmed edge. Traces of paper fiber present on plain back. A superbly preserved soft metal impression, with only minor surface wear and most of the original paper still present on the blank back. Bright lustrous evidence of the tin beneath is visible at the peripheries of the back. The struck side is glossy and appealing, even dark gray with no major defects. Details are spectacularly sharp, and some aspects of the design like the cuirass on Minerva's chest and the finer contours of her face have been refined from earlier state cliches into a more finished form.

This fascinating progress proof was made at a very particular moment of this die's journey to completion. Like all cliches, it was intended as a temporary form, a snapshot of the die's current state, intended for the eyes of the engraver and his patron. The exergual legend is not present, though various raised scribe lines are visible in the exergue. The peripheral legend is the most interesting part of this piece's design, however: NON SINE DIIS ANIMOSUS INTANS — INTANS, rather than the correct spelling, INFANS. Fortunately, the person to whom Benjamin Franklin sent this cliche noticed: Alexandre-Theodore Brongniart, an architect and man of letters who was a vital link in the chain that connected Franklin with both the designer of the reverse, E.A. Gibelin, and medalist Augustin Dupre who brought the Libertas Americana medal to fruition.

On January 23, 1783, Brongniart wrote to Franklin:

"I have the honor of sending to Mr Franklin two new proofs of the medal, noting that the head is not quite as perfect as it should be, that the serpents held by the child will be larger and better drawn; moreover the engraver put 'intans' instead of 'infans' and this spelling mistake shall be corrected.

"I have the honor of reminding Mr Franklin that he had promised what he shall have inscribed on both sides at the bottom of the medal, and this matter alone prevents its completion."

Brongniart is acting as a go-between from Dupre, who produced this object, to Franklin, who commissioned it, all while serving as a vital critical eye. In a February 1785 to Franklin, Gibelin attests to Brogniart's role in his involvement: "the medal of the United States of America that you had struck last year (sic)

was modeled after the design that I composed at the request of Monsieur Brongniart."

Not only was Brongniart's helpful edit of the legend corrected, but Dupre fixed his design flaws as well: on the final version, the lower of the two snakes has an additional coil at the end of its tail and the upper snake shows a forked tongue. Other improvements seen on the finished medal include the addition of DUPRE F. near the exergual line and the addition of a Gorgon's head to Minerva's cuirass.

Brongniart not only pointed out corrections - he followed up to make sure they were received and executed. On January 31, 1783, he wrote to Franklin again:

"M. Brongniart has the honor of sending his respects to Mr. Franklin and begs him to let him know if he was given Friday of last week [i.e. the day after his previous letter was sent, January 24] two new proofs of the medal, and among others that of the head of Liberty. Mr Franklin has seemingly forgotten to send to Mr Brongniart what he wishes to have put at the bottom of the medal on each side, and this holds back the engraver who wishes to complete this work."

This confirms that Dupre also made cliches that, like this one, had no exergual legend, but with the correct form of the peripheral legend. No such cliches are known today.

We know of just four Libertas Americana medal cliches, all of the reverse: this lot, Adams: 2093, Ford:288, and the framed and inscribed piece last sold in our 2012 ANA sale. We presume at least a few exist, if poorly documented, in institutional collections.

While every splasher has a great history, no trial piece for the Libertas Americana medal has so much direct documentary support as this one. When it was cataloged in our Ford sale, its major consequence was missed. Joined with the paper trail that fully explains it, this is an object of substantial historical importance and one of the only numismatic items that can be documentably placed in Franklin's own hands.

From the Cardinal Collection Educational Foundation. Earlier from Augustin Dupre to Alexandre-Theodore Brongniart to Benjamin Franklin on January 23, 1783; Wayte Raymond; John J. Ford, Jr.; our (Stack's) sale of the John J. Ford, Jr. Collection, Part XIV, May 2006, lot 286; our August 2012 ANA Auction, lot 4094; John W. Adams Collection; our sale of the John W. Adams Collection, November 2019, lot 2094.

Extremely Rare Libertas Americana Reverse Cliche One of Just Two Known of the Completed Die

1014

"1781" (ca. March 1783) Libertas Americana Medal. Reverse Cliché. Original. Workshop of Augustin Dupre. As Betts-615. White Metal. 48.1 mm, 0.7 mm to 1.6 mm thick. 191.3 grains. Called somewhat mishandled by John Ford while in his collection, an arc of the outer rim of this piece has broken away, but remains present, representing an unstruck area from roughly 2 o'clock to 4:30. The surfaces are deep gray and pleasing, original and attractive despite assorted marks, some old wax that remains present, and as-made surface roughness. The backing paper is a part-printed scrap, perhaps a bill of some sort, upon which the words and others are visible, along with a manuscript note. Despite its appearance, this is a specimen of resounding historical importance, produced for Franklin's personal inspection as a final draft of the finished but as yet unhardened reverse die of the Libertas Americana medal. It was apparently this state, indeed a cliche essentially identical to this one, that Franklin sent to Sir William Jones in March 1783 with a note stating, the engraving of my medal, which you know was projected before the peace, is but just finished. None are yet struck in hard medal, but will be in a few days. Unhardened dies are incredibly susceptible to damage, as 18th century die steel (and modern steel today) is brittle before it is hardened by quenching. Once a die is hardened, modification becomes very difficult, so if changes need to be made, they need to be done in that fragile, unhardened state. Engravers in major mints - Paris especially - were accustomed to making soft metal impressions as something of a proofreading copy, enabling the negative die to be viewed in the positive in rough draft form. Wax impressions were liable to leave bits of wax in the interstices of design elements, thus engravers settled upon tin (usually called "white metal" in modern numismatic circles) as the best medium. Tin melts at 450 degrees Fahrenheit, a low enough melting point to be accomplished in any small workshop. A ladle

full of molten tin poured onto a surface will cool and harden fairly quickly, but it will remain soft long enough that a die can be easily pushed into it by hand, leaving a relatively durable impression in medal. Most often, medalists would find a piece of scrap paper — a note, a newspaper, a book page — to pour the tin atop, thus preventing their workspace from getting scorched and making the tin sheet somewhat easier to lift and trim. These splashers were not intended to be medals, or even permanent, but simply a temporary way to display the state of the die in the positive before its devices were rendered immovable. Each was personally crafted by the engraver in his shop. In the case of the Comitia Americana medals, the epreuves made by Duvivier, Dupre, and Gatteaux were ultimately intended to be viewed and handled by themselves and those close to the process. Benjamin Franklin's first experience with this form appears to have been his review the epreuves of the De Fleury medal, made between April 20 and May 4, 1780, prior to his recommendations regarding the lettering in that medal's obverse exergue. Engraver Augustin Dupre retained many of his splashers in his personal collection, some of which found their way into institutions in France and the United States. Thomas Jefferson used cliches as a spendthrift (and lightweight) way to collect all the medals of the Comitia Americana series, assembling a set for himself and another for his Virginia countryman James Madison. The exact history of this cliche is unknown, but its rarity is clear. The only other Libertas Americana reverse cliche from this finished state in private hands is the framed and inscribed piece last sold in our 2012 ANA sale, though we would not be surprised if at least a few exist, unrecognized.

From the Cardinal Collection Educational Foundation. Earlier ex Ted Craige collection; Ted Craige estate to John J. Ford, Jr., October 4, 1982; our (Stack's) sale of the John J. Ford, Jr. Collection, Part XIV, May 2006, lot 288.

Spectacular Silver Libertas Americana Medal A Noble Form of an American Classic Last Sold Publicly in 1997

1015

"1781" (1783) Libertas Americana Medal. Original. Paris Mint. By Augustin Dupre. Adams-Bentley 15, Betts-615. Silver. MS-63+ (PCGS). An exceptional example of the single most famous and most desirable medal of the American Revolutionary era. Astonishingly beautiful toning graces both sides, gently overlaid by two dozen decades of gentle preservation in shades of pale blue and violet over largely brilliant surfaces. The toning is light and subtle, enriched with traces of gold and olive, a departure from the frequently dark or heavy coloration seen on silver examples of this medal. The sharpness is superb on both sides, and the surfaces have avoided any significant damage or handling. Beneath the portrait of Liberty, two small dark spots serve as distinguishing features, and a small area of above-surface roughness beneath JUIL is visible but similarly inconsequential to the magnificent eye appeal. The die state is remarkably early, retaining the guidelines used to punch in the letters in the reverse exergue, an aspect that quickly disappeared and is abraded away on all but the most high grade examples. This piece was among the first struck, likely among the first distributed, and remains among the very best to survive. Any Libertas Americana medal is special, with their personal connection to Benjamin Franklin and their superlative stature among American medals. Silver examples inhabit an outsized role, both for their unique visual appeal and their rarity. Among the rare space occupied by these elusive silver strikes, very few are nice: the population is dominated by those that have been handled and mishandled, dropped and cleaned, slid into and out of cabinets, darkly toned and reversed and toned again. This piece is a rather notable exception by virtue of its grade, its delicate toning, its originality, and its superb aesthetic impression. This example was acquired by B.G. Johnson, apparently from the Brand Estate, in the 1930s. It remained privately tucked away in the collection of pieces left to one of Johnson's assistants, a group of coins that eventually made its way to Spink America's unassuming sale of June 1997. Acquired there by Alan Weinberg, it was sold privately to the Cardinal Collection and has remained off the market for many years.

From the Cardinal Collection Educational Foundation. Earlier ex estate of Burdette G. Johnson; Spink America's sale of June 1997, lot 63; Alan Weinberg collection; Cardinal Collection, via private transaction.

Gem Copper Libertas Americana Medal PCGS MS-65

1016

"1781" (1783) Libertas Americana Medal. Original. Paris Mint. By Augustin Dupre. Adams-Bentley 15, Betts-615. Copper. MS-65 (PCGS). A wholesome and wholly appealing Gem, with even light brown surfaces alight with golden luster and toning that deepens to mahogany close to the rims. Close examination finds subtle highlights of pale blue but few marks of any consequence. A well-hidden spot has been somewhat diminished between 17 of the date 1776 in the obverse exergue, and the broad expanse of the reverse field hides some truly trivial marks and lines. The overall quality and aesthetic appeal of this specimen is a lion's leap above the typical example. The sharpness is superb, offering an unbeatable impression of the artist's intent. This is a singularly beautiful Libertas Americana

medal that ranks among the very finest known. While copper Libertas Americana medals are not the rarest item in the constellation of great American medals, with a population numbering perhaps 150 or more, Gems are very rare indeed. Distributed to Franklin's friends, members of the Continental Congress, and VIPs of all sorts, many were handled carelessly, polished extravagantly, or carried as curiosities. Very few were put away, left alone, and allowed to survive into the 21st century as Gem quality emissaries from the age of revolutions. This time traveler has survived brilliantly and against all odds, making it a prize to be captured and deposited in a place of honor in a fine cabinet.

A Second Libertas Americana Medal in Copper

1017

"1781" (1783) Libertas Americana Medal. Original. Paris Mint. By Augustin Dupre. Adams-Bentley 15, Betts-615. Copper. Unc Details—Mount Removed (PCGS). Encapsulated with the top edge hidden, so any mount removal is not presently visible. Attractive light golden-brown with some evidence of handling. A trace of verdigris is noted among the details of Hercules; crib, some light scattered marks and lines are seen in

the fields. A thin nearly vertical scratch is seen above the lion in the upper reverse field. The sharpness is superb on both sides, and the eye appeal is quite nearly a match. The long history of this medal's ownership may be unknown to us, but beginning as it did with Franklin himself, it is undoubtedly historic and just as remarkable as any Gem quality specimen.

From the Cardinal Collection Educational Foundation.

1018

Cast copy of a 1781 Libertas Americana medal. As Betts-615. Lead. 49.3 mm. 4.0 - 4.3 mm thick. 872.0 grains. Extremely Fine. 49.3 mm, 4.0 mm to 4.3 mm thick. 872.0 grains. While this piece has been celebrated in the literature as a different die variety of Libertas Americana medal, it is actually a cast of a specimen that was made when the medal was housed in a decorative bezel. The rotation is about 30 degrees counterclockwise of the proper medal rotation seen on all genuine pieces, and the surfaces show the tell-tale pitting from

gases escaping during the casting process. The details are likewise not crisp as they would be on a struck piece, particularly one produced in soft metal (compare to the two cliches seen elsewhere in this sale). The surfaces are glossy even dark gray except for some areas of raised pest. An interesting study piece and an attractive substitute for a real medal, one that has the appearance of significant age.

France. 1792 Lyon Convention Medal. By Galle. Maz-318. Metal de Cloche. Specimen-64 (PCGS). An exceptionally nice example of this popular French medal, tied for finest certified by PCGS and far above the usual level of quality encountered. Deep golden brown surfaces are as smooth as ever seen on this issue, whose planchets were cast and all show some level of inherent granularity. This piece is even and appealing, with great color, superb surface, and outstanding detail.

No marks or detractions are seen on either side. This medal's obverse portrait was inspired by Dupre's Libertas Americana, conceived just a decade before, thus giving it entry into cabinets in both France and the United States. Most are granular and mishandled, but this medal is absolutely lovely.

From the Cardinal Collection Educational Foundation.

1020

"1781" (2000) Libertas Americana Medal. Modern Paris Mint Dies. Gold. #355/500. Proof-68 Deep Cameo (PCGS). 47 mm. 64 grams. As issued and beautiful with deep golden surfaces and outstanding field to device contrast.

From the Cardinal Collection Educational Foundation.

1021

"1781" (2000) Libertas Americana Medal. Modern Paris Mint Dies. Gold. #367/500. Proof-67 Deep Cameo (PCGS). 47 mm. 64 grams. Splendid deep golden-yellow surfaces offer exceptional contrast between frosty motifs and deeply mirrored fields.

"1781" (2000) Libertas Americana Medal. Modern Paris Mint Dies. Gold. #0149/1776. Proof-69 Ultra Cameo (NGC). 40 mm. 43 grams. As struck and pristine, this fully defined and deeply cameoed specimen makes a lovely impression in all regards.

From the Cardinal Collection Educational Foundation.

1023

"1781" (2004) Libertas Americana Medal. Modern Paris Mint Dies. Gold. #0207/1776. Proof-67 Deep Cameo (PCGS). 40 mm. 43 grams. A breathtaking golden-orange specimen with fully defined, frosty motifs set against deep pools of reflectivity in the fields.

From the Cardinal Collection Educational Foundation.

1024

"1781" (2004) Libertas Americana Medal. Modern Paris Mint Dies. Gold. #0084/1776. Deep Cameo Proof. 40 mm. 43.06 grams, .999 fine, 43.02 grams AGW. As struck with gorgeous golden-orange surfaces that are boldly contrasted in finish between mirrored fields and frosty design elements. This is a perennially popular design in American medallic history, represented here by an expertly produced "restrike" from the Paris Mint. This lot includes the original case and Certificate of Authenticity as issued by Monnaie de Paris. The supporting items are available to the winning bidder upon request to Stack's Bowers Galleries at the close of the auction.

"1781" (2015) Libertas Americana Medal. Modern Paris Mint Dies. Silver. Proof-70 Ultra Cameo (NGC). 99 mm. 1 kilogram. Imposing in size and visually stunning, an outstanding example of what modern minting technology can produce using this classic early American medallic design.

1026

"1781" (2015) Libertas Americana Medal. Modern Paris Mint Dies. Silver. Proof-70 Ultra Cameo (NGC). 99 mm. 1 kilogram. A fully struck, boldly cameoed specimen with exquisite bright silver surfaces. Stunning!

1027

Two-Piece Set of "1781" (2004) Libertas Americana Medals. Modern Paris Mint Dies. Silver. Proof-69 Deep Cameo (PCGS). 40 mm each. Both examples are housed together in a special large size PCGS holder, which shows the obverse and reverse designs on both sides. The medals are fully struck, brilliant and possessed of exquisite cameo contrast to the finish. (Total: 2 medals)

Indian Peace Medal

1028

"1797" (post-1861) John Adams Indian Peace Medal. The Only Size. By Moritz Furst and John Reich. Julian IP-1. Bronze. First Reverse. MS-66 BN (NGC). 51 mm. Virtually pristine mahogany-brown surfaces with tinges of reddish-orange to the obverse, golden-brown on the reverse. Fully struck and visually appealing, a semi-prooflike finish in the fields is discernible as the medal rotates under a light. Some faint carbon on the obverse is noted for accuracy, and not readily evident at all viewing angles. The original dies for this issue were cut by Moritz Furst and John Reich, though neither die was

signed. In fact, this obverse is believed to be the only die by Furst that he did not sign. This example was struck from the first reverse die, which can be distinguished by the relatively wide spacing between the pipe and the letter P in PEACE. It seems to have broken early, as all of the small size silver medals struck from it exhibit a small rough chip within the narrow trench outside of the inner rim border, just below 3 o'clock. This is a later striking from this reverse (NGC says post-1861), and identifiable as such by two rough chips in that area.

COLUMBIANA

1029

1892-1893 World's Columbian Exposition Award Medal. By Augustus Saint-Gaudens and Charles E. Barber. Eglit-90, Rulau-X3. Bronze. MS-68 BN (NGC). 76 mm. Awarded to FERGUSON BROS., as noted on the base of the plaque on the

reverse. Surely among the finest certified survivors of this popular type, this handsome copper-brown example exhibits smooth satin surfaces that border on pristine. Fully struck, as well, and sure to please even the most discerning collector. Outstanding!

From the Martineit Family Collection.

WASHINGTONIANA

1030

"1797" (ca. 1859) Sansom Medal. First Reissue. Musante GW-59, Baker-72, Julian PR-1. Silver. AU-55 (NGC). 41 mm. A richly original example toned in steely-russet and pewter-gray, this piece has the appearance of having sat in a collector cabinet for many years. Reflective fields are appreciable with the aid of direct lighting, which also calls forth vivid undertones of cobalt-blue and reddish-gold. Fully struck and pleasingly smooth for the assigned numeric grade. Musante (2016) reports that just 57 examples are believed to have been struck in silver between 1861 and 1904, an estimate derived from Mint records. Silver impressions are scarce, but they are staples of any advanced collection of Washington medals, particularly considering the rarity and high cost associated with impressions of this medal from the original dies in this precious composition.

From the Kessler Collection of Washingtonia.

1031

"1832" (ca. 1858) Civic Procession Medal. Second Restrike. Musante GW-130-R2, Baker-160D. Copper. Thick Planchet. MS-66 RB (PCGS). 32 mm. An exquisite example from these dies, both sides retain abundant pinkish-orange color with minimal toning in iridescent brown and powder blue. Sharply struck with a prooflike finish. A later impression, there are several prominent die breaks on the reverse.

From the Kessler Collection of Washingtonia. Earlier ex our March 2020 Auction, lot 20046.

1032

Undated (ca. 1834) Lafayette Par Nobile Fratrum Medalet. By C.C. Wright and James Bale. Musante GW-142, Baker-197. Silver. MS-67 (NGC). 26 mm. An outstanding Superb Gem of this Wright and Bale issue, finer than the Boyd-Ford specimen in our August 2013 sale, which specimen is actually being offered here again in the following lot. Light gray-silver in the central obverse field, with bold blue-green iridescence around the devices. Similar tones on the reverse, mottled with russet and gold. Prooflike, sharp and beautifully preserved. A rarity in silver and in great demand.

From the Kessler Collection of Washingtonia. Earlier ex Virgil M. Brand Collection; our (Bowers and Merena's) Sussex Collection sale, June 1990, part of lot 5020; Jack Collins; our (Coin Galleries') sale of the Jack Collins Collection, Part II, July 1996, lot 63; our sale of the Charles A. Wharton Collection, March 2014 Baltimore Auction, lot 2161. Bowers and Merena and Coin Galleries lot tags in-

1033

Undated (ca. 1834) Lafayette Par Nobile Fratrum Medalet. By C.C. Wright and James Bale. Musante GW-142, Baker-197. Silver. Proof-65 (ANACS). 26 mm. A lovely Gem, with pastel blue-green and light gold toning over the reflective surfaces. A curled lintmark (as made) is noted in the upper obverse field, light smudge at upper reverse, only the most trivial marks or hairlines. Exceptional eye appeal on both sides. A very scarce production in silver, one avidly sought by Washingtoniana collectors.

From the Kessler Collection of Washingtonia. Earlier ex F.C.C. Boyd; John J. Ford, Jr.; our sale of the John J. Ford, Jr. Collection, Part XXIII, August 2013 Chicago ANA Auction, lot 21256.

1848 National Monument Medal. Musante GW-178, Baker-320A. Silver. MS-61 (NGC). 40 mm. Rich steel-olive toning blankets the obverse, but is confined to outlining the design elements on an otherwise silver-gray reverse. Well mirrored in finish with iridescent undertones and fully rendered motifs. As discussed by Musante, this medal commemorates the laying of the cornerstone of what would become the Washington Monument on the National Mall on July 4, 1848. The design depicted on the medal was the original conceived by the architect, but it was rather dramatically changed to the simple obelisk standing there now, completed in 1885. A rarity in silver, we have offered only white metal impressions from these dies in recent years.

From the Kessler Collection of Washingtonia.

1035

"1859" (1859-1904) Washington Cabinet Medal. By Anthony C. Paquet. Musante GW-240, Baker-325C, Julian MT-22. Bronze. MS-66 RB PL (NGC). 21 mm. A glorious example of this perennially popular Washington medallic type. Prooflike in the fields, the motifs are more satiny in texture, and all areas retain abundant mint color in vivid pinkish-orange. Lightly toned, as well, we note cobalt blue highlights to dominant iridescent brown patina. Sharply struck and virtually blemish free. Per R.W. Julian, the United States Mint at Philadelphia made 258 bronze impressions from these dies between 1859 and 1904.

1036

"1792" (ca. 1858) George Washington - Martha Washington Medalet. By Robert Lovett, Jr. Musante GW-264, Baker-209, Fuld-115B/115C f. Rarity-9. Silver. Plain Edge. MS-64 (PCGS). 13 mm. Lovely steely-olive toning with iridescent reddish-apricot undertones. The fields and well mirrored, the motifs satiny and well struck. A very rare Civil War patriotic die combination in any metal, but one that is especially desirable in silver.

 $From\ the\ Kessler\ Collection\ of\ Washingtonia.$

1037

Undated (ca. 1860) Washington - Pro Patria Ejusque Libertate Medal. By George Hampden Lovett. Musante GW-353, Baker-271. Silver. MS-63 (NGC). 21 mm. Semi-prooflike surfaces are beautifully toned in iridescent steel and olive-gray. This is a fully struck and nicely preserved example of a Washington medallic type that is infrequently seen in any metal, but particularly rare in silver.

From the Kessler Collection of Washingtonia.

1038

Undated (ca. 1861) Elwood Ivins Store Card. Musante GW-441, Baker-546, Fuld-750Lc-1f. Rarity-9. Silver. Plain Edge. MS-63 (PCGS). 25 mm. Iridescent cobalt-blue and antique gold undertones backlight dominant steel-olive patina. Sharply to fully struck overall with a reflective finish readily apparent as the surfaces dip into a light. Rare.

From the Kessler Collection of Washingtonia.

1039

"1799" (ca. 1862) Washington in Semicircles and Stars / Shield and Star Medal. By George Hampden Lovett. Musante GW-537, Baker-141B. Silver. MS-65 (NGC). 29 mm. Lovely original toning graces both sides, the patina iridescent in quality to allow full appreciation of a reflective finish in the fields. The design motifs are frosty in texture and fully rendered. Called "Very Rare" by Musante in this metallic composition, which was unlisted in the Rulau-Fuld reference on Washingtoniana.

From the Kessler Collection of Washingtonia.

1040

1864 Abraham Lincoln / Freedom to All Men Medal. Musante GW-719, Baker-383, Cunningham 3-060S, King-77, DeWitt-AL 1864-5. Silver. MS-66 (NGC). 32 mm. An exquisite Gem, beautifully toned, over lively prooflike fields. Surfaces are essentially pristine and the eye appeal superb. Clearly finer than the Zabriskie specimen described as having "a few obverse scratches." That piece still realized \$1,210 in the 1999 Sotheby's sale. A distinctive type by William Key Philadelphia, featuring a small Washington head reverse. Prized by Washington collectors as well as those interested in Lincoln and political pieces, and rare in silver.

 $From \ the \ Kessler \ Collection \ of \ Washingtonia.$

1864 Washington and Flags - Abraham Lincoln Medal. By William H. Key. Musante GW-721, Baker-237, Cunningham 3-200S, King-89, DeWitt-AL 1864-19. Silver. MS-65 (NGC). 28 mm. Bold reflectivity in the fields. Deep steel gray, with accents of rose and pale blue iridescence. A seemingly comparable piece sold in the Zabriskie sale in 1999 for \$1,210. Rare in silver.

From the Kessler Collection of Washingtonia. Earlier ex Wayte Raymond; F.C.C. Boyd estate; John J. Ford, Jr.; our sale of the John J. Ford, Jr. Collection, Part XXIV, September 2013 Americana Sale, lot 11004. Ford collector envelope with attribution notation included.

1042

1864 Washington and Flags - Abraham Lincoln Medal. By William H. Key. Musante GW-723, Baker-238, Cunningham 3-300S, King-93, DeWitt-AL 1864-26. Silver. MS-65 (NGC). 28 mm. Deep gray on the obverse, rich gold, blue and violet on the reverse. Prooflike and rare. Missing from Zabriskie in this metal.

From the Kessler Collection of Washingtonia. Earlier ex Wayte Raymond; F.C.C. Boyd estate; John J. Ford, Jr.; our sale of the John J. Ford, Jr. Collection, Part XXIV, September 2013 Americana Sale, lot 11006. Ford collector envelope with attribution notation included.

1043

1864 Washington and Flags - George McClellan Medal. By William H. Key. Musante GW-725, Baker-219, DeWitt-GMcC 1864-21. Silver. MS-65 (NGC). 28 mm. Bold blue, green, rose and gold iridescence over prooflike fields. Unlisted in DeWitt in silver and rare.

From the Kessler Collection of Washingtonia. Earlier ex Wayte Raymond; F.C.C. Boyd estate; John J. Ford, Jr.; our sale of the John J. Ford, Jr. Collection, Part XXIV, September 2013 Americana Sale, lot 11118. Ford collector envelope with attribution notation included.

1044

Undated (ca. 1864) Washington and Flags - Ulysses S. Grant Medal. By William H. Key. Musante GW-727, Baker-250, DeWitt-USG 1868-26. Silver. MS-66 (NGC). 28 mm. Deeply and attractively toned with bold violet and blue accents, the reverse lighter gold at the center. Sharp and high grade. Desirable in silver.

From the Kessler Collection of Washingtonia. Earlier ex Wayte Raymond; F.C.C. Boyd estate; John J. Ford, Jr.; our sale of the John J. Ford, Jr. Collection, Part XXIV, September 2013 Americana Sale, lot 12072. Ford collector envelope with attribution notation included.

1045

1889 Washington Inaugural Centennial, Committee of the Celebration Badge. By Augustus Saint-Gaudens and Philip Martiny. Musante GW-1136, Douglas-54. Silver. Choice About Uncirculated. 35 mm (medal only), 79 mm total length. 36.29 grams. Looped for suspension from a bar and golden-yellow ribbon. The functional bar pin is signed TIFFANY & CO on the reverse. Antique silver surfaces display rich originality and rose and teal highlights in the protected areas of the design. Medals of this type were presented to Inaugural Centennial celebration officials and members of the New York State Legislature. While we occasionally offer bronze examples, silver examples are exceedingly rare, especially this nice!

From the Kessler Collection of Washingtonia.

THE SOCIETY OF THE CINCINNATI

1046

(ca. 1900) Daughters of the Society of the Cincinnati Eagle Badge. Bishop and Elliott-63. Gold and Enamel. Awarded to Brigadier General William F. Irvine. Choice About Uncirculated. 33.5 mm x 31.3 mm. 15.0 grams. Maker's identification B.B. & Co. PHILA for Bailey, Banks & Biddle. Back engraved BRIGADIER GENERAL WILLIAM M IRVINE. A very rare insignia, one singled out by Bauman Belden in a 1908 "American Journal of Numismatics" article as "still lacking" in the American Numismatic Society collection.

General William Irvine, an Irish-born Pennsylvanian, was later a member of the Continental Congress and the United States House of Representatives. This badge likely belonged to his great-granddaughter, Margaret Irvine Biddle, who was active in the Daughters of the Revolution and the Daughters of the Society of the Cincinnati (as a descendent of William Irvine) until her death in 1925.

From the Kessler Collection of Washingtonia.

LINCOLNIANA

1047

Undated (1860) Abraham Lincoln Campaign Medal. Cunningham 1-070W, King-6, DeWitt-AL 1860-6. White Metal. MS-63 (NGC). 40 mm. Pleasing light silver-gray surfaces with semi-prooflike fields supporting satiny design elements. Well struck with all features crisp.

Issued by the New York firm of Henning & Eymann and distributed during Lincoln's 1860 presidential campaign, white metal impressions such as this were offered to the public at 25 cents/medal.

1048

1860 Abraham Lincoln Campaign Medal. Cunningham 1-450B, King-31, DeWitt-AL 1860-34. Brass. MS-64 (NGC). 31 mm. Deep brassy-gold surfaces with subtle olive-gray highlight, this smooth

and satiny piece makes a lovely impression in all regards. Struck from dies cut by John D. Lovett of New York, both of which are known in mulings with other dies.

1865 French Tribute Medal to Abraham Lincoln. By F. Magniadas. Cunningham 9-010Bz, King-245. Bronze. Mint State, Questionable Color. 83 mm. A sharply struck example with crisp detail throughout this impressive design. Although pleasing to the eye, the somewhat swirling deep golden-brown and mahogany patina seems a bit "off" to your cataloger. A few spots are also noted, including one before Lincoln's eye, as are a couple of minor rim disturbances. These were struck in Switzerland after French Emperor

Napoleon III refused to permit their striking at the Paris Mint. They were produced on subscription only, and in very limited numbers. A single gold striking was presented to Mary Lincoln, the president's widow, by a committee representing French citizens who admired her late husband. Substantial in both size and elegance of design, the scarcity of bronze impressions further enhances the desirability of the offered specimen.

Collector envelope included.

1050

"1865" (post-1886) Abraham Lincoln Presidential Medal. By George T. Morgan. Cunningham 22-240Cbz, King-518, Julian PR-12. Bronzed Copper. MS-64 BN (NGC). 77 mm. Handsome mahogany-brown patina with blended steel-olive highlights and faint powder blue undertones. The fields reveal modest hints of reflectivity as the medal dips into a light, which feature further enhances already

strong eye appeal. A boldly rendered and overall smooth-looking example that is perhaps kept from a full Gem rating by only a swirl of ancient verdigris at the upper reverse border. Medals of this type were first struck in the United States Mint during the second quarter of 1886. Julian (1977) considers the obverse of the Lincoln medal to be, "one of the finest artistic efforts ever struck at the mint."

POLITICAL MEDALS AND RELATED

1051

Undated (1861) Anti-Confederate Political Medal. DeWitt-C 1861- 5. Brass. MS-63 (NGC). 34 mm. Handsome surfaces exhibit mottled rose-russet and steel-blue patina to a base of deep antique brassy-gold. Both sides are well struck with only a few trivial blemishes scattered about. A scarce type that enjoys strong collector demand.

1052

1864 George B. McClellan Campaign Medal. DeWitt-GMcC 1864-19. Silver. MS-67 (NGC). 31 mm. Lively prooflike fields behind satiny devices. Pearl-gray undertones with delightful light violet, blue and rose toning. A superb piece, unlisted by DeWitt in this composition, and rare in silver.

Ex Wayte Raymond; F.C.C. Boyd estate; John J. Ford, Jr.; our sale of the John J. Ford, Jr. Collection, Part XXIV, September 2013 Americana Sale, lot 11114. Ford collector envelope with attribution notation included.

JOHN ADAMS BOLEN MEDALS

Exceptional Pioneer Baseball Club Medal by Bolen

1053

Undated (ca. 1861) Pioneer Baseball Club Medal. By John Adams Bolen. Musante JAB-1. Silvered White Metal. MS-64 (NGC). 32 mm. Soft satin luster joins with vivid toning to give this piece exceptional eye appeal for the type. Otherwise goldentinged surfaces exhibit rich steel-blue and olive-russet outlines to the design elements. Slight bubbling underneath the silvered surfaces is noted under magnification, a feature common to these medals in this composition. Smartly impressed with all features sharply to fully rendered. Bolen's personal specimen sold in our November 2021 Baltimore Auction had his edge mark that indicated 25 struck in this composition, but the number is reported as 125 in his own notebook and in the

1882 Edwin Johnson listing. Considering the frequency of appearances of both compositions, it is fairly clear that the white metal examples were made in a larger number than the copper ones. There were some 40 club members in the Pioneer Club, so it is unlikely that either composition would have an original issue number smaller than that. As such, 75 is probably reliable for the copper ones and 125 is likely accurate for this, though this more fragile composition undoubtedly contributed to a greater degree of loss over the years. However many exist today, it is hard to imagine a nicer specimen than this at the Choice Mint State level.

1862 Young America / J.A. Bolen Store Card. Musante JAB-5, Rulau Ma-Sp 4. Copper. MS-65 BN (PCGS). 27.8 mm. An exceptional red and brown specimen with just a trace of light residue on the reverse from what appears to be an old spill resulting in slightly uneven toning. Both sides are still rather handsome, the obverse particularly so with considerable red remaining in the recesses and soft overtones of chocolate-brown and iridescent blue. Very sharply struck and no visible evidence of handling to speak of. As noted by Q. David Bowers in our January 2011 offering of his personal collection, "The term *Young America* was popular in the mid-19th century and was used for many purposes, including the name of a town (in Minnesota), several ships, various toys, and in cartoons. On

this die, Bolen captures the patriotic spirit of American youth...," or perhaps the relative youth of America itself at a time, in 1862, when the American Civil War seemed to threaten its very existence. Though it was reported in the 1882 Edwin L. Johnson listing that 75 were struck in copper, it can't really be considered common in any metal. This type was not included in our February 2014 sale of the Musante Collection in any composition, and our online archives include only about five appearances of each, copper and brass, over the last decade.

From our sale of the E PLURIBUS UNUM Collection, November 2021 Baltimore Auction, lot 10188.

Exceedingly Rare Maj. Gen. Berry / Liberty Cap Muling in Silver Perhaps Just Two Known

1055

Undated (ca. 1863) Major General H.G. Berry / Liberty Cap Medal Muling. By George Hampden Lovett and John Adams Bolen. Musante JAB M/E-18. Silver. MS-64 (PCGS). 28 mm. A richly original steel-gray and antique gold specimen with a slightly lighter appearance on the reverse. Both sides are fully struck with a soft satin texture to smooth-looking surfaces. According to Musante, the reverse die was cut in 1862 by Bolen and sold to Mason, then to Dr. Edwards, and to Cogan with further intermediaries before it ended up in the holdings of the ANS. The obverse die is unaccounted for. The Lovett obverse paired with its original reverse, struck pieces in silver,

copper, brass, and tin. This is only the second example of this muling that we can account for, the first being the Musante plate specimen that sold as lot 6654 in our January 2011 New York Americana Sale as part of the Q. David Bowers Collection. A lovely memorial to this fallen Major General who died at Chancellorsville in 1863 at the age of 38, having attained the highest military rank. The importance of this Bolen piece cannot be overstated. Whether or not you ever own this rare muling may well depend upon your success in this sale, for if this piece goes into a museum collection it will be forever lost to the private sector.

ASSAY COMMISSION MEDALS

1056

1892 United States Assay Commission Medal. By George T. Morgan. JK AC-36. Rarity-5. Silver. MS-65 (NGC). 33 mm. A handsome matte specimen richly toned in a blend of pewter and mauve-gray. Fully struck with expert surface preservation that will please even the most discerning collector. The Mint delivered at least 25 silver impressions from these dies in 1892 to fill the medal cases that it purchased on February 8 of that year. The dies were put to use in later years, accounting for at least one silver restrike in 1906.

Interestingly, most silver strikings of this type that we have handled in recent years have been impaired due to light wear or cleaning. The only exceptions are the present example, the PCGS Specimen-64 from the Larry Baber Collection sold in our March 2021 Auction, and the Mint State specimen from the Collection of Charles E. Barber that sold as lot 4845 in our (Stack's) January 2010 New York Americana Sale. A rare offering for the specialist.

COMMEMORATIVE MEDALS

1057

Two-Piece Set of "1776" (2013) United States Diplomatic Medals. Modern Paris Mint Dies. Gold. Proof-70 Deep Cameo (PCGS). 41 mm each, 2 ounces each. Both examples are housed together in a single large size PCGS holder, each side of which shows the obverse and reverse designs. A pair of boldly cameoed specimens with gorgeous, pristine surfaces. First made at the Paris Mint in 67 mm size, these huge gold medals were presented to foreign diplomats in honor of their services to the United States. As American minting technology advanced, it became possible for these medals to actually be struck in America, and the dies were dispatched from Paris to the Philadelphia Mint, but they promptly went missing and were never used to produce American-made examples. By the 1870s interest in medals was increasing in this country, and Chief Engraver Charles E. Barber was tasked with preparing new dies based on lead proofs

of the originals. The name of the original French designer (Dupre) was retained, however Barber unobtrusively added his name and the date 1876 to the new dies. Medals (Julian CM-15) were then produced for collectors in bronze, and occasionally in silver for the next hundred years. Recently the Monnaie de Paris, the original minting place of these medals, was contacted to reproduce the United Stated Diplomatic Medal once again, in a smaller size, using the most modern of medal production techniques. The result are these impressive Proof medals with an adaptation of the original design struck in gold to a total weight of two ounces. We have handled both 37 mm and 41 mm formats; these are 41 mm medals. (Total: 2 medals)

Two-Piece Set of "1776" (2013) United States Diplomatic Medals. Modern Paris Mint Dies. Gold. Proof-70 Deep Cameo (PCGS). 38 mm each, 1 ounce each. Both examples are housed together in a single large size PCGS holder, each side of which shows the obverse and reverse designs. As issued, pristine and a delight to behold. (Total: 2 medals)

From the Cardinal Collection Educational Foundation.

1059

1883 Maris Family Bicentennial Medal. Julian CM-27. Bronze. MS-63 (PCGS). 38 mm. Medals of this type, commissioned by Dr. Edward Maris, were struck in the United States Mint to the extent of two gold and one aluminum impressions. According to Julian (1977) bronze examples, as here, were struck outside the Mint. Beautiful deep golden-brown patina with iridescent undertones of olive-blue and pale pink.

1060

Matched Two-Piece Set of "1970" (1971) Stone Mountain Memorial Completion Medals. Philadelphia Mint. By Abram Belskie. Silver. No. 289. (NGC). Both examples are individually graded and encapsulated. Included are: First Size, Swoger-49Aa, MS-64, 76 mm, 4,211.8 grains; and Second Size, Swoger-49Ba, MS-65, 39 mm, 565.5 grains. Both exhibit a handsome antiqued pewter-gray finish with speckled russet toning. Although the initial examples

of this type were struck by Medallic Art Co. in 1969, only the Philadelphia Mint pieces struck in 1971 are government authorized and, per Swoger (2008), qualify as National Commemorative medals. These are identified by a P mintmark on the reverse within the bottom of the wreath, as seen on both the offered examples. Scarce as an original matched set, and a find for the specialist. (Total: 2 medals)

Stunning Large Size Gold National Bicentennial Medal No. 115 of Just 424 Examples Distributed

1061

1976 National Bicentennial Medal. First Size. Swoger-52IAa. Gold. No. 115. MS-67 (PCGS). 76.2 mm. 1 pound. This is an exceptionally beautiful large size Bicentennial medal, featuring a blend of soft satin luster and vivid golden-yellow color. It is fully struck, well preserved, and sure to please even the most discerning collector. This type was designed by Frank Gasparro (obverse) and Edgar Zell Steever, IV (reverse) and issued to

commemorate the bicentennial of American independence. Gold examples were produced in three sizes; the offered example is the largest and also the rarest, with a distribution of just 424 pieces. This is medal #115 from that distribution, as noted on the PCGS insert; the edge is obscured by the holder.

From the Cardinal Collection Educational Foundation.

1062

1976 National Bicentennial Medal. Second Size. Swoger-52IC. Gold. Proof-69 Deep Cameo (PCGS). 34 mm. 1 ounce. A gorgeous specimen with deep golden-yellow color and profound field to device contrast. Faint, mottled reddish-rose toning enhances the appearance of this wonderfully original piece.

From the Cardinal Collection Educational Foundation.

1063

1976 National Bicentennial Medal. Third Size. Swoger-52ID. Gold. Proof-69 Deep Cameo (PCGS). 23 mm. 1/3 ounce. Splendid rose-tinged surfaces exhibit dominant deep orange-gold color. As visually impressive and technically sound as we have ever seen for a third size variant of the gold National Bicentennial medal.

So-Called Dollars

Exceptional 1869 Pacific Railway Completion Medal with Original CaseThe Sole Finest at PCGS

1064

1869 Pacific Railway Completion Medal. By William Barber. Awarded to Joshua Rufus Nichols. HK-12a, Julian CM-39. Rarity-6. Silver. Specimen-64 (PCGS). 45 mm. This lovely near-Gem is vividly toned in steel-blue, pinkish-rose and champagnegold iridescence that assumes a more colorful appearance when the medal dips into a light. Both sides are fully impressed with reflective fields supporting frosty design elements. Struck in the Philadelphia Mint from dies prepared by Chief Engraver William Barber, medals of this type commemorate completion of the first transcontinental railroad on May 10, 1869, in a ceremony in Provo, Utah. The mintage in silver is just 126 pieces, high quality examples such as this particularly appealing to both so-called dollar specialists and U.S. Mint medal collectors. The present example is an important survivor that ranks as the sole finest graded by PCGS. This represents it's first public offering and it will surely generate tremendous excitement among bidders.

This specimen was awarded to Joshua Rufus Nichols, a pivotal figure in the development of the American railway system in

the mid-to-late 19th century. Born in 1831 in Upstate New York, Nichols worked at the Chicago, Burlington, and Quincy Railroad in Chicago from 1854 until 1869, when he then began working as the Assistant Superintendent of the Union Pacific Railroad in Omaha, Nebraska. It was presumably during his time with the Union Pacific Railroad that he was awarded this historic medal. It was obviously well cherished and cared for and it is among the very finest known survivors.

This lot includes the original leather slipcase and box for the medal, the outside of both with the name J.R. NICHOLS. printed in gold lettering. Both are fully functional, although the slipcase is a bit tattered around its edges, the lid and base also a bit loose at their fittings. (Total: 1 medal; 1 slipcase and box combination).

PCGS# 642038

PCGS Population: 1; none finer.

Ex Joshua Rufus Nichols. Never before offered publicly.

1065

1869 Pacific Railway Completion Medal. By William Barber. HK-12a, Julian CM-39. Rarity-6. Silver. MS-61 (NGC). Rarely do we have the opportunity to present two silver impressions of this scarce type in the same sale. The present example retains full mint brilliance

in the fields that supports smartly impressed, sharply defined motifs. Minimally toned, the generally bright silver surfaces are a bit glossy with wispy hairlines to explain the MS-61 numeric grade from NGC.

1066

1896 Bryan Dollar. HK-780, Schornstein-6. Rarity-5. Silver. MS-62 (PCGS). 52 mm. An outstandingly original Choice Mint State example of a popular Bryan dollar type. Quite a bit finer than typically seen and sure to be of interest to advanced collectors.

AVIATION AND SPACE

The Harris and Wendy Lefkon Collection is an extensive cabinet of aviation medals, awards and related material that spans from the pioneering days of aviation to the explosion of commercial airlines. The portion presented here comprises items honoring two of the most famous aviators of all time, both of whom are celebrated for immense bravery and great accomplishments. The first lot, the "Holy Grail" of matchbook covers, honors Charles Lindbergh's nonstop crossing of the

Atlantic Ocean from New York City to Paris in 1927, an astounding feat in its day. Then follow 16 medals and awards presented to astronaut Edwin "Buzz" Aldrin, the second person to walk on the Moon's surface. A delightful variety is offered, with items both domestic and foreign in gold, silver, and bronze, allowing collectors of all types to bring a piece of space history home.

1067

1927 Captain Charles A. Lindbergh Matchbook Cover. From June 14th Dinner in New York City. Fine—Struck. 38 x 123 mm cardstock. Printed in blue, black and gold ink on white cardstock. Obv: a profile of the young Lindbergh with short, curly hair and black coat framed by gold and blue frame, SAFETY FIRST CLOSE COVER BEFORE / STRIKING MATCH below. Rev: DINNER / TO / CAPT. CHAS. A. / LINDBERGH / →★ — / NEW YORK CITY / —★ — / TUESDAY / JUNE 14th 1927 printed in gold with blue, black and gold border, LION MATCH Co NEW YORK below.

The striker shows signs of being struck by a few matches, and creases in the paper are noted in multiple areas, though Lindbergh's portrait remains largely unaffected by these. Staple holes where matches were once secured are noted and confirm the cover was indeed used in circulation. The backside of the cover reveals a small area of paper loss (on the opposite side of NEW YORK CITY from the reverse), this from presumably being glued in a scrapbook at one time. Fortunately this damage is absolutely undetectable from the front-facing side.

The Lindbergh matchbook cover has been considered the Holy Grail of covers among phillumenists (persons who engage in the hobby of collecting matchbooks, matchboxes and other associated material). It's rarity has long been recognized, but interest began to really grow in 1970 when one reached the then record price of \$160 at auction. By 1991 one had sold for \$4,000 which held the record until 2015 when one was auctioned for \$6,000. That remains the record holder for highest price paid for a matchbook cover and it is listed in *The Guinness Book of World Records*. In 2011, 11 examples were traced. This example could be a newcomer and the total number known may be higher today, but demand remains strong and most collectors have never even seen an example. As such, we anticipate strong demand and vigorous competition.

In May 1927 Captain Charles Augustus Lindbergh won the Orteig prize for being the first aviator to fly non-stop from New York City to Paris. He accomplished the 3,600 mile flight in 33 1/2 hours and found success where many others had failed and even lost their lives. He arrived in Paris to a crowd of an estimated 150,000 people and was immediately launched into worldwide fame. After a brief tour in Europe he returned back to the United States on June 11th and was awarded The Distinguished Flying Cross by President Calvin Coolidge. He flew from Washington D.C. to New York City on June 13th where he participated in a tickertape parade along the Canyon of Heroes. On June 14th he was honored with a grand banquet attended by 3,700 people, the occasion for which the matchbook we offer here was printed. Soon after, Lindbergh was promoted to the rank of Colonel and awarded the Medal of Honor by President Coolidge. In January of 1928 he was honored by *Time* magazine as their first Man of the Year (now Person of the Year).

1969 Honorary Citizen of Chicago Award Medal. Bronze. Awarded to Astronaut Edwin E. Aldrin Jr. Mint State. 76 mm. Obv: The Chicago Corporate Seal consisting of a shield (American) with a sheaf of wheat on its center; a ship in full sail on the right; a sleeping infant on the top; a Native American with bow and arrow on the left; and with the motto URBS IN HORTO at the bottom of the shield, with the inscription CITY OF CHICAGO /-INCORPORATED 4TH MARCH 1837 - around the outside edge of the seal. Rev: HONORARY CITIZEN / OF / CHICAGO at top, signature of Richard J. Daley / MAYOR at bottom in raised lettering; TO ASTRONAUT EDWIN E. ALDRIN JR. / IN APPRECIATION / FROM CITY OF CHICAGO / AUGUST 13, 1969 engraved at center,

Edge: plain

Housed in a black leatherette clamshell case with simple gilt decoration. The interior is black plush and white silk and is unmarked.

A blue paper sticker affixed to the top of the box identifies this as LOT NO. / AD0070 / PIECE NO. / 012

August 13th, 1969 was a busy day for the Apollo 11 astronauts who participated in a massive tickertape parade in New York City in the morning, then after a flight on Air Force One participated in another tickertape parade in Chicago. Two million people turned out in Chicago's downtown to see the Apollo 11 astronauts. At the Civic Center Plaza (now Daley Plaza), Mayor Richard J. Daley welcomed them along with a crowd estimated at 100,000 to present them with medals making them honorary citizens of Chicago. Before the day was finished, they were back on Air Force One to be hosted at a state dinner in Los Angeles with President Richard Nixon. Chicago Tribune press photos exist of the moment when Mayor Daley awarded these medals to the astronauts, the boxes identical to that which we offer here.

"Buzz" Aldrin saluting the American flag he placed on the Moon. (NASA image)

Remarkable Gold Medallic Art Company Commemorative Medal Awarded to Edwin E. Aldrin

1069

1969 Apollo 11 Commemorative Moon Landing Medal. By Medallic Art Company. Gold. Awarded to Edwin E. Aldrin. Mint State. 63 mm, .585 fine. 170.8 grams, 99.9 grams AGW. Obv: Busts of Collins, Armstrong and Aldrin at center with Nasa logo between them, ARMSTRONG / COLLINS / ALDRIN near the busts; 11 / APOLLO below. Rev: Armstrong, Aldrin and the Apollo Lunar Module Eagle on the surface of the Moon, the Earth in the background; MAN'S / FIRST / LUNAR / LANDING / JULY 20-21 / 1969 in the right field. Edge: MEDALLIC ART CO. NY 14K.

Lustrous golden surfaces are virtually pristine, and the high relief devices fully present exacting details. Housed in a cabinet style blue leather box with gilt decoration and with a functional latch. A stand on the reverse pops out and acts as an easel. The front of the case reads EDWIN E. ALDRIN in gilt lettering and the reverse MEDALLIC ART CO. / NEW YORK. The interior is red plush and white silk and is unmarked.

Though we are unaware of the specific ceremony in which this medal was awarded to Aldrin, there is no doubt this was a special presentation piece. The case references Aldrin, and the gold composition is clearly something special. Designed by Ralph J. Menconi, the Medallic Art Company manufactured these medals in sterling silver (limited to 10,000 pieces) and bronze (open edition) and both are easily obtainable on the secondary market today. We have never encountered one in gold, however, and have unable to locate any other examples though we strongly suspect identical examples were awarded to Armstrong and Collins.

France. 1969 City of Paris Grand Vermeil Medal. Gilt Silver. Awarded to Edwin Aldrin. Mint State. 63 mm, .925 fine. 132.3 grams, 122.4 grams ASW. Obv: FLUCTUAT NEC MERGITUR around, Paris coat of arms at center. Signed M. DELANNEY at periphery at 4:30. Rev: VILLE DE PARIS above; PARIS / A / EDWIN / ALDRIN / 1969 engraved at center. Edge: (cornucopia) 1 ARGENT.

Beautifully preserved, there are only a few tiny specks where gilding has been lost, these primarily confined to the unseen edge. Otherwise, essentially as issued. Housed in a red leather case with functional spring closure and with gilt Paris coat of arms at top center. The interior is red plush and silk with no markings.

Paris was the seventh city of the Apollo 11 astronauts "Giant Step" world tour, and the second European city in a hectic schedule. Like in other cities, numerous individuals and reporters were ready to see the men and the city was abuzz with excitement. The astronauts met with the Prime Minister and were awarded the honor on October 8th, 1969.

The Medal of the City of Paris, Grand Vermeil, was created in 1911 to recognize individuals or groups. It is considered to be Paris' most prestigious honor and has been presented to a variety of cultural and political figures. It comes in bronze, silver, large silver, and the highest level, vermeil (as here).

From the Wendy and Harris Lefkon Collection.

1071

France. 1969 Les Vieilles Tiges Old Stems Gold Medal. Bronze. Awarded to Edwin Aldrin. Mint State. 67 mm. Obv: POUR SERVICES RENDUS A L'AERONAUTIQUE / LES VIELLES TIGES around, (early biplane) at center, signed (flower), D'APRLS P. LENGELLE at 4 o'clock on periphery. Rev: EDWIN ALDRIN engraved in triangular shaped field with rounded corners; an aerial profile of a plane below. Edge: 1969 (cornucopia) BRONZE.

Bright yellow bronze surfaces with a few inconsequential handling marks in the obverse field below the plane. Housed in a blue leather case with functional spring closure. The interior is blue plush and blue silk and is marked MONNAIE DE PARIS.

Les Vieilles Tiges is a French association recognized as being of public utility on August 25, 1926. It was founded by pioneers in the service of the French Air Force who retained nostalgia for the heroism displayed in the Great War.

Italy. 1969 Mayor of Rome Medal. Silver. Awarded to Edwin E. Aldrin. Mint State. 61 mm, .986 fine. 89.9 grams, 88.6 grams ASW. Obv: Michelangelo's "Campidoglio" at center, ROMA COMMVNIS PATRIA / —(flower)— / EQ . I . BIANCHI . S . below. Rev: IL SINDACO DI ROMA / CLELIO DARIDA / A / EDWIN E. ALDRIN / INTREPIDA ASTRONAUTA / DELLA / MISSIONE APOLLO 11 / PRIMO UOMO SULLA LUNA / CAMPIOGLIO. 15 OTTOBRE 1969 engraved in an otherwise plain field. Hallmarked 986 at 6 o'clock of reverse. Edge: plain.

Pleasing antique silver surfaces with no handling marks of any kind noted. Housed in a blue leather case with spring closure, a gilt SPQR with shield on top. The interior is blue plush and cream silk with no markings.

Interestingly, Neil Armstrong's version of this exact medal sold in 2018 for \$1625 but without the original case.

Astronaut Edwin E. Aldrin on the Moon, photo taken by commander Neil Armstrong. (NASA image)

Impressive Gold Medal Gifted by Pope Paul VI to Edwin Aldrin

1073

Italy. 1969 Pontifical Academy of Sciences Pius XI Medal. By Aurelio Miztruzzi. Gold. Gifted to Edwin Aldrin by Pope Paul VI. Mint State. 70 mm, .917 fine. 215.8 grams, 197.8 grams AGW. Obv: Left facing bust of Pius XI at center, PIVS . XI . PONTIFEX . MAXIMVS . FVNDATOR around, signed MISTRVZZI to the right of the bust. Rev: PONTIFICIA . ACADEMIA . SCIENTIARVM around periphery, a simple wreath within, PAULUS PP. VI / EDVINO ALDRIN / DONO DEDIT / A.D. MCMLXIX in raised letting at center, hallmarked (?)917 at 6 o'clock. Edge: plain.

Beautiful, bright golden surfaces are expertly preserved and satiny smooth. Housed in a cream leather case with functional spring clasp and gilt papal seal at top. The matching plush and silk interior is unmarked.

Contemporary accounts of Pope Paul VI describe him as being especially interested in space travel. He, along with millions of others throughout the world on July 29th, 1969 watched

on television as the astronauts first landed and walked on the moon. A few minutes after landing, he sent them a message of blessing, salutations and honor. He also sent a special blessing with other world leaders on a silicon disc that was left on the Moon's surface. When the astronauts and their wives were granted an audience with Pope Paul VI on October 16th of 1969 as part of the Giant Step tour, he presented them with multiple gifts and medals. Interestingly, this one, a Pius XI award, is not listed as an official award to Aldrin from the Pontifical Academy of Sciences and instead appears to be a personal gift from Pope Paul VI himself. The words "dono dedit" (as a gift) allude to this. None of the other Pius XI medals we have researched contain such language. As such, this medal is one of a highly personal nature from the head of the Catholic church to one of the most famous astronauts of all time. We anticipate aggressive competition among collectors when it crosses the block so be prepared with only the strongest of bids.

Desirable Art Medal in Gold Awarded to "Buzz" Aldrin

1074

Italy. 1969 Cocepa / Il Tempo Commemorative Moon Landing Medal. Awarded to Edwin Aldrin. Gold. Mint State. 60 mm, .900 fine. 100 grams, 90 grams AGW. Obv: profile of human at center superimposed over Moon at top shining light down, EARTH . MOON . EARTH at bottom half of periphery, 1969 in right field. Rev: an astronaut descends the ladder of the Lunar Module "Eagle" and prepares to step foot on the Moon, 100 GR. / GOLD superimposed over the scene, hallmarked 38 AMI 900 at 6 o'clock. Edge: reeded.

Beautiful even gold surfaces with reflective fields and no marks of consequence. Housed in a blue leather case with snap closure and gilt decoration of the medal obverse on the case. The interior is in matching plush with gilt letting inside: COCEPA - TEMPO / A EDWIN ALDRIN.

This medal appears to have been given to Buzz Aldrin in collaboration by the medalist Cocepa and the Roman newspaper Il Tempo (Time). Similar, smaller medals and in lesser compositions were made by Cocepa for this and subsequent Apollo missions for private collectors, though we haven't been able to locate any others in this size and composition. With an attractive and artistic design and a special connection to Edwin Aldrin, there is much to recommend to space memorabilia collectors in this lot.

 $From \ the \ Wendy \ and \ Harris \ Lefkon \ Collection.$

Astronaut Edwin Aldrin, Jr. at the Lunar Lander. (Neil Armstrong/NASA image)

Attractive Italian Art Medal in Gold

1075

Italy. 1969 Euronummus Milan Apollo 11 Commemorative Medallion. Gold. Awarded to Edwin E. Aldrin Jr by the Tourist Bureau in Silvino, Italy. Mint State. 40 mm. .900 fine. 34.9 grams. 31.4 grams AGW. Obv: forward facing busts of Armstrong, Collins and Aldrin at center; (star) (star) (star) at top; N. ARMSTRONG . M. COLLINS . E. ALDRIN at bottom. Rev: Armstrong and Aldrin on the surface of the moon collecting specimens, .. APOLLO 11 . LEM .. LA GRANDE CONQUISTA .. / 20 - 7- 1969 above; I PRIMI UOMINI SULLA LUNA at bottom. Hallmarked on Moon's surface 284M and 900 in separate hexagon frames. Edge: Reeded.

A tiny rim bump is noted on the reverse at 6 o'clock, but the medallion is as-issued otherwise. Housed in a blue leather case with a functional clasp and blue plush and white silk interior. Inside the case is a brass plaque that reads A RICORDO / PRIMA EXPLORARIONE UMANA DELL LUNA / L' AZIENDA DI SOGGIORNO E / IL COMUNE DI SELVINO / OFFRONO A / EDWIN E. ALDRIN JR. while the white silk background has ALBERTI S.R.L. / MILANO imprinted in gold.

Accompanied by a photocopy of an unclassified Department of the State Airgram indicating that the American consulate in Milan accepted three gold medallions on behalf of the Apollo 11 astronauts from the President of the Tourist Bureau in Selvino, a resort village about 80 miles north-west of Milan.

From the Wendy and Harris Lefkon Collection.

1076

Italy. (ca. 1969) Grand Orient of Italy Award Medal. Gold. Awarded to Bro. Edwin (Buzz) Aldrin. Mint State. 32 mm, .750 fine. 14.8 grams, 11.1 grams AGW. Obv: seal of the grand orient of Italy, a radiant sun shining down on several masonic symbols, framed by the legend GRANDE ORIENTE D'ITALIA AN:.V:.L:.5805 around and a periphery of 28 stars around the legend. Rev: engraved TO BRO. EDWIN / (BUZZ) ALDRIN / FIRST MASON / ON THE MOON, hallmarked 750 and 195111 at 6 o'clock. Edge: plain.

Housed in an emerald green leather case with functional spring clasp. The interior is plush emerald green and gold silk with no markings within. Affixed to the top of the case is a sticker from a past auction, denoting it as LOT NO. / AD0070 / PIECE NO. / 050.

The Grand Order of Italy is an Italian Masonic Grand Lodge founded in 1805 which remains in existence today.

While astronaut Neil Armstrong bears the title of the first man to set foot on the Moon, many individuals celebrate Aldrin as being the first mason to do so. Though the distinction may seem immaterial to the uninitiated, it is a point of pride among freemasons still today. For Aldrin, freemasonry was an important component of his life. He was a member of Montclair Lodge (144) in New Jersey, and later moved to Clear Lake Lodge (1417) in Seabrook, Texas. Aldrin also reached the 33rd degree of the Ancient and Accepted Scottish Rite of the Southern Jurisdiction of the United States, of which he took the insignia with him on board the spacecraft, claiming for the Moon the masonic jurisdiction of the Grand Lodge of Texas.

Mexico. 1969 Advisory Council of Mexico City, Mexico Medal. Bronze. Awarded to Mr. Edwin E Aldrin. About Uncirculated. 40 mm (medal only), 120 mm total length with ribbon and hanger. Obv: enameled Mexico City coat of arms at center, CONSEJO CONSULTIVO / DE LA / CIUDAD DE MEXICO Y DEL D.F. around. Rev: AL SENOR / EDWIN E. ALDRIN / HEROE DEL ESPACIO. / LA CIUDAD DE MEXICO. / 29 - IX - 1969. Edge: plain. Suspended by a green, white and red grosgrain ribbon from a pinback suspension bar with a Mexican golden eagle devouring a rattlesnake atop a bar of blue enamel and gold lettering reading HUESPED DE HONOR. The back of the bar is unmarked.

A fair amount of enamel loss is noted on the Mexico City coat of arms, but this is primarily limited to the yellow color, most of which has chipped away. A tiny enamel chip is also noted in the blue background on the suspension bar at the top left corner. With very limited handling marks seen otherwise, we suspect the enamel loss is a result of manufacturing flaws vs. careless handling. Housed in a black leather clamshell case with a seemingly original paper card taped to the top with the name EDWIN E. ALDRIN typed onto it. The interior is plush black and white silk with a golden seal of Mexico printed on the white silk.

Mexico City was the first city of a worldwide Giant Leap goodwill tour for the Apollo 11 astronauts for which President Nixon supplied Air Force 2 to be at their disposal. The men, donning sombreros and ponchos, were eagerly greeted by thousands of Mexicans lining the streets in a parade. The chaotic scene would be repeated again and again over the next 38 days as they visited an additional 21 countries and met with numerous world leaders.

Spain. 1969 Institute of North American Studies in Barcelona John F. Kennedy Award. Silver. Awarded to Edwin E. Aldrin Jr. Mint State. 39 mm, .900 fine. 17.6 grams. 15.8 grams ASW. Obv: JOHN F. KENNEDY AWARD / 1965 around periphery, left facing bust of Kennedy at center. Rev: INSTITUTO DE ESTUDIOS NORTEAMERICANOS / BARCELONA around periphery; EDWIN E. / ALDRIN JR. / 1969 engraved at center. Edge: plain.

Composed of two shells, the award is hollow in the center, but the seam is well concealed. Housed in a red leather case with spring closure. The interior is plush black and white silk with gilt lettering in interior of case reads: CAPDEVILA / VIA LAYETANA 129 / VIA AGUSTA 80 / BARCELONA

The Institute of North American Studies was created from the dream of two friends in 1951 as a private not-for-profit association which sought to foster cultural exchange between Catalonia and the United States of America. The John F. Kennedy award is "given annually and alternately to a Spaniard and an American, who has made a distinguished contribution in a field of human endeavor... the arts, public service, international relations or science-reflecting the precepts and ideals of the late President." The astronauts and their wives were received in Madrid, Spain on October 7th as part of their larger world tour, and presumably this award was given to them on or near that date.

From the Wendy and Harris Lefkon Collection.

1079

United Kingdom. 1969 Air League of the United Kingdom Founders' Medal. Gilt Silver. Awarded to Astronaut Edwin Aldrin. Mint State. 57 mm, .925 fine. 85.1 grams. 78.7 gams ASW. Obv: AIR LEAGUE FOUNDERS' MEDAL around periphery, Hermes holding caduceus at center. Rev: AWARDED IN / 1969 / TO THE UNITED STATES / ASTRONAUT / EDWIN ALDRIN / FOR HIS PART / IN THE FIRST LANDING / ON THE MOON neatly engraved. Edge: ENDOWED BY STEPHEN MARPLES CO-FOUNDER AND 1ST SECRETARY.

Very slight loss of gilt is noted at the extreme peripheries and is easiest to see at 9:30 on the reverse. It is essentially as-made otherwise. Housed in a blue leather clamshell case with simple decoration in gilt and functional spring clasp. The interior is blue plush and white silk with JOHN PINCHES / LONDON printed on the silk.

The Air League is the United Kingdom's leading aviation and aerospace charity with a vision focused on changing lives through aviation. Established in 1960, the Air League Founders' medal is awarded "For the most meritorious achievement in the whole field of British aviation or reaching its culmination during the calendar year under review." The award was the gift of the late Mr. Stephen Marples, co-founder of the Air League with Colonel H S Massy in 1909. Though the website for the club states these medals are struck in hallmarked silver-gilt by Spink and Son, the present medal is missing such hallmarks, the only clue to manufacturer being the name listed inside the case, John Pinches.

United Kingdom. 1969 The Royal Aero Club of the United Kingdom Gold Medal. Gold. Awarded to Edwin Aldrin. Mint State. 38 mm, .375 fine. 30.4 grams, 11.4 grams AGW. Obv: Hermes at the summit of a mountain, his caduceus on the ground, seemingly ready to leap off and take flight at center; eight pairs of wings at the periphery. Rev: THE / ROYAL AERO CLUB / EDWIN ALDRIN / 1969 at center within a simple wreath with a crown at 12 o'clock. Hallmarked at the bottom, JP 9 .375 O (illegible). Interestingly, the hallmarks were applied to the planchet before the medal was struck, causing the hallmarks to be squished in and at a lower relief than one would normally expect. Edge: Plain.

As-issued with no handling marks of any consequence and attractive reflective fields. Housed in a burgundy leather case with gilt decorations and spring closure. The interior is plush burgundy and white silk with no markings.

The Aero Club was founded in 1909 and was granted the Royal prefix in 1910. Though it's activities and structure have changed over the years, it continues to be the national governing and coordinating body of air sport and recreational flying in the United Kingdom. The gold medal is awarded for outstanding achievement in aviation, a distinction the Moon landing surely qualifies for.

From the Wendy and Harris Lefkon Collection.

(Photo Reduced)

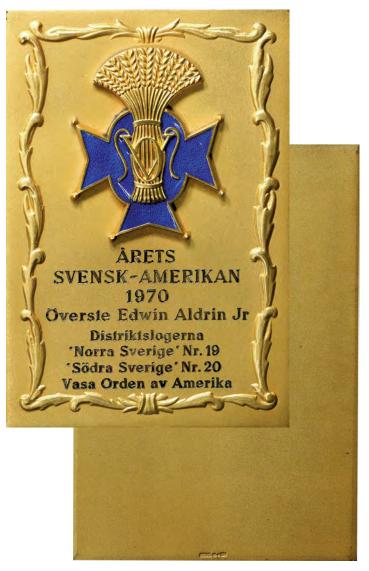

1081

1970 Office of Strategic Services Society William J. Donovan Award. Cast Bronze. Awarded to Colonel Edwin E. Aldrin, Jr. Mint State. 118 mm. Obv: GEN'L WILLIAM J. DONOVAN around, Left facing bust of General Donovan in his military dress uniform at center; signed G. PROCTOR at 4:30 on the periphery. Rev: AWARDED / TO / COLONEL / EDWIN . E. ALDRIN . JR. / APOLLO 11 ASTRONAUT / 1970 / BY THE / VETERANS OF OSS / circle enclosing an eagle and VETERANS / OSS below. Edge: plain.

Lovely chocolate brown surfaces with good luster and an impressively artistic high relief obverse. Housed in a black leather case with two functional closures to keep the substantially heavy medal securely enclosed. The interior is plush black and black silk with COL.

EDWIN E. ALDRIN JR. printed in silver letting on the silk. A sticker atop the case reads LOT NO. / AD0070 / PIECE NO. / 098 indicating it was once in another auction.

The Donovan Award was created by the OSS Society, which was founded by Donovan in 1947. The award is presented to "someone who has exemplified the distinguishing features that characterized General Donovan's lifetime of public service to the United of States of America as a citizen and a soldier". OSS records online indicate that each of the Apollo 11 crew members were awarded a medal in 1970. Other awardees over the years include Margaret Thatcher and multiple U.S. Presidents.

1970 Vasa Order of America, Swedish-American of the Year Award Plaque. Gilt Silver. Awarded to Colonel Edwin Aldrin Jr. Mint State. 76 x 111 mm rectangular plaque, .800 fine. 308.6 grams, 246.8 grams ASW. Obv: stylized border with Vasa Order of America coat of arms at top with enameled blue cross; ARETS / SVENSK - AMERIKAN / 1970 / OVERSTE EDWIN ALDRIN JR / DISTRIKTSLOGERNA / "NORRA SVERIGE" NR. 19 / "SODRA SVERIGE" Nr. 20 / VASA ORDEN AV AMERIKA engraved below. Rev: hallmarked at the bottom center LFA, stylized M (for Malmberget), triple crowns within cat's paw frame, S (indicating silver at minimum .800 fineness), U9 (date code for 1970). Edge: plain.

Very slight loss of gilt is noted at the corner tips, but the plaque is otherwise pristine. Within the engraved letters, colorful rainbow toning has developed, a pleasant surprise. Housed in a blue grosgrain paper covered case with functional spring clasp. The interior is plush blue and white silk with no markings. The Vasa Order of America is an organization founded in the United States in the late 19th century by Swedish emigrants. It initially functioned as an aid organization for Swedish emigrants. The Order has active lodges in the USA, Canada and Sweden and since 1960 has selected a prominent American citizen of Swedish birth or descent to become Swedish-American of the Year.

From the Wendy and Harris Lefkon Collection.

1083

1973 National Father Marquette Tercentenary Commission Medal. Struck by the Philadelphia Mint. Silver. Awarded to Edwin E. Aldrin Jr. Mint State. 33.5 mm, .900 fine. 20.0 grams, 18.0 grams ASW. Obv: PERE JACQUES MARQUETTE / MISSIONARY AND EXPOLORER around, Father Jacques Marquette and fur trader Louis Joliet with Native guide in canoe at center, 1668 / 1773 / P under the canoe indicating the medal was struck at the Philadelphia Mint. Rev: 1968 TERCENTENNIAL 1973 / EXPLORATIONS OF MARQUETTE around, map of interior of the United States and route of exploration along the Mississippi river at center. Edge: plain.

Attractive and original lustrous surfaces with gold and deep pink toning noted on the reverse periphery and edge. Housed in a plush blue clamshell case with plush blue and cream silk interior. A plaque inside the case reads: NATIONAL FATHER MARQUETTE / TERCENTENARY COMISSION MEDAL / AWARDED TO / EDWIN E. ALDRIN. JR. / NOVEMBER 8, 1969 - MILWUKEE, WISCONSIN.

In September 1965, the U.S. Congress established the Father Marquette Tercentenary Commission to commemorate the 300th anniversary of Jacques Marquette's explorations of the northern Great Lakes and Mississippi River Valley. The commission granted a five year period, 1968-1973, to honor Marquette. The commission authorized multiple events including the composition of a symphony, a symposium, and the awarding of Marquette University's first Pere Marquette Discovery Medals to the Apollo 11 astronauts at the Discovery award dinner on November 8, 1969. Along with the Discovery medals, Tercentenary Commission medals (as here) were also awarded to the three astronauts. In speaking of the awards, President John P. Raynor said "Like Father Marquette, the Apollo 11 astronauts share in full measure the qualities which distinguish all great explorers - a questing spirit, uniqueness in deed and a consuming dedication to the betterment of civilization."

Even apart from the obvious appeal of being an Aldrin-awarded medal, these rarely seen Philadelphia Mint issues appeal to Mint medal collectors as well. Struck in both silver and bronze, both are quite tough to find. This is the first example we can recall handling in any composition.

HARD TIMES TOKENS

SUTLER TOKENS

1084

Great Britain—Middlesex. Undated (1790s) Am I Not a Man and a Brother Political Token. D&H-235. Gilt. Plain Edge. MS-62 PL (NGC). 33 mm. While we have been offering increasing numbers of British political tokens with this basic obverse type in our sales — due to their association by subject with the popular HT-81 Hard Times tokens — this is the first gilt specimen that we can recall handling. It is a bright medium gold example with a prooflike finish and sharply executed strike. Intriguing, and undoubtedly rare in this fabric.

1085

1838 Beehive. HT-83, Low-194, W-Unlisted. Rarity-4. Brass. Plain Edge. MS-62 (NGC). 28.4 mm. Mottled overtones of rose-russet and steel-blue enliven a base of deep autumn-brown patina. Direct lighting calls forth underlying brassy-gold color, as well as faint traces of semi-reflective tendencies in isolated field areas. The strike is sharply executed with most features full.

1086

New York—New York. Undated (1829-1833) John Barker. HT-230, Low-338, W-NY-260-10b, Musante GW-124, Baker-511. Rarity-7. Brass. Plain Edge. MS-63 (NGC). 19 mm. Pierced for suspension. The reverse is rotated slightly more than 90 degrees counterclockwise from medallic alignment. Beautiful brassy-olive surfaces exhibit mottled steely-russet overtones on the reverse. Sharply struck with an impressive satin to modestly semi-reflective finish from the dies. This elusive type is unplated in the 2004 edition of the Rulau reference on U.S. tokens. While John Ford had three examples, the finest was certified EF-45 by NGC at the time of our August 2013 sale, and the other two were impaired EFs. This is the finest and only Mint State specimen that we can ever recall handling, and it comes highly recommended for inclusion in an advanced Hard Times token collection or Washingtoniana cabinet.

Rarely Offered C.H Smith Token

1087

United States. 117th United States Colored Troops. Undated (1861-1865) C.H. Smith. 5 Cents. Schenkman US-117-5B (NL-W5B), W-CI-140-005b. Rarity-9. Brass. Plain Edge. AU-50 (NGC). 23 mm. With blushes of reddish-russet and steel-olive patina to a base of deep brassy-gold color. All denominations from this sutler are rare and, indeed, this is our first offering for a C.H. Smith token that we can recall. An exciting opportunity for the advanced specialist that deserves serious consideration.

LATE 19TH AND 20TH CENTURY TOKENS

1088

Georgia—Atlanta. 1895 Atlanta. Silver. Plain Edge. AU-53 (PCGS). 22 mm. Originally and attractively toned in a mix of steel and dovegray, this is a boldly defined and appreciably lustrous AU example. Tokens of this type were issued in connection with the 1895 Cotton States Exposition. Rare.

HOBO NICKELS

1089

(Undated) Man with Beard, Hat and Collar. By George Washington "Bo" Hughes. Host Coin About Uncirculated. This is an above average to superior carving on a Type II Buffalo nickel with considerable fine detail to the beard. The obverse is lightly toned in golden-gray, while the reverse displays a bit bolder patina with powder blue, pale gold, and faint rose overtones. It is a significant and highly desirable piece that is sure to appeal to advanced Hobo nickel enthusiasts.

George Washington "Bo" Hughes was born around 1900 and was the son of a freed enslaved man. He became a prolific carver after learning the craft from his friend and mentor Bertram "Bert" Wiegand. Today, the hobo nickels from "Bo" and "Bert" remain some of the most collectible and in demand.

Housed in a 2x2 with the signature of Bill Fivaz and the note of "ORIGINAL "BO" HOBO 5C" at top.

1090

(Undated) Man with Hat and Collar. By Bertram "Bert" Wiegand. Host Coin Very Fine. A finely executed portrait on a Type II Buffalo nickel with a simple banded hat and charming wavy hair. "Signed" Bert by removing the LI and Y of LIBERTY. Pretty rose and powder blue toning dominate both sides, though the rose color really makes a statement on the reverse. A real find for collectors, hobo nickels attributed to Bert are quite a bit rarer than those from his student "Bo" whose style closely mimics his.

Wiegand was born around 1890 and is well-known for his exceptionally detailed carvings. It is known he spent time incarcerated where he continued to carve and he was last tracked in the 1940s selling hobo nickels at flea markets.

Housed in a cardboard 2x2 with Bill Fivaz's signature and the note ORIGINAL "BERT" HOBO 5C at top.

Numismatic & Other Antiques

1091

Ornate Snuff Box Fashioned in part out of an 1885 Liberty Head Eagle. Gold. About Uncirculated. 29 mm x 14.5 mm closed, 33.5 mm x 38 mm open. 547.2 grains, 14 karat. The \$10 gold coin has been fit into the lid of the circular box, the exterior of which exhibits an ornate rippled design. Fully functional with only light handling marks and no significant blemishes. Likely a late 19th or early 20th century production, although with no date apart from that on the coin. There is also no manufacturer's name, so this is probably a custom-made item. Very nice!

COLONIAL COINS AND RELATED

Pleasing Noe-8 Pine Tree Shilling

1092

1652 Pine Tree Shilling. Large Planchet. Noe-8, Salmon 7-E, W-740. Rarity-4. Ligatured NE In Legend. EF-40 (NGC). 68.6 grains. Generally well struck on an irregular ovoid planchet with a somewhat ragged clip centered on 5:30 relative to the obverse. All major design elements are present, and all are bold except for the second letter A in MASATHVSETS, which is soft, yet still

fully discernible. Light pearl-gray overall with iridescent goldenrusset highlights flashing into view as the coin rotates under a light. There are no sizeable marks, although faint hairlines and a touch of glossiness to the texture are noted for accuracy. Struck from an early state of the Noe-8 dies without the massive reverse break at the letters GL in ENGLAND.

PCGS# 45373. NGC ID: 2ARY.

Nice Choice Fine Noe-30 Pine Tree Shilling

1093

1652 Pine Tree Shilling. Small Planchet. Noe-30, Salmon 12-G, W-935. Rarity-3. Fine-15 (PCGS). 66.51 grains. Struck off center, a typical feature for this die pairing, the upper left design elements on both the obverse and reverse are off the flan. Areas of softness due to uneven wear are also noted for the

upper left obverse and upper right reverse. For those features that are present we note generally bold Fine detail, the surfaces smooth in hand and attractively original in dove-gray patina. All in all, an appealing circulated example of both the type and die marriage.

PCGS# 24. NGC ID: 2ARZ.

1773 Virginia Halfpenny. Newman 4-G, W-1460. Rarity-3. No Period After GEORGIVS, 7 Harp Strings. MS-62 BN (PCGS). 124.4 grains. Handsome reddish chocolate-brown surfaces are satiny smooth and show no distracting marks or spots. Nicely struck, particularly so on the reverse where the boldly defined design is framed by a full border of dentils. A high quality Mint State example of this significant colonial type.

PCGS# 243. NGC ID: 2ATL.

1095

1773 Virginia Halfpenny. Newman 4-P, W-1475. Rarity-5. No Period After GEORGIVS, 7 Harp Strings. MS-62 BN (PCGS). 111.4 grains. An appealing piece with nicely lustrous surfaces that display an attractive patina of medium brown with light olive accents. Well struck from an interesting late state of the dies showing numerous die chips on the obverse and bold clashmarks on the reverse. Premium quality surfaces and eye appeal at the MS-62 grade level. A scarce die variety of the overall less common No Period type.

PCGS# 243

From The San Diego Show, Inc.'s A Classic Collectors Sale auction, January 1988, lot 357.

1096

1773 Virginia Halfpenny. Newman 25-M, W-1580. Rarity-2. Period After GEORGIVS, 7 Harp Strings. MS-63 RB (PCGS). Abundant light rose color remains to surfaces that are minimally toned in pale brown. Satiny to semi-reflective in finish with a nicely executed strike that is bold to sharp throughout the design. An excellent Mint State representative of this classic Colonial era type.

PCGS# 241. NGC ID: 2ATK.

1097

1773 Virginia Halfpenny. Newman 27-J, W-1585. Rarity-2. Period After GEORGIVS, 7 Harp Strings. MS-63 BN (PCGS). 115.2 grains. A crisply struck, lustrous piece with more than a little mint red remaining, mostly on the obverse. Otherwise toned to a nice chocolate-brown and the surfaces possess a fresh, satiny appearance. Thanks to the Cohen hoard, a cache of Mint State Virginia halfpennies turned up by Baltimore numismatist Col. Mendel I. Cohen in the 1870s, collectors today have a relative abundance of high grade examples of this historic type from which to choose.

PCGS# 240. NGC ID: 2ATK.

From The San Diego Show, Inc.'s A Classic Collectors Sale auction, January 1988, lot 356.

1098

1773 Virginia Halfpenny. Newman 27-J, W-1585. Rarity-2. Period After GEORGIVS, 7 Harp Strings. MS-63 BN (PCGS). 127.8 grains. A nicely struck and well centered piece with frosty medium brown surfaces enlivened by flashes of mint red in protected areas and slightly reflective luster. Only a few trivial spots and microscopic abrasions can be found under close scrutiny. Excellent overall quality, clearly above average for the grade level.

PCGS# 240. NGC ID: 2ATK.

From The San Diego Show Inc.'s A Classic Collectors Sale auction, January 1988, lot 355.

Phenomenal 1721-B French Colonies 9 Deniers

1099

1721-B Sou, or 9 Deniers. Rouen Mint. Martin 1.1-A.1, W-11825. Rarity-4. AU-50 (PCGS). Offered is the nicest 1721-B 9 deniers that your cataloger (JLA) has handled in a professional numismatic career spanning more than two decades. It is a sharp early striking from Martin's 1.1-A.1 die pairing without the obverse break above the letter E in NOMEN or the massive reverse break through the center. Detail is universally crisp with most design elements fully rendered. The surfaces are satiny in texture with excellent gloss, and they are devoid of all but a few trivial handling marks that are easily overlooked. Similarly insignificant are shallow obverse flan flaws that meander through the lower right base of the crown and bisect the letter D in DOM. Otherwise autumn-brown in color, splashes of steel-olive toning at the right reverse and throughout the upper field on that side add character.

An example of this issue, from different dies, sold as lot 6245 in our November 2012 sale of the Ted L. Craige Collection, where it was cataloged, in part, as, "Exceptional eye appeal for the issue. Offered on its own, this would be a conversation starter and one of the best 1721-Bs sold for an extended period of years or decades!" That coin realized \$23,500, which is even more significant when we consider that it was certified only VF-20 by PCGS. The present example is far, far superior and fully deserving of the AU rating from PCGS. If the Craige piece was "exceptional," "a conversation starter" and "one of the best 1721-Bs," this specimen has legitimate claim to the title of "Finest Known" for the issue. At very least it is a phenomenal example of this French Colonial type that belongs in the finest type set. Worthy of the strongest bids.

PCGS# 170192.

1787 Massachusetts Cent. Ryder 4-J, W-6120. Rarity-7. Bowed Head, Arrows in Left Talon. Fine-12 (PCGS). An exciting offering for the specialist in Massachusetts copper varieties. Evenly toned in medium brown, the reverse also delivers bold outline definition to all major design elements. The obverse is more irregular in toning, and also more softly defined in the center and at the right border, its otherwise golden-brown surface exhibiting splashes of steely-olive color. Both sides are pleasingly smooth in hand with no sizeable marks, just microscopic ticks and other wispy abrasions that are commensurate with the assigned grade. A bit of ancient surface build up is associated with the deeper color noted for the obverse. As of January 2021 Mike Packard was aware of only eight examples of the 1787 Ryder 4-J die pairing. This is the fourth specimen that we have offered in recent decades. It is finer than the Twin Leaf coin on a flawed planchet that PCGS certified as VG-10, and also superior (in your cataloger's opinion) to the Norweb-Partrick coin in NGC VF-25, which is also on a flawed planchet and is more extensively marked. The PCGS MS-64 RB in our (Stack's) July 2009 ANA Sale is the finest known, and also the only Ryder 4-J in Mint State.

PCGS# 688950.

1101

1788 Massachusetts Cent. Ryder 1-D, W-6190. Rarity-2+. Period After MASSACHUSETTS. AU-58 (PCGS). A superb, very nearly Uncirculated example of the type with smooth, mark-free surfaces that retain traces of mint texture in the fields. The color is an attractive autumn-brown with faint traces of olive-gray, the toning perfectly matched on both sides. Well made, the strike is fairly well centered and full apart from a touch of softness at the right obverse and reverse borders. A lovely coin and prime candidate for inclusion in a high quality colonial type set or specialist's Massachusetts copper cabinet.

PCGS# 948. NGC ID: 2B27.

1102

1787 Connecticut Copper. Miller 33.19-Z.1, W-3645. Rarity-4. Draped Bust Left, INDE/INDN. AU-53 (PCGS). Medium brown surfaces display noticeable mint frost in the fields on each side and only light wear on the high points. Planchet flaws are seen across the obverse, but there no marks or roughness or any other post-strike impairments. Very well centered and nicely struck save for the central devices. An impressive level of preservation and technical grade for the type and variety.

PCGS# 370. NGC ID: 2B2X.

1103

1787 New Jersey Copper. Maris 30-L, W-5090. Rarity-4. No Sprig Above Plow. EF-40 (PCGS). 147.9 grains. This impressive piece appears to be a candidate for a position in the top six for the die pairing, with sharpness and surface quality nearly equal to those of Ford's second piece (a real EF, undergraded in Ford, and noted as "very pretty" in your cataloger's (JK's) copy) and the Roper coin. Glossy medium brown and steel with some remaining peripheral luster and excellent eye appeal. Later die state with a substantial bulge at plow. Some light marks, like a thin scratch from snout to neck, two digs between plow and beam, and a thin scratch through the beam, none of which are serious. Some lighter color around the date suggests some buildup may have been lifted from the area ages ago. Sharp and really lovely in hand, Ted Craige called this coin "Choice XF / XF." We agree entirely.

PCGS# 767899.

From our sale of the Ted L. Craige Collection, January 2013 Americana Sale, lot 11334. Lot tags and collector envelopes with attribution and provenance notes included.

Superior Maris 34-J New Jersey Copper Popular Deer Head Variety Boldly Overstruck

1104

1787 New Jersey Copper. Maris 34-J, W-5115. Rarity-3. Sprig Above Plow, Deer Head—Overstruck on a 1787 Connecticut Copper, Miller 30-hh.1—EF-45 (PCGS). 144.2 grains. A magnificent specimen of this popular and distinctive variety, one of the very finest known from these dies. Beautiful glossy light brown with exquisite eye appeal. Boldly overstruck on a Connecticut copper, as often seen for this variety, here showing enough undertype to be readily attributable as a Miller 30-hh.1, with its ET LIR entirely visible beneath the New Jersey shield. The Connecticut has spread into an impressively broad planchet, nearly the size of the Morristown Large Planchet issues, yet an alarming amount of undertype detail remains, especially on the reverse. The New Jersey detail is sharp, only slightly worn even, with full shield definition and a fully realized version of the Deer Head. Some light roughness is seen within the shield, and

the surfaces, though glossy, reveal some faint granularity under a glass. A couple minor horizontal scrapes are noted, hidden within the right side of the shield to no great detriment. Early die state, no break at date, break from end of plow to rim below 3 o'clock. Though this variety is not a great rarity, it seems to come in wretched grades in plenitude. There are only a few New Jersey cabinets on the planet which would not be improved by the addition of this exceptional coin.

PCGS# 763331.

From our (Stack's) sale of March 1993, lot 2053; our (Stack's) sale of March 1994, lot 336; our (Stack's) sale of the Clem Schettino Collection of New Jersey Coppers, January 2010 New York Americana Sale, lot 4287. Lot tags and collector envelope with attribution and provenance notes included. Plated on page 313 of the Siboni-Howes-Ish reference on New Jersey coppers, to illustrate an overstrike for these dies.

1105

1788 New Jersey Copper. Maris 65-u, W-5495. Rarity-3. Head Right. VF-30 (PCGS). Attractive steel-brown and deep golden-brown patina engages surfaces that are largely free of post-striking blemishes. The better struck areas show good gloss, as well as sharp detail. This is a late die state example of the Maris 65-u dies, however, with extensive buckling to the obverse that has resulted in little to no detail over the left-central obverse and right-central reverse. Virgin planchet texture is evident in those areas, which is rough and pitted, as made. This advanced die state is described in detail in the 2013 Siboni-Howes-Ish reference on New Jersey coppers:

"DS3 also involves drastic buckling of the die through the center and a horn-like cud appears on the horse's chest. It is small initially, then grows to considerable size. The buckling of the die means that the horse's chest is weak on the majority of specimens such that distinguishing this cud is often difficult. In DS4, the cracks becomes more prominent, particularly the one across the top of NOVA. The arc break through the singletree extends to the final 8 and then horizontally under the date. Late is DS4, the horn on the horse's chest grown to considerable size."

The present example is DS4, Late, with the horn break completely indistinct due to buckling of the die. Our consignor considers this die state terminal and assigns it a Rarity-8 rating. Certainly an exciting offering for the specialist in New Jersey coppers.

PCGS# 767860.

Ex Henry Chapman; unknown intermediaries; Dennis Wierzba, via Mike Wierzba, September 20, 2006. Chapman tag and collector envelope with attribution and provenances notes included. Interestingly, the Chapman tag describes this piece as "Poor," obviously a failure to recognize the terminal die state.

1786 Vermont Copper. Landscape. RR-7, Bressett 5-E, W-2025. Rarity-3. VERMONTENSIUM. VF-30 BN (NGC). CAC. A premium example from these dies, richly original surfaces are toned in deep, rich copper-rose. A few swirls of deeper charcoal-russet are scattered about, generally associated with ancient carbon deposits that are hardly significant for a mid grade Vermont. The strike softens a bit toward the upper left obverse and in the opposing area on the reverse, the dies slightly misaligned, but otherwise the detail is impressively sharp to include a bold sun, plow and eye. There are no marks of consequence to smooth, satiny surfaces. A coin that will see spirited bidding as a well struck, well preserved survivor of the classic Vermont Landscape type.

PCGS# 545

From the Martineit Family Collection.

1107

Undated (ca. 1793-1795) Kentucky Token. W-8805. Rarity-6. Copper. Engrailed Edge. MS-64 BN (PCGS). Smooth, hard and satiny, the otherwise golden-brown surfaces reveal considerable pinkish-red mint color in the protected areas around the peripheral design elements. Sharply struck overall with exceptional eye appeal. This edge variant of the type is often seen in high grades, indicating that it is was made specifically for collectors. On the other hand, the Engrailed Edge Kentucky is very scarce in an absolute sense.

PCGS# 617.

PCGS Population: 4; 0 finer in this category.

From our (Bowers and Merena's) sale of the Norweb Collection, Part I, October 1987, lot 1391. Lot tag included.

1108

Undated (ca. 1793-1795) Kentucky Token. W-8810. Rarity-5. Copper. LANCASTER Edge. MS-65+ BN (PCGS). This lovely piece retains considerable faded mint orange color to otherwise olive-brown surfaces, especially on the reverse. Sharply struck and exceptionally well preserved in an example of this scarcer Conder token type.

PCGS# 623.

PCGS Population: 1; 1 finer in this category (MS-66 BN)

1109

1796 Castorland Medal, or Jeton. Obverse Cliche. Lecompte-197a. Specimen-62 (PCGS). All obverse motifs are sharply rendered and crisp on this enticing piece, which side also exhibits subtle antique gold tinting to dominant pewter gray patina. A few minor handling marks and carbon flecks preclude a Choice grade, but none are individually distracting, and the eye appeal is superior at the assigned level. This rare cliche from the original obverse die would serve as a significant addition to a specialized collection alongside early strikings of this handsome, yet challenging medallic type.

PCGS# 880737.

1110

1791 Washington Large Eagle Cent. Musante GW-15, Baker-15, W-10610. Lettered Edge. MS-63 ★ BN (NGC). A pronounced prooflike finish and vivid antique gold and cobalt blue undertones clearly explain the coveted NGC ★ designation for superior eye appeal. Otherwise silver-copper in appearance with an impressively sharp strike for the type that is full in virtually all areas. This popular Washington type was produced in England as part of a bid to secure a coinage contract from the United States Congress. While many examples that were shipped to America eventually found their way into circulation, many high grade examples such as this were preserved by collectors and others in England. Few of the latter are as visually appealing as this stunning Choice specimen.

PCGS# 702. NGC ID: 2B6Z.

1111

Undated (possibly ca. 1793) Washington Success Medal. Large Size. Musante GW-41, Baker-265A, DeWitt-GW 1792-1a, W-10905. Brass. Plain Edge. AU-53 (PCGS). This is a richly patinated example with considerable steel-olive toning to a base of antique-gold color. Boldly defined for the type, and free of significant blemishes to deliver a pleasingly smooth appearance in hand. Struck from a very late state of the dies, with not only a bisecting crack (as made) over the upper obverse but also considerable evidence of die rust and erosion in several areas on both sides.

PCGS# 779

Iconic Continental Dollar

1112

"1776" (1783) Continental Dollar. Newman 2-C, W-8445. Rarity-3. CURRENCY. Pewter. Good Details—Damage (PCGS). Examples of this iconic type are eagerly sought by numismatists at all levels of preservation. This is certainly a more affordable alternative, although the deep pewter surfaces do retain bold outline detail to most major design elements. The links along the upper reverse border are faint, yet still discernible, and only in the center of the obverse do we note considerable loss of detail. Digs and pits in the centers on both sides join with a lengthy scratch at the right obverse to explain the PCGS qualifier. If ever there was an example of this type that upheld the traditional story of commercial use in America during the Revolutionary War, this would be it. Based on modern scholarship (see below), however, this specimen is more likely a (very) poorly handled collector piece.

The earliest known published record of the Continental "dollar" came, oddly enough, in the German book *Historical and Genealogical Almanac, or Yearbook of the Most Remarkable New World Events for 1784* by Matthias Christian Sprengel. A few years later, in 1786, Bishop Richard Watson's *Chemical Essays* (Volume IV) also mentioned the Continental "dollar." Watson was a professor of chemistry and divinity at Cambridge sanctioned by the British Crown. Although the authors of these early publications obviously believed that the Continental "dollars" were coins of American manufacture, no documentary evidence was provided to substantiate this claim, a fact that has long troubled numismatic researchers.

Recent research and a two-part article by Erik Goldstein and David McCarthy entitled "The Myth of the Continental Dollar" published in the January and July 2018 editions of *The Numismatist* challenge the long accepted theories surrounding these coins. They discovered that a long string of early Americans went on the record to mention that they had never seen or heard of such a thing as a Continental dollar coin. Paul Revere and Josiah Meigs both went on the record within a decade of the end of the American Revolution to correct Bishop Watson's report that the pewter "dollar" was an American coin.

That the Continental dollar was intended as a medal and not a coin, and that it was struck in London in 1783 instead of an unknown American location in 1776, changes very little in the scheme of things. The Libertas Americana medal was coined in Paris but is consistently rated as among the most desirable American numismatic collectibles; the Continental "dollar" should not forfeit a similar place in the hearts of American collectors. It remains scarce, attractive, historic and valuable. It's a piece that Paul Revere — no man of letters, typically — felt passionately enough about to write a missive to the Bishop of London. And it's a piece that all of us grew up looking at and wanting to own, just as every generation of American collector since 1823 has. Indeed, the inclusion of a Continental "dollar," even one such as this, will continue to help define the difference between an average and outstanding collection of early American types.

PCGS# 794. NGC ID: 2AYT.

1787 Fugio Cent. Club Rays. Newman 3-D, W-6680. Rarity-2. Rounded Ends. VF-30 (PCGS). A highly attractive mid-grade example of a Club Rays Fugio cent. Glossy surfaces with striking two-tone coloration of dark olive fields and tan devices. A strong, well centered strike adds further to the impressive visual appeal. The entirety of the major design elements are displayed boldly with just a bit of weakness at the first and last letters of BUSINESS. A predominantly smooth and high quality planchet that shows just trace porosity in a few places under a glass and a trivial planchet flaw on the reverse. A charming piece with much to recommend it as an example of this popular type.

PCGS# 904. NGC ID: AX5E.

1114

1787 Fugio Cent. Club Rays. Newman 3-D, W-6680. Rarity-2. Rounded Ends. VF-25 (PCGS). Pleasing circulated cameo effect with steely-charcoal outlines to design elements that provide strong contrast with otherwise deep rose and golden-brown patina. The strike is a bit tight to the upper border on the both sides, but to no great detriment as the overall design is bold. Generally smooth in hand, we note only a few well scattered marks or other blemishes. A nice mid grade offering for this scarcer *Guide Book* variety of the historic Fugio cent.

PCGS# 904. NGC ID: AX5E.

1115

1787 Fugio Cent. Club Rays. Newman 4-E, W-6685. Rarity-3. Rounded Ends. VF-25 (PCGS). 159.0 grains. A pleasing, original, light to medium brown piece. Glossy surfaces that show a few minor nicks and scrapes, mostly on the reverse, but there is no significant roughness or other problems. The motifs, date, and legends all present nicely, with weakness only at a few letters of MIND YOUR BUSINESS. Neat fold-over planchet lamination by the date.

PCGS# 904. NGC ID: AX5E.

From Mayflower Coin Auction Inc.'s November 1963 sale, lot 37.

1116

1787 Fugio Cent. Pointed Rays. Newman 6-W, W-6730. Rarity-3. STATES UNITED, 4 Cinquefoils. EF-45 (PCGS). Very choice for the variety, a solid Condition Census example. Newman 6-W was not among the varieties uncovered in the Bank of New York hoard and there are no truly Mint State specimens extant to the best of our knowledge. This lovely example has wonderfully smooth surfaces and perfectly even light brown color. No marks, flaws, or roughness — an ideal Fugio cent in all respects. Struck a tad off center towards 10 o'clock, but only the dentils were pushed off the planchet and all of the important design elements are clear and bold. Typical advanced die state, the obverse crack below the first S in BUSINESS extends up to the base of the sundial and the U of YOUR is filled in with a die break. Reverse plated in the original Newman monograph.

PCGS# 883, NGC ID: 2B8E.

Ex Thomas Elder, February 12, 1906; Hillyer Ryder; F.C.C. Boyd Estate; our (Stack's) sale of the John J. Ford, Jr. Collection Part I, October 2003, lot 242; Inde Et Lib, Numismatists' Fixed Price List #2, The Sun Rays Collection Part 1, August 2018, lot 22.

1117

1787 Fugio Cent. Pointed Rays. Newman 7-T, W-6735. Rarity-3. STATES UNITED, 4 Cinquefoils. EF Details—Cleaned (PCGS). A strong and attractive coin, well struck from an early state of these dies. Received a "Cleaned" qualifier from PCGS due to some faint hairlines in the fields on each side, but they are minor and only visible at certain viewing angles. The color is a pleasing, even, deep coffee-brown and the surfaces have no other marks or flaws to note. Only lightly worn and there are even subtle traces of mint frost in some of the protected areas.

PCGS# 883. NGC ID: 2B8E.

1787 Fugio Cent. Pointed Rays. Newman 8-B, W-6740. Rarity-2. UNITED STATES, 4 Cinquefoils. MS-64 BN (PCGS). This hard and satiny example delivers superior quality and strong eye appeal for both type and die pairing. Generally medium brown surfaces retain appreciable faded mint color that serves as outlines for many of the peripheral devices. The strike is tight to the upper right obverse, lower right reverse, but while border denticulation is incomplete as a result, the overall design is sharp. The only significant flan flaws are on the reverse above the letter W in WE and at 1 o'clock, but they are still minor and detract little from generally smooth-looking surfaces. Definitely superior to the vast majority of Mint State examples from the Bank of New York Hoard, which contained 246 examples of Newman 8-B when inventoried in 1948.

PCGS# 889. NGC ID: 2B8F.

1119

1787 Fugio Cent. Pointed Rays. Newman 8-B, W-6740. Rarity-2. UNITED STATES, 4 Cinquefoils. MS-62 BN (PCGS). Frosty medium brown with peeps of mint red in some of the letters. Cartwheel luster turns around each side and reveals absolutely no marks, spots, or flaws. Weakly struck at the lower obverse, affecting BUSINESS, and the corresponding upper reverse as is often the case to some extent with the Newman 8-B variety. But what this coin lacks in strike it makes up for in outstanding surface quality and luster of the sort normally only seen on higher graded Mint State examples. Overall a fresh and pleasing piece that would make a nice example of the UNITED STATES *Guide Book* variety in a high grade major variety set of Fugio cents.

PCGS# 889. NGC ID: 2B8F.

From Kreisberg-Schulman's Waldorf-Astoria Auction Sale, May 1966, lot 821.

1120

1787 Fugio Cent. Pointed Rays. Newman 8-B, W-6740. Rarity-2. UNITED STATES, 4 Cinquefoils. MS-61 BN (PCGS). Medium brown surfaces with accents of sea-green and orangey-tan. Displays a delicate, frosty mint texture and no trace of wear. Received a typical strike for the variety, bold at the sun face, sun dial, FUGIO, and 1787 date while weak at the lower left obverse and opposing reverse. Struck on a high quality planchet that shows no significant flaws or post-strike damage. Appealing as a Mint State example of this historic early federal coinage.

PCGS# 889. NGC ID: 2B8F.

1121

1787 Fugio Cent. Pointed Rays. Newman 8-B, W-6740. Rarity-2. UNITED STATES, 4 Cinquefoils. AU-58 (PCGS). 153.4 grains. A bold Near Mint example with glossy surfaces that are a pleasing shade of medium brown. Well struck for the variety and on a high quality planchet that shows no flaws. There is just a touch of strike weakness at the lower left obverse and corresponding reverse where some original planchet texture remains. Otherwise the coin is impressively hard and satiny smooth with no marks or roughness, and the high quality surfaces allow for full appreciation of the delicate clashmarks on each side.

PCGS# 889

From French's October 1963 MANA Sale, lot 202.

1122

1787 Fugio Cent. Pointed Rays. Newman 8-B, W-6740. Rarity-2. UNITED STATES, 4 Cinquefoils. VF Details—Cleaned (PCGS). 131.0 grains. An overall attractive light brown piece with just subtle highlights of rose and sea-green that are all that remain from an old cleaning. A few light planchet flaws are seen on the right side of the coin but there are no serious marks or roughness. Rather unusual strike characteristics for the Newman 8-B variety, this piece being well balanced and fully detailed throughout while also showing slightly distorted peripheral detail likely due to a second strike with little to no offset or rotation.

PCGS# 889. NGC ID: 2B8F.

1787 Fugio Cent. Pointed Rays. Newman 8-X, W-6750. Rarity-3. STATES UNITED, 4 Cinquefoils. MS-63 BN (PCGS). Boldly lustrous surfaces toned to medium brown and steel with mint red peeping through some of the details. A few light planchet streaks of darker color run vertically across both sides, but there are no serious planchet flaws or post-strike issues. A curved planchet clip seen at 6 o'clock relative to the obverse does not impinge on any major part of the design or legends. Sharply struck and well centered in general with better than average definition even in the area of the ever-present obverse die break. An impressive and interesting Choice Mint State example to represent the Fugio cent type.

PCGS# 883. NGC ID: 2B8E.

1124

1787 Fugio Cent. Pointed Rays. Newman 8-X, W-6750. Rarity-3. STATES UNITED, 4 Cinquefoils. EF-45 (PCGS). Pleasing, original surfaces with an attractive patina of reddish medium brown fields and light brown devices. There are no marks or flaws of any consequence to note and the strike is reasonably full and well centered for the variety. An appealing lightly circulated example with excellent eye appeal and quality for the grade.

PCGS# 883. NGC ID: 2B8E.

1125

1787 Fugio Cent. Pointed Rays. Newman 8-X, W-6750. Rarity-3. STATES UNITED, 4 Cinquefoils—Double Struck—EF-45 (PCGS). A particularly bold example of this sort of mint error, one that for some reason has been observed on several Newman 8-X die variety examples. Struck twice, first with another already-struck coin that was only partially ejected from the dies and which left a partial reverse brockage impression on the obverse, then struck again normally with slight offset between the strikes resulting in rather dramatic doubling and contortion of the reverse, but only where the remnants of the first strike were protected opposite the obverse brockage impression. Fascinating and attractive, with glossy medium brown and dark olive surfaces that have no serious flaws or impairments.

PCGS# 883. NGC ID: 2B8E.

1126

1787 Fugio Cent. Pointed Rays. Newman 8-X, W-6750. Rarity-3. STATES UNITED, 4 Cinquefoils—Multiple Strikes—EF-40 (PCGS). Another mind-boggling mint error example of Newman 8-X. This piece displays remnants of as many as four or five different strikes, with obverse detail seen offset at least three different ways relative to the primary, centered strike — GIO of FUGIO above, sun rays to the right, and E of BUSINESS slightly offset to the lower left; this in addition to an off center brockage strike leaving an arc of impressed dentils at the center of the obverse. The reverse shows only subtle evidence of the multiple strikes with slight doubling seen near the rims and a faint arc from the rim of an off center strike. There is also a depression at the central reverse that is most likely an effect of the error strike. The coin itself is problem-free with glossy chocolate-brown surfaces. A captivating piece with a seemingly endless amount of intricacies to study.

PCGS# 856585.

1127

1787 Fugio Cent. Pointed Rays. Newman 10-G, W-6700. Rarity-5. UNITED STATES, 1/Horizontal 1. AU Details-Environmental Damage (PCGS). With an uncommon amount of sharp striking detail remaining, this Newman 10-G is sure to catch the eye of astute Fugio cent enthusiasts. The strike is tight to the left borders on both sides, but affecting only the denticulation in those areas. Handsome deep autumn-brown patina overall, the PCGS qualifier concerns microgranularity on both sides, as well as some surface build up here and there on the reverse. Excluding the unique Newman 10-OO, this is the more difficult of two scarce die varieties using the 1/Horizontal 1 obverse. These two die pairs alone comprise two major Guide Book varieties, as one has a UNITED STATES reverse and the other a STATES UNITED. Newman 10-G, the UNITED STATES reverse version, is the slightly scarcer and considerably more conditionally challenging of the two. Clearly this AU example represents a significant find despite being less than perfect.

PCGS# 892. NGC ID: 2B8H.

1128

1787 Fugio Cent. Pointed Rays. Newman 11-B, W-6785. Rarity-4. UNITED STATES, 4 Cinquefoils. EF-40 (PCGS). 170.5 grains. A charming piece with medium brown surfaces that are original and attractive. A few small planchet flaws are noted as well as some slightly granular natural planchet texture, but there are no distracting issues either pre or post-strike. The rather thick planchet received a well balanced and nicely centered strike from the usual heavily clashed state of the dies.

PCGS# 889. NGC ID: 2B8F.

From our (Stack's) C. Ramsey Bartlett Collection sale, February 1966, lot 76.

1129

1787 Fugio Cent. Pointed Rays. Newman 12-U, W-6810. Rarity-4. STATES UNITED, 4 Cinquefoils. VF-20 (PCGS). 155.1 grains. A premium quality and highly appealing Fugio cent at the VF-20 grade level. Well struck, perfectly centered, and just evenly worn. There are no marks or flaws of any consequence and just a touch of natural granular planchet texture visible under a glass. All of the major detail stands out boldly upon pleasing light brown surfaces.

PCGS# 883. NGC ID: 2B8E.

1130

1787 Fugio Cent. Pointed Rays. Newman 12-X, W-6820. Rarity-2. STATES UNITED, 4 Cinquefoils. MS-63 BN (NGC). Satiny deep brown surfaces are hard, tight and impressively smooth for the assigned grade. The strike is well centered and otherwise sharp, minor softness noted only at the lower right obverse and upper right reverse borders. While Newman 12-X is among the most common Fugio varieties in high grade, second only to 13-X, and several hundred were among the Bank of New York's hoard, few offer this level of quality and visual appeal.

PCGS# 883. NGC ID: 2B8E.

1131

1787 Fugio Cent. Pointed Rays. Newman 12-X, W-6820. Rarity-2. STATES UNITED, 4 Cinquefoils. AU Details—Environmental Damage (PCGS). A surprisingly attractive and high quality coin given the PCGS qualifier. The vast majority of the surfaces are a smooth, frosty medium brown with just a few tiny nicks and planchet flaws. The environmental damage concerns just a small patch of old brickred and dark olive roughness to the right of the sun rays and an even smaller spot of similar roughness right of ARE. In general a fairly pleasing high grade coin and solid example of the type.

PCGS# 883. NGC ID: 2B8E.

1132

1787 Fugio Cent. Pointed Rays. Newman 12-Z, W-6830. Rarity-5-STATES UNITED, Label With Raised Rims, Large Letters in WE ARE ONE. VF-20 (PCGS). 155.9 grains. A choice and remarkably attractive example of this scarce die pair and *Guide Book* variety. There are absolutely no problems to note, just even wear on smooth light brown surfaces. The strike was perfectly centered and well balanced; all of the major design elements, date, and legends are bold excepting slight weakness at the upper right reverse label due to die swelling in that area. Not quite as sharp but just as appealing as the recently sold PCGS VF-35 Fricke and PCGS VF-25 Star of Texas examples that realized \$3,360 and \$3,600 respectively.

PCGS# 878500.

1133

1787 Fugio Cent. Pointed Rays. Newman 13-R, W-6850. Rarity-4. STATES UNITED, 4 Cinquefoils. VF-35 (PCGS). 145.1 grains. A solid mid-grade example of this rather scarce variety. Technically EF judging by the sharpness of the peripheral detail and traces of mint frost in some of the protected areas, but displays some softness of strike at the centers as seen on many examples of the variety. Very well centered though and a good majority of the significant detail is clear. Mixture of medium brown and darker maroon and olive patina.

PCGS# 878088.

1134

1787 Fugio Cent. Pointed Rays. Newman 13-X, W-6855. Rarity-1. STATES UNITED, 4 Cinquefoils. MS-63 BN (PCGS). An attractive Choice Mint State piece with cartwheel luster on steel-brown surfaces that still retain mint red in the recesses of many of the details. Some streaky planchet flaws are seen on each side but these are not overly severe and there are no other problems that catch the eye. Slightly off center but sharply struck with excellent definition to the entirety of the design.

PCGS# 883. NGC ID: 2B8E.

From Abner Kreisberg's November 1962 Mail Bid Sale, lot 34.

1135

1787 Fugio Cent. Pointed Rays. Newman 13-X, W-6855. Rarity-1. STATES UNITED, 4 Cinquefoils. MS-62 BN (PCGS). With superb color and planchet quality, this is an unusually attractive example of Newman 13-X at the MS-62 grade level. Frosty chocolate-brown surfaces display no planchet flaws or contact marks of any significance. Slight weakness of strike at the upper left obverse and corresponding reverse, but well centered and quite bold in overall appearance. A pleasing specimen most likely from the famous Bank of New York hoard.

PCGS# 883. NGC ID: 2B8E.

1136

1787 Fugio Cent. Pointed Rays. Newman 13-X, W-6855. Rarity-1. STATES UNITED, 4 Cinquefoils. AU-58 (PCGS). 125.0 grains. An excellent Fugio cent at the popular and attractive AU-58 grade level. Medium steel-brown with subtle accents of rose-copper. The surfaces are smooth and pleasing with no notable flaws, marks, or roughness. Very well struck for the variety with bold definition most everywhere, especially on the intricate detail of the sun dial. The bold strike and hard surfaces also allow for close study of the many fine die cracks and clashmarks on each side.

PCGS# 883. NGC ID: 2B8E.

1137

1787 Fugio Cent. Pointed Rays. Newman 15-V, W-6910. Rarity-5. STATES UNITED, 4 Cinquefoils. VF-20 (PCGS). Pleasing grade and quality for this scarce die variety. Light golden brown surfaces are smooth and problem-free and offer excellent eye appeal. Nicely centered and all of the major detail presents boldly. Late die state with a heavy die crack and associated swelling at the central right reverse.

PCGS# 878105

1138

1787 Fugio Cent. Pointed Rays. Newman 15-Y, W-6915. Rarity-2. STATES UNITED, 8-Pointed Stars on Label. VF-30 (PCGS). A solid representative of this distinctive variety featuring the only reverse die in the Fugio series to use the "8-pointed star" ornaments on the reverse label. This well struck example shows both the upper and lower stars while many have a faint or totally absent lower star. Overall smooth in appearance with just some light natural planchet roughness and a small flaw and scratch near the sun face.

PCGS# 898.

1139

1787 Fugio Cent. Pointed Rays. Newman 15-Y, W-6915. Rarity-2. STATES UNITED, 8-Pointed Stars on Label. VF-25 (PCGS). Predominantly choice tan-brown surfaces with a patch of darker toning by the date and at the lower reverse rings. Excellent centering and overall boldness of detail. The upper 8-pointed star is sharp while the lower one is faint as is often the case.

PCGS# 898.

Fantastic Double Struck Newman 17-S Fugio Cent

1140

1787 Fugio Cent. Pointed Rays. Newman 17-S, W-6935. Rarity-3. STATES UNITED, 4 Cinquefoils—Double Struck, Second Strike 35% Off Center—VF-20 (PCGS). 149.0 grains. An incredible double struck Fugio, very rare as it received two bold strikes on both sides, as opposed to one side being a brockage maker, and additionally, this is the first major error we can recall seeing on this uncommon die variety. The offset between the two strikes was significant, some 35% by PCGS' estimation, which left a dramatic presentation of two full suns and two bold dates, and about half of the reverse rings of each

strike visible on the reverse. The wide offset and strong strike broadened the planchet to at least a few millimeters above its normal size. This coin saw a surprising amount of circulation despite its unusual appearance, but the surfaces and color are quite nice for the grade and the circulation cameo patina only adds to the visual impact. A delightful and rare piece sure to see spirited bidding.

PCGS# 878107.

Purchased from Empire Coin Co. Inc. (Q. David Bowers and James F. Ruddy) in November, 1963.

1141

1787 Fugio Cent. Pointed Rays. Newman 18-U, W-6960. Rarity-3. STATES UNITED, 4 Cinquefoils. VF-30 (PCGS). 142.1 grains. A pleasing light olive-brown specimen with full, bold detail for the grade. There are a few light scratches by the sun face but no other impairments or planchet flaws. Slight straight planchet clip from 1 to

2 o'clock relative to the obverse. An excellent mid-grade example of the type or die variety alike.

PCGS# 883. NGC ID: 2B8E.

Harmer, Rooke Numismatists, Ltd.'s Million Dollar Sale, Part I, November 1969, lot 264.

1787 Fugio Cent. Pointed Rays. Newman 19-Z, W-6975. Rarity-4. STATES UNITED, Label With Raised Rims, Large Letters in WE ARE ONE. VF Details—Environmental Damage (PCGS). A strong and attractive example of the Raised Rims *Guide Book* variety that received a conservative assessment from PCGS. Sharp detail that is easily EF by most anyone's standards and there is very little in the way of environmental damage — this apparently concerns some tiny

specks of verdigris in the right obverse field and subtle brick-red patina in a few places around the coin. On the whole though, the surfaces are a decent, glossy olive-brown with a bit of pale-orange on some of the highpoints from a light rubbing or cleaning. Boldly struck and the level of detail alone, especially at the distinctive central reverse, makes this a very worthwhile piece.

PCGS# 895. NGC ID: B7VH.

1143

1787 Fugio Cent. Pointed Rays. Newman 20-X, W-7000. Rarity-5-. STATES UNITED, 4 Cinquefoils. VF-20 (PCGS). 139.3 grains. A satisfying example of this tough variety with full, well centered detail

and pleasing light brown color. The natural texture of the planchet was slightly granular and there are a few streaky flaws on the reverse, but on the whole the coin has an appealing, problem-free appearance.

PCGS# 878115

HALF CENTS

1144

1793 Head Left. C-2. Rarity-3. Fine Details—Damage (PCGS). With bold outline detail to most major design elements, this is a numismatically desirable 1793 half cent despite considerable wear and an overall rough, granular texture. A prominent void in the planchet is evident at 11:30 on the reverse, which affected the wear pattern on the obverse and has resulted in the near-total loss of the digit 3 in the date. The first three digits are bolder, however, and the

top of the 3 is discernible. Ruddy-brown and olive-copper patina overall. Struck in the first year of coinage operations at the United States Mint in Philadelphia, the 1793 half cent is the only date of the Flowing Hair, Liberty Cap type with Liberty's head facing to the viewer's left. As such, the demand from half cent specialists and type collectors is strong for examples at all level of preservation.

PCGS# 1000. NGC ID: 2222.

Probable Condition Census 1794 C-1a Half Cent The Weber-Terranova-Koshkarian Specimen

1145

1794 C-1a. Rarity-3. Normal Head. Large Edge Letters. AU-58 (PCGS). Deep chocolate-brown surfaces on obverse and reverse, quite smooth for the issue, as half cents of this date are remarkable for being irregular and rough. Even within this high grade, one would probably need to inspect from one to two dozen examples — strictly theoretical, as no such opportunity would ever exist — to find another that matches this. The present coin is thought to rank among the Condition Census (defined as the six best specimens of this die variety), and handily exceeds the quality of most at the PCGS-certified grade level by virtue of its choice surfaces and eye appeal. (Our last offering of this coin was in March 2019, when it was certified MS-63 BN by NGC, and we feel that it is also superior for the variety at that grade level.) The details on obverse and reverse are superb, with just about all design elements fully struck, save for a few of the high points. The dies clashed prior to the striking of this piece, with the result that on the obverse before the lips and chin are incuse impressions of the leaves on the reverse; on the reverse, to the left of the letter H in HALF can be seen some evidence of the hair strands from the other side. The rim is well defined, with all of the denticles distinct, not a single exception. A few tiny scattered marks are mentioned for accuracy. The most interesting aspect of this obverse die, a repunched date with the original numerals far south of the dominant date, is plain to the naked eye. Manley Die State 3.0, with clash marks visible between the cap and hair below the letter L in LIBERTY, in front of Liberty's face and below her chin. A rarely visible fine die crack is plain at the tops of the letters IBE in LIBERTY. The reverse is rotated 30 degrees counterclockwise from normal coin alignment.

The 1794 is properly considered a distinct type within the half cent series, as even a casual comparison with the Small Head style of 1795 to 1797 will reveal a dramatic difference. It has been our experience that of all the half cent types, the 1794 is

far and away the most difficult to obtain in high grades, handily eclipsing the even more famous 1793 Head Left, and by a large factor. Indeed, although the 1794 is not rare as a date in comparison to the famous 1793, all bets are off when it comes to pieces such as this, offering a combination of high grade, smooth planchet surfaces, and excellent eye appeal. Using these criteria, the 1794 Large Head type is the most difficult to obtain in the entire series. Only a few varieties of 1794 half cents are known in such remarkable grades as this, with this Cohen number notably scarcer than the C-9 in grades exceeding EF. A type collector could hardly seek a finer specimen than offered here, a coin that would also serve as a focal point in a specialized half cent variety collection.

Copper supplies for the early Philadelphia Mint were from many different sources and the quality and purity of the metal varied. For 1794 the metal, after refining at the Mint, remained generally unsatisfactory, probably due to impurities and other unwanted elements, although we are not aware of any analysis that has ever been done. Not generally known is the fact that copper half cents and cents were usually profitable for the Mint to produce, as after the early years the amount of copper needed to make these coins was less than face value. This in contrast to the full or nearly full weight of metal required for silver and gold coins. Accordingly, the more copper coins that could be made, the greater the profits would be.

PCGS# 35018. NGC ID: 2223

From the Cardinal Collection Educational Foundation. Earlier ex Superior's sale of the Bill Weber Collection of Half Cents, June 2002, lot 2242; Anthony Terranova; our (American Numismatic Rarities') sale of the Haig A. Koshkarian Collection, March 2004 Classics Sale, lot 2; Heritage's FUN Signature Coin Auction of January 2007, lot 756; our Spring 2019 Baltimore Auction, March, lot 1007, as NGC MS-63 BN.

Superior Quality 1794 C-9 Half Cent

1146

1794 C-9. Rarity-2. High-Relief Head. AU-55 BN (NGC). Glossy antique copper surfaces are smooth apart from a few light toning spots that are largely out of the way around the peripheries. There are no marks of note, and the eye appeal benefits from a well centered strike that has imparted bold to sharp detail throughout the design. Manley Die State 2.0.

The accepted mintage for this issue is 81,600 coins, achieved in five deliveries during early to mid 1794:

- February 22: 10,000 coins
- June 4: 16,000 coins
- June 26: 16,000 coins
- June 27: 16,000 coins
- July 8: 23,600 coins

After determining the die emission sequence, and also considering the number of coins extant, William R. Eckberg

and Ronald P. Manley were able to ascertain exactly which die pairings were included in each of the deliveries for this issue. As published in Eckberg's 2019 reference *The Half Cent*, 1793-1857: *The Story of America's Greatest Little Coin*, C-7, C-8 and C-9 together comprise the 23,600 coins delivered on July 8. With approximate 750 survivors in all grades, Cohen-9 is an excellent candidate to represent the High-Relief Head *Guide Book* variety of the 1794 half cent in a type set. It is not, however, the most common variety of the 1794 half cent as once thought, for that honor now goes to the C-4 Normal Head. The two dozen or so high grade examples of the 1794 C-9 in numismatic hands are split fairly evenly between About Uncirculated and Mint State grades. This is our second offering of this beautiful NGC-certified Choice AU in recent years, and it is sure to find its way into an advanced cabinet.

PCGS# 35054. NGC ID: 2223.

From the Cardinal Collection Educational Foundation. Earlier from our ANA Auction of August 2019, lot 542.

Exceptionally Original, CAC Approved 1797 Half Cent

1147

1797 C-1. Rarity-2. 1 Above 1, Plain Edge. AU-55 (PCGS). CAC. A charming, thoroughly PQ example of this bold naked eye variety among early half cents. Satiny surfaces are hard, tight and pleasingly smooth. Closer inspection with a loupe reveals scattered carbon deposits and a few light marks on the obverse, but these are ancient and, in the case of the former, provide further evidence for the undeniable originality of the surfaces. There are no blemishes of note on the reverse, and microscopic roughness in the planchet at and before Liberty's portrait on the obverse is as made. Warmly toned in a blend of autumn and copper-brown and displaying a well centered strike that is sharp in most areas. Manley Die State 1.0, cataloged as "rare" by the author.

The famed 1 Above 1 die error is perhaps the boldest die punching error in the entire U.S. coinage series. The top 1 is thinner and lacks bottom serifs, indicating at least some attempt to efface it, but no great effort was put into its removal. Ed. Frossard, writing in 1879, seems to have mistaken it for a die break, perhaps incredulous that such a remarkable error could have been left in the die. Most specimens of this variety are struck over cut-down Talbot, Allum & Lee (T.A.L.) tokens, Breen's 1c attribution. Though this example shows no evidence of any undertype, it does not necessarily indicate a virgin planchet was

used. In fact, Manley asserts that most, if not all of the coins that Breen attributes as 1a (rolled copper planchet stock) are simply examples that show no evidence of the T.A.L. undertype. The extremely rare and unconfirmed B-1b attribution corresponds to planchet stock derived from cut down spoiled cents.

C-1 is the most available 1797 half cent die marriage and the only one corresponding to the 1 Above 1, Plain Edge *Guide Book* variety. As such, examples are eagerly sought among type collectors. The surviving population of high grade coins is generous by the standards of the Liberty Cap series, but Bill Eckberg (2019) notes that "at least twenty are known in AU or better" — a paltry total that is in no way sufficient to meet demand from quality conscious early copper enthusiasts. The condition rarity of the present example is enhanced by its standing as one of only two AU examples to have met with strict CAC approval. A highly significant offering worthy of the strongest bids.

PCGS# 1042. NGC ID: 2228.

CAC Population (1 Above 1 variety only): 2 in all AU grades.

From the Cardinal Collection Educational Foundation. Earlier from Legend's sale of the South Texas Collection, July 2018 Regency Auction 27, lot 172; Legend's Regency Auction 33, June 2019, lot 41.

1148

1803 C-3. Rarity-1. Widely Spaced 3. AU-58 (PCGS). CAC. A handsome, fully original example with blended autumn-orange and medium brown patina. Surfaces are smooth and satiny with faded mint color still clinging to the protected areas around many of the

devices. Well struck for the type, it is difficult for us to imagine a more desirable Draped Bust half cent at the near-Mint grade level. Manley Die State 3.0.

PCGS# 1060. NGC ID: 222E.

LARGE CENTS

1149

1793 Chain Reverse. S-Unattributable. AMERICA. Poor-1 (PCGS). A find for the budget minded type collector seeking a more affordable, yet still numismatically appealing example of this historic first year large cent issue. As faint outlines to Liberty's portrait and the central reverse design elements make clear, this is most definitely a Chain cent. The patient observer with a bit of imagination can also discern elements of the date and some of the peripheral lettering on the reverse. Conclusive evidence for PCGS' AMERICA attribution is difficult to come by, however, and there is just not enough detail for us to provide a definite Sheldon number, although such technicalities are perhaps irrelevant for the kind of type collector that we anticipate showing greatest interest in this piece. Autumn and ruddy-brown surfaces are rough and pitted overall, yet no more so than one should expect for a 1793-dated cent at the assigned grade level. An intriguing piece that is sure to see much bidding activity.

PCGS# 1341. NGC ID: 223F.

1150

1793 Wreath Reverse. S-9. Rarity-2. Vine and Bars Edge. EF Details—Scratch (PCGS). A wholesome EF with much to recommend it to both type collectors and early copper enthusiasts. Original copper-brown surfaces exhibit deep steely-charcoal outlines to the design elements, especially on the reverse. Both sides retain plenty of bold detail, the surfaces generally smooth with only a few shallow planchet pits and, more significantly, several faint pin scratches on the obverse. As a one year design type, the historic 1793 Wreath cent enjoys strong collector demand at all levels of preservation. With prices climbing ever higher in today's market, this relatively appealing piece is sure to appeal to many bidders.

NGC ID: 223H.

1151

1794 S-30. Rarity-1. Head of 1794. Marred Field, Amiable Face. EF-45 (PCGS). CAC. An absolutely stunning piece with stronger quality and eye appeal than one might expect even at the desirable Choice EF grade level. Both sides are smooth in hand, and impressively so, without so much as a single mark or other blemish to report. The strike is a bit tight to the upper right obverse border, better centered on the reverse, and both sides exhibit at least discernible denticulation in all areas. Well defined overall, in fact, with handsome medium brown patina that speaks volumes about the originality of this PQ large cent. In 1870, Dr. Edward Maris named this variety the "Amiable Face," for the pleasant expression to Liberty's portrait, a gentlemanly revision of his racier first moniker published in 1869, the "Amatory Face." The present coin is truly a delight to behold and will please even the most discerning type collector or early copper enthusiast.

PCGS# 35555. NGC ID: 223P.

1152

1812 S-288. Rarity-2. EF-40 (PCGS). This handsome piece exhibits a blend of medium and autumn-brown patina, the latter color representing those areas where original mint red color was last to fade. The strike is well centered and bold for the type, and we note only a few minor handling marks from time spent in active commerce. A pleasing EF to represent this brief and conditionally challenging large cent series.

PCGS# 1564.

The Unique Proof 1819/8 Newcomb-1 Cent Ex Dupont-Pittman-Twin Leaf

1153

1819/8 N-1. Unique as a Proof. Large Date. Proof-64 BN (NGC). This coin was part of the fabulous holdings of John Jay Pittman for more than 40 years, commencing with his purchase of it in our (Stack's) 1954 Anderson-Dupont sale for \$70. When it was next offered for sale, presented by the astute David Akers in 1997, it was described in part, as follows:

"Full mirror fields and beautiful medium tan surfaces that are enhanced with magnificent, light iridescent multicolored toning that is a blend of various shades of blue, greenish-gold, violet and russet. The coin is very sharply struck with broad even dentils all around, and sharp stars. There are a few tiny scratches and marks, as well as a few pinpoint carbon flecks, spots and verdigris, but the overall appearance of the coin is still excellent."

We find little to add to that characteristically precise description beyond noting the evidence of die clashing seen on the reverse center, just as mentioned by Noyes as "usually seen." Noyes Die State A/A.

At the most generous of estimations, there could be two Proof impressions of this issue, this one which stands unchallenged, and a second specimen that has been called Proof in the past, including when it appeared in the 1910 Mougey sale as lot 121. However, the Proof status of that piece has been called into question in more recent times and it has yet to be confirmed by authority Denis Loring, keeper of the most complete census of Proof large cents.

When C. Douglas Smith described this coin in our 1954 sale of the Charles J. Dupont coins, he did so with only the slightest hedge, adding "(?)" after his "Proof" designation, but then

continued to explain why it was in fact Proof, commenting in closing that it "may be an extreme rarity as such." Walter Breen, writing in his *Encyclopedia of United States and Colonial Proof Coins*, listed this coin first, among two or potentially three examples but, as he suspected, there was duplication and only two coins were actually represented. Back to David Akers writing in the Pittman catalog, no question was levied on the status of this coin and his keen sense in such matters earned him high respect from his peers.

Prior to our 1954 sale, the last public offering of this coin we are aware of was in the 1923 S.H. Chapman sale of the Dr. Henry W. Beckwith Collection. Noted large cent connoisseur, John W. Adams wrote in his study of American auctions, *United States Numismatic Literature*, that the Beckwith sale was "the finest collection of high condition cents of all time," shining impressive light on the first collector recorded to have owned the present coin. Dupont and Pittman are famous for the great coins in their collections, and as for Twin Leaf, our offerings from that cabinet in recent years speak volumes of the collector's taste for the finest coppers.

PCGS# 81768. NGC ID: 2262.

Ex S.H. Chapman's sale of the Dr. Henry W. Beckwith Collection April 1923, lot 54; Charles J. Dupont; our (Stack's) Anderson-Dupont Catalogue, September 1954, lot 568; John Jay Pittman; David W. Akers's sale of the John Jay Pittman Collection, Part I, October 1997, lot 196; our (Bowers and Merena's) ANA Sale of July 2003, lot 177; Heritage's Long Beach Signature Auction of June 2005, lot 5122; Twin Leaf Collection; our sale of the Twin Leaf Collection of United States Large Cents, Part I, July 2015 Baltimore Auction, lot 2052; Heritage's FUN Signature Auction of January 2018, lot 4745.

1820 N-13. Rarity-1. Large Date. MS-65 BN (NGC). Enticing cobalt blue undertones to dominant steely-copper patina, both sides also retain traces of faded mint red color in the protected areas around and among some of the design elements. Sharply struck and well centered with a smooth and inviting satin texture. The 1820 Newcomb-13 is one of the most available varieties of large cent from the famous Randall Hoard. This hoard, which contained thousands of large copper cents mostly dated from 1817 through 1820, was rumored to have been found beneath a railroad platform in Georgia some time after the Civil War, but before 1869. Supposedly hidden in a small keg (or multiple kegs), the hoard was named for John Swan Randall of Norwich, New York, who purchased the coins after they had changed hands several times since their discovery. After Randall's death in 1878, the coins that remained were offered at auction by Edward D. Cogan. The most readily obtainable variety from the Randall Hoard is the 1818 N-10, followed by the 1820 N-13 (offered here). Over the years, even as late as the 1970s, it was not unheard of to find groups of Randall Hoard cents offered by coin dealers. However, as the 20th century came to a close, examples were usually found as individual pieces.

PCGS# 1615. NGC ID: 2256.

1155

1833 N-5. Rarity-1. MS-64 RB (PCGS). OGH. Pleasing mint orange color with blushes of steel-brown patina confirming the RB designation from PCGS. The abundant cartwheel luster on both sides is predominantly smooth and free of all but a few widely scattered marks. A decent strike for the variety with full centers to several of the stars on the obverse. Peripheral cracks and flowlining point to a late die state, Noyes D/C.

PCGS# 1697. NGC ID: 225P.

1156

1852 N-22, **9.** Rarity-1. MS-65 RB (NGC). Plenty of vivid reddishorange mint color shines through steely-copper patina that is more extensive on the reverse. Sharply struck from a late state of these dies (Noyes c, N-9), the surfaces are lustrous and smooth with an endearing satin texture.

PCGS# 1899. NGC ID: 226J.

SMALL CENTS

1157

1857 Flying Eagle. Type of 1857. MS-65 (PCGS). Beautiful tannish-apricot patina blankets satiny and inviting surfaces. With razor sharp striking detail, as well, this coin should have little difficulty finding its way into a high grade type set.

PCGS# 2016. NGC ID: 2276.

1158

1858 Large Letters, Low Leaves (Style of 1858), Type III. MS-64 (PCGS). OGH—First Generation. This upper end near-Gem is fully lustrous with a soft, satiny texture to the finish. Striking detail is impressively sharp for a type that is often encountered with considerable softness. Pretty golden-tan color is also a praiseworthy attribute.

PCGS# 2019. NGC ID: 2277.

1159

1858 Large Letters, High Leaves (Style of 1857), Type I. MS-64 (PCGS). A tinge of pale rose enhances otherwise golden-copper patina on both sides of this lovely example. Sharply struck in most areas with full satin luster, there is much to recommend this superior near-Gem for high grade type purposes.

PCGS# 2019. NGC ID: 2277.

1160

1858 Large Letters, High Leaves (Style of 1857), Type I. MS-63 (PCGS). OGH. Worthy of a close look, this satiny example is as smooth and attractive as one would expect at the MS-64 grade level. Vivid orange-tan surfaces with a sharply executed strike, there is much to recommend this coin to the astute bidder. PQ!

PCGS# 2019. NGC ID: 2277.

1161

1858 Small Letters, High Leaves (Style of 1857), Type I. MS-63 (NGC). Handsome golden-bronze surfaces are frosty with modest semi-reflectivity in the fields. Sharply to fully struck with superior eye appeal at the assigned grade level. This is a scarce hub combination for the issue, the High Leaves Reverse paired with the Small Letters obverse is three to four times scarcer than its Large Letters counterpart.

PCGS# 2020. NGC ID: 2279.

1859 MS-64 (PCGS). OGH—First Generation. A lovely Choice example of this perennially popular one year design type in the Indian cent series. Sharply struck with full, satiny luster and pretty tannish-apricot color.

PCGS# 2052, NGC ID: 227E.

1163

1859 MS-64 (NGC). Warm medium tan color with blushes of intermingled rose-russet confirming this coin's originality. The strike is sharp, the luster full, and the one-year type status of this issue enhances the appeal of this 1859 Indian cent.

PCGS# 2052. NGC ID: 227E.

1164

1862 Proof-64 (PCGS). CAC. OGH—First Generation. Blushes of rose, powder blue and pale silver enhance otherwise tan-apricot surfaces. This is a beautiful specimen, the obverse especially colorful, and both sides fully struck and nicely preserved.

PCGS# 2259. NGC ID: 229C.

1165

1864 Copper-Nickel. Proof-66 Cameo (NGC). Splendid olive-apricot color greets the viewer from both sides of this silky smooth, upper end Gem. Fully impressed and satiny, the devices contrast nicely with reflective fields, the cameo finish best appreciated at direct lighting angles. The Proof mintage for this issue is up in the air, as the *Guide Book* and the Snow reference (2009) each give an estimate of 370 pieces, but the Bowers reference on the series calls for an estimated 800 to 1,000 pieces. Mintage presumptions aside, the 1864 copper-nickel is a rare issue in the finer Gem Proof grades, and we suspect the bidding will be fast and furious for this specimen.

PCGS# 82265. NGC ID: 229E.

NGC Census: 9; 3 finer in this category (Proof-67 \bigstar Cameo finest).

1166

1864 Copper-Nickel. Proof-64 (PCGS). CAC. OGH—First Generation. Lovely tan-rose surfaces exhibit reflective fields supporting satiny, fully impressed devices. Premium Choice Proof quality for the final copper-nickel cent in U.S. coinage history.

PCGS# 2265. NGC ID: 229E.

1167

1864 Bronze. L on Ribbon. MS-65 RB (PCGS). Far more Red than Brown, this minimally patinated example retains nearly full mint color in vivid orange-gold. It is sharply struck with a smooth, satiny texture that would accept nothing less than a Gem Uncirculated rating.

PCGS# 2080, NGC ID: 227M.

1168

1866 MS-64 RD (NGC). A bright, vivid example with pinkish-rose highlights on reddish-orange surfaces. The scarcity of early date bronze Indian cents in full Red Mint State confirms the desirability of this sharply struck and satiny 1866.

PCGS# 2085. NGC ID: 227P.

1169

1870 FS-901. Shallow N. MS-65+ RB (PCGS). CAC. Pretty rose-orange color with minimal muting to explain the RB color designation from PCGS. The surfaces are satiny, smooth and possessed of razor sharp striking detail to all areas. The Shallow N reverse hub variety of this issue is attributed to James Barton Longacre, the original designer of the Indian cent. Its replacement, the Bold N hub variety, was prepared by Chief Engraver William Barber and introduced in 1870. Even so, the Shallow N remained in use for circulation strikes for three more years. This variety is scarce for the 1870, 1871 and 1872 circulation strikes, most survivors of which are Bold N examples.

PCGS# 2098. NGC ID: 227U.

1170

1872 MS-63 RB (PCGS). OGH—First Generation. Even medium brown patina on the reverse, while the obverse is more colorful with splashes of deep copper-rose on original mint orange color. Both sides are sharply struck with a lustrous, generally smooth appearance that very close to an MS-64 grade. This conditionally challenged early date bronze Indian cent issue represents a particularly significant find when mint red color remains, as here.

PCGS# 2104. NGC ID: 227W.

1171

1875 MS-65 RB (NGC). OH. A silky smooth Gem with abundant mint orange color remaining. Both sides are attractively toned in a soft mottling of olive-copper and deep lilac. Razor sharp striking detail and bountiful satin luster add to the appeal of this premium quality example.

PCGS# 2121. NGC ID: 2282.

1877 AU-55 BN (NGC). A richly and originally toned deep copper-brown example with sharp to full striking detail to virtually all design elements. Pleasingly smooth, this is a highly desirable Choice AU to represent the key date 1877 Indian cent.

PCGS# 2127. NGC ID: 2284.

1173

1884 Proof-66+ RD (PCGS). CAC. Lovely deep rose surfaces are as smooth and vivid as the day of striking. Fully defined, as well, and a delight to behold.

PCGS# 2341. NGC ID: 22A5.

PCGS Population: 3; 11 finer in this category (all Proof-67 RD). CAC Population: 6; 5. The former total includes coins certified both Proof-66 RD and Proof-66+ RD.

1174

1884 Proof-65 RD (PCGS). OGH. Gorgeous deep rose surfaces are as bright and fresh as the day the coin emerged from the dies. A thoroughly PQ example that is sure to sell for a strong premium.

PCGS# 2341. NGC ID: 22A5.

1175

1886 Type I Obverse. MS-64 RD (PCGS). OGH—First Generation. A lovely medium rose-orange example with razor sharp striking detail and lively mint luster. Smooth and inviting enough to suggest an even higher numeric grade.

PCGS# 2156. NGC ID: 272Y.

1176

1888 Proof-66+ RB (NGC). Exquisite satin to reflective surfaces are silky smooth in appearance and readily uphold the validity of the near-Superb grade from NGC. Awash in deep, vivid rose-orange color, this fully struck and expertly preserved specimen will please even the most discerning Proof type or date collector.

PCGS# 2352. NGC ID: 22AA.

NGC Census: 1; 0 finer in this category. The corresponding PCGS Population is also 1/0.

1177

1899 Proof-67 RB (PCGS). CAC. This delightful Superb Gem really needs to be seen to be fully appreciated. Both sides exhibit a base of warm olive-brown patina from which iridescent colors of salmonpink and orange-apricot shine forth powerfully as the surfaces rotate under a light. Fully struck and exceptionally well preserved, the strongest bids are in order for this spectacular Proof 1899 cent.

PCGS# 2385. NGC ID: 22AM.

PCGS Population: 11; with a single Proof-67+ RB finer in this category. CAC Population: 7; 0.

1178

1899 Proof-65 RD (PCGS). OGH. Exceptional deep orange surfaces are smooth and attractive enough to evoke thoughts of a Prood-66 RD grade. Worthy of a close look, and also strong bids.

PCGS# 2386. NGC ID: 22AM.

Virtually Perfect Mint State 1900 Cent

1179

1900 MS-67+ RD (PCGS). Simply outstanding Superb Gem quality for both high grade type collectors and advanced Indian cent specialists. Vivid medium rose surfaces are sharply struck with a rich satin texture. The faintest salmon-pink shades have gathered at the peripheries to add additional eye appeal. Smooth and inviting. Struck to a sizable quantity of 66,831,502

circulation strikes, though precious few survivors are as expertly preserved as the coin offered here. This piece is among the finest known of the issue, with none graded finer at PCGS.

PCGS# 2207. NGC ID: 228V. PCGS Population: 3; 0 finer.

Awe-Inspiring Ultra Gem 1902 Indian Cent

1180

1902 MS-68 RD (PCGS). A phenomenal coin that is not only tied for CC#1 for the circulation strike 1902, but it also one of the finest Indian cents of all types and issues certified by PCGS. It is a virtually pristine coin with a smooth satin texture that is devoid of even the most trivial blemishes. Fully original mint color is generally medium rose with blushes of even more vivid reddish-orange in a few isolated peripheral areas. Striking detail is impressively sharp and the eye appeal is nothing short of outstanding. Simply put it would be difficult, if not impossible, to imagine a more delectable example of the 1902 Indian cent. One of the high mintage circulation strike deliveries from the early years of the 20th century, the 1902 is a mainstay in circulated caches of Indian cents held by both collectors and the general public. Mint State survivors of this 87.3 million piece delivery are also common in an absolute sense and can be had with ease even through the MS-65 RD grade level. Examples in MS-66 RD are scarce, however, and Superb Gems such as this are major condition rarities that usually appear at auction only once in a very long while. When they do appear, examples at the full Red Superb level are usually in MS-67 RD or, far less often, MS-67+ RD. PCGS reports only two grading events in MS-68 RD and, assuming these represent two distinct coins, neither has ever sold at auction. When one further considers that the PCGS population in MS-68 for the Indian cent series in its entirety is a mere seven coins, the awesome condition rarity of this Ultra Gem 1902 is beyond doubt. It is eagerly awaiting inclusion in the finest circulation strike Indian cent set on the PCGS Registry, in which it will serve as a leading highlight.

PCGS# 2213. NGC ID: 228X.

PCGS Population: 2; 0 finer. PCGS has certified only seven Indian cents of all types and issues as MS-68.

1909-S Lincoln. V.D.B. MS-64 RD (PCGS). With tinges of pale gold and olive to otherwise medium orange surfaces. Satiny in texture and sharply struck, this is a handsome Choice Uncirculated example of a perennially popular Lincoln cent issue.

PCGS# 2428. NGC ID: 22B2.

1182

1909-S Lincoln. V.D.B. MS-64 RB (PCGS). Handsome goldenbrown surfaces with subtle pinkish-rose highlights at the borders. The fabled 1909-S V.D.B cent, offered here in attractively original and numismatically desirable Choice Mint State preservation.

PCGS# 2427. NGC ID: 22B2.

1183

1909-S Lincoln. V.D.B. MS-62 RB (NGC). CAC. Lustrous and sharply struck, warm orange-brown surfaces reveal only trivial carbon flecks as grade-defining features. Handsome Mint State preservation for this key date Lincoln cent issue.

PCGS# 2427. NGC ID: 22B2.

1184

1909-S Lincoln. V.D.B. AU-55 BN (NGC). Here is an example of the perennially popular 1909-D V.D.B. "penny" in boldly and original toned Choice AU preservation. A find for Lincoln cent specialists, as well as the many Americans who spent at least some portion of their childhood searching for an example of this key date issue to place in their Lincoln cent coin album.

PCGS# 2426. NGC ID: 22B2.

1185

1909-S Lincoln. MS-65 RD (PCGS). CAC. Light golden-apricot color greets the viewer from smartly impressed, satin to softly frosted surfaces. A key date Lincoln cent in highly desirable full Red Gem Uncirculated preservation.

PCGS# 2434. NGC ID: 22B4.

1186

1909-S Lincoln. MS-65 RD (PCGS). OGH—First Generation. A fully lustrous and satiny example with original color in warm medium orange.

PCGS# 2434. NGC ID: 22B4.

1187

1909-S Lincoln. MS-65 RD (PCGS). OGH—First Generation. An intensely lustrous, frosty-textured Gem dressed in mottled pinkish-apricot and pale rose colors. Exceptionally vivid in appearance with a sharp strike and nicely composed surfaces.

PCGS# 2434. NGC ID: 22B4.

1188

1914 Proof-66 RB (PCGS). CAC. Nearly in the full Red category, this premium quality specimen exhibits minimal iridescent lilac-rose and pale pink highlights to otherwise dominant orange-gold mint color. Fully struck with a serene satin texture, astute collectors would be wise to enter the strongest bids for this offering.

PCGS# 3319. NGC ID: 22KX.

PCGS Population: 45; 14 finer in this category (Proof-67+ RB finest). CAC Population: 23; 6.

1189

1914-D MS-63 RB (NGC). An issue that needs no introduction among Lincoln cent specialists, the key date 1914-D enjoys strong demand in all Mint State grades, especially when some original mint color is retained. This is just such a coin, its otherwise medium rose surfaces revealing only minimal muting to confirm the RB designation from NGC. Fully struck with a soft satin texture.

PCGS# 2472. NGC ID: 22BH.

1914-D AU-55 BN (NGC). CAC. Lovely antique copper-brown surfaces are predominantly lustrous with a delightful satin texture. Near-fully defined, as well, and about as nice as they come for a Choice AU survivor of the key date 1914-D cent.

PCGS# 2471. NGC ID: 22BH.

1191

1914-S MS-64 RB (PCGS). CAC. OGH—First Generation. Lustrous tan-rose surfaces exhibit tinges of gold and apricot as the coin dips into a light. Although overshadowed by its identically dated Denver Mint counterpart, the 1914-S is a scarce and conditionally challenged early Lincoln cent issue in its own right.

PCGS# 2475. NGC ID: 22BJ.

1192

1915-S MS-65 BN (NGC). OH. A satiny and lustrous Gem with subtle remnants of pale gold color to otherwise olive-brown surfaces. The toning is light and iridescent in quality, the strike sharply executed throughout the design.

PCGS# 2483, NGC ID: 22BM.

1193

1918-S MS-65+ RB (PCGS). CAC. A predominantly deep orange example with minimal toning in iridescent olive-brown. The 1918-S has a mintage of 34,680,000 pieces, heavily circulated survivors of which are plentiful due to widespread hoarding during the 1940s and 1950s. Extremely Fine and About Uncirculated survivors are scarce, the same being true of low end Mint State coins. This issue is rare in Gem Mint State, due to a combination of inadequate striking quality and poor surface preservation. In fact, the typical 1918-S encountered in today's market exhibits blurry definition to the devices from having been struck from worn dies. That the present example is both overall sharply struck and expertly preserved defines it as a conditionally rare survivor of this challenging issue.

PCGS# 2511. NGC ID: 22BX.

PCGS Population: 1; 0 finer in this category.

1194

1920-S MS-64 RD (NGC). Blended mint orange color and light olivebrown toning provides an attractively original appearance for this piece. It is also quite well struck for a 1920s San Francisco Mint cent with just a touch of softness in isolated peripheral areas. Sure to please discerning Lincoln cent enthusiasts.

PCGS# 2528. NGC ID: 22C5.

1195

1922-D MS-66 BN (NGC). This semi-key date Lincoln cent is a highly lustrous, smooth looking Gem with abundant eye appeal. Pretty cobalt blue, antique gold and medium rose colors enliven dominant antique copper patina.

PCGS# 2537. NGC ID: 22C8.

NGC Census: 4; 0 finer in this category.

1196

1922 No D FS-401, Die Pair III. Weak Reverse. MS-63 RB (NGC).

CAC. This handsome piece is awash in a bold blend of medium pinkish-rose color and dusky gray-brown patina. An ever-popular variety, the 1922 "Plain" has been adopted by Lincoln cent specialists as an integral part of the series, and pleasing examples are eagerly sought in today's market regardless of certified grade. The most popular of all are the pieces struck from Die Pair II, with a weak obverse and a strong reverse, followed closely by the die pair offered herein. Examples of all die pairs are particularly desirable when they retain at least some of the original mint red color. Coveted CAC approval further confirms the significance of this condition rarity.

PCGS# 2541. NGC ID: 2U6G.

NGC Census: 4; 0 finer in this category. CAC Population: 4; 4.

1197

1929-S MS-66 RD (PCGS). A satiny pinkish-rose Gem with bold luster and excellent eye appeal. Benefiting from both a generous mintage of 50,148,000 pieces and widespread hoarding, the 1929-S is one of the most plentiful pre-1935 San Francisco Mint Lincoln cents in terms of total number of coins extant. As with many mintmarked issues from the Roaring Twenties, however, the 1929-S is plagued by poor striking detail from the extensive use of worn dies. This is a superior quality example in all regards that would fit comfortably into an advanced Lincoln cent set.

PCGS# 2602. NGC ID: 22CW.

1955 FS-101. Doubled Die Obverse. MS-64 RB (NGC). Scarce and desirable Red and Brown preservation for this perennially popular Lincoln cent variety. Satiny surfaces retain an uncommon amount of original, vivid medium orange mint color. So much so, in fact, that only the lightest wisps of lilac-brown iridescence preclude a full Red designation. Smartly impressed with razor sharp to full striking detail throughout. As an expertly produced and uncommonly well preserved example of the fabled 1955 DDO Lincoln cent, we expect strong competition for this premium Choice Mint State coin from advanced Lincoln cent enthusiasts.

PCGS# 2826. NGC ID: 22FG.

1199

1955 FS-101. Doubled Die Obverse. MS-63+ RB (NGC). Satiny and boldly impressed surfaces are awash in handsome reddish-rose color that provides an unusually vivid appearance for a 1955 DDO cent. PQ for the variety, and sure to have no difficulty finding it way into an advanced Lincoln cent set or more expansive collection of Mint blunders.

PCGS# 2826. NGC ID: 22FG.

1200

1955 FS-101. Doubled Die Obverse. MS-63 RB (PCGS). CAC. Seldom do Red and Brown examples of this conditionally challenged DDO variety retain as much mint color as this premium quality example. Vivid rose-orange color dominates the in hand appearance, in fact, with only the lightest mellowing of color that is not readily evident at all viewing angles. With a sharp strike and freedom from all but a few faint flyspecks, this thoroughly PQ example is sure to sell for a strong bid to a discerning Lincoln cent variety enthusiast.

PCGS# 2826. NGC ID: 22FG.

1201

1955 FS-101. Doubled Die Obverse. MS-62 RB (PCGS). CAC. The presence of considerable mint orange color sets this premium quality example apart from the majority of Mint State 1955 DDO cents in numismatic hands. Generous gray-brown patina is also noted, the surfaces with a satiny texture that is pleasingly smooth in hand.

PCGS# 2826. NGC ID: 22FG.

1202

1955 FS-101. Doubled Die Obverse. AU-55 (PCGS). CAC. A thoroughly PQ, fully original Choice AU example of this perennially popular Lincoln cent variety, this coin is sure to sell for a nice premium to a discerning numismatist.

PCGS# 2825. NGC ID: 22FG.

1203

1972 FS-101. Doubled Die Obverse. MS-66+ RD (PCGS). Smooth satin surfaces with medium rose peripheral highlights to otherwise dominant light pinkish-red mint color. After only the 1955 Doubled Die Obverse, the 1972 FS-101 is the most famous Doubled Die variety in the entire Lincoln cent series. There are actually several Doubled Die Obverse varieties known for this issue, but FS-101 is by far the most visually dramatic and commands the strongest premium among collectors. The first examples had been confirmed by numismatists by July of 1972, at the latest, with the greatest distributions coming in Indiana and Pennsylvania. By August of that year this variety was so well known that it was already trading on dealer teletypes. The early discovery, widespread publication in the hobby and extensive releases resulted in many Mint State examples being preserved. So many, in fact, that the 1972 FS-101 is readily obtainable in grades up to and including MS-66 RD. However, premium Gems like the present coin are surprisingly rare.

PCGS# 2950. NGC ID: 22GU.

TWO-CENT PIECES

Full Red Gem Mint State 1864 Small Motto Two-Cent Piece Noteworthy Condition Rarity

1204

1864 FS-401. Small Motto. MS-65 RD (PCGS). CAC. OGH— First Generation. This coin offers amazing quality and eye appeal for this key hub type from the first year of two-cent coinage. The surfaces are exceptionally vivid rose-red, with tinges of pale apricot and salmon-pink. Richly frosted and razor sharp, the strike is ideally centered and well executed. Exceptionally well preserved, there is not much separating this coin from an even higher Gem Mint State grade.

The two-cent piece made its debut in 1864 at a time when gold and silver coinage had long since been absent from circulation in the Eastern and Midwestern states due to the economic turmoil and uncertainty of the Civil War. Struck in bronze, the new denomination was not subject to hoarding and, as such, initially proved popular in commerce. After the War, however, production rapidly dropped off until the two-cent piece was ultimately consigned to the history books in 1873.

While plans for the new denomination were being finalized, Secretary of the Treasury Salmon P. Chase had heard the appeals of Reverend Mark R. Watkinson of Pennsylvania and decided that the new two-cent coin would include a statement of faith, ultimately settling on IN GOD WE TRUST. The new coin was ready by 1864 and the first versions introduced bore the motto on the obverse in small letters on a ribbon above the shield, flanked by laurel sprays. Not long after its debut, the obverse hub was modified to render the letters somewhat larger, and this hub became the standard for the rest of the series. The Small Motto variety is an important rarity. Scarce in circulated grades, the 1864 Small Motto is very scarce in Mint State with either a BN or RB color designation. Full Red coins are very rare, particularly in the finest Mint State grades, as here.

PCGS# 3581. NGC ID: 22N8.

PCGS Population: 21; 11 finer in this category (MS-66 RD finest). CAC Population: 7; 1.

1864 Large Motto. Proof-66 RB (PCGS). CAC. An exquisite Gem that readily reveals a reflective finish in the fields as the surfaces dip into a light. The design elements are satiny in texture and fully defined, and the entire package is dressed in an outstanding blend of deep orange mint color and iridescent copper-brown patina. Although not in the same rarity league as the Proof Small Motto, the 1864 Large Motto two-cent piece in this format is conditionally challenging in its own right and can be very challenging to locate as a Gem. In addition to condition rarity the present specimen offers outstanding eye appeal.

PCGS# 3622. NGC ID: 274T.

PCGS Population: 15; with a single Proof-67 RB finer in this category. CAC Population: 8; 0.

1206

1864 Large Motto. Proof-64 RB (PCGS). From the first year of Proof two-cent coinage comes this vivid, predominantly mint orange specimen. Minimally toned in iridescent rose-brown, the surfaces reveal only a couple of widely scattered carbon flecks that preclude an even higher grade.

PCGS# 3622. NGC ID: 274T.

1207

1864 Large Motto. MS-66+ RD (NGC). CAC. Glowing pinkishorange surfaces with wisps of salmon-pink iridescence. The texture is smooth and satiny, and the technical quality is equally strong in the areas of strike and preservation. The two-cent piece made its debut in 1864 at a time when gold and silver coinage had long since been absent from circulation in the Eastern and Midwestern states due to the economic turmoil and uncertainty brought about by the Civil War. Struck in bronze, the new denomination was not subject to hoarding and, as such, initially proved popular in commercial channels. Mintages were correspondingly high in 1864 and 1865, but with the end of the Civil War in the latter year, production fell off rapidly through the series' end in 1873. The 1864 is the most plentiful date in this series, and as a first year issue it is understandably popular for type purposes. Most survivors of the year's Proof and circulation strike deliveries are examples of the Large Motto hub variety, which replaced its short-lived Small Motto predecessor that the Mint used to strike the first few Proofs and a limited number of circulation strikes (Walter Breen, 1988, says only "a few thousand"). Although plentiful in an absolute sense, the 1864 Large Motto is rare in the finest Mint State grades, as here. Indeed, this lovely premium Gem comes highly recommended for inclusion in an advanced cabinet.

PCGS# 3578. NGC ID: 22N9.

NGC Census: 1; 3 finer in this category (all MS-67 RD).

1208

1864 Large Motto. MS-65 RD (PCGS). OGH. With full mint luster, vivid color and a sharply executed strike, this wonderfully original Gem will be just right for a Mint State type set. Popular first year two-cent issue!

PCGS# 3578. NGC ID: 22N9.

1209

1865 Plain 5. MS-65 RB (PCGS). CAC. Abundant medium rose mint color remains to surfaces that are also originally toned in light olive-brown. An attractive Gem Uncirculated type candidate from the second year of this odd denomination series.

PCGS# 38248. NGC ID: 22NA.

1210

1867 Proof-64 RD (PCGS). A fully original, visually appealing specimen with fully rendered design elements and modestly reflective fields. Delicate silvery overtones do not detract from vivid medium orange mint color.

PCGS# 3635. NGC ID: 274W.

1211

1869 Proof-65 RB (NGC). CAC. OH. Dominant antique copper patina on the reverse gives way to particularly vivid colors of pinkishorange, medium rose, blue-gray and antique gold on the obverse. Some of these colors exist as faint undertones on the reverse, evident as that side of the coin dips into a light. As expertly preserved, carefully preserved and visually appealing as one is likely to find in a survivor of this middle date Proof two-cent issue.

PCGS# 3604. NGC ID: 22ND.

1212

1871 MS-65 RB (PCGS). CAC. Sharply struck with pretty reddishrose highlights to dominant deep orange mint color. The penultimate circulation strike in the two-cent series, the 1871 is one of the scarcer issues of its type with a mintage of 721,250 pieces. It can be readily found in lower Mint State grades, but is a noteworthy rarity as a Gem.

PCGS# 3610. NGC ID: 22NF.

1213

1872 Proof-66 RD (NGC). A simply beautiful specimen. Dominant rose-orange color yields to warmer undertones of deep olive. Both sides exhibit full striking detail and the features are exceptionally smooth and well preserved. Given that the circulation strike 1872 two-cent piece is a key date issue with just 65,000 coins struck, this beautiful and conditionally rare Proof should have no difficulty finding its way into a high grade date set or advanced type collection.

PCGS# 3650. NGC ID: 2752.

NGC Census: 8; 0 finer in this category.

1214

1872 Proof-66 RB (PCGS). CAC. Beautiful surfaces exhibit iridescent golden-brown toning with plenty of original mint color in pinkish-apricot shining forth as the coin rotates under a light. Fully struck, as befits the method of manufacture, with simply outstanding eye appeal. One of "950+" Proofs of the date struck according to the *Guide Book* figure, although a more encompassing estimate is perhaps in the range of 850 to 1,100 pieces. Either way, precious few survivors are as expertly preserved and visually appealing as the offered coin.

PCGS# 3649. NGC ID: 2752.

PCGS Population: 42; 6 finer in this category (Proof-67 RB finest). CAC Population: 25; 0.

1215

1873 Close 3. Proof-63 RB (PCGS). OGH. A generally medium brown example with traces of faded mint orange color outlining many of the design elements. This popular variety is the so-called original striking of the Proof-only 1873 two-cent piece.

PCGS# 3652. NGC ID: 2753.

NICKEL THREE-CENT PIECES

1216

1877 Proof-66 (PCGS). CAC. OGH. Brilliant and modestly cameoed in finish with full, razor sharp detail throughout the design. The lowest mintage date in the nickel three-cent series, and a Proof-only affair, the 1877 was produced to the extent of just 900 pieces. Few survivors that we have handled in recent sales are as desirable as this premium quality Gem.

PCGS# 3773. NGC ID: 275X.

NICKEL FIVE-CENT PIECES

Stunning Ultra Gem Proof 1869 Shield Nickel

1217

1869 Proof-68 (PCGS). One look at this beautiful specimen and it will be obvious why it is the single finest certified Proof 1869 nickel listed at PCGS. Peripherally toned in iridescent goldenapricot, reddish-pink and powder blue, both sides exhibit softer silver-gray in the centers. Virtually all design elements are fully struck, and reflective surfaces are serene from the rims to the centers. Dating to an era when the United States Mint had not yet begun to record the number of Proof minor coins struck each year, the mintage of the Proof 1869 Shield nickel is unknown. We do know, however, that at least 600 coins were produced for distribution as part of the year's silver Proof sets. Additional

specimens were undoubtedly prepared for inclusion in three-piece minor coin Proof sets, explaining Q. David Bowers' (2006) estimate of 850 to 1,100 Proofs struck in all. While available by the standards of the early Proof Shield nickel series, most are poorly struck or show obvious signs of (mis)handling. The present example is a noteworthy exception to the rule in terms of surface preservation, and it is worthy of the strongest bids. Outstanding!

PCGS# 3823. NGC ID: 276K.
PCGS Population: 1; 0 finer.

1218

1869 MS-66+ (PCGS). CAC. Among the finest circulation strike 1869 nickels extant, this lovely Superb Gem delivers uncommonly sharp detail for a circulation strike coin of this type. Obverse definition is full, in fact, while that on the reverse is nearly full with only a few stars exhibiting trivial softness to their radial lines. The

texture is smooth and satiny with enhancing blushes of iridescent golden-apricot toning. A Condition Census beauty that will appeal to series specialists as well as advanced type collectors.

PCGS# 3796. NGC ID: 22P3.

PCGS Population: 5; 0 finer. CAC Population: 10; 0. This total includes coins certified both MS-66 and MS-66+.

1870 Proof-65 Cameo (PCGS). CAC. Delightful light silver surfaces are fully struck with pleasing contrast between reflective fields and satiny motifs.

PCGS# 83824. NGC ID: 276L.

1220

1871 Proof-67 (NGC). A virtually pristine condition rarity that will appeal to quality conscious specimen type and date collectors. Lightly toned in iridescent champagne-gold, more so on the obverse than reverse. Both sides are fully struck with a highly reflective finish. Exquisite!

PCGS# 3825. NGC ID: 276M. NGC Census: 5; 0 finer in this category.

1221

1872 VP-015. Doubled Die Obverse. MS-65 (NGC). Direct lighting calls forth playful iridescent toning in pale champagne-pink and golden-olive. The ring at the top of the shield and several of the leaves near the cross reveal doubling when the obverse is studied with the aid of a loupe.

PCGS# 3799. NGC ID: 22P6.

1222

1876 MS-65 (PCGS). CAC. OGH—First Generation. Soft sating luster flows over silver-gray Gem surfaces. Well struck with most design elements sharply to fully rendered.

PCGS# 3805. NGC ID: 22PB.

1223

1877 Proof-64 (NGC). CAC. A golden-toned beauty that also sports full striking detail and smooth, Choice surfaces. From a popular Proof-only issue with a mintage of just 900 pieces.

PCGS# 3831. NGC ID: 276U.

1224

1878 Proof-66 (NGC). From a popular Proof-only Shield nickel issue comes this fully struck, satin to semi-reflective beauty dressed in vivid champagne-gold iridescence.

PCGS# 3832. NGC ID: 276V.

1225

1885 Proof-65 (PCGS). CAC. OGH—First Generation. Dusted with silver-gray and champagne-gold, this is a wonderfully original Proof to represent this key date in the Liberty Head nickel series. Fully struck with a soft, satiny texture that is just a few wispy carbon flecks away from an even higher Gem grade.

PCGS# 3883. NGC ID: 277T.

1226

1885 Proof-64 (PCGS). A dusting of pale silver is a bit more pronounced on the reverse. Both sides are fully struck with a desirable satin to modestly semi-reflective finish. One of the more eagerly sought Proof Liberty Head nickels, the 1885 is associated by date with one of the key circulation strike issues in this series.

PCGS# 3883. NGC ID: 277T.

1227

1886 Proof-66 Cameo (PCGS). Untoned and nicely cameoed in finish, this is a lovely Gem Proof to represent one of the more eagerly sought dates in the Liberty Head nickel series. The circulation strike 1886 is a low mintage affair, placing increased collector pressure on survivors of the year's 4,290-piece Proof issue.

PCGS# 83884. NGC ID: 277U.

PCGS Population: 25; 13 finer in this category (Proof-67+ Cameo finest).

1228

1913-D Type I. MS-67 (PCGS). CAC. Exquisite satin surfaces are boldly to sharply struck with a full endowment of smooth, billowy mint luster. Blushes of champagne-gold and powder blue iridescence provide further appeal. A coin that would make a fine addition to an advanced type collection or Registry Set.

PCGS# 3916. NGC ID: 22PX.

1229

1918/7-D FS-101. Fine-12 (NGC). A generally silver-gray example with outlines of olive-russet to the motifs. This is scarce and desirable overdate at all levels of preservation, especially when the 7 underdigit is bold, as here.

PCGS# 3939. NGC ID: 22RJ.

1230

1925-D MS-64+ (PCGS). CAC. Seldom do Mint State survivors of this challenging Denver Mint issue possess the generally bold striking detail and smooth satin surfaces that characterize the present example. So well produced and preserved is this piece, in fact, that were it not for minor softness to the bison's head and foreleg PCGS may have returned a full Gem Uncirculated grade. A coin that offers excellent value for the astute Buffalo nickel enthusiast.

PCGS# 3955. NGC ID: 22S3.

1231

1929-D MS-66+ (**PCGS**). Crescents of steel-russet and burnt-orange iridescence line the lower obverse and upper reverse borders of this otherwise brilliant Gem. A sharp strike and bountiful satin luster are also worthy of praise.

PCGS# 3967. NGC ID: 22SF.

1936 Satin Proof-66 (PCGS). Fully struck specimen with a soft satin texture on both sides. The surfaces are brilliant apart from a dusting of pale silvery iridescence, and they are as smooth as would be expected for the assigned grade. The scarcer of the two late date issues in the Proof Buffalo nickel series, the 1936 is eagerly sought in both Satin and Brilliant formats.

PCGS# 3994. NGC ID: 278X.

1233

1936 Satin Proof-64 (PCGS). OGH. A fully struck, otherwise silvergray specimen with a dusting of pale iridescent gold toning that provides further appeal.

PCGS# 3994. NGC ID: 278X.

1234

1936 Brilliant Proof-68 (PCGS). Razor sharp devices and appreciably mirrored fields are dressed in warm sandy-gold patina. Champagne-apricot, pale pink and powder blue undertones add to the visual appeal. A truly remarkable example. The 1936 is the first Proof Buffalo nickel produced since 1916. Rarer than the only other Proof Buffalo nickel of its era — the 1937 — the 1936 has a mintage of 4,420 pieces. Nearly two-thirds of the coins struck were made with a satin finish, though the number of Brilliant and Satin Proofs known for the date are about equal in today's numismatic marketplace. Many collectors choose to own one of each style.

PCGS# 3995, NGC ID: 278Y.

PCGS Population: 15; 3 finer (Proof-69 finest).

1235

1936 Brilliant Proof-66 (NGC). Bright and brilliant surfaces are adorned in lovely iridescent champagne-gold, powder blue and pale lilac. The 1936 is eagerly sought as the rarer of the two late date Proof Buffalo nickel issues.

PCGS# 3995. NGC ID: 278Y.

1236

1937 Proof-67+ (PCGS). A bright, brilliant, ice-white Ultra Gem to tempt the quality conscious Proof type collector. Fully struck with reflective fields supporting more satin-textured motifs, this is certainly one of the nicest examples of both the type and issue that your cataloger (JLA) has handled in recent sales.

PCGS# 3996. NGC ID: 278Z.

1237

1937 Proof-67+ (NGC). CAC. Brilliant and beautiful, this expertly produced and carefully preserved specimen would do equally well in a high grade Proof type or date set.

PCGS# 3996. NGC ID: 278Z.

1238

1937 Proof-66 (PCGS). OGH. This lovely upper end Gem comes highly recommended for inclusion in a Proof type set. Fully struck with a dusting of light, even, iridescent-gold toning.

PCGS# 3996. NGC ID: 278Z.

1239

1937 Proof-66 (NGC). OH. A silver-tinged specimen with intense mint reflectivity shining forth nicely under a light.

PCGS# 3996. NGC ID: 278Z.

1240

1937 Proof-64 (PCGS). OGH. Lightly toned silver-gray with a full, razor sharp strike.

PCGS# 3996. NGC ID: 278Z.

1241

1937-D FS-901. 3-Legged. MS-63 (PCGS). CAC. A thoroughly appealing example that is far superior to the typically offered Mint State 3-Legged nickel in today's market. Impressively smooth in hand with a soft satin texture, the silver-gray surfaces are enhanced by pale golden highlights. Remarkably sharp striking detail is most notable on the reverse at the bison's head, shoulder and tail. A perennially popular Buffalo nickel variety in superior Choice Uncirculated preservation that is sure to result in a strong premium being paid by the winning bidder.

PCGS# 3982. NGC ID: 22SX.

1937-D FS-901. 3-Legged. MS-62 (NGC). This is a pleasing example for the assigned grade with an overall bold strike that includes ample detail to the bison's head, shoulder and tail. Both sides exhibit light toning in champagne-gold to a smooth satin texture, the appearance not all that far from what one would expect to see at the Choice Uncirculated level. Certainly a desirable Mint State example of this perennially popular Buffalo nickel variety.

PCGS# 38475. NGC ID: 22SX.

1243

1937-D FS-901. 3-Legged. MS-61 (NGC). Satiny pearl-gray surfaces with a suitably bold strike overall for the popular 3-Legged Buffalo variety. Always in demand, especially in Mint State.

PCGS# 3982. NGC ID: 22SX.

Stellar 1938-D Buffalo Nickel

1244

1938-D Buffalo. MS-68 (PCGS). CAC. Delightful toning in iridescent gold and pastel colors decorates both sides of this virtually pristine Superb Gem. Possessed of intense satin luster, this sharply struck and expertly preserved example would make a fitting addition to either a high-quality type set or the finest Buffalo nickel collection.

Struck in the final year of the Buffalo nickel series. In 1938 the mints at Philadelphia, Denver, and San Francisco were churning

out the new Jefferson nickel type, but Denver still managed to produce over seven million Buffalo nickels as well alongside the nearly 5.4 million Jefferson five-cent pieces it struck. Denver was alone in its production in the final year of James Earle Fraser's beloved Buffalo nickel design type. Beautiful Gems such as that offered here accelerate rapidly beyond their "common" date status when they appear at auction.

PCGS# 3984. NGC ID: 22SZ.

PCGS Population: 50; 3 finer. CAC Population: 11; 0.

HALF DIMES

1245

1795 LM-3. Rarity-5. AU Details—Cleaned (PCGS). Pretty steelolive and cobalt blue peripheral toning adorns both sides, enhancing the appearance of this more affordable 1795 half dime. It is well struck for an early half dime with sharp to full detail to most design features. A touch of glossiness explains the PCGS qualifier, but this is still a pleasing example with much to offer the high grade type or variety

collector. The 1795 Logan-McCloskey 3 die pairing is distinctive due to a bisecting crack through the letter R in LIBERTY, which no doubt prompted this obverse to be replaced. As a consequence, this variety is scarce in all grades.

PCGS# 4251. NGC ID: 22ZV.

Notable Mint State 1795 Half Dime

1246

1795 LM-10. Rarity-3. MS-61 (PCGS). A classic early U.S. Mint silver issue in scarce and desirable Mint State preservation. Dusted with pale pinkish-silver patina, both sides reveal soft satin luster under a light. The strike itself is well executed by the standards of the type with softness largely confined to the high points of the central design elements, some of which admittedly is light rub that helps to explain the MS-61 grade from PCGS. The upper left obverse border is nearly devoid of detail with stars 5 to 7 more or less indistinct. This is due to a concentration of fairly deep adjustment marks (as made) in the opposing area of the reverse border which largely obscures the letters UN in UNITED. These adjustment marks also interfered with metal flow on the opposite side of the planchet, explaining the lack of detail at the upper left obverse border. There are no handling marks or other post-production blemishes of consequence and, were it not for the aforementioned rub, the graders at PCGS would have probably returned a slightly higher Mint State rating. A prominent cud break above the letters TY in LIBERTY and star 9 confirms a late die state for the 1795 LM-10 attribution.

Half dimes were the first denomination struck by the United States Mint. After the "small beginning" of half dismes in 1792, the next issue of half dimes came a couple of years later with the Flowing Hair type designed by Robert Scot. While the dies for the 1794 half dimes were ready by year's end, they were not put into service until 1795. All told, 86,416 Flowing Hair half dimes were struck, of which 78,660 were dated 1795. In 1796, the obverse was replaced with the Draped Bust motif.

With Liberty's distinctive flowing hair and the delicate small eagle on the reverse, this design type has long been a favorite among devotees of early American coinage. Demand among type collectors has remained steady over the years and has put pressure on the 1795-dated pieces. The denomination saw heavy use in commerce and the vast majority of specimens are found at lower circulated grade levels, and many are damaged or otherwise impaired. While PCGS estimates approximately 1,750 pieces are known, less than one-tenth are Mint State.

PCGS# 4251. NGC ID: 22ZV.

From the Cardinal Collection Educational Foundation.

DIMES

1247

1822 JR-1, the only known dies. Rarity-3+. AG-3 (PCGS). CAC. The mintage of 100,000 pieces is clearly incorrect as the key date 1822 dime has never been available in any quantity; it would be more likely that half or fewer that number were actually coined. This example would be a prize worth capturing as these are infrequently offered at any grade level, and then again many of the 200 to 250 pieces extant are impaired.

PCGS# 4497. NGC ID: 236Z. CAC Population: 36 in all grades.

1248

1824/2 JR-1. Rarity-1. Flat Top 1 in 10 C. VF-35 (PCGS). CAC. Warmly toned in pewter and dove-gray, both sides also deliver bold Choice VF detail and an impressively smooth texture to the surfaces.

PCGS# 4502. NGC ID: 2373.

LEGENDARY COLLECTIONS | LEGENDARY RESULTS | A LEGENDARY AUCTION FIRM

Elusive Gem Proof 1849 Liberty Seated Dime One of Four Specimens Confirmed

1249

1849 Fortin-107. Rarity-7+. Proof-66 (PCGS). CAC. OGH. Simply put, this is one of the rarest and most desirable coins in this sale. It is also beautiful, with both sides displaying a blend of lavender-gray and olive-charcoal patina. Iridescent undertones of antique gold, cobalt blue and salmon-pink are more vivid and varied on the obverse. The strike is razor sharp throughout, and the fields offer appreciable reflectivity under a light. Expertly preserved, visually appealing and undeniably rare, this coin would serve as a highlight in the finest collection of Proof Liberty Seated coinage.

Struck at a time before the United States Mint began marketing Proof coins to collectors on a wider scale, the 1849 Liberty Seated dime is a major rarity in this format. For each year during the 1840s, the Mint produced only a few Proof sets for official purposes or distribution to the few numismatists active in the Northeast during that decade. Mintages were not recorded, so it is impossible for us to know exactly how many Proof 1849 dimes were coined. Given the paltry number of survivors (see below), we believe that no more than 10 specimens were produced. Perhaps not surprisingly, auction appearances for this issue are few and far between, underscoring the significance of this bidding opportunity.

All known Proof 1849 dimes were struck from an obverse die that had long been considered an 1849/8 overdate. On the website *seateddimevarieties.com*, Liberty Seated dime specialist Gerry Fortin calls this attribution into question:

"In 1849, the mint changed the logotype from the large dates of 1847 and 1848 to the smaller date punch found on 1849 dies. Acknowledging this fact, it is difficult to justify that the date on the 1849 obverse die would be an 1849/8 overdate given the large date punch of 1848. If one examines the date positions of the 1849 proof die against that of the 1848 dies, with the larger date punch, it is immediately evident that the 1849/8 overdate theory should be seriously questioned."

In our opinion Fortin is correct, and we believe that the obverse die of this issue is a Repunched Date, not an overdate.

We are able to trace this jewel back over 75 years to J.C. Morgenthau's sale of January 1943. It appeared in lot 443 and was called "Brilliant proof. Ex[tremely] rare" and garnered a top bid of \$26 which was remarkable for the era. The winning

bidder was famed Proof specialist Floyd T. Starr, in whose collection this piece would reside for the following five decades. We had the privilege of selling Starr's legendary collection over the course of two sales, dispersing his incredible cabinet of half cents and large cents in our (Stack's) sale of June 1984, and later handling his gold, silver, and minor coinage in October 1992. This coin was featured as lot 366 in the October 1992 auction, cataloged as a "Gem Brilliant Proof" having "virtually flawless fields." For most of the three decades since, it has seemingly been handled privately, emphasizing the present public offering as a truly significant event for Liberty Seated dime specialists.

We have been able to positively confirm the existence of just four Proof 1849 dimes:

- 1 PCGS Proof-66. Ex J.C. Morgenthau's sale of January 1943, lot 443; our (Stack's) sale of the Floyd T. Starr Collection, October 1992, lot 366; our ANA Auction of August 2018, lot 1115. *The present example*.
- 2 PCGS Proof-66. Ex our (Stack's) sale of the James A. Stack, Sr. Collection, January 1990, lot 86; Heritage's sale of the Phil Kaufman Collection of Early Seated Proof Sets, Part III, April 2008, lot 2389; Heritage's sale of the Greensboro Collection, Part I, October 2012, lot 3948; Bill Nagle, October 2012; Heritage's sale of the Eugene H. Gardner Collection, June 2014, lot 30289.
- **3 NGC Proof-65**. Ex our (Bowers and Merena's) sale of the Louis E. Eliasberg, Sr. Collection, May 1996, lot 1137; Heritage's sale of the Lark Collection, March 2006, lot 458; Heritage's Rosemont Signature Auction of August 2013, lot 5562.
- 4 PCGS Proof-64. Ex Hollinbeck Stamp & Coin Co., lot 130, date of sale not recorded; David W. Akers' sale of the John Jay Pittman Collection, Part I, October 1997, lot 602; David Lawrence's sale of the Richmond Collection, Part III, March 2005, lot 1243; Heritage's New York Signature Auction of June 2005, lot 5378; Simpson Collection; Legend Rare Coin Auctions' Regency Auction VIII, July 2014, lot 71; Heritage's FUN Signature Auction of January 2015, lot 4070.

PCGS# 4736. NGC ID: 23C5.

PCGS Population: 2; 0 finer. CAC Population: 2; 0.

From J.C. Morgenthau's sale of January 1943, lot 443; our (Stack's) sale of the Floyd T. Starr Collection, October 1992, lot 366; our ANA Auction of August 2018, lot 1115.

1859-O Fortin-103. Rarity-3. Medium O. MS-66 (NGC). This stunning high grade dime exhibits subtle semi-prooflike tendencies to otherwise satiny mint luster. Lightly toned in pale iridescent gold, the surfaces are silky smooth and feature a sharp strike. Although ranking among the easier New Orleans Mint Liberty Seated dimes to locate in lower grades, the 1859-O is scarce to rare above the VF level. As a premium quality Gem the lovely coin here offered here is worthy of the strong bids.

PCGS# 4620. NGC ID: 2395.

NGC Census: 11; 4 finer (MS-68 finest).

From our sale of the Larry H. Miller Collection, December 2020 Auction, lot 1053.

1251

1863-S Fortin-101, the only known dies. Rarity-4+. AU-58 (PCGS). Predominantly brilliant with nearly complete mint luster, this scarce San Francisco Mint dime also offers bold to sharp detail throughout the design. This 157,500-piece issue circulated extensively on the West Coast, with the result that EF and AU survivors are challenging to locate, especially with problem free surfaces.

PCGS# 4638. NGC ID: 239L.

PCGS Population: 5; 14 finer (MS-65+ finest).

1252

1867 MS-63 (PCGS). OGH. A brilliant and beautiful example with semi-reflective tendencies in the fields enhancing an otherwise frosty texture. Sharply struck. Early Reconstruction era circulation strike dimes from the Philadelphia Mint like the 1867 were produced in limited numbers and are scarce to rare in all grades today. This particular issue has a paltry mintage of 8,000 pieces in this format.

PCGS# 4645. NGC ID: 239U.

1253

1871 Proof-66 (PCGS). CAC. This beautiful upper end Gem reveals iridescent undertones of reddish-apricot, salmon-pink, cobalt blue and pale lilac. Warmer silver-mauve and olive-copper patina is seen, especially on the reverse. Sharply struck overall and exceptionally well preserved, fully deserving of the impressive Proof-66 grade from PCGS. From a mintage of 960 Proofs, this premium quality example would do particularly well in a stellar type set.

PCGS# 4764. NGC ID: 23CV.

PCGS Population: 10; 3 finer in this category (Proof-67 finest). CAC Population: 10; 1.

1254

1878 Proof-65 (PCGS). A mottling of exceptionally vivid reddish-rose and cobalt blue toning on the reverse surely identifies this as one of the most attractive Proof 1878 dimes extant. The obverse is peripherally toned in reddish-gold and steel-blue. Worthy of a strong premium.

PCGS# 4775. NGC ID: 23D3.

1255

1882 Proof-65 Cameo (NGC). Pretty peripheral toning in reddishgold combines with a boldly cameoed finish to make this a highly desirable Gem Proof for high grade specimen type purposes.

PCGS# 84779. NGC ID: 23D7.

1256

1898-O MS-66 (PCGS). A lustrous and attractively original Gem. Satiny surfaces are dressed in light pewter-gray with blushes of reddish-russet and steel-olive in isolated peripheral areas. Nearly flawless and very attractive, a truly significant find for Set Registry participants. Barber dime production at the New Orleans Mint ratcheted up considerably in 1898 with a total of 2,130,000 coins struck. Even so, this is a challenging issue to collect that is quite underrated in Mint State. The 1898-O is actually rarer in high grades than the lower mintage 1897-O, 1903-S, 1904-S, 1913-S and 1915-S. It becomes scare in MS-64 and very rare above MS-65.

PCGS# 4816. NGC ID: 23E7.

PCGS Population: 6; 3 finer (MS-67+ finest).

1904-S MS-62 (PCGS). Rich peripheral toning in steel-blue and roserusset graces both sides of this sharp and lustrous example. These are scarce in all Uncirculated grades, as commercial use was heavy for this San Francisco Mint issue.

PCGS# 4834. NGC ID: 23ES.

1258

1905 Proof-66 (PCGS). OGH. An angelic Gem with richly and originally toned surfaces that display the more vivid colors on the obverse. 727 Proof dimes were struck in 1905 and about 675 survive to this day. However, the vast majority of these have been impaired by minor marks, well-intentioned cleaning, or even circulation in the past century. This issue becomes considerably scarce at the Gem level, with only about 250 known.

PCGS# 4889. NGC ID: 23GJ.

PCGS Population: 41; 21 finer in this category (Proof-68 finest).

1259

1912-S MS-66+ (PCGS). CAC. Speckles of light olive-russet iridescence overlay a blanket of antique silver patina on both sides of this pleasingly original piece. Sharp, satiny and exceptionally well preserved. This is an underrated Barber dime from the 1910s, and it is more challenging to locate in Mint State that the 1911, 1911-D, 1911-S, 1912, 1912-D, 1913, 1914, 1914-D, 1915, 1916 and 1916-S. Writing in the 2009 book *Collecting & Investing Strategies for Barber Dimes*, our own Jeff Ambio also states that the 1912-S is rarer in the finest Mint State grades than the low mintage 1913-S, as well as the 1893, 1900, 1908-O and 1909. The coin we offer here represents a rare and fleeting bidding opportunity for the astute collector of this series.

PCGS# 4862. NGC ID: 23FP.

PCGS Population: 2; 2 finer (both MS-67). CAC Population: 3; 1.

1260

1913-S AU-58 (PCGS). From a mintage of just 510,000 pieces, one of the lowest in the circulation strike Barber dime series, this brilliant and lustrous near-Mint 1913-S will appeal to series specialists.

PCGS# 4864. NGC ID: 23FS.

1261

1916-D Fine-12 (PCGS). CAC. Really a lovely example at the assigned grade level, original silver-gray surfaces are smooth in hand with all major design outlines boldly outlined and clear. The key date status and perennial popularity of this issue are sure to result in strong competition for this premium Fine-12 piece.

PCGS# 4906. NGC ID: 23GY.

1262

1920-S MS-63 FB (PCGS). OGH—First Generation. Dusted with golden iridescence, this highly lustrous and well struck example has the eye appeal of a higher grade.

PCGS# 4933. NGC ID: 23HD.

1263

1925-D MS-64 FB (PCGS). CAC. OGH. Wisps of rose and pale champagne-pink are all that deny brilliance for this lustrous and satiny near-Gem. The strike is impressively sharp for the issue, the centers full and the peripheries sufficiently bold, if not crisp.

PCGS# 4951. NGC ID: 23HN.

1264

1930-S MS-66+ FB (PCGS). Brilliant satin-white surfaces are expertly produced, carefully preserved and visually stunning.

PCGS# 4981, NGC ID: 2316.

PCGS Population: 16; 25 finer in this category (MS-67+ FB finest).

TWENTY-CENT PIECES

1265

1875 Proof-64 (NGC). CAC. OH. Splendid Choice surfaces are dressed in mottled toning of vivid steel-blue, salmon-pink, reddishapricot and silver-mauve shades. All design elements are fully rendered, and the in hand appearance is uncommonly smooth even at the Proof-64 grade level. A premium Proof striking from the first year of the brief twenty-cent series.

PCGS# 5303. NGC ID: 27GZ.

1266

1875-CC BF-2. Rarity-1. MS-63 (NGC). OH. As the only readily collectible Carson City Mint twenty-cent issue, the 1875-CC is a perennial favorite with collectors at all grade levels. This satiny Mint State survivor is sharply struck with warm, mottled toning engaging the peripheries.

PCGS# 5297. NGC ID: 23R6.

1267

1875-CC BF-2. Rarity-1. MS-62 (PCGS). OGH. A brilliant satin-white example with virtually all features sharply struck and crisp.

PCGS# 5297. NGC ID: 23R6.

1268

1875-S BF-14. Rarity-1. Misplaced Date. MS-65 (NGC). Satiny and brilliant, this lovely Gem from the brief twenty-cent piece of 1875 to 1878 has very smooth surfaces. A high quality type candidate that is sure to see spirited bidding at auction.

PCGS# 5298. NGC ID: 23R7.

1269

1876 Proof-64 (NGC). Boldly and originally toned over fully impressed, satin to semi-reflective surfaces. At 1,500 pieces produced, the 1876 boasts the highest mintage in the Proof twenty-cent series of 1875 to 1878. The Mint undoubtedly stepped up production of Proof coinage this year in anticipation of strong sales in connection with the United States' centennial. While survivors of this issue are plentiful by the standards of the type, few have been as nicely preserved as this handsome near-Gem.

PCGS# 5304. NGC ID: 27H3.

1270

1876 Proof-63 (PCGS). CAC. OGH—First Generation. From the United States' Centennial year comes this fully struck Proof dusted with pale silvery iridescence. A cameo finish goes unmentioned on the old style PCGS insert which, when combined with the CAC sticker, confirms the premium quality nature of this offering.

PCGS# 5304. NGC ID: 27H3.

1271

1876 BF-4. Rarity-4. MS-64 (PCGS). This richly and originally toned example exhibits a bold blend of steel-gray, golden-copper and deep rose. The luster is full and frosty, the strike razor sharp from the rims to the centers. Introduced in 1875, by 1876 the unpopularity of this denomination was already confirmed. Only a perfunctory quantity of coins was struck at Philadelphia in the latter year, none at San Francisco, and almost the entire Carson City mintage of 10,000 pieces was melted. Today, the 1876 Philadelphia Mint twenty-cent piece is popular among specialists in the more unusual denominations, as well as with better date type set collectors seeking to avoid the common 1875-S.

PCGS# 5299. NGC ID: 23R8.

1272

1876 BF-2. Rarity-2. Doubled Die Reverse. MS-63 (PCGS). Handsome steely-gray and antique copper patina blankets both sides of this scarce date twenty-cent piece. Sharply struck with strong luster and vivid undertones.

PCGS# 5299. NGC ID: 23R8.

1273

1876 BF-4. Rarity-4. MS-63 (PCGS). Deep steel-olive peripheral toning on the obverse gives way to lighter antique gold and silver toward the center. The reverse is rich steel-olive and antique copper overall. Both sides are lustrous for the grade and sharply struck.

PCGS# 5299. NGC ID: 23R8.

Low Mintage Proof-Only 1877 Twenty-Cent Piece

1274

1877 Proof-64+ (PCGS). CAC. Blanketed in warm coppergray, this handsome specimen also exhibits blushes of cobalt blue, medium rose and golden-apricot iridescence that is best appreciated with the aid of direct lighting. The fields are modestly reflective through the toning and suspending sharp and richly frosted central devices. An attractive and richly original near-Gem.

With only 510 coins struck, all of which were Proofs, the 1877 has the lowest mintage and is the scarcest date in the twenty-cent series of 1875 to 1878. A large portion of the mintage is thought to have been melted after going unsold to collectors, resulting in an even more scant net-mintage of about 350 pieces.

PCGS# 5305. NGC ID: 27H4.

CAC Population: 14; 14.

1275

1878 Proof-64 (NGC). CAC. OH. Beautifully toned in rich steelolive and pinkish-gray, sharp design elements and a mirrored finish provide further visual appeal. The popular and eagerly sought 1878 is a Proof-only issue from the final year of the twenty-cent series, the mintage just 600 coins.

PCGS# 5306. NGC ID: 27H5. NGC Census: 12; 9.

1276

1878 Proof-64 (NGC). CAC. Boldly and originally toned surfaces are awash in deep antique copper, steel-blue, rose and burnt-orange shades. Direct lighting calls forth more vivid undertones, as well as appreciable reflectivity to the finish in the fields. A fully struck and uncommonly well preserved survivor of this scarce Proof-only issue from the final year of the brief twenty-cent series.

PCGS# 5306. NGC ID: 27H5.

CAC Population: 13; 9.

QUARTER DOLLARS

Classic 1796 Small Eagle Quarter Scarcer B-1 Low 6 Variety

1277

1796 B-1. Rarity-4+. Good-6 (PCGS). Offered is a lovely circulated example of the historically significant, perennially popular 1796 Draped Bust quarter. Handsome surfaces are warmly and evenly toned in dominant silver-gray patina; the obverse has outlines of warmer steel-russet to the design elements. The strike is well centered, both sides otherwise boldly defined for the grade with the only mentionable softness confined to the reverse border, where much of the denticulation has been lost. This is a desirable coin at the Good-6 level that is sure to appeal to type collectors and early quarter specialists.

The 1796 quarter has long been an object of desire for all who form type sets of American coinage. Struck only in this single year, the Draped Bust obverse in combination with the Small Eagle reverse is very rare relative to the demand for it, as no type set can be complete without an example. Survivors are scarce as the mintage was just 6,146 pieces. The Mint required two obverse dies and one reverse to achieve this mintage, with Browning-1, as offered here, the less frequently encountered by a small margin. This is the Low 6 variety of the issue, so named because the digit 6 in the date is more distant from the bust than on the B-2 High 6 variety.

PCGS# 5310. NGC ID: 23RA.

Key Date 1804 Quarter Rare B-2 Die Pairing

1278

1804 B-2. Rarity-5. VF-20 (PCGS). This is a handsome coin, with both sides richly and originally toned in a blend of charcoal and olive-gray. Generally smooth with no post-production blemishes of note, the planchet is flawed at 9 o'clock on the obverse, as made. All design elements are boldly outlined with appreciable sharpness remaining in some of the recesses.

The first quarter dollar produced in the United States Mint since 1796, and the premier issue in the Heraldic Eagle portion of the Draped Bust series, the 1804 is also a key date coin with a mintage of just 6,738 pieces. Browning-2, offered here, is the scarcer of the two known die marriages, confirming the significance of this find for advanced early quarter enthusiasts.

PCGS# 5312. NGC ID: 23RB.

1279

1806 B-2. Rarity-2. VF-35 (PCGS). OGH. Early quarters as a group are scarce and underrated, confirming the significance of this offering for a mid grade Draped Bust, Heraldic Eagle example. Dusky slategray patina deepens a bit near the central reverse, where underlying salmon-pink color is most intense.

PCGS# 5314. NGC ID: 23RD.

1280

1853/4 Arrows and Rays. Briggs 1-A, FS-301. AU-58 (NGC). This is a particularly sharp and impressive early die state of the variety, the artifact beneath the digit 3 in the date full and doubling to the right arrow prominent. Boldly defined over most design elements with pale, even, golden-gray tinting to both sides.

PCGS# 5427. NGC ID: 23U4.

Remarkably Vivid Ultra Gem Proof 1867 Quarter

1281

1867 Proof-67+ Cameo (NGC). This exceptionally attractive specimen really needs to be seen to be fully appreciated, for it is one of the most vividly toned Proof Liberty Seated quarters of any type or date that we have ever offered. Bulls-eye toning in multiple colors moves from the rims to the centers, the shades deepest and most vivid near the borders. The strike is full throughout, and direct lighting easily calls forth bold cameo contrast between the fields and devices. A simply stunning Ultra Gem Proof worthy of the strongest bids.

The Philadelphia Mint struck 625 Proof quarters in 1867, which were distributed to contemporary collectors as part of the year's Proof Sets. This is one of the finest and most aesthetically appealing survivors obtainable in today's market — a rare find for the discerning collector that would serve with distinction in an advanced cabinet.

PCGS# 85566. NGC ID: 23WY.

NGC Census: 1; 0 finer in this category. PCGS has yet to certify an example finer than Proof-67 in the CAM category.

1282

1873 Arrows. MS-63 (NGC). Blended pewter-gray, antique gold and steel-olive patina provides a pleasingly original appearance for this satiny and well struck example. The brevity of the Arrows, Motto Liberty Seated quarter type is sure to result in keen bidder interest in this Choice Uncirculated 1873.

PCGS# 5491. NGC ID: 23VU.

1283

1877-CC MS-64 (PCGS). OGH—First Generation. Peripherally toned in blue-gray and reddish-apricot, especially on the obverse, both sides are smartly impressed with a smooth satin texture. A touch of muting to the luster precludes an even higher Mint State grade. The resumption of silver specie payment in April 1876 explains the uncommonly high mintages of the 1876-CC and 1877-CC quarters. Both issues are perennial favorites among mintmarked type collectors.

PCGS# 5505. NGC ID: 23V6.

1284

1884 Proof-67 Cameo (PCGS). Delightful pinkish-silver and cobaltblue iridescence blankets the obverse, yet stays away from a largely brilliant center on the reverse. Silky smooth in texture with a full strike and decided cameo contrast to the finish. An outstanding condition rarity that is temptingly close to pristine in a survivor from this 875-coin Proof issue.

PCGS# 85585. NGC ID: 23XG

PCGS Population: 10; 4 finer in this category (Proof-69 Cameo finest).

1285

1890 MS-64 (NGC). Lightly toned in pale silver and champagnegold, this late date Liberty Seated quarter is a nice Choice Mint State type candidate from the With Motto portion of the series.

PCGS# 5523. NGC ID: 23VP.

1892 Proof-66 Cameo (PCGS). CAC. This charming specimen exhibits blushes of orange-russet iridescence to otherwise silvertinged surfaces. Fully struck and frosty, the design elements contrast nicely with reflective fields. The advent of the new Barber quarter design in 1892 caused a run at the Mint on Proofs, where 1,245 coins were produced; the next year the love affair was over and the Proof mintage had dropped considerably, never again to brush the 1,000-piece mark for the duration of this series. Popular now as then, the first year 1892 is a favorite among Proof type collectors in the modern numismatic community.

PCGS# 85678. NGC ID: 2427.

PCGS Population: 18; 24 finer in this category (Proof-68+ Cameo finest). CAC Population: 8; 10.

1287

1893 Proof-67 Cameo (PCGS). CAC. Angelic surfaces combine frosty motifs with well mirrored fields. Dusted with iridescent sandy-silver, golden-apricot and powder blue toning, full striking detail and exceptional eye appeal are equally praiseworthy attributes. Second year of issue for the Proof Barber quarter series, the 1893 has a mintage of 792 pieces. With the technical quality and eye appeal offered here, the Proof 1893 is quite rare and seldom offered.

PCGS# 85679. NGC ID: 2428.

PCGS Population: 17; 9 finer in this category (Proof-68+ Cameo finest). CAC Population: 9; 7.

1288

1900 MS-65+ (PCGS). Moderately and attractively toned, this wonderfully original Gem also delivers full satin luster and razor sharp striking detail. The turn-of-the-century 1900 is one of the more desirable Barber quarters for Mint State type purposes.

PCGS# 5625. NGC ID: 23YK.

1289

1901 Proof-66 (NGC). CAC. Blushes of iridescent reddish-olive peripheral toning enliven otherwise silver-tinged surfaces. Modest cameo contrast to the finish goes unmentioned on the NGC insert and, in combination with full striking detail and a silky smooth appearance, confirms this as an exceptionally desirable Proof type candidate from the Barber quarter series.

PCGS# 5687. NGC ID: 242G. CAC Population: 6; 12.

1290

1901 MS-65 (NGC). CAC. Gem type collectors will surely appreciate the opportunity to acquire this pretty Barber quarter. It is warmly and originally toned over smooth satin surfaces, the most vivid and varied colors reserved for the reverse. Sharply struck.

PCGS# 5628. NGC ID: 23YN.

NGC Census: 20; 6 finer (MS-66 ★ finest). CAC Population: 6; 7.

Amazing Proof 1907 Barber Quarter

1291

1907 Proof-67+ (PCGS). CAC. As a perusal of our auction archives will indicate, there are a few truly exceptional survivors of this 20th century Proof Barber quarter issue in numismatic hands. The present specimen is definitely included in this highly select group, and it is a strong contender for the title of "Most Attractive Proof 1907 Quarter Known." Incredibly beautiful surfaces really need to be see to be fully appreciated, such is the vividness and rich variety of toning that graces both sides. The colors have a somewhat target-like distribution from the

rims to the centers — a feature that toning enthusiasts find very appealing. Surfaces are serene, virtually untouched, and certainly unblemished when observed in hand. We anticipate this fully struck Gem will sell for a strong premium to an advanced type collector, toning enthusiast or Proof Barber quarter specialist. Extraordinary!

PCGS# 5693. NGC ID: 242N.

PCGS Population: 2; 3 finer in this category (all Proof-68). CAC Population: 6; 3. The former total includes coins certified both Proof-67 and Proof-67+.

1292

1915 Proof-66 (PCGS). Blushes of steel-gray enliven a base of antique silver iridescence on both sides of this visually impressive piece. A well mirrored finish is readily evident at direct viewing angles, while full striking detail is easily seen even at arm's length. This was the final year Proofs were issued for the Barber quarter series, and a tiny

issue of just 450 pieces were struck and sold. Naturally upper end Gems are quite rare and desirable today.

PCGS# 5701. NGC ID: 242X.

PCGS Population: 15; 20 finer in this category (Proof-68 finest).

Significant Mint State 1916 Standing Liberty Quarter

1293

1916 Standing Liberty. Unc Details—Reverse Improperly Cleaned (NGC). With sharp to full striking detail to most design elements, this well produced and technically Uncirculated key date 1916 quarter is sure to appeal to many specialists in the Standing Liberty series. The surfaces are free of sizable handling marks, and even hairlines are few in number and difficult to discern. The texture, however, is a tad glossy, especially on

the reverse, explaining the NGC qualifier. Considerable luster remains, and the surfaces have a bit of light toning in pale champagne-gold. The low mintage, first year 1916 Standing Liberty quarter is always in high demand, and this example is a more affordable, yet still highly appealing Mint State representative.

PCGS# 5704. NGC ID: 242Y.

1294

1921 MS-62 (PCGS). CAC. OGH—First Generation. Brilliant and lustrous surfaces define this scarce 1921 quarter from a relatively limited mintage of 1,916,000 pieces. The strike is impressively sharp and not all that far from a coveted FH designation. PQ in all regards and worthy of the strongest bids, as such.

PCGS# 5740. NGC ID: 243H.

Stunning Full Head 1928 Quarter

1295

1928 MS-67 FH (PCGS). A simply beautiful example that offers superior striking quality and preservation. Lightly toned, present as brilliant at most viewing angles. Razor sharp striking detail extends even to the inner shield, most of the surrounding rivets and the eagle's breast, in addition to Liberty's head. This crisply impressed Superb Gem is in very select company near

the top of the *PCGS Population Report*. An Outstanding coin fit for inclusion in the finest Standing Liberty quarter set, especially one that is competing for top ranking on the PCGS Registry.

PCGS# 5767. NGC ID: 243X.

PCGS Population: 9; 1 finer (MS-67+ FH).

1296

1929-D MS-63 FH (NGC). OH. Lustrous surfaces exhibit a billowy satin texture that is exceptionally smooth overall for the assigned grade. Sharply struck and minimally toned, it is easy to envision thoughts of an MS-64 FH grade when viewing this PQ example.

PCGS# 5774. NGC ID: 2443.

1297

1932-D MS-63 (NGC). CAC. OH. Intensely lustrous satin surfaces are brilliant apart from speckled russet peripheral highlights. Sharply struck and impressively smooth for the assigned grade, it is difficult for us to imagine a more desirable Choice Mint State example of this famous key date Washington quarter issue.

PCGS# 5791. NGC ID: 2448.

1298

1950-D/S FS-601. MS-66 (PCGS). CAC. This scarce overmintmark Washington quarter offers rare premium Gem quality. The smooth and lustrous surfaces are adorned with wisps of light russet toning that appear to drift toward the borders. It is expertly preserved and ranks among the finest certified. Specialists in Washington quarter varieties have long taken note of a strange occurrence with regards to the branch mint issues of 1950. When one branch ordered a set of dies, the die cutter at the Philadelphia Mint took an already prepared branch mint die and simply punched in the requested mintmark, but then later the converse occurred, producing the fascinating D over S and S over D varieties. It is not known which came first, though it is well established that 1950 D/S FS-601 is by far the rarer of the two varieties in Gem Mint State by a margin of almost four to one. Long popular with advanced collectors, the appearance of such an outstanding CAC-approved example at auction is certainly a noteworthy event.

PCGS# 5843. NGC ID: 245T.

PCGS Population: 18; 5 finer (MS-67 finest). CAC Population: 10; 1

HALF DOLLARS

1299

1794 O-101a, T-7. Rarity-3. VG-10 (PCGS). OGH. This well balanced example retains bold outline definition to all major design elements, allowing full appreciation of the Flowing Hair type. The obverse border is devoid of denticulation from 1 to 6 o'clock, but otherwise there is no significant softness at the assigned grade level. A minor crack in the planchet at 1 o'clock relative to the obverse is as made. There is a light scuff in that area and a few widely scattered digs on the reverse; light hairlining and a somewhat glossy texture point

to an old cleaning. On the positive side, the surfaces have retoned nicely in dominant reddish-apricot with intermingled blushes of powder blue. This classic issue is the first United States Mint half dollar, and it is considerably scarcer than the 1795, the only other date in the Flowing Hair series. The offered coin is sure to appeal to many buyers in today's highly competitive numismatic market. Tompkins Die Stage 1/5.

PCGS# 6051. NGC ID: 24E6.

Condition Census 1795 O-115 Half Dollar

1300

1795 O-115, T-10. Rarity-4+. Two Leaves. AU-55 (PCGS). A visually stunning and conditionally rare example of the United States Mint's earliest half dollar design. Plenty of soft satin luster shines forth nicely through an overlay of warm dove and olive-gray patina. The surfaces are smooth and inviting, and uncommonly so for a Flowing Hair half dollar that acquired a bit of light wear. Indeed, the wear is so minimal that softness to most of the central high points has more to do with characteristic striking incompleteness than commercial use. Free of both adjustment marks and post-production distractions, this is a

phenomenal coin to represent the type, date or variety in an advanced numismatic cabinet. Tompkins Die Stage 3/3.

Overton-115 is a scarcer die marriage for the 1795 Flowing Hair half dollar issue, and it a major rarity in Mint State with only one example currently known. The offered coin is tied for CC#3 per the listing in the Spring 2022 revision to Stephen J. Herrman's Auction & Mail Bid Prices Realized for Bust Half Dollars: 1794-1839.

PCGS# 39231. NGC ID: 24E7.

From the Cardinal Collection Educational Foundation.

Significant 1795 O-119 Half Dollar Just Shy of Condition Census

1301

1795 O-119, T-1. Rarity-3. Two Leaves. AU-55 (NGC). A high grade survivor of this otherwise frequently encountered die marriage for the 1795 Flowing Hair half dollar. Lightly toned in silver-gray, the obverse is enhanced by outlines of steely-olive iridescence to many of the design elements. The reverse is lighter overall in iridescent champagne-gold with reddish-rose highlights clinging to a few of the more protected areas. Softly frosted and pleasingly smooth, there are no handling marks of note. Faint adjustment marks around the reverse periphery are as made. The strike comes up short along the right obverse and reverse borders, but to no great detriment since otherwise the detail is impressively bold for a product of the early United States Mint. Tompkins Die Stage 4/2.

Overton-119 represents the only use of both the obverse and reverse dies in the Flowing Hair half dollar series. The obverse is readily identifiable by the presence of a small die lump above star 15. On the reverse, the berries are arranged in the wreath nine left, nine right with a leaf touching the left base of the letter I in UNITED — the only reverse of the issue with this feature. The same letter I is also repunched, as is the left base of the letter E in AMERICA, and there are prominent die lines from the tip of the eagle's left wing and the upper serif of the letter R in AMERICA. Tompkins 4/2, represented here, is the latest die state known, both sides with clash marks in the fields around the

central devices. The obverse also exhibits a series of fine cracks: from the border through star 15 into the field toward Liberty's throat; from star 15 to the center of the digit 5 in the date; and from the border through the two lowest points of star 5.

The reported mintage for half dollars during calendar year 1795 is 317,844 coins, all of which were delivered from February 4 to June 5 of that year in eight warrants. Since numismatic scholars believe that most (if not all) of the 18,164 examples delivered in Warrant No. 3 on February 4, 1795 were from 1794-dated dies, the mintage for the 1795-dated issue is usually given as 299,680 pieces. Steve M. Tompkins (2015) believes that O-119 was the first die marriage produced for the 1795 half dollar, "the reverse working die made from a Type II master hub/die, and most likely...a left over from 1794." If Tompkins' die emission sequence is correct, and despite its late die state, the offered coin was among the earliest 1795-dated half dollars struck. It was preserved after having seen minimal commercial use, perhaps intentionally, or more likely as a matter of chance. In either case it is rare high grade survivor that is only one grade removed from Condition Census ranking for the 1795 O-119 dies. An equally significant offering for advanced type collectors and early half dollar variety enthusiasts.

PCGS# 6052. NGC ID: 24E7.

1809 O-107. Rarity-2. IIIII Edge. MS-62 (PCGS). Brilliant apart from blushes of reddish-gold iridescence here and there around the peripheries, this lively example allows full appreciation of intense mint frost. Most areas show razor sharp to full striking detail, the only mentionable softness confined to the top of Liberty's cap and the opposing area on the reverse. There are no significant marks at the assigned grade level. This is an important survivor from the 1809 O-107 dies that just qualifies for Condition Census per Stephen J. Herrman in the Spring 2022 revision to *Auction & Mail Bid Prices Realized for Bust Half Dollars: 1794-1839.* The variety is readily identified by wide spacing of the 18 in the date and a rough die lump to the left of the C. on the reverse. With the III Edge variety adding further desirability, this flashy example is sure to see spirited bidding among collectors specializing in this popular 19th century half dollar series

PCGS# 6094. NGC ID: 24ES.

1303

1812 O-109a. Rarity-2. AU-58 (PCGS). OGH. This beautifully and originally toned example exhibits blended powder blue, steel-olive and mauve-gray to satiny surfaces. Smooth and inviting with all major design elements nicely defined. Thoroughly PQ near-Mint quality for this popular early date issue in the Capped Bust half dollar series.

PCGS# 6100. NGC ID: 24EW.

1304

1820 O-105. Rarity-1. Square Base Knob 2, Large Date. AU-58 (PCGS). This desirable early date Capped Bust half dollar retains much of the original frosty to semi-prooflike finish imparted by the dies. It is generally brilliant, but with pretty iridescent toning in cobalt blue and champagne-pink at the peripheries. Sharply defined and visually appealing.

PCGS# 6122.

1305

1825 O-101. Rarity-1. MS-63 (NGC). This minimally toned, goldentinged piece would do particularly well in a Mint State set. Sharply struck throughout with full, soft, satiny mint luster.

PCGS# 6142. NGC ID: 24FL.

1306

1831 O-110. Rarity-2. MS-62 (PCGS). Steel-blue peripheral toning gives way to warmer mauve-gray and reddish-apricot patina toward the centers. Lustrous and satiny overall, this is a well struck example for the die pairing that would do particularly well in Mint State type set

PCGS# 6159. NGC ID: 24FV.

1307

1833 O-106. Rarity-2. MS-63 (PCGS). Lustrous satin surfaces are dressed in a vivid array of cobalt blue, golden-olive and reddish-rose iridescence. A visually stunning piece that also qualifies as Condition Census for the 1833 Overton-106 dies.

PCGS# 6163. NGC ID: 24FX.

1308

1833 O-108. Rarity-1. MS-62 (NGC). This satin to softly frosted example combines a nearly brilliant obverse with a reverse dressed in light sandy-gold iridescence. Uncommonly well struck for an 1830s half dollar of the Lettered Edge type, freedom from sizeable marks further enhances this coin's appeal.

PCGS# 39896. NGC ID: 24FX.

1309

1833 O-114. Rarity-2. MS-64+ (PCGS). CAC. Charming satin surfaces are dressed in soft pearl-gray patina, the peripheries with more vivid reddish-gold and powder blue iridescence. Well struck for the type with most major design elements sharp, the surfaces are nicely preserved and expectably smooth for the assigned grade. CC#3 for the 1833 Overton-114 dies per the listing in the Spring 2022 revision to Stephen J. Herrman's AMBPR for Bust half dollars.

PCGS# 6163. NGC ID: 24FX.

1837 Reeded Edge. 50 CENTS. GR-24. Rarity-2. Broad Collar. MS-62 (NGC). An exciting offering for the specialist in Reeded Edge Capped Bust half dollars. Writing in the 2012 reference *A Registry of Die Varieties of Reeded Edge Half Dollars: 1836-1839*, Dick Graham relates:

"I have seen a few GR-24s with an oversized and extended planchet, the reason for which I have not been able to ascertain, so keep an eye out for one of these in your searches. The planchet size will be 1.245", the reverse dentils will be elongated and stretched to a shallow rim, and the legend will be drawn and thinner. The enlarged planchet is what will bring them to your attention first and foremost."

NGC recognizes this special variant of the 1837 GR-24 attribution, although PCGS does not. This is only our second offering for an NGC-designated Broad Collar example, the first a VF-30. This Mint State piece exhibits moderate, mottled toning to softly frosted surfaces. All major design elements are sharply rendered, the peripheries showing the distortion of detail mentioned by Graham. Eagerly anticipating inclusion in an advanced collection of this brief half dollar type.

PCGS# 531078. NGC ID: 24G4.

1311

1839 Reeded Edge. HALF DOL. GR-5. Rarity-2. Large Letters. MS-64 (NGC). Intense satin luster blankets surfaces that are brilliant apart from wisps of pale champagne-apricot iridescence. Nicely struck, most features are sharply rendered and crisp, and none are less than bold. From a brief subtype at the end of the popular Capped Bust half dollar series, and particularly well suited for inclusion in a Mint State type set.

PCGS# 6179. NGC ID: 24G6.

1312

1839-O Reeded Edge. HALF DOL. GR-1. Rarity-1. Repunched Mintmark. AU-50 (PCGS). This issue is the second on which the New Orleans mintmark appeared on the obverse of the half dollar, the first of course the extremely rare 1838-O half dollar. The 1839-O is the only realistically obtainable mintmarked half dollar of the Capped Bust design type as far as most collectors are concerned, although we stress that most survivors are heavily worn, impaired, or both. This is a scarce AU example with dominant apricot-gray patina that yields to powder blue at the peripheries.

PCGS# 6181. NGC ID: 24G7.

1313

1856-O WB-17. Rarity-3. MS-64 (NGC). This lustrous and satiny near-Gem is lightly toned in pretty champagne-pink iridescence. It is softly struck in isolated areas, especially around the obverse periphery, but the overall strike is suitable bold by New Orleans Mint standards. The 1856-O is a high mintage issue produced in the aftermath of the Act of February 21, 1853, which means that while it is common in an absolute sense, most survivors are worn from heavy commercial use. The scarce Mint State survivors such as this are eagerly sought by series specialists as well as mintmarked type collectors.

PCGS# 6288. NGC ID: 24HP.

NGC Census: 25; 22 finer (MS-66 finest).

1314

1860 Proof-62 (NGC). CAC. A predominantly brilliant specimen with enhancing blushes of reddish-apricot iridescence at the borders. This early U.S. Mint Proof half dollar issue is far rarer in numismatic hands than a mintage of 1,000 pieces would imply, as many of those coins went unsold at the time and were later released into circulation.

PCGS# 6414. NGC ID: 27TK.

1861-S WB-9. Rarity-2. Large S. MS-63 (PCGS). Brilliant apart from pale champagne-gold iridescence, this endearing piece delivers full satin luster and razor sharp striking detail. A heavily circulated issue, as are all San Francisco Mint half dollars of the 1860s, most of the 939,500 examples produced for the 1861-S were used extensively until worn out or lost. Mint State survivors, as here, are scarce and always in demand among advanced collectors.

PCGS# 6306. NGC ID: 24J5.

PCGS Population: 5; 20 (MS-66+ finest).

1316

1862-S Type I Reverse. WB-1. Rarity-3. Damaged 6, Large S. MS-63 (PCGS). CAC. OGH. A crisp early striking from these dies, both sides exhibit razor sharp detail to all features. Full satin luster shines forth powerfully from brilliant surfaces that are also devoid of troublesome marks. Suggestive of MS-64 quality, this upper end example is worthy of the strongest bids. Although silver coins disappeared from circulation in the East and Midwest early in the Civil War, it remained business as usual on the West Coast throughout the 1860s. In 1862, for example, the San Francisco Mint churned out 1,352,000 half dollars, most of which saw immediate and extensive commercial use. With no known collectors in California during the era, the few existing Mint State coins seem to have survived purely as a matter of chance. This is a rare and desirable CAC-approved example whose offering in this sale represents a significant bidding opportunity for advanced collectors of Liberty Seated coinage.

PCGS# 6308. NGC ID: 24JA.

PCGS Population: 12; 16 finer (MS-66 finest). CAC Population: 2; 4.

1317

1863 WB-101. MS-63 (PCGS). CAC. OGH—First Generation. Impressively smooth for the assigned grade, this piece exhibits satiny surfaces beneath delicate silver-gray and pinkish-apricot iridescence. Near-fully struck with crisp detail to all features. Scarce to rare in all Mint State grades, this Civil War half dollar has a mintage of 503,200 circulation strikes. Examples did not see commercial use during the conflict. While many circulated beginning in the mid 1870s, most eventually succumbed to melting.

PCGS# 6309. NGC ID: 24JB.

CAC Population: 8 in all Mint State grades.

1318

1865 Proof-64 Cameo (PCGS). CAC. Inviting golden-tinged surfaces with warmer honey iridescence around much of the obverse border. This is a fully struck specimen, as befits the method of manufacture, with a boldly cameoed finish also imparted by the dies. The eagerly sought 1865 is a challenging Civil War era Proof issue in the Liberty Seated half dollar series. Limited CAC population figures confirm the rarity of premium quality survivors at all grade levels.

PCGS# 86419. NGC ID: 27TS.

CAC Population: 4; 5.

1319

1869 Proof-64 (PCGS). Handsome steel-olive iridescence with more vivid powder blue and pale pink undertones evident as the surfaces dip into a light. A fully struck, universally brilliant-finish specimen with equal appeal for high grade Proof type and date purposes.

PCGS# 6427. NGC ID: 27U4.

1874 Arrows. Proof-62 (NGC). Silver-gray surfaces are a bit muted overall, yet free of sizeable or otherwise individually distracting blemishes. A respectable Proof striking of this brief and popular two-year design type from the later Liberty Seated half dollar series.

PCGS# 6435. NGC ID: 27UV.

1321

1879 WB-102. Type II Reverse. MS-62 (NGC). A brilliant, sharply struck, satin to semi-reflective example of this popular low mintage issue from the final years of the Liberty Seated half dollar series.

PCGS# 6361. NGC ID: 24KS.

1322

1888 Proof-64 (PCGS). A richly original specimen exhibiting a bold blend of olive-copper, steel-gray and sandy-mauve patina. Vivid undertones of cobalt blue and golden-orange shine forth nicely under a light. With a full strike and pleasingly smooth surfaces, this is an appealing late date Liberty Seated Proof half dollar from a year that saw a limited mintage in circulation strike format.

PCGS# 6449. NGC ID: 27UP.

1323

1890 WB-101. MS-64 (PCGS). OGH—First Generation. Wisps of reddish-apricot peripheral toning enliven otherwise brilliant surfaces. This is a sharply struck and highly lustrous example from a mintage of just 12,000 circulation strike half dollars of the date. An issue that is always in demand.

PCGS# 6372. NGC ID: 24L5.

1324

1890 WB-101. MS-62 (PCGS). CAC. OGH. A sharply struck and highly lustrous example with original, vivid toning. Both the quality and eye appeal are far superior to what one might expect at the assigned grade level, and the strongest bids are certainly justified here. Mintage: just 12,000 circulation strikes.

PCGS# 6372. NGC ID: 24L5.

CAC Population: 21 in all Mint State grades.

1325

1891 WB. MS-63 (PCGS). OGH. From the final year of the long-running Liberty Seated half dollar series comes this smartly impressed and satiny example. Dusted with pale silver and champagne-apricot toning, the in hand appearance is not all that far from what one might expect to see in a coin certified MS-64.

PCGS# 6373. NGC ID: 24L6.

1326

1894 MS-64 (NGC). Blended antique silver and olive-russet patina greets the viewer from both sides. This is an ideal Mint State type candidate from the early Barber half dollar series, sharply struck, lustrous and originally preserved.

PCGS# 6468. NGC ID: 24LN.

1327

1896 Proof-64 (NGC). Fully struck, as befits the issue, this coin also exhibits the expected field to device contrast for a Proof 1896 half dollar, although a Cameo designation has not been awarded by NGC. Wisps of champagne-pink and pale silver iridescence leave the central reverse brilliant.

PCGS# 6543. NGC ID: 24NY.

1328

1897 MS-65 (PCGS). CAC. Intensely lustrous with a silky smooth satin texture, this otherwise untoned example is enhanced by champagne-apricot peripheral iridescence. Rare premium Gem quality for the conditionally challenging Barber half dollar series of 1892 to 1915, this is one of the finest survivors of the 2,480,000-piece circulation strike 1897 verified by CAC, and it is sure to sell for a strong premium.

PCGS# 6477. NGC ID: 24LY.

PCGS Population: 21; 24 finer (MS-67+ finest). CAC Population: 9; 11.

1329

1900 Proof-65 (PCGS). Here is a handsome and fully original specimen, with rich steely-charcoal peripheral toning passes through lighter shades of sandy-tan and pale silver before yielding to virtual brilliance in the centers. Sharply struck, as befits the method of manufacture, with reflective fields and iridescent undertones of vivid blue, pink and apricot. Scarce Gem quality for this popular turn-of-the-century Proof Barber half dollar.

PCGS# 6547. NGC ID: 24P4.

PCGS Population: 29; 18 finer in this category (Proof-68 finest).

1907 MS-64+ (PCGS). CAC. Bright, brilliant surfaces allow full appreciation of intense mint luster and razor sharp striking detail. Eagerly awaiting inclusion in an Uncirculated type set.

PCGS# 6508. NGC ID: 24MY.

1331

1908 Proof-64 (NGC). CAC. Otherwise silver-tinged surfaces are enhanced by wisps of iridescent olive-russet that are lighter, yet more widespread on the obverse. A universally reflective finish adds further appeal for this later date Proof type candidate from the Barber half dollar series.

PCGS# 6555, NGC ID: 24PC.

1332

1910 MS-63 (PCGS). OGH—First Generation. One of the scarcer and more eagerly sought Philadelphia Mint Barber half dollars, the 1910 has a limited mintage of 418,000 circulation strikes. This pale gold and silver-tinged example is sharply struck in most areas with pleasing mint luster.

PCGS# 6519. NGC ID: 24NB.

1333

1910-S MS-62 (PCGS). OGH—First Generation. Scarcer in Mint State than its lower mintage Philadelphia Mint counterpart from the same year, this San Francisco Mint half dollar issue obviously suffered a higher rate of attrition through circulation. The offered example is satiny and well struck with a speckling of pale golden-russet iridescence.

PCGS# 6520. NGC ID: 24NC.

1334

1911 MS-66 (PCGS). CAC. This is a sharply struck example, boldly lustrous and with delicate reddish-gold toning that appears to drift toward the borders. The 1911 is one of the more popular Barber half dollars for high grade type purposes, but it is rare in the finest Mint State grades, as here. Rarer still are upper end Gems with CAC approval, testament to the extreme challenge that collectors will face when pursuing truly PQ examples. This fleeting opportunity deserves serious consideration.

PCGS# 6521. NGC ID: 24ND.

PCGS Population: 25; 0 finer. CAC Population: 3; 0.

1335

1919 MS-63 (PCGS). CAC. Brilliant and beautiful surfaces allow full appreciation of billowy satin luster. With a sharp strike and impressively smooth appearance in hand, the eye appeal of this coin is strong enough to support an MS-64 grade. Instantly recognizable as a key date issue, the 1919 has one of the lowest mintages in the Walking Liberty half dollar series with just 962,000 struck. The present example, premium quality for the assigned grade, would serve as a highlight in an advanced Walking Liberty half dollar set.

PCGS# 6577. NGC ID: 24PY.

1336

1919-D AU-58 (PCGS). CAC. Near-fully lustrous with minimal iridescent toning at the borders, an impressively smooth appearance for a lightly circulated early date Walker is also worthy of praise. Softness through the centers is the result of both incomplete striking detail and light rub that explains the Choice AU grade from PCGS. Indeed, the 1919-D is a severe strike rarity, with most examples flatly struck in the centers. In Mint State it is the third rarest issue of its type, surpassed by only the 1921-S and 1919-S. However, even Choice AU examples like this piece offer a significant challenge to locate. From a mintage of just 1,165,000 pieces, this is a significant piece that is sure to appeal to astute Walking Liberty half dollar enthusiasts.

PCGS# 6578. NGC ID: 24PZ.

From our (Stack's) sale of January 1987, lot 336. Lot tag included.

Eagerly Sought 1921 Walking Liberty Half Dollar Classic Low Mintage Issue

1337

1921 MS-64+ (PCGS). CAC. This wonderfully original near-Gem sports mottled toning in rich reddish-russet. The surfaces exhibit an even overlay of underlying antique silver that blends with full, satiny mint luster. Well struck with most design elements sharply rendered. The 1921 has almost always enjoyed strong numismatic demand, but not until most had already entered circulation. Commercial demand for new half dollars was low that year as the world economy adjusted sharply,

reflecting the changes from war driven production to peacetime activities. The 1921 has a mintage of 246,000 pieces and perhaps just 750 remain at all levels of Mint State preservation. With quality conscious collectors ever more the standard, market pressure is evident at the Gem and higher grades making this PCGS/CAC 64+ example an attractive option.

PCGS# 6583. NGC ID: 24R6.

1338

1921-S AU-50 (**NGC**). A generally untoned example with plenty of original luster evident as the surfaces rotate under a light. From a mintage of just 548,000 pieces, one of the lowest among half dollars of the popular Walking Liberty design type. The 1921-S is particularly elusive in grades above VF, as here.

PCGS# 6585. NGC ID: 24R8.

1339

1929-S MS-64 (PCGS). OGH—First Generation. Gently mottled olive-russet patina enhances satiny surfaces on both sides of this lustrous and boldly struck near-Gem.

PCGS# 6590. NGC ID: 24RD.

1340

1933-S MS-64 (PCGS). CAC. OGH—First Generation. This lightly and originally toned example exhibits the razor sharp striking detail and thick mint luster that have helped to make the 1933-S a popular Mint State type candidate from the early Walking Liberty half dollar series. Smooth in hand and a delight to behold.

PCGS# 6591. NGC ID: 24RE.

1937-S MS-67 (PCGS). CAC. Lovely satin-white surfaces are minimally toned in light, mottled champagne-gold. An uncommonly sharp strike for the issue includes overall full definition and emerging detail to the central obverse and reverse high points. One of the rarer middle date Walking Liberty half dollars, the 1937-S is more challenging to collect in Mint State than the 1936-D, 1939-D, 1939-S and 1940-S, not to mention all Philadelphia Mint issues from 1934 to 1940. This is one of the finest examples known to both PCGS and CAC, a beautiful Superb Gem that would do justice to an advanced collection of this popular 20th century series.

PCGS# 6603. NGC ID: 24RT.

PCGS Population: 49; 10 finer (all MS-67+). CAC Population: 30; 0.

1342

1938-D MS-66+ (PCGS). CAC. Smooth and satiny surfaces are lightly and attractively toned. The peripheral iridescence of golden-russet on the obverse encroaches more deeply upon the center on the reverse. This issue represents the only one in the series with a mintage of fewer than 1 million pieces since the 1921 trio of rarities. With the lowest mintage of any circulation strike Walking Liberty half dollar of the 1923 to 1947 era, as such, the 1938-D enjoys strong collector demand in all grades. With the quality offered here this issue is particularly desirable to advanced numismatists.

PCGS# 6605. NGC ID: 24RV.

1343

1939 Proof-67 (PCGS). CAC. Original silver-gray surfaces are lightly and evenly toned over a universally reflective mint finish. Fully struck and a delight to behold.

PCGS# 6639. NGC ID: 27V7.

1344

1939-D MS-67+ (PCGS). CAC. This is a virtually perfect Superb Gem with subtle golden toning across snowy-white surfaces. Hints of matte-like texture blanket the fields courtesy of fine die polishing, while the focal elements showcase exceptional detail. Among the most exceptional survivors of this issue, and worthy of the strongest bids.

PCGS# 6607. NGC ID: 24RX.

PCGS Population: 27; 3 finer (all MS-68).

1345

1942-D MS-68 (NGC). Gently mottled russet and reddish-gold iridescence enhances isolated peripheral areas of this otherwise brilliant example. Both sides are intensely lustrous with a smooth satin texture that borders on pristine. The 1942-D is the key date among the late date Walking Liberty half dollars in the "short set" of 1941 to 1947. Despite a mintage of 10.9 million coins, it is surprisingly scarce in grades above MS-66. Writing in the 2008 reference *Collecting & Investing Strategies for Walking Liberty Half Dollars*, our own Jeff Ambio ranks the 1941-D as the rarest "short set" issue in Mint State, and the fifth rarest in grades of MS-65 and finer. As one of the finest examples known to PCGS and NGC, this top-tier condition rarity is eagerly awaiting inclusion in an advanced collection.

PCGS# 6615. NGC ID: 24S7.

NGC Census: 7; 0 finer. The corresponding PCGS Population is 9/0.

Superb Gem 1946 Half Dollar

1346

1946 MS-67+ (PCGS). CAC. This amazing Superb Gem is exceptionally well preserved and borders on pristine. Lovely mint luster flows over serene surfaces, and both sides are enhanced by delicate iridescent toning in sandy-gold, with hints of sea-green and orange at the obverse borders. Boldly to sharply struck, and sure to please even the most discerning Walking Liberty half dollar enthusiasts.

Writing in the 2008 book Collecting & Investing Strategies for Walking Liberty Half Dollars, Jeff Ambio describes the 1946

as, "an underrated issue" and "the rarest Walking Liberty half dollar struck in the Philadelphia Mint from 1941 to 1947." Of the 12,118,000 struck, less than 0.2% survive in Gem condition. Approval by CAC confirms the superior quality of the present offering, and it is certainly among the most desirable examples of this issue available to quality-conscious collectors. A true crowning jewel for an advanced cabinet or Registry Set.

PCGS# 6627. NGC ID: 24SJ.

PCGS Population: 34; 1 finer (MS-68). CAC Population: 54; 1. The former total includes coins certified both MS-67 and MS-67+.

1347

1946-D MS-67 (PCGS). CAC. Fully struck with silky smooth luster, this satiny example is further enhanced by wisps of pale golden-russet peripheral iridescence. Type collectors as well as those assembling stellar quality Walking Liberty half dollar "short sets" would be wise to give this piece serious consideration.

PCGS# 6628. NGC ID: 24SK.

1348

1952 Proof-66 Deep Cameo (PCGS). CAC. An incredible Proof Franklin half dollar irrespective of date, this is a truly remarkable example of the third year 1952 issue. Not only are the fields deeply mirrored, but the devices are softly frosted and stand out with marked cameo contrast. Untoned throughout and expertly preserved, this coin would serve as a highlight in the finest collection of Franklin half dollars or modern U.S. Mint Proof coinage. The Philadelphia Mint produced 81,980 Proof half dollars in 1952. Quality control was superior to that observed for the Proof 1950 and 1951 issues, most examples displaying deeply mirrored fields from having been coined from fresh dies. Additionally, the earlier problems with glue stains due to careless packaging are also gone. Yet even so, the Proof 1952 is still a significant strike and condition rarity in the finest Deep/Ultra Cameo grades. Given that we have offered few examples of this issue that are even remotely comparable to this beauty, strong bids are in order here.

PCGS# 96693. NGC ID: 27VC.

PCGS Population: 8; 2 finer in this category (Proof-67 Deep Cameo finest). CAC Population: 7; 0.

1349

1957 Proof-69 ★ Cameo (NGC). Untoned glittering white surfaces allow ready appreciation of a bold cameo finish. Virtual perfection!

PCGS# 86698. NGC ID: 24TX.

SILVER DOLLARS

1350

1795 Flowing Hair. BB-21, B-1. Rarity-2. Two Leaves. EF Details—Cleaned (PCGS). Whereas the BB-27 is the preferred variety for those seeking an example of the Three Leaves *Guide Book* variety of the 1795 Flowing Hair dollar, BB-21 is the die pairing of choice for its Two Leaves counterpart. This curiously appealing example exhibits glints of light olive to otherwise pale pewter-gray surfaces. A mattelike texture helps to explain the PCGS qualifier, but in the absence of large marks and overly conspicuous hairlines, the in hand appearance is rather pleasing. Bold to sharp definition from a well centered strike adds further appeal.

PCGS# 6853.

1351

1795 Flowing Hair. BB-21, B-1. Rarity-2. Two Leaves. Good-6 (NGC). The Bowers-Borckardt 21 is the most readily obtainable die marriage of the Two Leaves *Guide Book* variety of the 1795 Flowing Hair. This issue as a whole is very popular for type purposes given the rarity of the first year 1794 silver dollar.

PCGS# 6853.

Lovely Choice AU 1795 Flowing Hair S\$1

1352

1795 Flowing Hair. BB-27, B-5. Rarity-1. Three Leaves. AU-55 (PCGS). This coin offers superior preservation and eye appeal for a perennially popular type variety in the Flowing Hair dollar series. Lustrous surfaces retain much of the original frosty to semi-reflective finish, which shines through a dusting of iridescent olive-apricot patina and undertones of reddishgold and, at the upper left obverse border, powder blue. Well centered in strike with crisp denticulation around both sides, the major design elements are impressively full, especially at the central high points. Smooth and inviting in hand with a lovely appearance. BB Die State III.While first introduced in 1794, it was not until 1795 that the silver dollar was produced in numbers that would allow it to fulfill its intended role as the monetary unit of the fledgling nation. At least 10 obverse dies

and 11 reverse dies were prepared for the 1795 Flowing Hair dollar, resulting in 19 known varieties. The BB-27 variety is the most available of these and may be distinguished by three leaves under each of the eagle's wings and a "bar" that extends from the topmost curl of Liberty's hair to star 5. Because Liberty's portrait was deeply impressed into the die, this variety was struck in high relief and many details wore down quickly. An estimated 2,500 and 3,500 pieces are believed to exist for the BB-27 die pair, but as with many early silver dollars, almost all are at the low to middle circulated grade levels, making the present Choice AU specimen a real treat for an advanced collector.

PCGS# 6852. NGC ID: 24WZ.

From the Cardinal Collection Educational Foundation.

1353

1795 Flowing Hair. BB-27, B-5. Rarity-1. Three Leaves. VF Details—Tooled (PCGS). With perhaps as many as 290,000 examples struck for the 1795 Flowing Hair, it is clear that these early silver dollars were intended to play a significant role in the commerce of the new nation. With 1794 dollars out of reach of most collectors, the 1795 BB-27 dollar has long been popular with those seeking an example of this historic series for type purposes. BB Die State II.

PCGS# 6852. NGC ID: 24WZ.

1354

1795 Flowing Hair. BB-27, B-5. Rarity-1. Three Leaves. VF Details—Holed (PCGS). Richly original steel-gray and deep olive patina overall, this piece is well defined for the grade with mentionable softness confined to the lower obverse and upper reverse borders. The hole is neatly executed through the letters BE in LIBERTY, both sides also with several notable marks in and around the centers. BB Die State II.

PCGS# 6852. NGC ID: 24WZ.

1355

1795 Flowing Hair. BB-27, B-5. Rarity-1. Three Leaves. Fine Details—Scratch (PCGS). This historic Flowing Hair dollar exhibits generally silver-gray surfaces with outlines of olive-russet to some of the design elements. Otherwise pleasingly smooth in hand, an unfortunate obverse scratch through stars 10 to 12 explains the PCGS qualifier. More affordable for type purposes. BB Die State II.

PCGS# 6852. NGC ID: 24WZ.

1356

1795 Draped Bust. BB-52, B-15. Rarity-2. Centered Bust. VF-35 (PCGS). The fields are of this handsome piece are dressed in warm silver-mauve patina, the design elements light silver-gray and outlined in steel-olive. Pleasingly smooth in hand with plenty of bold definition remaining from a generally well centered strike. A desirable coin to represent the perennially popular first year issue in the Draped Bust silver dollar series. Scarce Small Eagle design type! BB Die State V.

PCGS# 6858. NGC ID: 24X2.

1357

1796 BB-65, B-5. Rarity-4. Large Date, Small Letters. VF-35 (PCGS). OGH. This wonderfully original example exhibits blended charcoal and steel-olive peripheral highlights to dominant dove-gray patina. Pretty cobalt blue, brick-red and antique gold undertones flash into view as the surfaces dip into a light. Nicely struck and well centered, plenty of bold detail remains at the Choice VF level. The second most available of 1796 dollars behind only the BB-61 die marriage, most of the estimated 800 to 1,400 examples of BB-65 are found in mid-level circulated grades, as here. This piece, however, is far finer than the typically offered survivor and is sure to sell for a strong premium. BB Die State II.

PCGS# 6861. NGC ID: 24X3.

1358

1797 BB-71, B-3. Rarity-2. Stars 10x6. VF-25 (NGC). Well centered in strike, the reverse periphery is a bit soft but all major design elements on both sides are fully outlined and readily appreciable. Light mauve blends with warmer dove-gray to provide a pleasing appearance in hand. As one of the two relatively obtainable die marriages of the 1797 silver dollar, BB-71 is a favorite among type collectors seeking an example of the brief and challenging Draped Bust, Small Eagle design. It is also the only die pairing of the issue that corresponds to the Stars 10x6 *Guide Book* listing. BB Die State III.

PCGS# 40004.

Exciting Late Die State 1798 BB-124 Dollar

1359

1798 Heraldic Eagle. BB-124, B-24. Rarity-2. Pointed 9, 4 Lines. AU-55 (PCGS). A lovely example, both sides are near-fully lustrous with a soft satin texture overall. Otherwise brilliant with a silver-white appearance, blushes of reddish-gold iridescence are tightly confined to the upper obverse and lower reverse borders. The obverse die was damaged and sunken in this advanced state (see below), resulting in softness to Liberty's bust and in the opposing area at the upper right reverse. Besides this we note bold to sharp detail that is in keeping with the desirable Choice AU grade from PCGS. Impressively smooth overall and sure to please the discerning numismatist. BB Die State IV.

As one of the more readily obtainable die pairings of the date, the 1798 BB-124 is popular both with type collectors and specialists in the early dollar series. The latter are often drawn to this variety due to the multiple die states that have been observed among surviving examples. Of the 600 to 1,100 coins believed extant in all grades (per Q. David Bowers, 2013), most are BB Die State III. For BB Die State IV Bowers notes simply, "A few BB-124 dollars are of this die state," implying scarcity, if not rarity. Myriad obverse die cracks make for exciting observation with the aid of a loupe. In the final state, BB V, the lower right obverse would shatter; such examples were possibly struck during calendar year 1799.

PCGS# 40018.

1360

1799 BB-157, B-5. Rarity-2. VF-35 (PCGS). This handsome piece is toned in mottled pewter, dove-gray and golden-olive that provides an attractively original appearance. Well defined for a mid grade early dollar, much of the denticulation is complete and the central features are quite sharp. The 1799 BB-157 is a popular die marriage for type purposes, and this Choice VF is sure to please many collectors. BB Die State III.

PCGS# 6878. NGC ID: 24X7.

1361

1799 BB-158, B-16. Rarity-2. VF-30 (PCGS). CAC. A poster child for what a completely original, problem free, mid grade early dollar is supposed to look like. Rich olive-charcoal patina blankets both sides with iridescent undertones of cobalt blue and deep rose on the obverse. Smooth and inviting overall with plenty of bold detail remaining in the recesses of the major design elements. Difficult to improve upon in a circulated example of the type, date or die pairing, this PQ 1799 S\$1 is worthy of the strongest bids. BB Die State I.

PCGS# 6878. NGC ID: 24X7.

From Smythe's Public Sale 264, September 2006, lot 1059. Lot tag included.

1799 BB-164, B-17. Rarity-2. VF-25 (PCGS). This handsomely toned example exhibits a base of pewter-gray with mottled charcoal and olive-russet overtones. Universally bold VF detail remains from a well executed strike that comes up short only in isolated areas around the obverse border. BB-164 is among the more available die marriages of the 1799-dated silver dollar and, as such, is popular for type purposes. BB Die State II.

PCGS# 6878. NGC ID: 24X7.

1363

1799 BB-165, B-8a. Rarity-3. VG-10 (NGC). From one of the more available die marriages of the 1799 dollar, the coin offered here features more affordable quality as a certified VG-10. BB Die State II.

PCGS# 6878. NGC ID: 24X7.

1364

1799 BB-169, B-21. Rarity-3. VF-30 (NGC). Handsome deep olivegray patina blankets generally smooth-looking surfaces. Powder blue and pale pink undertones are reserved for the obverse, both sides with universally bold Choice VF detail from a nicely centered and well executed strike. While not a major rarity among die marriages of the 1799 dollar, BB-169 is more conditionally challenging than most with the typical survivor grading no finer than EF-40. This solid mid grade example offers good value for the astute collector. BB Die State I.

PCGS# 40060. NGC ID: 24X7.

1365

1800 BB-186, B-4. Rarity-4. VF-20 (NGC). OH. Well centered in strike with the border boldly and universally denticulated, this piece also shows suitable detail to the major design elements. A glossy texture points to an old cleaning, but there are no sizable marks, and the surfaces have retoned quite nicely in steel-olive iridescence that deepens toward the peripheries. Suitable for mid grade type purposes, and also appealing as an example of this scarcer die pairing for the issue. BB Die State I.

PCGS# 6887. NGC ID: 24X9.

1366

1800 BB-190, B-10a. Rarity-3. Very Wide Date, Low 8. Unc Details—Improperly Cleaned (NGC). Of superior quality for both the variety and the assigned grade, this is a more attractive coin than one might expect given the stated qualifier. Lustrous satin surfaces are lightly toned in iridescent champagne-pink and pale silver. There are no sizable marks, and even hairlines from a light cleaning are faint and not readily discerned. The strike is ideally centered and delivered bold to sharp detail to all design elements. This popular *Guide Book* variety is one of the more frequently encountered 1800 silver dollar, although this observation is reserved for circulated coins. Mint State survivors of all stripes qualify as Condition Census, and given their extreme rarity this intriguing piece is sure to appeal to astute early dollar enthusiasts. Worthy of a close look, and also a strong bid. BB Die State III.

PCGS# 40076.

1367

1803 BB-255, B-6. Rarity-2. Large 3. VF-20 (NGC). Warm mauvegray patina with olive and reddish-russet peripheral highlights, cobalt blue and lilac-rose undertones. Pleasingly smooth in hand with plenty of bold detail remaining from a well centered strike. 1803 is the final year that these large Draped Bust dollars were produced. Although a trickle of dollars continued to emerge from the Mint in 1804 and 1805, these were all believed to be dated 1803. On the Large 3 obverse used for the BB-255 variety, offered here, the 3 is repunched low and this is diagnostic to identify the die. BB Die State II.

PCGS# 6901. NGC ID: 24XD.

Classic 1836 Judd-60 Original Gobrecht Dollar

1368

1836 Name on Base. Judd-60 Original, Pollock-65. Rarity-1. Silver. Plain Edge. Die Alignment I. Proof-45 (PCGS). Offered is perhaps the most popular, and certainly the most obtainable, Judd number and die alignment of the Gobrecht silver dollar. This is a pleasing specimen for the grade with appreciable mint finish evident. The obverse is brilliant apart from delicate champagnepink iridescence along the upper left border, while the reverse exhibits champagne-pink iridescence overall. Light high point wear does little more than define the grade, the detail otherwise razor sharp to full. Faint hairlines are noted, but the surfaces are pleasingly smooth with just a few sizable marks. DTS Die State G.

Recent authors have generally recognized four different die alignments for Gobrecht dollars, designated as I (coin turn, eagle flying upwards), II (medal turn, eagle flying upwards), III (coin turn, eagle flying level with respect to obverse), and IV (medal turn, eagle flying level with respect to obverse). When Walter Breen wrote his *Complete Encyclopedia* in 1988, he considered Die Alignment I examples of the Judd-60 Name on Base issue to be originals from 1836 and Die Alignment II pieces from a

mintage of 600 pieces delivered in March 1837. He regarded Die Alignment III and IV pieces as restrikes. This view had been challenged by the early 1990s, when it was found that many Die Alignment IV pieces evinced signs of circulation, suggesting that they had been made for that purpose rather than to accommodate coin collectors. Modern research by Craig Sholley, John Dannreuther, and Saul Teichman (based on an exhaustive examination of die state evidence), reported that the die alignment sequence of Judd-60 Gobrecht dollars is actually I-IV-II-IV. All examples in these alignments are originals attributed to the December 1836 issue of 1,000 coins; the 600 pieces struck in March 1837 represent a test striking, and all were subsequently melted. Die Alignment III pieces are still regarded as restrikes coined decades later than 1836. Pollock in his United States Patterns and Related Issues considered Die Alignment II and III pieces as the scarcest alignment varieties, followed by IV. He regarded Die Alignment I pieces to be the most readily available.

PCGS# 11225.

1369

1841 OC-4. Rarity-1. AU-50 (PCGS). This second year Liberty Seated issue is among the scarcer 1840s silver dollar issues. An otherwise brilliant example with a trace of reddish-gold iridescence at the upper right obverse border.

PCGS# 6927. NGC ID: 24YB.

1370

1847 OC-2. Rarity-1. AU-55 (NGC). While the 1847 is among the more plentiful Liberty Seated dollars in an absolute sense, this piece has a more desirable, original "look" than seen in most survivors. Sandy-gray surfaces are warmly and evenly toned with subtle reddishgold undertones evident.

PCGS# 6934. NGC ID: 24YJ.

1371

1849 OC-2. Rarity-2. AU-58 (NGC). One of the scarcer 1840s silver dollar issues, requests from contemporary bullion depositors in 1849 resulted in a mintage of just 62,600 pieces. The offered coin is brilliant apart from iridescent reddish-gold peripheral color.

PCGS# 6936. NGC ID: 24YL.

1372

1855 OC-1, the only known dies. Rarity-3+. AU Details—Corrosion Removed (PCGS). Brilliant with universally bold to sharp detail. Circulation strike silver dollars of the mid to late 1850s were used almost exclusively for export, predecessors to the specialized trade dollar introduced in 1873. With most of the 26,000 circulation strikes melted or otherwise lost overseas, the 1855 is understandably elusive in today's market. A more affordable circulated survivor, and a scarce offering in today's market, the significance of this coin for series specialists can hardly be overstated. The single die pairing known for this date was used to strike both Proofs and circulation strikes.

PCGS# 6943. NGC ID: 24YU.

1859-O OC-2. Rarity-1. MS-62 (PCGS). This Treasury Hoard 1859-O comes highly recommended for inclusion in a Mint State type set where an example of the No Motto Liberty Seated dollar is required. Highly lustrous and satiny with minimal toning confined to the left obverse border.

PCGS# 6947. NGC ID: 24YY.

Condition Census 1860 Silver Dollar Underrated Circulation Strike Issue

1374

1860 OC-1. Rarity-3+. MS-64+ (PCGS). CAC. Offered is a truly exceptional example of this often overlooked issue among No Motto Liberty Seated dollars. It is a wonderfully original near-Gem dressed in blended mauve-gray and steel-olive patina, the peripheries with vivid cobalt blue undertones. Both the strike and luster are full, and were it not for a few ancient marks on the obverse this coin would certainly have secured a Gem Mint State grade. The reverse alone, in fact, is an MS-65+ in quality. A PQ example worthy of the strongest bids.

Circulation strike silver dollar production remained strong in 1860 in response to heightened demand for these coins to use in the export trade with the Orient. The Philadelphia Mint's issue of that year was produced to the extent of 217,600 pieces — one of the highest totals in the entire Liberty Seated dollar series. Much of the precious metal for this issue was supplied by increased output from the Comstock Lode, which was largely shipped to the East and South where bullion brokers deposited it at the Philadelphia or New Orleans mints and requested dollars for use in the export trade. As with the 1859, many examples of the 1860 were probably included among the more than 1,250,000 silver dollars shipped to China in 1859, 1860 and 1861. Other 1860 dollars were held domestically by banks, merchants and bullion brokers until acquired and subsequently melted by the Mint to provide bullion for the large mintages of

subsidiary silver coins at Philadelphia in 1861 and 1862. Indeed, R.W. Julian believes that the recently produced 1859 and 1860 Philadelphia Mint issues may have been disproportionately affected by this mass melting since they would have been the two issues most widely represented in bank reserves at the time.

The wholesale destruction of coins through melting — either after export or at the Mint — explains why the 1860 is far rarer in all grades than the substantial mintage would suggest. Due to this discrepancy, the 1860 is one of the most underrated Liberty Seated dollars, a distinction it shares with such other relatively high mintage issues as the 1859 and 1869. In Mint State the 1860 is very scarce in lower grades through MS-64 and rare any finer. This PCGS/CAC MS-64+ example is solidly in the Condition Census and ranks among the finest known for the issue. It is strongly suggestive of a coin that found its way into numismatic hands, or was otherwise handled with great care, immediately upon leaving the Mint in 1860.

PCGS# 6949. NGC ID: 24Z2.

PCGS Population: 2; 6 finer (MS-66+ finest). CAC Population: 7; 3. The former total includes coin certified both MS-64 and MS-64+.

Ex Bill Nagle, March 2007; Eugene H. Gardner; Heritage's sale of the Eugene H. Gardner Collection, Part II, October 2014, lot 98595; unknown; Osprey Collection, December 2021; Narva River & Lake Balaton Collection, March 2022.

1860-O OC-1. Rarity-1. MS-62 (PCGS). From the Treasury Department silver dollar releases of the early to mid 1960s comes this bright and satin to softly frosted No Motto Liberty Seated example. Intensely brilliant on the reverse, the obverse is dressed in pretty iridescent champagne-gold toning. An excellent Mint State type coin.

PCGS# 6950. NGC ID: 24Z3.

1376

1862 Proof-62 Cameo (PCGS). Otherwise silver-tinged surfaces are splashed with iridescent reddish-pink and russet toning here and there at the rims. Fully struck with appreciable field to device contrast that upholds the validity of the CAM designation from PCGS. Similar in overall rarity to the 1859 and 1860, the 1862 is one of the more frequently encountered Proofs of this type. On the other hand, demand from type collectors seeking a high grade No Motto Liberty Seated dollar is strong. When combined with the additional demand from series specialists looking for an alternative to a Mint State 1862 silver dollar — which coins are rare — Proofs of this date are understandably scarce from a market availability standpoint.

PCGS# 87005. NGC ID: 252G.

1377

1862 Proof-60 (PCGS). OGH—First Generation. A popular Civil War era issue in the Liberty Seated dollar series, the 1862 is very scarce as a circulation strike. This Proof alternative, significant in its own right, exhibits dappled sandy-silver and champagne-gold iridescence to a brightly mirrored finish.

PCGS# 7005. NGC ID: 252G.

1378

1866 OC-1. Rarity-2. Repunched Date, Doubled Die Reverse. Unc Details—Scratch (NGC). Scarce to rare at all levels of preservation, the circulation strike 1866 silver dollar has a mintage of just 48,900 pieces, most of which were lost through melting after use in the export trade with the Orient.

PCGS# 6959. NGC ID: 24Z9.

1379

1868 Proof-62 (PCGS). From a Proof mintage of 600 coins for the year comes this bright and predominantly brilliant Liberty Seated dollar. Speckled cobalt-blue and pinkish-rose rim toning provides further appeal for this With Motto type candidate.

PCGS# 7016. NGC ID: 252P.

1380

1868 Proof Details—Reverse Scratched (NGC). Handsome toning in a blend of iridescent and bolder colors enhances the appeal of this more affordable survivor from a mintage of 600 Proofs.

PCGS# 7016. NGC ID: 252P.

1381

1870 Proof-63 (PCGS). Well mirrored fields support fully impressed and frosty motifs, although dusky mauve and gray obverse toning precludes a Cameo designation. Contrast is stronger on the reverse, which is more lightly toned in similar shades. This sharp late date Proof Liberty Seated dollar would do nicely in a specimen type set to represent the With Motto design.

PCGS# 7018. NGC ID: 252S.

1382

1872 Proof-60 (PCGS). Delicate silver, gold and reddish-apricot iridescence engages the peripheries of this smartly impressed specimen.

PCGS# 7020. NGC ID: 252U.

1383

1872-CC OC-1, the only known dies. Rarity-3+. AU Details—Cleaned (PCGS). Retoning nicely in warm, even pearl and goldengray, this coin presents exceptionally well for the assigned grade. The popular 1872-CC boasts a paltry mintage of 3,150 pieces, survivors of which number only 250 to 300 coins in all grades (per Rusty Goe, 2020).

PCGS# 6969. NGC ID: 24ZK.

1878 7/8 Tailfeathers. Strong. MS-63 DMPL (PCGS). Fully struck, frosty motifs are set against deep pools of reflectivity in the fields on both sides of this lovely DMPL dollar. A popular first year Morgan variety with superior Choice Uncirculated quality.

PCGS# 97079.

1385

1878 7 Tailfeathers. Reverse of 1879. MS-65+ (PCGS). CAC. Rare premium Gem quality for this underrated hub type from first year of Morgan dollar production. Otherwise brilliant surfaces exhibit a splash of mottled champagne-apricot iridescence along the lower reverse border. Fully struck with satiny luster that is exceptional for both its intensity and smoothness.

PCGS# 7076. NGC ID: 253L.

PCGS Population: 49; 46 finer in this category (MS-67 finest). CAC Population: 44; 8. The former total includes coins certified both MS-65 and MS-65+.

Stunning Premium Gem 1878-CC Silver Dollar

1386

1878-CC Morgan. MS-66+ (NGC). CAC. This is a beautiful example from the first year of Morgan dollar coinage at the Carson City Mint. Exceptionally well preserved, both sides are virtually pristine and even under close inspection with a loupe there is little to disturb the smooth, frosty surfaces. Blushes of vivid iridescent toning are evident here and there at the borders. Sharply to fully struck throughout, it is difficult for us to imagine a more appealing example of either the type or issue.

The Carson City Mint's initial Morgan dollar mintage was 2,212,000 coins in 1878. Unlike many later CC-Mint Morgans (the 1883-CC and 1884-CC, for example), the 1878-CC saw considerable commercial use at the time of striking. In circulated grades it is among the more obtainable CC-Mint

Morgans, with most such examples well worn in grades from Good to Fine. Even so, enough of the mintage was retained in government vaults that releases during the 1950s resulted in a temporary glut of coins in dealers' inventories. As significant as they were, those releases were dwarfed by others affecting the 1882-CC, 1883-CC and 1884-CC beginning in the 1960s. The conditionally challenging nature of the 1878-CC comes to the fore in grades above MS-65. In MS-65+ and MS-66 this issue is scarce by Morgan dollar standards, while in MS-66+ and higher grades it is rare. A find for the discerning Carson City Mint or Morgan dollar specialist, we anticipate keen bidder interest in this lovely premium Gem.

PCGS# 7080. NGC ID: 253M.

NGC Census: 11; 10 finer in this category (all MS-67).

1878-CC Morgan. MS-64 DMPL (PCGS). Brilliant, minimally marked surfaces allow one's eye to focus fully on a boldly cameoed finish from the dies. Popular as the perennial CC-Mint Morgan dollar issue, the 1878-CC is scarce to rare in all grades in the DMPL category.

PCGS# 97081. NGC ID: 253M.

1388

1878-CC Morgan. MS-64 DPL (NGC). A smartly impressed, fully rendered example with strong cameo contrast between the fields and design elements. Brilliant and beautiful.

PCGS# 97081. NGC ID: 253M.

1389

1878-CC Morgan. MS-64 PL (PCGS). OGH. Fully struck and brilliant.

PCGS# 7081. NGC ID: 253M.

1390

1879 Morgan. Proof-63 (PCGS). A lightly toned, mostly slate-gray example with wisps of reddish-gold further adorning both sides. Sharply struck with appreciable reflectivity in the fields, this is a desirable Choice specimen from the early Proof Morgan dollar series.

PCGS# 7314. NGC ID: 27Z2.

1391

1879 MS-66+ (NGC). The phrase "condition rarity" comes readily to the fore when evaluating this gorgeous circulation strike 1879 silver dollar. Bright and brilliant surfaces are sharply struck with a full endowment of smooth satin luster. Among the finest known to NGC, and eagerly awaiting inclusion on a high quality Morgan dollar or type set.

PCGS# 7084. NGC ID: 253S.

NGC Census: 12; 8 finer in this category (all MS-67).

Semi-Key Date 1879-CC Morgan Dollar

1392

1879-CC Clear CC. MS-64 (PCGS). CAC. Bright and brilliant surfaces allow full appreciation of intense satin to modestly semi-reflective luster. Both sides offer razor sharp to full striking detail. Carefully preserved with abundant eye appeal.

After a promising start with 2,212,000 coins struck in 1878, Morgan dollar production at the Carson City Mint fell off markedly the next year. Only 756,000 pieces were produced in 1879, and mintages would continue to fall through 1881. Despite its proximity to Nevada's rich silver mines, the Carson City Mint was forced to play second fiddle as much of the bullion mined was sent to the more distant San Francisco Mint for coinage. There was so little bullion on hand at the Carson City facility throughout 1879, in fact, that the presses were still for much of the year. In our August 2013 sale of the Battle Born

Collection, Rusty Goe reported that Superintendent Crawford received orders from his superiors in Washington, D.C. to cease coinage operations in April and lay off workers. The presses in Carson City remained idle until August, after which only 210,000 additional silver dollars were struck before the end of 1879; these added to the 546,000 coins struck prior to the Mint's cessation of operations in April constituted the mintage for the year. With a far smaller percentage of the mintage finding its way into numismatic hands through the GSA sales of the 1970s, the 1879-CC is rarer than the lower mintage 1880-CC, 1881-CC and 1885-CC in Mint State. This issue, in fact, is the scarcest Carson City Mint Morgan dollar of the 1878 to 1885 era. With strong candidacy for inclusion in an advanced Morgan dollar set, we certainly anticipate strong interest in this offering.

PCGS# 7086. NGC ID: 253T.

Eagerly Sought 1879-CC Dollar

1393

1879-CC Clear CC. MS-64 (PCGS). Frosty surfaces are brilliant, highly lustrous and sharply struck throughout. After a promising start with 2,212,000 coins struck in 1878, Morgan dollar production at the Carson City Mint fell off markedly the next year. Only 756,000 pieces were produced in 1879, and mintages would continue to fall through 1881. Despite its proximity to Nevada's rich silver mines, much of the bullion mined was sent to the San Francisco Mint for coinage. With

a far smaller percentage of the mintage finding its way into numismatic hands through the GSA sales of the 1970s, the 1879-CC is rarer than the lower mintage 1880-CC, 1881-CC and 1885-CC in Mint State. This issue, in fact, is the scarcest Carson City Mint Morgan dollar of the 1878 to 1885 era. Just right for an advanced Morgan dollar set, we certainly anticipate strong interest in this offering.

PCGS# 7086. NGC ID: 253T.

Another Choice Uncirculated 1879-CC Morgan

1394

1879-CC Clear CC. MS-64 (PCGS). This beautiful near-Gem is intensely lustrous with frosty design elements set against semi-reflective fields. Lightly toned in pale silver, wisps of even lighter champagne-pink are evident here and there around the

peripheries. Sharply to fully struck throughout with smoother, more carefully preserved surfaces than many survivors of this semi-key date CC-Mint Morgan dollar issue.

PCGS# 7086. NGC ID: 253T.

1395

1879-CC Clear CC. MS-62 (PCGS). A brilliant and highly lustrous example that also sports razor sharp striking detail to both sides. Popular and scarce CC-Mint Morgan dollar issue!

PCGS# 7086. NGC ID: 253T.

1396

1879-CC Clear CC. Unc Details—Obverse Improperly Cleaned (NGC). Scarcest of the Carson City Mint Morgans of the 1878 to 1885 era, the semi-key date 1879-CC has a strong numismatic following at all levels of preservation.

PCGS# 7086. NGC ID: 253T.

1397

1879-S MS-68 (NGC). A virtually pristine beauty with intensely lustrous surfaces. Otherwise brilliant, splashes of champagne-apricot and, to a lesser extent, powder blue peripheral iridescence provide further visual appeal. For the quality conscious type collector or advanced Morgan dollar enthusiast, this scarce Ultra Gem will surely please.

PCGS# 7092. NGC ID: 253X.

1398

1879-S MS-68 (NGC). Virtually pristine, this fully struck Superb Gem exhibits frosty design elements set against a backdrop of satiny brilliance in the fields. The 1879-S Morgan dollar is not rare until you reach the very upper echelons of preservation. Many thousands of Uncirculated 1879-S dollars exist up to and including the Gem level, but numbers thin out significantly in higher grades. Almost all of the 9,110,000 coins struck at San Francisco that year remained in the Mint's vaults, only gradually being released in quantities in 1942 and again in the early 1960s. Most Mint State survivors come from those releases and often have marks and/or other abrasions from being moved around from vault to vault in large and very heavy \$1,000 face value sacks for the better part of 80 years. Examples are challenging to find above the MS-67 level. This coin is ever so close to perfect and will be a showcase coin for any numismatist.

PCGS# 7092. NGC ID: 253X.

1399

1879-S MS-68 (NGC). High grade type collectors and advanced Morgan dollar enthusiasts will be pleased with our multiple offerings of stellar quality examples of the 1879-S in this sale. The present lot highlights a brilliant and beautiful coin. It is fully struck, intensely lustrous, and will please even the most discerning numismatist.

PCGS# 7092. NGC ID: 253X.

1400

1879-S MS-65 (NGC). CAC—Gold Label. OH. One for the toning enthusiast, the obverse of this 1879-S is awash in the most vivid and varied iridescent colors that your cataloger (JLA) her seen on a Morgan dollar in many years. Peripheral toning in soft powder blue and golden-apricot on the reverse adds further appeal. An upper end Gem in terms of preservation, and visually appealing to an extent that nearly defies description. Exquisite!

PCGS# 7092. NGC ID: 253X.

Superb Cameo Proof 1880 Morgan Dollar

1401

1880 Morgan. Proof-67 Cameo (PCGS). This dreamy Superb Gem is untoned apart from the lightest iridescent gold that is a bit more pronounced on the obverse. A boldly cameoed finish is easily seen, the fields deeply mirrored and supporting frosty design elements. Sharply struck with a silky smooth appearance, there is much to recommend this beautiful specimen to the discerning type or date collector. The Proof mintage for the date of 1,355 pieces represents the high water mark for Proof

production in the Morgan dollar series, though no doubt far fewer than that number can be accounted for today. This issue is rare at the Superb Gem level, attesting to the fact that precious few examples were handled with the utmost care by earlier generations of numismatists.

PCGS# 87315. NGC ID: 27Z4

PCGS Population: 14; 13 finer in this category (Proof-69 Cameo finest).

1402

1880 MS-66 (PCGS). CAC. Brilliant-white surfaces allow full appreciation of smooth, satiny mint luster and bold to sharp striking detail. Visually impressive and solidly graded as an upper end Gem, as coveted CAC approval confirms.

PCGS# 7096. NGC ID: 253Y.

1403

1880-CC MS-65 (PCGS). CAC. OGH—First Generation. Otherwise brilliant, highly lustrous surfaces exhibit wisps of golden iridescence at the lower obverse and upper reverse borders. An upper end Gem to represent this perennially popular low mintage CC-Mint Morgan dollar issue.

PCGS# 7100. NGC ID: 2542.

1404

1880-CC MS-65 (PCGS). Brilliant with a full endowment of soft, billowy mint luster.

PCGS# 7100. NGC ID: 2542.

1405

1880-CC VAM-5. Top 100 Variety. 8/High 7. MS-64 DMPL (PCGS). Minimally toned and close to fully brilliant, both sides allow ready appreciation of cameoed field to device contrast. Sharply struck and nicely preserved for this popular overdate in the CC-Mint Morgan dollar series.

PCGS# 97103.

1406

1880-O MS-64 (PCGS). Fully struck with brilliant satin-white surfaces, this is an endearing near-Gem to represent a more conditionally challenged O-Mint Morgan dollar issue.

PCGS# 7114. NGC ID: 2543.

1407

1880-O MS-64 (NGC). CAC. OH. Lightly toned in iridescent pinkishrose and cobalt blue, and then again mostly around the peripheries, this smooth and endearing near-Gem allows ready appreciation of full satin luster. Temptingly close to a coveted MS-65 grade, this 1880-O represents excellent value for the sharp-eyed numismatist.

PCGS# 7114. NGC ID: 2543.

1408

1880-O MS-63+ DMPL (PCGS). CAC. A impressive strike and condition rarity for this challenging early New Orleans Mint Morgan dollar. Both sides exhibit exceptional prooflike contrast between frosty design elements and deeply mirrored fields. Largely brilliant, with crisp detail to all features. Among the most visually impressive survivors of this issue with only a dozen higher graded DMPL examples approved by CAC. A true prize for the advanced specialist.

PCGS# 97115. NGC ID: 2543.

PCGS Population: 7; 54 finer in this category (MS-64+ DMPL finest).

1880-S MS-68 (NGC). Virtually pristine with outstanding visual appeal, this untoned beauty is sharply struck and displays intense mint luster. One of the quintessential type candidates in the Morgan silver dollar series of 1878 to 1921, the 1880-S is the most common of the early date issues in Mint State after only the 1881-S and is extremely popular with type collectors seeking a single Morgan dollar. At the threshold of numismatic perfection, however, the example offered here is a noteworthy condition rarity. Indeed it is far better preserved than the vast majority of 1880-S dollars, the surfaces offer equally superior eye appeal.

PCGS# 7118. NGC ID: 2544.

1410

1880-S MS-68 (NGC). Otherwise brilliant surfaces are ringed in halos of delicate golden-apricot peripheral toning that provide additional eye appeal. The luster is full and generally frosty, although the persistent viewer will discern faint semi-reflectivity in the fields. Fully struck, as befits the issue, with silky smooth surfaces that border on numismatic perfection.

PCGS# 7118. NGC ID: 2544.

1411

1880-S MS-67+ (PCGS). CAC. Brilliant, highly lustrous and fully struck, this exquisite Superb Gem comes highly recommended for inclusion in a top flight type set.

PCGS# 7118. NGC ID: 2544.

1412

1880-S MS-67+ (NGC). CAC. Delicate golden-russet iridescence engages isolated peripheral areas of this otherwise brilliant Superb Gem. An outstanding type candidate for the iconic Morgan silver dollar design.

PCGS# 7118. NGC ID: 2544.

1413

1881 Morgan. Proof Details—Obverse Scratched (NGC). The 1881 is popular with specimen type collectors as one of the earliest dated Proofs in the Morgan dollar series.

PCGS# 7316. NGC ID: 27Z5.

1414

1881 MS-66+ (PCGS). CAC. The lightest silver and gold tinting is all that denies full brilliance for this smooth and satiny Gem. The strike is razor sharp from the rims to the centers, and the eye appeal is nothing short of strong. This early date Philadelphia Mint Morgan dollar issue, plentiful in an absolute sense, is surprisingly elusive with the quality offered here.

PCGS# 7124. NGC ID: 2546.

PCGS Population: 54; 9 finer (MS-67+ finest). CAC Population: 42; 6. The former total includes coins certified both MS-66 and MS-66+.

1415

1881-CC MS-67 (PCGS). Scarce and highly desirable Superb Gem Uncirculated preservation for this low mintage Carson City Mint Morgan dollar issue. A brilliant satin-white coin with a full strike and bountiful luster.

PCGS# 7126. NGC ID: 2547.

1416

1881-S MS-67+ (NGC). Wisps of pale champagne-pink peripheral iridescence interrupt otherwise silver-white brilliance for this captivating semi-PL example.

PCGS# 7130. NGC ID: 2549.

1417

1882 Morgan. Proof-64 Cameo (PCGS). Fully struck and satiny, the design motifs contrast nicely with watery, reflective fields. A predominantly untoned specimen that is just a few stray blemishes away from Gem Proof quality. From a mintage of 1,100 Proofs for this early date Morgan dollar issue, this is an excellent specimen type candidate.

PCGS# 87317. NGC ID: 27Z6.

1882 MS-66+ (PCGS). CAC. Vivid target-like toning in iridescent reddish-gold, cobalt blue and champagne-apricot is more extensive on the obverse. Both sides are fully struck, highly lustrous and solidly graded at the threshold of Superb Gem Uncirculated. Gorgeous!

PCGS# 7132. NGC ID: 254A.

1419

1882 MS-66 (PCGS). A second vividly toned Gem Mint State 1882 dollar, this coin exhibits iridescent cobalt blue color around softer reddish-apricot centers. Sure to sell for a nice premium to a collector who appreciates vividly toned Morgans.

PCGS# 7132. NGC ID: 254A.

1420

1882-S MS-67+ (NGC). Dusted with smoky pinkish-silver patina, the obverse contrasts with a fully brilliant reverse. Both sides are highly lustrous with a razor sharp strike and expertly preserved surfaces.

PCGS# 7140. NGC ID: 254F.

1421

1883 MS-67+ (PCGS). Virtually pristine frosty surfaces are further enhanced by vivid peripheral toning in cobalt blue and reddish-gold. Fully struck. This issue is plentiful in an absolute sense, but above the basal MS-67 level the 1883 develops into a significant condition rarity. Few examples at this level can compare with this piece in terms of quality or visual appeal.

PCGS# 7142. NGC ID: 254G.

PCGS Population: 50; 5 finer in this category (MS-68+ finest).

1422

1883 MS-67+ (NGC). Peripheral bag toning at the upper obverse and lower reverse borders is more vivid and expansive on the latter side. Otherwise brilliant, this smartly impressed and impressively lustrous Superb Gem is sure to please. The otherwise readily obtainable circulation strike 1883 Morgan silver dollar develops into a significant condition rarity in the finest Mint State grades, as here.

PCGS# 7142. NGC ID: 254G.

NGC Census: 12; 6 finer in this category (all MS-68).

1423

1883 MS-67 (NGC). Lightly and vividly toned around the peripheries, this otherwise brilliant Superb Gem makes a lovely impression in all regards.

PCGS# 7142. NGC ID: 254G.

1424

1883-CC MS-66+ (PCGS). A smartly impressed, highly lustrous Gem that combines a brilliant reverse with an obverse dressed in iridescent golden-apricot, cobalt blue and rose-russet patina.

PCGS# 7144. NGC ID: 254H.

1425

1883-CC MS-66 PL (NGC). CAC. OH. Captivating mint luster shines forth powerfully from surfaces that are brilliant apart from delightful pinkish-apricot and powder blue peripheral iridescence. Fully struck motifs contrast appreciably with semi-reflective fields.

PCGS# 7145. NGC ID: 254H.

1426

1883-CC MS-66 (PCGS). CAC. OGH. A lustrous and brilliant Gem further enhanced by razor sharp striking detail. The surfaces are as smooth and attractive as one should demand at the MS-66 grade level.

PCGS# 7144. NGC ID: 254H.

1427

1883-CC MS-66 (PCGS). Brilliant, sharply struck and fully lustrous with an intense satin finish.

PCGS# 7144. NGC ID: 254H.

1428

1883-CC MS-65 DMPL (PCGS). OGH. Brilliant and beautiful surfaces have reflective fields supporting smartly impressed, frosty motifs.

PCGS# 97145. NGC ID: 254H.

1883-S MS-63 (NGC). CAC. Swaths of vivid reddish-rose and apricot iridescence decorate the obverse, the reverse brilliant apart from faint traces of similar colors at the borders. With a full strike and intense mint finish, this is one of the nicest MS-63s for this semi-key date Morgan dollar issue that we have offered in recent years.

PCGS# 7148. NGC ID: 254K.

1430

1883-S MS-62 (PCGS). CAC. OGH. Brilliant semi-prooflike surfaces with a sharp to full strike throughout this iconic silver dollar design. Grade-defining marks are few in number of fairly well scattered, further defining this as an upper end coin at the MS-62 level.

PCGS# 7148. NGC ID: 254K.

Condition Rarity 1884-CC Morgan Dollar

1431

1884-CC MS-67+ (NGC). A beautiful, exceptionally well preserved example of this otherwise plentiful Carson City Mint Morgan dollar. Essentially brilliant on the reverse, the obverse exhibits a splash of reddish-apricot iridescence radiating out from the center. Both sides are sharply struck with full, smooth satin luster that borders on pristine.

The 1884-CC ranks alongside the 1882-CC and 1883-CC as one of the most common CC-Mint silver dollars of this perennially

popular design type. On the other hand, all three issues are scarce in the finest Mint State grades, especially relative to the demand for such pieces among discerning Morgan dollar and Carson City Mint enthusiasts. Clearly this lovely Superb Gem represents a significant find.

PCGS# 7152. NGC ID: 254M.

NGC Census: 24; 2 finer in this category (both MS-68).

1884-CC MS-67 (PCGS). The reverse of this enchanting Carson City example is brilliant apart from subtle silvery overtones. The obverse, on the other hand, is bathed in a blend of rich olive-gold, pale apricot, pinkish rose and powder blue patina that makes a strong impression on the eye. Both sides are equally lustrous with a smooth, billowy, satiny texture from the dies. Sharply struck throughout, as well, this beautiful Superb Gem is sure to please even the most discerning collector.

PCGS# 7152. NGC ID: 254M.

1433

1884-CC MS-66 PL (PCGS). A perennially popular CC-Mint type issue in the Morgan dollar series, represented here by a bright and brilliant upper end Gem. Fully struck with nice contrast between mirrored fields and frosty motifs.

PCGS# 7153. NGC ID: 254M.

1434

1884-S AU-58 (NGC). Wisps of champagne-rose iridescence enliven otherwise silver-gray surfaces. Given the key date status of the 1884-S in Mint State, this sharp and lustrous Choice AU is sure to catch the eye of Morgan dollar enthusiasts working with a more limited numismatic budget.

PCGS# 7156. NGC ID: 254P.

1435

1885 Morgan. Proof-61 (PCGS). OGH—First Generation. This boldly and originally toned specimen displays deep charcoal-blue and steel-gray patina. Fully struck throughout with no sizable marks, although light hairlining under the toning explains the grade from PCGS. Still, this is a handsome piece in hand, and a numismatically desirable item as a Proof Morgan dollar.

PCGS# 7320. NGC ID: 27ZE.

1436

1885-O MS-65 (PCGS). CAC. A dazzling array of vivid multicolored toning on the obverse is sure to result in a strong premium paid for this stunning Morgan dollar. Shades of cobalt blue, salmon-pink, antique gold and sea-green are all very much in evidence, as are other hues. Essentially brilliant on the reverse with a full quota of satiny mint luster on both sides. Exquisite!

PCGS# 7162. NGC ID: 254T.

1437

1886-S MS-63 DPL (NGC). OH. Minimally toned at the rims, this predominantly brilliant example exhibits an uncommon degree of reflectivity in the fields for the issue. One of only 750,000 examples of this semi-key date struck, DMPL/DPL survivors of which are elusive at all grade levels.

PCGS# 97171. NGC ID: 254X.

NGC Census: 22; 11 finer in this category (MS-65 DPL finest).

1438

1886-S MS-62 (PCGS). OGH—First Generation. Vivid peripheral toning provides strong eye appeal for this premium BU survivor from a limited Morgan dollar mintage of 750,000 pieces.

PCGS# 7170. NGC ID: 254X.

1439

1887/6 VAM-2. Top 100 Variety. MS-65+ (PCGS). Semi-PL fields support frosty, smartly impressed design elements on both sides of this silver-tinged example. Bold remnants of the 6 underdigit are present before and after the primary digit 7 in the date, a feature best observed with the aid of a loupe. One of just a few overdates in the Morgan dollar series, all of which occurred in two years, 1880 and 1887. All four of the active mints produced overdates in the former year, while in 1887 the overdates were limited to Philadelphia and New Orleans. The present Gem, among the finer certified by PCGS, represents a nice opportunity for those specialists who strive for both completeness and superior quality in their Morgan dollar cabinet. Well worth a premium bid.

PCGS# 7174.

PCGS Population: 19; 22 finer in this category (MS-66+ finest).

1440

1887 Proof-64 (PCGS). Iridescent reddish-gold, powder blue and mauve backlight dominant patina in smoky silver-gray and oliverusset. This is a fully struck specimen with a smooth appearance in hand. With most of the 710 Proof Morgan dollars that the Philadelphia Mint produced in 1887 extant (per Q. David Bowers, 1993), the popularity of this issue for specimen type purposes is easy to understand.

PCGS# 7322. NGC ID: 27ZG.

1441

1887-O MS-65 (NGC). A brilliant and boldly struck Gem with intense satin to softly frosted luster.

PCGS# 7176. NGC ID: 2552.

1442

1888 Proof-62 (NGC). The scarcity and popularity of Proof Morgan dollars as a group will certainly result in keen bidder interest in this more affordable 1888. It is a lightly toned specimen with iridescent highlights that appear to drift toward the borders. Well struck for the issue with only a touch of the characteristic softness to the central high points.

PCGS# 7323. NGC ID: 27ZH.

Captivating DMPL 1889-CC Morgan Dollar

1443

1889-CC MS-62 DMPL (PCGS). OGH—Doily. Offered is a particularly desirable Mint State example of this legendary key date Morgan dollar issue. It is a virtually brilliant coin whose surfaces allow full appreciation of razor sharp striking detail and deeply mirrored fields. Flashy and nicely preserved for the assigned numeric grade.

The 1889-CC is the first Carson City Mint Morgan dollar struck since 1885. The Nevada branch mint was closed throughout the intervening years during the first presidency of Grover Cleveland, who backed the gold standard and opposed the free coinage of silver. As the Carson City Mint had come into existence

principally to process the large quantities of silver being mined from the nearby Comstock Lode, Cleveland's political positions made the continued operations of the facility unlikely.

Cleveland was defeated in his initial re-election bid in 1888, paving the way for the reopening of the Carson City Mint the following year. Coinage operations resumed fairly late in 1889, however, giving the facility enough time to strike only 350,000 Morgan silver dollars. Although other CC-Mint Morgans have lower mintages, the 1889-CC was saved in far fewer numbers and ranks as the rarest Carson City Mint issue of the type.

PCGS# 97191. NGC ID: 2559.

High Grade 1889-CC Morgan S\$1

1444

1889-CC AU-58 (NGC). A superior example of one of the most eagerly sought issues in the ever-popular Morgan dollar series. Lightly toned in mottled sandy-pink and pale silver, both sides readily reveal a semi-prooflike finish as the coin rotates under a light. Striking detail is nearly full with the design elements

universally crisp. Impressively smooth for the assigned grade, and just right for a top flight Morgan dollar set or collection of CC-Mint coinage.

PCGS# 7190. NGC ID: 2559.

1889-CC EF-45 (PCGS). A brilliant, lustrous and overall boldly defined Choice EF representative of this key date Morgan dollar from the Carson City Mint.

PCGS# 7190. NGC ID: 2559.

1446

1889-CC VF-35 (NGC). Warmly and evenly toned in deep dove-gray, this bold and inviting mid grade example is quite smooth overall for a CC-Mint silver dollar that saw this extensive commercial use. Popular key date Morgan issue!

PCGS# 7190. NGC ID: 2559.

1447

1889-CC VF-25 (NGC). CAC. Premium VF quality for this eagerly sought Carson City Mint Morgan dollar issue. Smooth and inviting in hand, the surfaces are attractively original in preservation with an even endowment of warm dove-gray patina.

PCGS# 7190. NGC ID: 2559.

1448

1889-CC VF-20 (PCGS). Light silver-gray surfaces and bold VF detail characterize both sides of this key date Morgan dollar.

PCGS# 7190. NGC ID: 2559.

1449

1889-O MS-65 (PCGS). CAC. OGH—First Generation. Smooth satin luster flows serenely over surfaces that are brilliant apart from a crescent of soft golden-apricot iridescence at the lower reverse border. Sharply struck throughout, and uncommonly so for the issue, this thoroughly PQ example has all the makings of an MS-66 grade for an 1889-O Morgan dollar. Thanks to the release of examples from federal vaults over a number of years from the late 1930s to the early 1960s, survivors of this 11,875,000-piece issue are plentiful in an absolute sense. Most are poorly struck with blunt high point definition, however, and many also possess indifferent luster quality and/or numerous bag marks. Those are not the kind of coins of which Gems are made and, indeed, this issue is scarce in MS-65 and rare any finer. As one of the finest examples that we have offered in recent memory, the significance of this piece for advanced Morgan dollar enthusiasts can hardly be overstated.

PCGS# 7192. NGC ID: 255A.

CAC Population: 22; 4.

1450

1889-O MS-64 (PCGS). CAC. OGH—First Generation. Sharp to full striking detail and intense mint luster would be enough on their own to distinguish this premium quality example from the majority of 1889-O dollars extant. Of further significance in this regard is the toning, which features a bold array of vivid and varied colors on the reverse. The obverse is brilliant apart from a splash of reddish-gold at the lower border. Choice examples of this challenging issue don't come any nicer than this and, indeed, this piece has more to offer than many certified MS-65s that we have handled for the 1889-O in recent years.

PCGS# 7192. NGC ID: 255A.

1451

1889-S MS-65 (ANACS). OH. Pretty iridescent toning in orange-apricot, reddish-rose and cobalt blue is boldest at the upper obverse and lower reverse borders. Sharp and lustrous with a pleasingly smooth satin texture.

PCGS# 7194. NGC ID: 255B.

1890 Proof-63 (NGC). CAC. Impressively full in strike for the issue, this piece combines satiny design elements with well mirrored fields. A bit of cloudiness around the peripheries is noted, especially for the reverse, on which side a streak of russet iridescence horizontally bisects the center. Proofs of this popular silver dollar type are always in demand, especially when solid enough technically to secure approval from CAC at the assigned grade level.

PCGS# 7325. NGC ID: 27ZK.

1453

1890 Proof-61 (PCGS). A boldly toned specimen that sports above average central striking detail for a Proof Morgan dollar from the 1888 to 1893 era.

PCGS# 7325. NGC ID: 27ZK.

1454

1890 MS-64 DMPL (PCGS). An elusive finish for this Philadelphia Mint Morgan dollar issue, we note an uncommon degree of reflectivity in the fields of this boldly struck example. Wisps of pale silver and, over the left quarter of the obverse, champagne-gold iridescence are noted.

PCGS# 97197. NGC ID: 255C.

1455

1890-CC MS-64 DMPL (PCGS). A bright white coin that shows strong reflectivity in the fields and billowy frost on the devices. The Deep Mirror Prooflike designation is very desirable, especially when found on coins in high grade, as the delicate mirror fields show bagmarks with ease. Hence this lovely Choice Morgan dollar would be a fine acquisition for the date or Carson City specialist. Finer examples are indeed rare and bring multiples of the price expected for this near-Gem.

PCGS# 97199. NGC ID: 255D.

1456

1890-CC MS-63 (NGC). OH. Beautifully toned surfaces exhibit cobalt blue peripheral iridescence that gives way to reddish-apricot and pearl gray toward the centers. Well struck with full mint luster, this PQ example in an old NGC "fatty" holder is sure to sell for a nice premium.

PCGS# 7198. NGC ID: 255D.

1457

1891-CC MS-65+ (**PCGS**). Bountiful luster in a satin to modestly semi-reflective finish shines forth powerfully from both sides of this brilliant and sharply struck example. Most 1891-CC dollars were paid out into circulation during the 1890s, continuing to 1910. It is little wonder that the 1891-CC is one of just a few Carson City Mint Morgan dollars that has been readily available ever since the year of issue. However, after 1962 to 1964, when it was found that few remained in the Treasury in comparison to the large quantities of CC-Mint dollars from the early 1880s, the 1891-CC became scarce in a relative sense. The typical survivor grades no finer than MS-64 and in the finest Mint State grades, as here, the 1891-CC is a noteworthy condition rarity that would be just right for an advanced collection.

PCGS# 7206. NGC ID: 255H.

1458

1891-CC MS-65 (PCGS). This smartly impressed and otherwise brilliant Gem exhibits blushes of pale champagne-pink iridescence here and there around the peripheries. Uncommonly well preserved for this scarcer CC-Mint Morgan dollar issue from the 1890s.

PCGS# 7206. NGC ID: 255H.

1891-CC VAM-3. Top 100 Variety. Spitting Eagle. MS-64 (PCGS). An original, silver-tinged, fully lustrous example of the popular Spitting Eagle variety, so-named due to the presence of a tiny di chip (as made) in the reverse field at the opening of the eagle's beak.

PCGS# 7206. NGC ID: 255H.

1460

1891-CC VAM-3. Top 100 Variety. Spitting Eagle. MS-64 (NGC). CAC. This attractively original near-Gem exhibits mottled reddishapricot and cobalt blue iridescence to a base of antique silvery tinting. Sharply struck, highly lustrous and sure to please the discerning collector of CC-Mint Morgans.

PCGS# 133937. NGC ID: 255H.

1461

1891-CC VAM-3. Top 100 Variety. Spitting Eagle. MS-63 DMPL (PCGS). Glowing with deep pools of reflectivity, the fields form a splendid backdrop to frosty-textured, boldly impressed devices. Essentially untoned, with a bright silver-white sheen that shines forth powerfully in the absence of all but minor abrasions. Interestingly, the 1997 reference *The Top 100 Morgan Dollar Varieties: The VAM Keys* by Michael S. Fey and Jeff Oxman describes this variety as "UNK" (read: unknown) with a DMPL finish.

PCGS# 43505. NGC ID: 255H.

1462

1891-CC GSA Morgan Silver Dollar. VAM-3. Top 100 Variety. Spitting Eagle. MS-63 (NGC). An untoned, frosty white example with full striking detail to the design elements. One of the scarcest Carson City Morgan dollars in an original GSA holder, only 5,687 examples of the 1891-CC (0.30% of the mintage of 1,618,000 pieces) were distributed through the GSA sales of the 1970s. A find for the advanced collector.

The original box and cards are included.

PCGS# 518881. NGC ID: 255H.

1463

1892-CC MS-65 (PCGS). Intensely lustrous surfaces are fully brilliant and sharply struck throughout the design. Despite a relatively generous mintage of 1,352,000 pieces, the 1892-CC is one of the more challenging Carson City Mint Morgan dollars to locate in the finer Uncirculated grades. Quantities were paid out from the San Francisco Mint during the 1920s and, especially, the 1940s and 1950s. Smaller quantities also came out of hiding in the Treasury Department Building during the same era. When it came to the great silver dollar releases of 1962 to 1964, however, few examples of the 1892-CC were still on hand. When the federal government stopped paying out silver dollars in March 1964, its inventory of remaining coins included just one 1892-CC! This is an uncommonly well preserved Gem that is sure to catch the eye of astute bidders.

PCGS# 7214. NGC ID: 255M.

1464

1892-CC MS-64 (PCGS). CAC. Sharp, lustrous and brilliant, this conditionally scarce 1892-CC dollar represents a significant find for the discerning collector of the Morgan series. Upper end Choice Mint State preservation that is worthy of a nice premium.

PCGS# 7214. NGC ID: 255M.

1892-CC MS-64 (PCGS). Brilliant and sharply struck with strong luster and a delightful frosty texture. One of the more conditionally challenged Carson City Mint Morgan dollar issues, the 1892-CC is far scarcer in the finer Mint State grades than the low mintage 1880-CC, 1881-CC and 1885-CC from the previous decade. With Gems particularly elusive, this attractive MS-64 represents a significant find for the astute collector.

PCGS# 7214. NGC ID: 255M.

1466

1892-CC MS-63 (PCGS). OGH—First Generation. A satiny and smartly impressed example with a dusting of pale silver to both sides and warmer pinkish-apricot iridescence in isolated peripheral areas. Certainly a superior MS-63 for this scarcer, more conditionally challenged CC-Mint Morgan dollar issue.

PCGS# 7214. NGC ID: 255M.

1467

1892-CC MS-63 (PCGS). Fully struck and highly lustrous, this attractive coin combines frosty design elements with semi-reflective fields. Peripheral toning in iridescent champagne-pink enhances already strong eye appeal.

PCGS# 7214. NGC ID: 255M.

1468

1892-CC MS-63 (PCGS). A full quota of satiny mint luster is readily appreciable in the absence of even the lightest toning. Brilliant and flashy Choice Mint State quality for this scarcer CC-Mint issue in the Morgan dollar series.

PCGS# 7214. NGC ID: 255M.

1469

1892-CC MS-62 (PCGS). OGH—First Generation. This fully struck, intensely lustrous example is smooth enough to evoke thoughts of a Choice Mint State rating. A brilliant and thoroughly PQ CC-Mint Morgan that is worthy of a close look prior to bidding.

PCGS# 7214. NGC ID: 255M.

1470

1892-CC MS-61 (PCGS). Untoned silver-white surfaces are sharply struck with a full quota of satiny mint luster.

PCGS# 7214. NGC ID: 255M.

Legendary Mint State 1892-S Morgan Dollar

1471

1892-S MS-64 (PCGS). CAC. This is an exceptional survivor and a sought-after condition rarity. It is also a richly original coin dressed in a bold blend of silver-mauve, steel-olive, powder blue, antique gold and reddish-apricot shades that deliver outstanding eye appeal. The finish is lustrous and satiny, the strike razor sharp to full throughout the design. The in hand appearance is remarkably smooth for the assigned grade and, in the absence of sizeable blemishes, only a few wispy handling marks preclude an even higher numeric grade. Given the legendary status of the 1892-S Morgan dollar in Mint State, this handsome PCGS/CAC MS-64 is sure to have no difficulty finding its way into an advanced cabinet.

The 1892-S is a Morgan dollar that makes the series both interesting to study and challenging to collect. On one hand, well worn survivors in grades such as Good and VG are readily obtainable, despite a mintage of 1,200,000 pieces. Conversely, the 1892-S is one of the rarest issues of its type in Mint State. We suspect that a significant portion of the mintage was placed into

commercial channels during the final years of the 19th century or early in the 20th century. Most coins remained in circulation for many years, explaining the sizable population of well worn survivors. According to Q. David Bowers (Silver Dollars & Trade Dollars of the United States: A Complete Encyclopedia, 1993), at least one original bag was paid out by the San Francisco Mint during the 1920s. The rest of the mintage was almost certainly included among the 270,232,722 silver dollars that the federal government melted pursuant to the terms of the 1918 Pittman Act. As far as numismatic scholars know, this issue was not included in the silver dollar releases from the San Francisco Mint during the 1940s or 1950s, nor was it represented in the Treasury Department releases of 1962 to 1964. Today, the rarity of the 1892-S in Mint State is well known among Morgan dollar enthusiasts. With market appearances of such pieces few and far between, the opportunity to acquire this premium Mint State example deserves serious consideration.

PCGS# 7218. NGC ID: 255P.

PCGS Population: 10; 16 finer in this category (MS-68 finest). CAC Population: 5; 3.

1472

1892-S AU-55 (NGC). With Mint State survivors priced beyond reach of most Morgan dollar enthusiasts, lustrous and bold Choice AU examples such as this bring premiums as attractive alternatives. Brilliant.

PCGS# 7218. NGC ID: 255P.

1473

1893 MS-63 (PCGS). OGH—First Generation. Lustrous satin surfaces exhibit delicate silver tinting and, in isolated peripheral areas, bolder champagne-apricot iridescence. Superior Choice quality for this popular low mintage entry in the circulation strike Philadelphia Mint Morgan dollar series.

PCGS# 7220. NGC ID: 255R.

Outstanding Strike and Condition Rarity 1893-CC Dollar

1474

1893-CC MS-64 (PCGS). An impressive representative of this challenging key date Morgan dollar issue. Whereas many Mint State 1893-CC dollars are bluntly struck in the centers, this attractive piece is fully defined throughout the design. The surfaces are also exceptionally smooth for the issue, the typical Uncirculated survivor of which is heavily abraded and confined to lower grades through MS-62. Brilliant with intense mint luster that provides modest cartwheel visual effects under a light.

The Carson City Mint silver dollar series passed into history in 1893 with a mintage of 677,000 pieces. This has long been recognized as a key date issue among CC-Mint Morgans, especially in the finest Mint State grades. Exceptionally well produced and preserved, this premium quality example would stand out as a highlight in an advanced collection of Carson City Mint coinage or Morgan silver dollars.

PCGS# 7222. NGC ID: 255S.

1893-CC MS-63 (PCGS). Central striking detail is razor sharp and far better than typically seen in Mint State '93-CC dollars. Also superior is the surface quality, both sides with uncommonly few marks for an issue that is usually offered with numerous deep, detracting abrasions. Brilliant and highly lustrous, as well, it is difficulty for us to imagine a more desirable example of this key date Morgan dollar issue at the assigned grade level.

PCGS# 7222. NGC ID: 255S.

1476

1893-CC MS-63 (PCGS). This very appealing coin is quite smooth for an issue that is known for Mint State survivors that are heavily abraded. The strike is more typical of the 1893-CC with softness in the centers, although the detail is considerably sharper toward the borders. Peripherally toned in delicate champagne-pink iridescence, full, intense mint frost adds to the overall desirability. The final year 1893-CC is also one of the more challenging Carson City Mint Morgan dollars to collect. Attractive Uncirculated survivors, as here, are particularly elusive relative to the strong demand that this series enjoys in today's market.

PCGS# 7222. NGC ID: 255S.

1477

1893-CC MS-62 (PCGS). CAC. Blushes of champagne-pink peripheral iridescence are all that deny brilliance for this lustrous and flashy piece. Semi-prooflike in finish, in fact, and sure to be of keen interest given the historical significance and semi-key date status of this Carson City Mint silver dollar issue.

PCGS# 7222. NGC ID: 255S.

1478

1893-CC MS-62 (NGC). It is not often that Mint State survivors of this key date Morgan dollar issue combine both razor sharp striking detail and minimally abraded surfaces in the manner that characterizes the offered coin. That it has been certified MS-62 is of further significance, for examples of all Morgan dollar issues are seldom this smooth when encountered at this grade level. Full mint luster and minimally toned surfaces further enhance the appeal of this premium quality BU example.

PCGS# 7222. NGC ID: 255S.

1479

1893-CC MS-60 (PCGS). CAC. OGH—First Generation. Whereas the highly lustrous surfaces of this coin are commensurate with a Mint State 1893-CC dollar, the toning is vastly superior in vividness to that which we have seen in examples of this issue over the years. The obverse periphery is ringed in mottled rose-orange iridescence, while similarly bright colors of reddish-apricot, salmon-pink and cobalt blue decorate the reverse border. Not overly abraded for the assigned grade, BU survivors of this challenging Morgan dollar issue are rarely offered either this well preserved or this attractive. The strongest bids are certainly justified here.

PCGS# 7222. NGC ID: 255S.

1480

1893-CC EF-45 (NGC). Lightly toned silver-gay surfaces show plenty of satiny mint luster as the coin rotates under a light.

PCGS# 7222. NGC ID: 255S.

1481

1893-CC EF-40 (PCGS). A richly and evenly toned example featuring a warm blend of olive and dove-gray. Well defined overall and impressively smooth in hand, here is a lovely EF that will nicely represent the historic, key date 1893-CC Morgan dollar.

PCGS# 7222. NGC ID: 255S.

1893-O AU-58 (PCGS). OGH—First Generation. From the lowest mintage Morgan dollar issue produced at New Orleans comes this sharply struck, near-fully lustrous example. This is essentially a Mint State coin, although a thin scuff in the lower left obverse field may continue to preclude a grade of MS-60 or finer even were this piece recertified in today's market. PQ at the AU-58 level, and further enhanced by pretty toning in delicate champagne-gold.

PCGS# 7224. NGC ID: 255T.

1483

1893-O AU-58 (PCGS). Brilliant surfaces allow full appreciation of abundant mint frost. The strike is soft in the centers, typical for the issue, but there is little in the way of actual rub, and most handling marks are inconspicuous to the eye. The eagerly sought 1893-O has the lowest mintage among New Orleans Mint Morgan dollars with just 300,000 pieces produced.

PCGS# 7224. NGC ID: 255T.

1484

1893-S VF-30 (PCGS). Warm dove-gray with tinges of light gold and olive, this boldly defined mid grade 1893-S dollar is sure to attract many bidders among Morgan dollar enthusiasts.

PCGS# 7226. NGC ID: 255U.

1485

1893-S VF-30 (NGC). An offering that is sure to catch the eye of advanced Morgan dollar enthusiasts, this lot highlights a bold and appreciably lustrous mid grade survivor of the key date 1893-S. Predominantly silver-gray in appearance, yet with a halo of vivid reddish-rose and cobalt blue iridescence encircling much of the obverse periphery.

PCGS# 7226. NGC ID: 255U.

1486

1893-S VF-30 (ANACS). OH. Pleasing tan-gray surfaces with wisps of pale powder blue in select peripheral areas. Bold and desirable midgrade preservation for this eagerly sought, key date Morgan dollar issue.

PCGS# 7226. NGC ID: 255U.

1487

1893-S Fine-12 (PCGS). A handsome piece with pleasing circulated cameo effect. Smooth-looking surfaces and solid Fine detail further enhance the appeal of this key date Morgan dollar.

PCGS# 7226. NGC ID: 255U.

Awe-Inspiring Proof 1894 Silver Dollar

1488

1894 Proof-67+ (PCGS). CAC. An enchanting specimen richly toned in olive-copper iridescence, select design elements with blushes of exceptionally vivid electric-blue. When viewed with the aid of direct lighting intense undertones of cobalt blue, salmon pink and champagne-pink come readily to the fore. Fully struck and remarkably well preserved in all regards, this captivating Superb Gem will appeal to Proof Morgan dollar specialists, specimen type collectors and numismatists with a wider interest in vividly toned silver coinage.

This issue, with a mintage of 972 pieces, is one of the more eagerly sought Proof Morgan dollars due to its association with

the key date circulation strike 1894. The latter issue is the lowest mintage circulation strike Philadelphia Mint silver dollar of the type with a mere 110,000 coins struck. Scarce in its own right at lower levels of preservation, the Proof 1894 is a noteworthy condition rarity with the combination of Superb Gem quality and outstanding eye appeal offered here.

PCGS# 7329. NGC ID: 2577.

PCGS Population: 2; 0 finer in this category. CAC Population: 4; 0. This total includes coins certified both Proof-67 and Proof-67+.

From our (Stack's) Norweb Collection sale, November 2006, lot 709, as NGC Proof-68.

1489

1894 MS-62 (ANACS). OH. Speckled steel-blue and pinkish-russet iridescence is most extensive along the upper obverse and lower reverse borders. This is a sharply struck and lustrous piece whose status as a survivor from a low mintage Morgan dollar issue is sure to result in keen bidder interest.

PCGS# 7228. NGC ID: 255V.

1490

1894 AU-58 (PCGS). Essentially untoned surfaces are boldly struck, lustrous and just a whisper away from Mint State preservation. From a mintage of just 110,000 pieces, the lowest in the Philadelphia Mint's circulation strike Morgan dollar series.

PCGS# 7228. NGC ID: 255V.

1491

1894 AU-55 (NGC). Brilliant apart from subtle reddish-gold outlines to some of the design elements. Striking detail is razor sharp to full throughout, and abundant luster remains. Low mintage issue!

PCGS# 7228. NGC ID: 255V.

1492

1894 AU-55 (NGC). Silver-tinged surfaces are sharply defined overall with plenty of luster remaining. Desirable low mintage Morgan dollar issue!

PCGS# 7228. NGC ID: 255V.

1493

1894-O MS-61 (PCGS). Lustrous satin surfaces are untoned apart from wisps of pretty champagne-pink iridescence at the upper obverse and lower reverse borders. Boldly to sharply struck with superior eye appeal at the assigned grade level. Mint State survivors of the 1894-O are far scarcer than a relatively generous mintage of 1,723,000 pieces might imply.

PCGS# 7230. NGC ID: 255W.

1494

1894-S MS-64 (PCGS). The lustrous and frosty surfaces are fully struck from the rims to the centers. Generally brilliant, although with blushes of pretty iridescent toning along the upper obverse and lower reverse borders. Although more available in Mint State than the 1894 and 1894-O, the 1894-S is still one of the scarcer, more conditionally challenging issues of its type. With Gems rare from a condition standpoint, this pleasing MS-64 represents outstanding value for the astute collector.

PCGS# 7232. NGC ID: 255X.

1495

1894-S MS-63 (PCGS). With just minimal toning here and there around the peripheries, this is a generally brilliant example with a pleasingly bold strike throughout the design. Both sides are fully lustrous, the obverse with a soft frosty texture and the reverse with modest semi-reflectivity in the fields. A few light marks to Liberty's cheek are all that separate this key date Morgan dollar from a higher Choice Mint State grade.

PCGS# 7232. NGC ID: 255X.

1496

1894-S MS-62 (PCGS). OGH—First Generation. Brilliant, highly lustrous and fully struck, this PQ example also offers uncommonly smooth-looking surfaces at the assigned grade level. Worthy of a close look, and also strong bids.

PCGS# 7232. NGC ID: 255X.

1497

1895-O AU-55 (PCGS). From a limited mintage of 450,000 pieces comes this boldly defined, considerably lustrous Choice AU Morgan. Brilliant.

PCGS# 7236. NGC ID: 255Y.

1498

1895-O AU-53 (PCGS). Brilliant surfaces allow full appreciation of a prooflike finish in the fields. With uncommonly sharp striking detail for the issue, as well, this is certainly a superior quality example of the key date 1895-O Morgan dollar.

PCGS# 7236. NGC ID: 255Y.

1499

1895-O VF-30 (PCGS). OGH—First Generation. Brilliant and boldly defined overall, we feel that both the amount of remaining detail and luster are more in line with an EF as opposed to Choice VF rating. Wispy hairlines are noted for accuracy, but the eye appeal is strong. In sum, there is a lot of "coin" here at the VF-30 grade level. Worthy of a premium.

PCGS# 7236. NGC ID: 255Y.

1895-S MS-63 (PCGS). An attractive piece with satin to frosty luster and just a blush of light reddish-gold toning in the center of the reverse. Well struck with most features sharply rendered, both sides are impressively smooth for the assigned grade. Far finer than the typical Mint State survivor of the challenging 1895-S Morgan dollar issue, and worthy of the strongest bids. A limited mintage of just 400,000 pieces for the issue only adds to the appeal of this key date coin.

PCGS# 7238. NGC ID: 255Z.

1501

1895-S Unc Details—Cleaned (NGC). A prooflike finish with mirrored fields supporting frosty design elements dominates the in hand appearance despite evidence for the stated qualifier. The latter takes the form of faint hairlines that are not readily evident at all viewing angles. Sharply struck and brilliant in most areas, this coin presents exceptionally well for the assigned grade and is sure to see spirted bidding among sharp-eyed collectors. Mintage: just 400,000 pieces, one of the lowest in the circulation strike Morgan dollar series.

PCGS# 7238. NGC ID: 255Z.

1502

1896 MS-67+ (PCGS). Enchanting frosty white surfaces are free of grade-limiting marks. Overall pristine, in fact, and also possessed of an impressively full strike from the dies. Most areas are brilliant, but we do note enhancing blushes of iridescent toning at the upper right obverse and lower left reverse borders. Thanks to the release of large numbers of Mint State examples in the 1950s and early 1960s, the 1896 ranks as one of the more plentiful circulation strike Morgan dollars in today's market. Even so, the coin offered here is quite special with its combination of virtually pristine surfaces and strong eye appeal. A find for the high grade type collector or advanced Morgan dollar enthusiast.

PCGS# 7240. NGC ID: 2562.

PCGS Population: 47; 3 finer in this category (all MS-68).

1503

1896 MS-67+ (PCGS). The silver-tinged obverse contrasts with a reverse that exhibits blushes of multicolored bag toning at the upper and left borders. Fully struck with a smooth, satiny texture overall. Thanks to the release of large numbers of Mint State examples in the 1950s and early 1960s, the 1896 ranks as one of the more plentiful circulation strike Morgan dollars in today's market. Even so, the coin offered here is quite special with its combination of virtually pristine surfaces and strong eye appeal. A find for the high grade type collector or advanced Morgan dollar enthusiast.

PCGS# 7240. NGC ID: 2562.

PCGS Population: 47; 3 finer in this category (all MS-68).

1504

1896-O MS-61 (NGC). Both the satiny mint luster and boldly to sharply executed strike are above average for a Mint State survivor of this conditionally challenged New Orleans Mint Morgan dollar.

PCGS# 7242. NGC ID: 2563.

1505

1896-S AU-58 (NGC). Surprisingly scarce in Mint State for an issue with 5 million pieces produced, the offered coin is a boldly defined and lustrous Choice AU alternative for the 1896-S dollar. Wisps of pale champagne-gold iridescence are all that deny full brilliance.

PCGS# 7244. NGC ID: 2564.

1506

1897-S MS-66 (PCGS). Both sides of this handsome piece exhibit a base of light antique silver patina, with overtones of soft powder blue, reddish-copper and antique gold iridescence on the obverse. Boldly to sharply struck with full mint luster. The 1897-S is a somewhat scarce San Francisco Mint Morgan dollar in lower Mint State grades that becomes notably scarce at the MS-66 level. Astute collectors would be hard pressed to do better than the offered coin.

PCGS# 7250. NGC ID: 2567.

1899 MS-66+ PL (PCGS). CAC. Outstanding quality and eye appeal for the low mintage 1899 Morgan dollar, an issue with just 330,000 circulation strikes produced. The fields are remarkably reflective for the issue, and they support fully impressed design elements that exhibit a modestly satin texture. Fully struck and carefully preserved, the obverse is untoned while the reverse exhibits a dusting of pale sandy-silver iridescence. Despite the limited mintage, the 1899 has survived in significant enough numbers that locating an example in most Mint State grades should prove easy under normal market conditions. As Wayne Miller noted in his popular Morgan and Peace Dollar Textbook, however, "Despite its ready availability in BU condition, the 1899-P [sic] is elusive in fully prooflike condition... When minimally bagmarked, they deservedly command a significant premium." A particularly significant find for the advanced collector of PL Morgan dollars, this is one of the two finest examples in its category known to PCGS.

PCGS# 7259. NGC ID: 256B.

PCGS Population: 2; 0 finer in this category. CAC Population: 4; 0. This total includes coin certified both MS-66 PL and MS-664-PL

1508

1899 MS-66 (PCGS). CAC. Dusted with the lightest silvery tinting, this endearing upper end Gem also sports razor sharp striking detail and virtually pristine surfaces. The 1899 Morgan dollar is not a particularly rare issue in Mint State, but it is perennially popular with collectors due to a limited mintage of 330,000 circulation strikes.

PCGS# 7258. NGC ID: 256B.

1509

1900 Proof-64 Cameo (NGC). CAC. Richly original toning reveals the most vivid and varied colors as the surfaces dip into a light. Fully struck with strong cameo contrast shining forth at all viewing angles. At 912 coins struck, the 1900 boasts the second highest mintage in the Proof Morgan dollar series after the 1894 (972 pieces produced). The Mint was likely anticipating heightened Proof sales to contemporary collectors in connection with the turn of the century. While survivors of the Proof 1900 are readily obtainable in an absolute sense by the standards of the type, most are confined to lower grades than that offered here.

PCGS# 87335. NGC ID: 27ZY. CAC Population: 8; 17.

1510

1900 MS-66+ (PCGS). CAC. From a popular turn-of-the-century issue comes this brilliant and satin to softly frosted Gem Morgan dollar. Sharply struck with plenty of visual appeal.

PCGS# 7264. NGC ID: 256E.

1511

1900-O MS-64 DPL (NGC). Delicate reddish-gold rim highlights further enliven surfaces that are reflective in the fields, soft and satiny over the design elements.

PCGS# 97267. NGC ID: 4WSX.

1512

1900-O/CC Top 100 Variety. MS-65 (PCGS). OGH. Crisply impressed with captivating satin-white luster, this brilliant and expertly preserved Gem delivers superior quality for a popular Morgan dollar variety. Sure to sell for a nice premium.

PCGS# 7268. NGC ID: 256G.

1513

1900-O/CC Top 100 Variety. MS-64+ (PCGS). CAC. Brilliant and boldly struck, this endearing near-Gem also offers full mint luster in a billowy satin texture. The overmintmark feature is plainly evident when observed with a loupe.

PCGS# 7268. NGC ID: 256G

1514

1901 Proof-63 (NGC). Warmly patinated in golden-gray, appreciable reflectivity shines forth nicely from the fields as the surfaces dip into a light. Given the scarcity and key date status of the circulation strike 1901 Morgan dollar issue in Mint State, survivors of the year's 813-piece Proof issue have long enjoyed heightened demand among collectors.

PCGS# 7336. NGC ID: 27ZZ.

1515

1901 MS-62 (PCGS). This significant offering is for a Mint State survivor of the fabled condition rarity 1901 Morgan dollar. It is a lightly toned coin dressed in iridescent gold over full satin luster. Well struck and bold overall, the in hand appearance is pleasingly smooth for the assigned grade.

PCGS# 7272. NGC ID: 256J.

1516

1902 Proof-64 (PCGS). CAC. Lovely reddish-gold peripheral toning frames silvery centers. Sharply struck with an intense, universally brilliant finish from the dies, there is much to recommend this coin to the discerning Proof type or date collector. From a mintage of 777 pieces, one of the lowest among Proof silver dollars of the Morgan design type. The 1902 is the first Proof Morgan dollar issue for which Mint employees lightly polished the recessed areas of the dies, the typical example displaying a universally brilliant finish without the cameo contrast seen on most earlier dated Proofs of this type. The 1903 and 1904 were also produced in brilliant format. Scarce when compared to many Proof Morgan dollar issues from the 1880s and 1890s.

PCGS# 7337. NGC ID: 2822.

1517

1902 Proof. Unc Details—Altered Surfaces (PCGS). Proof mintage: 777 pieces.

PCGS# 7337. NGC ID: 2822.

1518

1902 MS-63 PL (PCGS). OGH—First Generation. The lightest silvery tinting hardly inhibits a universally semi-reflective finish for this appealing piece.

PCGS# 7279. NGC ID: 256M.

1519

1902-O MS-66+ (NGC). CAC. Satiny and smooth Gem-quality surfaces are dusted with pale silver-rose iridescence that is not readily apparent at all viewing angles.

PCGS# 7280. NGC ID: 256N.

1520

1903 Proof-63 (NGC). The penultimate Proof issue in the original Morgan dollar series, the 1903 was produced to the extent of 755 pieces with most survivors universally brilliant in finish, as here. Untoned apart from the lightest silvery tinting that is not readily apparent at all viewing angles.

PCGS# 7338. NGC ID: 2823.

1521

1903-S Unc Details—Cleaned (PCGS). Pleasingly smooth in hand in the absence of sizeable marks, this frosty and boldly struck example represents a lot of "coin" for the assigned grade. Silver-gray obverse tinting contrasts with bolder golden-apricot iridescence on the reverse. More affordable, yet still desirable Mint State preservation for this key date Morgan dollar from the final years of this classic series.

PCGS# 7288. NGC ID: 256T.

Exceptional Gem Mint State 1904-S Dollar

1522

1904-S MS-66 (PCGS). Here is a simply outstanding example of this scarce, conditionally challenging Morgan dollar from the final year of the "original" series (i.e., 1878 to 1904). Sharply struck with bountiful satin to softly frosted luster, both sides are enhanced by full mint brilliance. The overall appearance is pristine, and the quality is very close to an even higher Gem Mint State rating.

The 1904-S is one of the most elusive Morgan dollars in all grades, as much of the mintage of 2,304,000 pieces was likely

melted under the Pittman Act in 1918. Release of coins from federal storage was limited and came to an end during the 1950s; there were none in the Treasury Department releases of 1962 to 1964. As one of the finest examples seen by PCGS, this lovely coin represents a significant find for advanced collectors specializing in this popular series.

PCGS# 7294. NGC ID: 256W.

PCGS Population: 18; 5 finer in this category (MS-67 finest).

1523

1904-S Unc Details—Cleaned (PCGS). Far finer than the assigned grade might imply, this key date Morgan is pleasingly smooth in hand with pretty peripheral toning in reddish-rose, champagne-apricot and cobalt-blue. Worthy of a close look, and also strong bids.

PCGS# 7294. NGC ID: 256W.

1524

1904-S AU-53 (**NGC**). Essentially brilliant surfaces with ample evidence of a prooflike finish from the dies. Key date issue!

PCGS# 7294. NGC ID: 256W.

1525

Page 132

1921 Peace. High Relief. MS-64 (PCGS). CAC. Delicate golden-gray and pale rose iridescence delivers more color than typically seen in examples of this first year Peace dollar issue. Well struck with emerging detail in the centers, this is an upper end coin for the assigned grade that is sure to catch the eye of series specialists.

PCGS# 7356. NGC ID: 2U4E.

1526

1921 Peace. High Relief. MS-64 (PCGS). CAC. Smooth and satin to softly frosted surfaces would likely have secured a full Gem Mint State grade from PCGS were the central striking detail sharper. Certainly an upper end Choice example of this challenging high relief issue, and one that is also attractively original with light to moderate pearl-gay and mauve patina. Worthy of the strongest bids.

PCGS# 7356. NGC ID: 2U4E.

1921 Peace. High Relief. MS-64 (NGC). CAC. Brilliant, highly lustrous and impressively smooth, this coin is far finer than the typical Choice Uncirculated example of this popular High Relief Peace dollar issue.

PCGS# 7356. NGC ID: 2U4E.

1528

1922 MS-66+ (PCGS). CAC. Knocking on the door of Superb Gem quality, this satiny, smooth and smartly impressed Peace dollar is sure to sell for a strong premium to a sharp-eyed numismatist. Brilliant and beautiful.

PCGS# 7357. NGC ID: 257C.

1529

1923 MS-67+ (PCGS). This enchanting Superb Gem is drenched in smooth, frosty mint luster. Fully struck with a light amount of pastellemon patina on each side. It is difficult to imagine a more inviting Peace dollar of the low relief design type. The 1923 is the most plentiful Peace dollar in Mint State, and the issue is readily obtainable in all grades up to and including MS-66. This type as a whole is conditionally rare in MS-67/67+, however, and much more so than the preceding Morgan silver dollar series. The present example is among the finest certified at PCGS, and it is sure to be of keen interest among both advanced Peace dollar collectors and high grade type collectors.

PCGS# 7360. NGC ID: 257F. PCGS Population: 6; 0 finer.

1530

1923 MS-67 (PCGS). CAC. Be they quality conscious Peace dollar specialists or high grade type collectors, discerning numismatists are urged to pursue this offering to the utmost. This is truly a beautiful 1923 dollar, its surfaces exceptionally smooth for the type. Intensely lustrous, as well, with a full strike and just a blush of pale golden iridescence to otherwise brilliant surfaces. Exquisite!

PCGS# 7360. NGC ID: 257F.

CAC Population: 49; 0.

1531

1923 MS-67 (PCGS). CAC. This enchanting Superb Gem is drenched in smooth, satin to frosty mint luster. Fully struck with a light amount of pale gold tinting on each side. Surely one of the most inviting Peace dollars of the low relief design type available to today's discerning collectors, and worthy of the strongest bids, as such.

PCGS# 7360. NGC ID: 257F.

1532

1924 MS-66+ (NGC). CAC. Brilliant, frosty and fully struck for this scarcer issue among the popular quartet of Philadelphia Mint Peace dollars, 1922 to 1925.

PCGS# 7363. NGC ID: 257J.

1925 MS-67 (PCGS). Fully struck with smooth, frosty luster, there is much to recommend this brilliant example to the high grade silver dollar type or date collector. Scarce in this grade, despite the fact that the 1925 is the most readily obtainable Peace dollar in Superb Gem Mint State.

PCGS# 7365. NGC ID: 257L.

1534

1934-S MS-64 (PCGS). Original antique silver surfaces with speckled golden-russet overtones. Rarest of the Peace dollars in Mint State, the key date status of the 1934-S is well known in today's market. Although the 1921, 1927, 1927-S, 1928 and 1934 all have lower mintages, the 1934-S (1,011,000 pieces produced) was not saved to the same extent. Much of the mintage was placed into circulation during the 1930s, explaining the ease with which collectors can obtain worn examples. Buying opportunities for attractive Mint State survivors such as this can be elusive, however, confirming the significance of this offering for the advanced Peace dollar enthusiast.

PCGS# 7377. NGC ID: 257Z.

1535

1934-S MS-63 (NGC). Attractive light rose-russet iridescence graces lustrous satin surfaces. The strike is impressively sharp for a San Francisco Mint Peace dollar, and the in hand appearance is pleasingly smooth. Desirable key date issue!

PCGS# 7377. NGC ID: 257Z.

1536

1934-S MS-62 (NGC). Our multiple offerings in this sale should not muddy the waters — the 1934-S is the most challenging Peace dollar to locate in Mint State. This BU example exhibits a dusting of pale silver to smartly impressed and lustrous surfaces.

PCGS# 7377. NGC ID: 257Z.

1537

1935 MS-66 (PCGS). CAC. Delightful satin surfaces are exceptionally smooth for the issue beneath a dusting of pale champagne-gold and pinkish-mauve iridescence. The 1935 is the final Peace dollar delivery from the Philadelphia Mint, the mintage 1,576,000 pieces. Examples entered the numismatic market over a long period of time and, given that the issue was largely overlooked for several decades after production, it should come as no surprise to read that few were preserved with enough care to qualify for a premium Gem rating by today's strict grading standards. This is just such a coin, and it would do justice to an advanced Peace dollar set.

PCGS# 7378. NGC ID: 2582.

TRADE DOLLARS

1538

1874-S MS-62 (NGC). This pleasing BU type candidate is lightly toned in iridescent golden-apricot. The reverse exhibits full satin luster, the obverse with wispy hairlines and a touch of glossiness that account for the MS-62 grade.

PCGS# 7036. NGC ID: 2533.

1539

1876-S Type I/I. MS-63 (NGC). A brilliant, satiny and highly lustrous example that comes highly recommended for inclusion in a Mint State type set. Sharply to fully struck and a delight to behold.

PCGS# 7043. NGC ID: 253B.

1878 Trade. Proof-64 Cameo (PCGS). CAC. Toning enthusiasts really need to see this beautiful coin to appreciate it. Spectacular target-like toning in multiple iridescent colors includes powder blue, reddish-apricot, antique-gold and steely-lilac. Softer olive-gray forms the base of the toning and rounds out the very attractive appearance. Equally impressive on the technical side with full striking detail and strong reflectivity in the fields. The first of the Proof-only trade dollars, the 1878 is very popular with specimen type collectors. Very few survivors from the mintage of 900 pieces are as carefully preserved and aesthetically appealing as this premium quality example.

PCGS# 87058. NGC ID: 27YP. CAC Population: 13; 12.

1541

1878 Trade. Proof-64 (PCGS). A lovely Choice Proof trade dollar displaying iridescent pearl-gray patina on both sides. The obverse is enhanced by vivid reddish-orange overtones that provide outstanding eye appeal. A cameo finish is not mentioned on the older style PCGS insert (Generation 4.0). Fully struck and impressively smooth, there is much to recommend this coin to discerning Proof type or date collectors.

PCGS# 7058. NGC ID: 27YP.

1542

1879 Trade. Proof-63 (PCGS). CAC—Gold Label. OGH—First Generation. From the first Proof-only date in the trade dollar series comes this premium quality specimen that has all the makings of a Proof-64 grade. A Cameo designation also seems to be in order, as the untoned surfaces allow full appreciation of bold field to device contrast. Sharply struck, visually stunning, and worthy of the strongest bids.

PCGS# 7059. NGC ID: 27YR.

1543

1881 Trade. Proof-63 Cameo (NGC). Sharply struck overall with a dusting of sandy-silver tinting to elegant, modestly cameoed surfaces. Nicer than the assigned grade might imply, the Proof-only status of the date adds further appeal for this endearing trade dollar.

PCGS# 7061. NGC ID: 27YT.

1544

1882 Trade. Proof-64 Cameo (NGC). Brilliant apart from faint silvery tinting in isolated areas on the reverse, this flashy piece readily reveals a boldly cameoed finish at all viewing angles. It is a sharply to fully struck near-Gem ideally suited for a high quality specimen type set where an example of the brief trade dollar series of 1873 to 1883 is required.

PCGS# 87062. NGC ID: 27YU.

1545

1882 Trade. Proof-62 Cameo (PCGS). Brilliant surfaces deliver bold contrast between highly reflective fields and satiny, fully impressed motifs. Always a popular issue for type purposes.

PCGS# 87062. NGC ID: 27YU.

1546

1882 Trade. Proof-62 (NGC). Lightly toned in smoky silver-gray, this fully struck and smooth-looking specimen reveals appreciable cameo contrast to the finish as the surfaces dip into a light. From a Proof-only issue with 1,097 pieces produced.

PCGS# 7062. NGC ID: 27YU.

Modern Dollars

1547

1978-D Eisenhower Dollar. MS-67 (ANACS). Roughly handled by Treasury Department employees and bank personnel, circulation strike Ike dollars as a type are rare in Superb Gem Mint State. This final year Denver Mint example is impressively smooth with subtle toning in iridescent powder blue and champagne-apricot.

PCGS# 7426. NGC ID: 258R.

1548

2000-P Sacagawea "Cheerios" Dollar, FS-902, Boldly Detailed Tail Feathers, MS-67 (PCGS), and 2000 Lincoln "Cheerios" Cent, MS-67 RD (PCGS). Both coins are individually graded and encapsulated by PCGS, as follows: "Cheerios" dollar, MS-67; and "Cheerios" cent, MS-67 RD. Each piece is essentially as made, virtually pristine with lovely satin surfaces. This popular variety of the first year Sacagawea dollar is affectionately known as the "Cheerios" dollar, and it is most readily identifiable by the pronounced enhancement evident to the detail of the eagle's tail feathers. These pieces were distributed by the Mint in boxes of Cheerios cereal as part of a promotional program with General Mills to advertise the new "golden" dollar coin. Each distribution also included an accompanying 2000 Lincoln cent, as here. Only 5,500 examples of this variety were distributed, and many of these "Cheerios" dollars were obtained by non-numismatists who eventually spent the coins or otherwise mishandled them, explaining the rarity of high grade examples. The Boldly Detailed Tail Feathers variety was short lived, the Mint smoothing out the eagle's tail feathers before commencing large scale Sacagawea dollar production later in

Also included in this lot is the original holder/Certificate of Authenticity, as jointly issued by Cheerios and the United States Mint. The box on the back of the Certificate, below the signature of Mint Director Philip N. Diehl, is blank without a NAME, EVENT or DATE filled in. Apart from having been opened to remove the coins, the holder/Certificate combination is in Extremely Fine condition with only minor signs of handling. (Total: 2 coins; 1 certificate)

WEDNESDAY, JUNE 15, 2022, 10:00 AM PT LOTS 2001-2328

GOLD DOLLARS

2001

1849 Close Wreath. MS-63 (PCGS). This first year gold dollar would make a pleasing addition to a Mint State type set. It is a smartly impressed, generally sharp example bathed in a blend of satiny luster and warm orange-honey color.

PCGS# 7503. NGC ID: 25BA.

2002

1850-D Winter 2-C, the only known dies. VF-30 (PCGS). OGH. A handsome deep honey-orange piece with intermingled reddishrose highlights providing further visual appeal. Desirable mid grade preservation for this rarer D-Mint gold dollar issue with fewer than 200 coins believed extant from a mintage of 8,382 pieces.

PCGS# 7511. NGC ID: 25BH.

2003

1851-C Winter-1. EF-40 (NGC). OH. Unusually vivid for a C-mint gold coin, splashes of iridescent reddish-rose and cobalt blue enliven a base of deep honey-orange. A captivating example worthy of a premium.

PCGS# 7514. NGC ID: 25BL.

2004

1851-O Winter-2. MS-65 (NGC). Satiny surfaces are dressed in pretty golden-apricot and pale pink colors. Fully struck. The 1851-O is a popular type issue in the brief and challenging New Orleans Mint gold dollar series, although we caution bidders that Gem Uncirculated survivors such as this are significant condition rarities.

PCGS# 7516. NGC ID: 25BN.

NGC Census: 16; 2 finer (MS-66 finest).

2005

1852 MS-65 (PCGS). A frosty and smooth-looking Gem with pretty golden-wheat color. Sharply struck and showing intricate hair detail on Liberty's portrait. Surpassed by only the 1851 and 1853, the 1852 is one of the most frequently encountered Type I gold dollars in today's market and is a perennial favorite with collectors seeking a single example of this classic 19th century design. However, just 38 coins rank finer than this piece at PCGS, stressing the elusive nature of high grade examples.

PCGS# 7517. NGC ID: 25BP.

PCGS Population: 73; 38 finer (MS-69 finest).

2006

1852-D Winter 4-E, the only known dies—Obverse Struck Thru—AU-58 (NGC). Vivid and attractive golden-yellow surfaces display remarkably sharp striking detail for a product of the Dahlonega Mint. Most design elements are full, in fact, and the quality is enhanced by ample frosty luster. A single mark in the right reverse field is noted, while NGC's Mint Error designation concerns an ovoid depression (as made) in the obverse field before Liberty's nose. A median rarity in the D-Mint gold dollar series, the 1852-D is more challenging to collect than the 1849-D, 1851-D and 1853-D. Survivors from a mintage of 6,360 pieces are thought to number only 125 to 175 coins (per Doug Winter, 2013).

PCGS# 7519. NGC ID: 25BS.

2007

1852-D Winter 4-E, the only known dies. EF-45 (NGC). CAC. OH. Original honey-orange surfaces are well defined overall for a lightly circulated Dahlonega Mint gold coin. Thoroughly PQ for both the issue and the assigned grade, and sure to sell for a strong premium.

PCGS# 7519. NGC ID: 25BS.

2008

1853 MS-65 (NGC). Sharp, satiny and vivid Gem Mint State quality to represent the United States Mint's Type I gold dollar design.

PCGS# 7521. NGC ID: 25BU.

2009

1854 Type II. MS-63 (PCGS). Uncommonly well struck by the standards of this challenging design type, the peripheries are sharp and the centers sport emerging to bold detail. Lustrous medium gold surfaces with a soft, satiny appearance overall. The brief and relatively scarce Type II gold dollar of 1854 to 1856 is a significant find at all levels of Mint State preservation, and this is certainly an above average example relative to the MS-63 designation.

PCGS# 7531. NGC ID: 25C3.

1854 Type II. MS-62 (PCGS). A bright and satiny golden-apricot example with much to recommend it to Mint State gold type collectors. Sharply struck in general with just a touch of characteristic softness in the centers that is hardly of concern.

PCGS# 7531. NGC ID: 25C3.

2011

1855-O Type II. Winter-1. Unc Details—Improperly Cleaned (NGC). The final New Orleans Mint gold dollar, the 1855-O is also perhaps the most popular since it is the only one of the brief and challenging Type II design.

PCGS# 7535. NGC ID: 25C7.

2012

1857-C Winter-1, the only known dies. AU Details—Bent (NGC). With warm honey-gold color and generally smooth-looking surfaces, this coin has much to offer at the assigned grade level. Striking detail is sharp for the issuing mint, as well, and we note only a touch of characteristic softness in the center of the reverse, affecting the letters OL in DOLLAR and the digits 85 in the date. Wispy handling marks include no singularly mentionable distractions, and the coin is well positioned in the NGC holder to minimize the visual effects of the bend. From a small mintage of just 13,280 pieces, Doug Winters (2008) estimates that just 300 to 400 examples of the 1857-C gold dollar survive today. The majority of these are available in Extremely Fine and lower grades, with About Uncirculated examples exceedingly scarce. Be sure not to let this more affordable offering pass by without your consideration!

PCGS# 7545. NGC ID: 25CE.

2013

1859-D Winter 11-N. AU Details—Bent (PCGS). A visually engaging piece with deep honey-gold color and peripheral rose highlights. The bend is only minimally apparent through the PCGS holder, and with no sizeable marks this piece presents quite nicely in hand. Much scarcer than the 1849-D in an absolute sense, the 1859-D gold dollar is also rarer than the 1851-D in high grades (read: AU and Mint State). The mintage is fewer than 5,000 coins.

PCGS# 7553. NGC ID: 25CN.

2014

1859-S AU-50 (PCGS). Struck to a quantity of just 15,000 coins, and heavily circulated on the West Coast, the 1859-S gold dollar is scarce overall and a dramatic condition rarity beyond the lower AU grades. This pleasing AU-50 survivor represents an excellent opportunity for today's astute gold enthusiasts.

PCGS# 7554. NGC ID: 25CP.

2015

1874 MS-66 (PCGS). CAC. Satiny golden-apricot surfaces are silky smooth in texture and have much to offer the high grade gold type collector.

PCGS# 7575. NGC ID: 25DC.

2016

1874 MS-66 (NGC). Simply exquisite technical quality and eye appeal in a Type III gold dollar, this premium Gem 1874 is sure to please even the most discerning collector. Soft satin luster blankets both sides and blends perfectly with original rose-gold color. Boldly struck and smooth, this is an excellent high grade type coin.

PCGS# 7575. NGC ID: 25DC.

Delightful Ultra Cameo Proof 1876 Gold Dollar

2017

1876 JD-2. Rarity-6+. Proof-65+ Ultra Cameo (NGC). An exceptional example of a rare classic U.S. Mint Proof gold issue. Bright and reflective, the fields form a splendid backdrop to fully impressed, satiny design elements. The entire coin exhibits handsome orange-rose color that enhances the already strong eye appeal.

Proof gold dollar production at the Philadelphia Mint amounted to only 45 coins in 1876, though this would be the highest yearly total for the type from 1868 through 1880. We suspect that the increased mintage for this year was due to the United States celebrating its centennial in 1876, and the Mint anticipating increased sales to collectors seeking numismatic keepsakes. In the end, however, sales proved to be only marginally greater than for other years during that era. With an estimated

surviving population of only about 15 to 25 coins, we suspect that no more than 30 or 35 examples were actually distributed. The present example ranks among the finest of these extant pieces and would serve as a highlight in any cabinet.

Interestingly for a classic Proof gold issue, and no doubt the result of multiple striking periods during the year, the Mint employed two die pairings to produce these coins. Both share the same reverse, the obverses distinguishable by the presence or absence of polishing within the first feather of Liberty's headdress. JD-2 shows no polishing, and it is seen with slightly more frequency than JD-1.

PCGS# 97626. NGC ID: 25EK.

NGC Census: 1; 4 finer in this category (Proof-67+ ★ Ultra Cameo finest).

1881 MS-64 (PCGS). Fully struck with intense semi-prooflike luster, an even endowment of vivid golden-apricot color is also a praiseworthy attribute. Mintage: just 7,620 circulation strikes.

PCGS# 7582. NGC ID: 25DK.

2019

1883 MS-64 (NGC). Intensely lustrous satin surfaces are smooth enough to evoke thoughts of a full Gem Mint State grade. Crisply impressed with pretty golden-apricot color. From a mintage of just 10,800 circulation strikes.

PCGS# 7584. NGC ID: 25DM

1887 MS-67 (PCGS). A fully impressed, highly lustrous beauty displaying blended pale rose and deep orange colors. So smooth as to be virtually pristine, this is conditionally rare survivor of the low mintage (7,500 pieces) circulation strike 1887 gold dollar. One of the more challenging issues of its era to locate in high grades, the 1887 is rarer than the 1881, 1883, 1888 and, especially, 1889 at the finest levels of Mint State preservation. A significant bidding opportunity for astute gold enthusiasts.

PCGS# 7588. NGC ID: 25DS.

PCGS Population: 32; 9 finer (MS-68 finest).

2021

1889 MS-65 (PCGS). Final year type collectors will find much to admire in this satiny, fully struck and vivid gold dollar. A no questions Gem with gorgeous golden-apricot color.

PCGS# 7590. NGC ID: 25DU.

2022

1889 MS-65 (NGC). This final-year gold dollar would make a lovely addition to a Gem Mint State type set. It is a vivid golden-apricot example with smooth, satiny luster and sharply rendered design elements.

PCGS# 7590. NGC ID: 25DU.

QUARTER EAGLES

2023

1805 BD-1, the only known dies. Rarity-4. VF Details—Cleaned (PCGS). Well centered in strike with all major design elements boldly outlined, this more affordable mid grade early \$2.50 allows full appreciation of the classic Capped Bust Right design. Deep olive undertones backlight warmer reddish-gold color. All early quarter eagles are rare, the denomination unpopular with contemporary gold bullion depositors and seeing limited mintages. Only 1,781 examples were struck for the 1805, and survivors number no more than 150 or so coins in all grades. BD Die State c/b.

PCGS# 7653. NGC ID: BFVV.

Uncirculated 1829 Quarter Eagle Rare Issue

2024

1829 BD-1, the only known dies. Rarity-4+. Unc Details—Altered Surfaces (PCGS). The rarity of the Capped Head Left quarter eagle as a type is sure to result in keen bidder interest in this remarkably attractive 1829. Both the quality and eye appeal are certainly superior for the assigned grade. The surfaces exhibit handsome color in olive-orange, and there is strong reflectivity in the fields. Indeed, the finish is prooflike, as might be expected given the limited mintage (see below). The design elements are sharply to fully rendered with a softly frosted texture. Evidence to support the PCGS qualifier is difficult to come by, and obviously minor, as the appearance is seemingly original and visually appealing.

Beginning in 1829, quarter eagles were struck with a reduced diameter collar and a distinct upset rim that resulted from the introduction of the Mint's new Rush & Muhlenberg coining

press and modified dies by William Kneass. The modifications to the design along with the technological innovation made for coins with improved striking and wear characteristics. Even with the new press, quarter eagle production remained low, with just 3,403 struck in 1829. The half eagle remained the preferred coin of contemporary bullion depositors throughout the early 19th century, and it was that denomination that claimed the lion's share of the gold deposited with the Mint each year. The 1829, in fact, has the lowest mintage in the Reduced Diameter portion of the Capped Head Left quarter eagle series and, while it is not the rarest date, it is still highly elusive with only 70 to 90 coins extant in all grades (per John W. Dannreuther, 2006). The offered coin well above average for the assigned grade and worthy of a strong bidding strategy.

PCGS# 7669. NGC ID: BFW7.

2025

1836 HM-7. Rarity-3. AU-50 (NGC). Glints of pale silver and vivid reddish-rose enliven otherwise deep honey-olive color. A boldly defined, appreciably lustrous AU representative of this brief and often overlooked 19th century half eagle type.

PCGS# 8174. NGC ID: 25RY.

2026

1837 HM-1. Rarity-3. EF-40 (NGC). Only 400 or so 1837 quarter eagles are estimated to survive in all grades, establishing the 1837 as one of the scarcest and most underrated Classic Head quarter eagles. Daryl J. Haynor (2020) observes that "it is easier to find an 1839-C or 1839-O in EF to AU condition than an 1837." Clearly this handsome honey-olive and rose-russet example represents an important find for the astute gold collector.

PCGS# 7695. NGC ID: 25FX.

1839-O HM-1, Winter-1. Rarity-3. High Date, Wide Fraction. AU-53 (NGC). Pale golden-wheat color with tinges of pale olive undertoning. Well struck overall; the very light wear allows plenty of sharp to full detail to remain. Frosty and lustrous for the grade, wispy hairlines are noted for accuracy, but there are no sizable marks. The 1839-O is a significant issue with tremendous appeal for advanced gold enthusiasts. It is the first New Orleans Mint quarter eagle, the only one of the Classic Head design type, and the only one that displays the O mintmark on the obverse. The mintage is just 17,781 pieces, although its first year status explains an above average rate of survival for a Southern gold issue from before the Civil War. Even so, the 1839-O is scarce in AU grades.

PCGS# 7701. NGC ID: 25G7.

2028

1841-C Winter-1, the only known dies. AU-50 (NGC). Warmly patinated in deep honey-rose, both sides offer uncommonly bold detail for a lightly circulated Charlotte Mint gold coin. Traces of the original mint finish persist in the more protected areas around some of the design elements, especially on the reverse. Simply put, the 1841-C is a very scarce quarter eagle in all grades with only 10,281 pieces produced. Survivors probably number only 125-175 coins, and Doug Winter (*Gold Coins of the Charlotte Mint: 1838-1861*, 2008 edition) also states that the 1841-C is the rarest Charlotte Mint quarter eagle in high grades after only the 1842-C. An offering that is sure to catch the eye of advanced Southern gold enthusiasts.

PCGS# 7721. NGC ID: 25GE.

2029

1843-C Large Date, Plain 4. Winter-1, the only known dies. EF-40 (PCGS). OGH. An attractive golden-yellow piece with faint olive undertones and, at the upper left reverse, a splash of coppery-rose tinting. This may be the more readily obtainable date logotype 1843-C \$2.50, but the Large Date is scarce in an absolute sense. No more than 350 or so coins are believed extant from a mintage of 23,076 pieces.

PCGS# 7728. NGC ID: 25GN

2030

1843-D Winter 4-H. Small D. VG-10 (PCGS). This issue's status as the most readily obtainable Dahlonega Mint quarter eagle combined with the offered coin's unusually collector-friendly grade will certainly result in keen bidder interest in this lot.

PCGS# 7730.

2031

1850-C Winter-1. VF-25 (NGC). CAC. OH. An attractive honeyrose offering with ample boldness of detail remaining where the strike allows. Although more plentiful in an absolute sense than a limited mintage of 9,148 pieces might imply, the 1850-C \$2.50 is scarce in an absolute sense. PQ examples, as here, are rare regardless of grade level.

PCGS# 7756. NGC ID: 25HH. CAC Population: 18 in all grades

2032

1851 MS-64+ (PCGS). CAC. This bright and frosty near-Gem is dressed in vivid golden-rose color. Sharply struck and carefully preserved, there is much to recommend this early date Liberty Head quarter eagle to the advanced gold type collector. Underrated condition rarity!

PCGS# 7759. NGC ID: 25HL.

PCGS Population: 3; 7 finer (MS-67 finest).

CAC Population: 15; 3. The former total includes coins certified both MS-64 and MS-64+.

203

1851-C Winter-1, the only known dies. EF-45 (PCGS). Exceptionally vivid in a pre-Civil War era Southern gold coin, otherwise deep honey-orange surfaces reveal lovely rose-red undertones as the coin dips into a light. Central detail is suitably bold for a lightly circulated Charlotte Mint gold coin from the 1850s. Both sides retain appreciable mint luster that is most intense in the protected areas around the peripheral design elements. Scarcer than even the mintage of 14,923 pieces might suggest, the 1851-C has an extant population of fewer than 350 (if not 300) coins in all grades. This handsome Choice EF would make a pleasing addition to an advanced Southern gold cabinet.

PCGS# 7760. NGC ID: 25HM.

1861 Type II Reverse. MS-64 (PCGS). CAC—Gold Label. OGH—First Generation. A fully struck, highly lustrous example dressed in a bold blend of satiny luster and vivid golden-apricot color. Gem MS-65 is the most appropriate way to describe this exceptional coin, which is obviously undergraded in its current holder in the esteemed opinion of CAC. A popular type issue in the early Liberty Head quarter eagle series, yet anything but common at the present level of preservation.

PCGS# 7794. NGC ID: 25JV.

2035

1861 Type II Reverse. MS-63 (PCGS). Sharp and satiny surfaces are sure to please.

PCGS# 7794. NGC ID: 25JV.

2036

1896 MS-65 (NGC). Lovely rose-orange surfaces are smartly impressed, fully lustrous and a delight to behold. Underappreciated at the Gem Mint State level despite a limited circulation strike mintage of 19,070 pieces.

PCGS# 7848. NGC ID: 25LL.

2037

1899 JD-1, the only known dies. Rarity-4. Proof-62 (PCGS). Proof qualities are on full display on both sides of this silver-tinged, generally olive-orange specimen. Fully struck and satiny, the design elements contrast appreciably with reflective fields, although a Cameo designation is not included as part of the PCGS-certified grade. This is a desirable survivor from a Proof mintage of 150 pieces, one of 90 to 110 believed extant (per John W. Dannreuther, *United States Proof Coins, Volume IV: Gold, Part One*, 2018).

PCGS# 7925. NGC ID: 288N.

2038

1899 JD-1, the only known dies. Rarity-4. Proof-60 (PCGS). A second Proof 1899 \$2.50, this handsome piece combines olive undertones with warm orange-gold color. Fully struck, as befits the method of manufacture, with appreciable reflective qualities evident in the fields as the surfaces dip into a light.

PCGS# 7925. NGC ID: 288N.

2039

1899 MS-67 (PCGS). CAC. Splashes of champagne-pink enliven otherwise golden-orange surfaces. This is a smooth, satiny Superb Gem with much to recommend it to the discerning gold type or date collector. This late date Liberty Head \$2.50 is a readily obtainable issue in an absolute sense, but survivors are seldom offered with the quality and eye appeal seen here.

PCGS# 7851. NGC ID: 25LP.

PCGS Population: 12; 2 finer (MS-68 finest).

CAC Population: 5; 0.

2040

1900 MS-66 (NGC). CAC. Silky smooth medium gold surfaces with tinges of pale pink and apricot evident as the coin rotates under a light. An exquisite premium Gem that would do particularly well in a high quality type set.

PCGS# 7852. NGC ID: 25LR.

2041

1905 MS-66 (NGC). Full striking detail, smooth mint luster and vivid color combine to establish the desirability of this late date Liberty Head quarter eagle for high grade type or date purposes.

PCGS# 7857. NGC ID: 25LW.

2042

1905 MS-66 (NGC). With smooth, frosty mint luster, vivid reddishgold color and razor sharp striking detail, this is an outstanding Gem Mint State representative of the Liberty Head quarter eagle series.

PCGS# 7857. NGC ID: 25LW.

1906 JD-1, the only known dies. Rarity-4. Proof-64 Cameo (NGC). CAC. Brilliant yellow-gold with sharp frosty devices that radiate with luster. The fields are generously reflective and smooth with faint orange peel texture in places. Only the most trivial evidence of handling accounts for the grade, but the eye appeal remains excellent. Proof coins represent the finest the Mint had to offer and nearly all of the gold issues in this format were produced in extremely small quantities. More than 176,000 circulation strike quarter eagles were made in 1906, but only 160 coins were struck in Proof.

PCGS# 87932. NGC ID: 288W.

2044

1906 JD-1, the only known dies. Rarity-4. Proof-62 (PCGS). Highlights of pinkish-rose enhance otherwise olive-orange surfaces for this handsome specimen. Appreciably mirrored in the fields, the design elements are fully impressed with a more frosty texture to the finish. More than 176,000 circulation strike quarter eagles were made in 1906, but only a total of 160 coins were struck in Proof. Survivors from the latter delivery are scarce and number just 100 to 120 in all grades (per John W. Dannreuther, 2018).

PCGS# 7932. NGC ID: 288W.

2045

1906 MS-66 (NGC). Smartly impressed with intense mint luster, this silky smooth Gem also offers beautiful color in deep golden-orange.

PCGS# 7858. NGC ID: 25LX.

2046

1907 MS-66 (PCGS). This late date Liberty Head \$2.50 delivers sharp striking detail, smooth satin luster and lovely golden-apricot color. An ideal type candidate at the premium Gem Uncirculated level.

PCGS# 7859. NGC ID: 25LY.

2047

1908 MS-64+ (PCGS). From the first year of Pratt's novel Indian quarter eagle series comes this smartly impressed and lustrous near-Gem. Warm golden-orange color provides further appeal.

PCGS# 7939. NGC ID: 288Y.

2048

1908 MS-64 (**PCGS**). Perennially popular with collectors as the premier issue in Bela Lyon Pratt's Indian quarter eagle series, the 1908 enjoys strong demand in all Mint State grades. This lovely near-Gem exhibits subtle powder blue iridescence to dominant pinkish-apricot colors.

PCGS# 7939. NGC ID: 288Y.

Scarce Proof 1909 Indian Quarter Eagle Stunning Satin Finish

2049

1909 JD-1, the only known dies. Rarity-4+. Proof-63 (NGC). CAC. Delightful deep gold surfaces exhibit the soft satin finish for which this issue is known. Both sides are fully struck with razor sharp definition throughout the design. They also offer an uncommonly smooth appearance for a survivor from this 139-piece mintage.

The 1909 is the second issue in the Proof Indian quarter eagle series, and it introduces the Satin Finish style for this type. Its predecessor, the 1908, was produced with a coarse grain Sandblast Finish that proved unpopular with contemporary collectors who were used to the Brilliant and Cameo Proofs

of the Liberty Head era. Perhaps because they were already disenchanted with the Proof 1908, many contemporary numismatists failed to order the Proof 1909. Much of the mintage failed to sell, and the coins left on hand eventually were destroyed through melting in the Mint. Today the 1909 is one of the rarest Proof Indian quarter eagles with fewer than 100 coins extant in all grades (John W. Dannreuther, 2018, offers an estimate of 50 to 60 survivors). A small CAC population further highlights the significance and significant nature of this bidding opportunity for astute gold specialists.

PCGS# 7958. NGC ID: 289H. CAC Population: 13 in all grades.

1909 MS-64 (PCGS). Satiny golden-apricot surfaces define both sides of this scarcer early date Indian \$2.50. Sharply struck and visually appealing.

PCGS# 7940. NGC ID: 288Z.

2051

1909 MS-64 (NGC). CAC. With a razor sharp strike, billowy satin luster and pretty orange-apricot color, this smooth and inviting example is sure to sell for a premium bid. One of the more underrated Indian quarter eagles, the second year 1909 is the third rarest issue of the type in Mint State after the 1911-D and 1914.

PCGS# 7940. NGC ID: 288Z.

2052

1910 MS-64 (PCGS). Satiny rose-gold surfaces with a sharp strike and abundant eye appeal.

PCGS# 7941. NGC ID: 2892.

Key Date 1911-D Quarter Eagle in Choice Mint State

2053

1911-D MS-63+ (NGC). CAC. A wonderfully original example with warm honey-rose color blanketing both sides. Sharply struck and free from notable imperfections, this piece certainly approaches near-Gem condition in many respects.

Introduced in 1908 alongside the artist's similarly styled Indian half eagle, Bela Lyon Pratt's Indian quarter eagle was innovative with its recessed or incuse designs. There are only 15 circulation

strike issues in the Indian quarter eagle series, and most are readily obtainable, especially in lower Mint State grades. The exception is the 1911-D, with just 55,680 pieces produced, making it the scarcest issue of the type in all grades. For the numismatist assembling a superior Indian quarter eagle set, this premium survivor represents a significant bidding opportunity.

PCGS# 7943. NGC ID: EGZ7.

2054

1911-D AU-55 (NGC). Deep honey and rose-gold surfaces are sharply defined overall with ample luster remaining. The eagerly sought 1911-D is the scarcest circulation strike Indian quarter eagle, and this Strong D example is sure to find its way into a specialized collection.

PCGS# 7943. NGC ID: EGZ7.

2055

1911-D Strong D. AU Details—Cleaned (PCGS). Rather pleasing honey-apricot surfaces are sharply defined overall to include a crisp D mintmark. Eagerly sought at all levels of preservation, the 1911-D is the undisputed key to completion of a circulation strike Indian quarter eagle set.

PCGS# 7943. NGC ID: 2894.

1911-D Strong D. AU Details—Ex Jewelry (PCGS). Near-fully defined with vivid reddish-honey color, this is a remarkably attractive example of the key date 1911-D \$2.50 given the stated qualifier.

PCGS# 7943. NGC ID: 2894.

2057

1911-D AU Details—Cleaned (NGC). A deep honey-gold example with traces of pinkish-rose also evident on both sides. The D mintmark is fully outlined and sharp, adding to the appeal of this more affordable key date Indian quarter eagle.

PCGS# 7943. NGC ID: EGZ7.

2058

1912 MS-64 (PCGS). An appealing, frosty near-Gem example with a fresh, original appearance and excellent luster. The attractive surfaces are knocking on the door of an even higher grade, which is especially significant given that the 1912 is a scarce issue any finer than MS-64.

PCGS# 7944. NGC ID: 2896

2059

1913 MS-64 (NGC). CAC. Lustrous and satiny surfaces are further adorned with pretty golden-honey color. PQ!

PCGS# 7945. NGC ID: 2897.

2060

1914 MS-63 (**PCGS**). This satiny golden-apricot example has a smoother appearance in hand than one might expect for the assigned grade. It is an above average Choice Uncirculated example for this key date Indian \$2.50 issue.

PCGS# 7946. NGC ID: 2898.

2061

1914-D MS-64+ (PCGS). Wonderfully frosty and lustrous goldenorange surfaces are exceptionally well preserved for the issue. Although the low mintage 1911-D garners much of the attention among numismatists when they discuss key date Indian quarter eagles, the 1914-D is actually the rarest issue of this type in grades at and above the MS-65 level. The present example, just shy of that grade level, is a premium quality Choice survivor that represents outstanding value for the astute collector.

PCGS# 7947. NGC ID: 2899.

2062

1914-D MS-64 (NGC). CAC. Beautiful orange-gold surfaces are highly lustrous with a smooth, satin to softly frosted texture. Well struck for the issue with all features boldly to sharply rendered. The 1914-D is one of the scarcer Indian quarter eagles, and this is an upper end example for the assigned grade that is worthy of a strong premium.

PCGS# 7947. NGC ID: 2899.

2063

1914-D MS-63 (PCGS). This scarcer date Indian \$2.50 delivers light golden-apricot color and soft satin luster. The strike is sharp, as well, with all details crisp.

PCGS# 7947. NGC ID: 2899.

2064

1914-D MS-63 (NGC). CAC. Lively mint luster blends with vivid golden-rose color on both sides of this better-date Indian \$2.50.

PCGS# 7947. NGC ID: 2899.

1915 MS-64 (PCGS). A pretty example with full, frosty mint luster and subtle powder blue highlights on deep orange-apricot surfaces.

PCGS# 7948. NGC ID: 289A.

2066

1915 MS-64 (NGC). CAC. A lovely honey-gold piece with full luster and a sharply executed strike. Like all early date Indian quarter eagles, the 1915 is scarcer in all Mint State grades than those issues of the 1925 to 1929 era.

PCGS# 7948. NGC ID: 289A.

2067

1925-D MS-64 (PCGS). CAC. A sharp and inviting piece with gorgeous rose-orange color and captivating mint luster.

PCGS# 7949. NGC ID: 289B.

2068

1925-D MS-64 (NGC). CAC. Frosty golden-rose surfaces with a sharp strike and abundant eye appeal.

PCGS# 7949. NGC ID: 289B.

2069

1927 MS-65+ (**PCGS**). **CAC.** Lustrous honey-orange surfaces with a tinge of pale pink, this wonderfully original Gem will please even the most discerning 20th century gold enthusiasts.

PCGS# 7951. NGC ID: 289D.

2070

1927 MS-65+ (NGC). Intensely lustrous and smooth with light rosegold color to frosty surfaces. The 1927 is similar in overall rarity to the 1926 and 1928, and it can be obtained without much difficulty in MS-64 or lower grades. Gems are also relatively available by the standards of this series. As with all Indian Quarter Eagles, however, the 1927 is very rare above MS-65.

PCGS# 7951. NGC ID: 289D.

NGC Census: 21; 13 finer (all MS-66)

2071

1927 MS-65 (PCGS). Delightful satin surfaces are sharply struck with an even endowment of warm rose-apricot color. An attractive Gem that will please the discerning 20th century gold enthusiast.

PCGS# 7951. NGC ID: 289D.

THREE-DOLLAR GOLD PIECES

2072

1854 MS-62 (NGC). Sating golden-wheat surfaces deliver sharp striking detail and strong eye appeal. From the first year of the challenging \$3 gold series, and ideally suited for Mint State type purposes.

PCGS# 7969. NGC ID: 25M3.

2073

1855 MS-61 (PCGS). CAC. OGH—First Generation. This attractive example offers superior quality and eye appeal for the assigned grade. Both sides are lustrous with a soft, satiny finish from the dies. Vivid deep golden-apricot color and razor sharp striking detail are sure to please, and the appearance is exceptionally smooth for the grade. By 1855, only the second year of production for this curious gold denomination, the three-dollar gold piece was not popular in commerce. Circulation strike production at the Philadelphia Mint that year dropped to 50,555 coins, as opposed to 138,618 coins struck in that facility the year before. The 1855 is still a relatively obtainable issue by the standards of the series, and it is a popular coin for type purposes. It is still much rarer than the first year 1854 in Mint State, to say nothing of the 1874 and 1878. This impressive Uncirculated example is sure to appeal to astute bidders.

PCGS# 7972. NGC ID: 25M6.

1862 EF-45 (PCGS). Here is a desirable Choice EF example of this elusive Civil War issue in the challenging three-dollar gold series. Pretty olive and reddish-gold colors blend over surfaces that retain appreciable mint luster. Boldly defined overall and free of sizable marks. From a mintage of just 5,750 circulation strikes, survivors of which are thought to number fewer than 300 coins in all grades.

PCGS# 7983. NGC ID: 25MH.

2075

1864 EF-45 (PCGS). OGH. Silver-tinged, honey-orange and pinkish-rose surfaces reveal plenty of lively mint luster as the coin dips into a light. With 2,630 pieces produced, the 1864 has one of the lowest mintages in the circulation strike three-dollar gold series of 1854 to 1889. Little gold bullion reached the Philadelphia Mint during this Civil War year. Gold coins of all denominations were absent from circulation in the Eastern and Midwestern states and had been since late December 1861. Two deliveries sufficed to close out this issue: 440 coins on February 25 and 2,190 pieces on December 6. All were struck from a single die pair, the reverse with a Repunched Date that is boldest on the digits 18. The offered piece represents a significant find for gold enthusiasts with an interest in this challenging 19th century series.

PCGS# 7985. NGC ID: 25MK.

Acquired from Heritage Rare Coin Galleries, date not recorded. Old style company tag included.

2076

1868 AU-50 (PCGS). OGH. Warm honey and olive-orange colors with razor sharp striking detail overall. Like so many of its counterparts in the challenging three-dollar gold series, the circulation strike 1868 has a low mintage (4,850 coins produced) and survivors are scarce to rare in all grades.

PCGS# 7989. NGC ID: 25MP.

2077

1870 AU-58 (PCGS). A visually striking coin with just a faint bit of wear on the highest points. Strongly reflective in the fields, particularly on the reverse. Completely fresh and original, this is a new discovery in the holdings of a New England family as of our Winter 2014 Baltimore Auction, when it was offered as lot 5367. Deep rose toning over much of the surface, with accents of vivid violet and blue. Visually striking and quite attractive. One of just 3,500 struck.

PCGS# 7991. NGC ID: 25MS.

2078

1874 MS-61 (PCGS). OGH—First Generation. This vivid orange-gold example is lustrous with an uncommonly smooth appearance in hand for the assigned grade. While the 1874 is among the more readily obtainable issues in its series, no three-dollar gold piece is common in an absolute sense. Attractive for BU type purposes.

PCGS# 7998. NGC ID: 25MX.

2079

1878 MS-63 (PCGS). CAC. OGH. Lovely satin to softly frosted surfaces are further adorned by original color in rich golden-orange and pinkish-rose. Both sides are sharply struck with an impressively smooth appearance that borders on an even higher Mint State grade. At 82,304 pieces the mintage of the 1878 three-dollar gold piece is the second highest for the type after 1854. Except for this and the similarly aberrant 1874 (41,800 pieces struck), the highest mintage three-dollar gold issue from the later years of this series is the 1887 — with just 6,000 circulation strikes produced. Most of the 1878 three-dollar gold pieces that remained in the Mint were eventually melted, severely limiting the population of high quality survivors like the present piece. A significant offering for the discerning gold type collector.

PCGS# 8000. NGC ID: 25MZ.

1878 MS-61 (NGC). A vivid yellow-gold example that combines a satiny reverse with a semi-prooflike obverse. Sharp striking detail enhances the desirability of this \$3 gold piece for Mint State type purposes.

PCGS# 8000. NGC ID: 25MZ.

2081

1879 VF-30 (PCGS). A rare coin given that this issue saw hardly any commercial use, this is an uncommonly well circulated survivor of a low mintage, late date \$3 gold issue with just 3,000 pieces produced.

PCGS# 8001. NGC ID: 25N2.

Premium Choice Uncirculated 1880 \$3 Gold One of Just 1,000 Coins Struck

2082

1880 MS-64 (PCGS). CAC. OGH—First Generation. Here is an outstanding near-Gem quality example of this low mintage, circulation strike three-dollar gold issue. Lustrous satin to modestly semi-prooflike surfaces are enhanced by gorgeous vivid pinkish-rose and golden-apricot. Both sides are sharply struck with an appearance that is far smoother than seen on the typical survivor of this key date issue.

Only 1,000 circulation strikes were produced for the 1880 three-dollar gold piece against a modest 36 Proofs delivered for the date — no matter the format you will be hard pressed to find an attractive example in any grade. Early 20th century dealer Henry Chapman insisted that much of the circulation strike mintage remained at the Mint and was later melted. As sometimes noted in other sources, the 2005 Bowers-Winter

reference on the series suggests that there are some 140 to 170 or so examples of this issue known in Mint State, as here, but only 35 to 45 circulated survivors. A century and more ago Thomas Elder was well known for finding \$3 gold coins at banks and in jewelers' inventories and is rumored to have "saved" several hundred pieces from destruction. Many were dated 1879 and 1880, and many ended up with Chicago coin dealer Ben G. Green and notable collector John Beck. The present beauty may have been one of the Elder-Green-Beck pieces, though we are simply romanticizing here and have no way of knowing this coin's earliest provenance. One thing is certain, however — the present 1880 is exceptionally attractive and would be a fine addition to any three-dollar gold cabinet being formed.

PCGS# 8002. NGC ID: 25N3.

 $CAC\ Population:\ 19;\ 7.$

1885 AU-58 (PCGS). CAC. OGH—First Generation. With a mintage of 800 pieces coined for circulation one understands that all survivors of the 1885 \$3 are scarce. Perhaps a few hundred exist today, indeed, if that many to represent the issue. Vivid orange-gold surfaces retain much of the original prooflike finish. Sharply struck and free from handling issues. An offering that should be noticed by date collectors not only for the high grade and rarity, but visual appeal as well.

PCGS# 8007. NGC ID: 25N8.

2084

1889 MS-64+ (PCGS). Here is an impressively lustrous example of the final date in the denomination. The warm honey-rose surfaces are alive with boldly moving cartwheel activity and are laden with eye appeal. The strike is bold to sharp in all places including Liberty's tresses and the vertical line in the reverse bow. This series wound down in 1889 with a mintage of 2,300 circulation strikes. The entire mintage was delivered by the Mint's coiner in December of the year, just in time for holiday gift giving, the fate of numerous \$3s in that era. Indeed, it is thought that not all of the 2,300 pieces were distributed. Absolutely choice for the grade and not far from another half step up the grading scale.

PCGS# 8011. NGC ID: 25NC.

HALF EAGLES

Exceedingly Rare 1798 BD-7 Half Eagle

2085

1798 Heraldic Eagle. BD-7. Rarity-7. Normal (a.k.a. Small) 8. AU Details—Improperly Cleaned (NGC). This is our first offering that we can recall for this highly elusive die pairing from the early half eagle series. The dies were in an advanced state of break up when this coin was struck (see below), although they still managed to impart bold to sharp detail to most design elements. The exceptions are in the centers, where the hair curls behind Liberty's ear and the eagle's breast are quite blunt. Light high point rub is noted overall. The NGC qualifier concerns moderately heavy hairlining and a curiously bright, somewhat glossy texture. Light honey-gold color enhances the appearance, however, as do blushes of pale reddish-rose in the protected areas around some of the design elements. BD Die State e.

Of the 24,867 1798 Heraldic Eagle \$5s that the author believes were struck, John W. Dannreuther (2006) asserts that only 400 to 800 were coined from the die pairing now identified as BD-7. The paltry mintage of this variety is obviously due to the

early and severe break up of both the obverse and reverse dies, neither of which appears in any other pairing. BD Die State e is described by the author simply as, "further cracked with reverse die sinking, terminal state." Expanding on this by using the present coin to illustrate this state, we note that the upper left obverse and upper right reverse are shattered by numerous heavy die breaks. There is even a prominent piece out of the reverse die at the left upright of the letter M in AMERICA. This is surely one of the final 1798 BD-7 half eagles struck before Mint employees were forced to retire both dies.

With so few coins struck, BD-7 is the rarest of the three die pairings that correspond to the Small 8 *Guide Book* variety of this issue. It is also one of the rarest early half eagle varieties of all dates with Dannreuther accounting for only six to 10 survivors. This is only the third auction appearance for the variety during the 21st century that we have been able to trace, and the first in one of our sales. An important opportunity for the specialist that is unlikely to come along again anytime soon.

PCGS# 8079. NGC ID: BFX5.

1802/1 BD-7. Rarity-5. High Overdate. AU Details—Scratch (PCGS). A frosty to modestly semi-reflective example that delivers razor sharp striking detail to all but a few isolated design features. Wisps of pale rose iridescence to otherwise olive-gold color, the in hand appearance is quite smooth overall. We do note faint hairlines, however, and a few pin scratches on the obverse explain the PCGS qualifier. Of the eight known die marriages of the 1802 half eagle, all are overdates, and BD-7 is among the scarcer varieties. John W. Dannreuther (2006) opines that only 3,000 to 6,000 examples were coined from this die pairing, survivors numbering just 50 to 65 pieces in all grades. This relatively affordable AU example has much to offer early gold enthusiasts. BD Die State c/b.

PCGS# 8083. NGC ID: 25NX.

2087

1806 BD-6. Rarity-2. Round-Top 6, Stars 7x6. AU Details—Slide Marks (PCGS). Lustrous for the grade with a pleasing satin texture, this otherwise medium gold example is further enhanced by splashes of iridescent reddish-rose. Boldly to sharply defined from a nicely centered strike, there are no sizeable or otherwise individually mentionable marks on either side. Adjustment marks on the reverse are as made. Evidence for the PCGS qualifier is not readily apparent upon initial viewing, but rotation under a light shows a curious "shine" to the obverse high points due to concentrations of faint slide marks. Visually appealing, nonetheless, and desirable as a more affordable example of this perennially popular type variety in the challenging pre-1834 half eagle series. BD Die State d/f.

PCGS# 8089. NGC ID: 25P5.

2088

1807 Capped Bust Left. BD-8. Rarity-2. AU-58 (PCGS). This thoroughly appealing example offers stronger quality and eye appeal than many lower end Mint State coins of the type that we have handled over the years. Nearly complete satin luster blends with handsome deep honey-olive and more vivid orange-gold colors. Both sides exhibit a razor sharp strike that is all but devoid of even the lightest rub. This is the popular first year of issue for the Capped Bust Left series, examples of which are known in two die marriages. BD-8, offered here, is readily identifiable with the tip of the lowermost arrow feather on the reverse over the extreme right edge of the digit 5 in the denomination. Examples such as this are eagerly sought by quality conscious type collectors as well as early gold variety specialists.

PCGS# 8101. NGC ID: CKLH.

2089

1834 Classic Head. HM-1. Rarity-3. Plain 4. AU-55 (NGC). CAC. Original honey-gold color with more vivid reddish-rose outlines to the peripheral design elements. Much luster remains, and the overall detail is bold, which qualities confirm the desirability of this premium Choice AU for first year type purposes.

PCGS# 8171. NGC ID: E2KE.

2090

1834 Classic Head. HM-3. Rarity-2. Plain 4. EF-45 (PCGS). CAC. A crusty and original example from the first year of this brief and often overlooked 19th century gold series. Ideal for circulated type purposes.

PCGS# 8171. NGC ID: 25RR.

From the Fairmont Collection.

2091

1835 HM-1. Rarity-2+. AU-50 (PCGS). Light olive undertones to medium gold color, this is a desirable AU type candidate from the brief and challenging Classic Head \$5 series.

PCGS# 8173. NGC ID: 25RV.

2092

1835 HM-8. Rarity-3+. EF-45 (PCGS). CAC. Richly original honey and rose-gold surfaces deliver bold detail and appreciable luster at the Choice EF grade level.

PCGS# 8173. NGC ID: 25RV.
From the Fairmont Collection.

1836 HM-4. Rarity-3+. EF-45 (PCGS). CAC. A fully original example whose bold Choice EF surfaces are sure to win many adherents among quality conscious type collectors.

PCGS# 8174. NGC ID: 25RY. From the Fairmont Collection.

2094

1837 HM-2. Rarity-3+. Block 8, Broken Arrow. EF-45 (PCGS). CAC. OGH. After producing record numbers of Classic Head half eagles in 1834 and 1836, production of this denomination returned to more normal levels in 1837 with 207,121 pieces. The 1837 is one of the two the scarcest Philadelphia Mint issues of this brief design type, and Choice EF examples with the premium quality and undeniable originality offered here are rare relative to demand.

PCGS# 8175. NGC ID: 25RZ.

2095

1838 HM-1. Rarity-3. Center Dot, Broken Arrow. AU-55 (PCGS). Lustrous deep gold surfaces with a blush or two of pale rose iridescence. The 1838 rivals the 1837 as the scarcest Philadelphia Mint issue in the brief Classic Head half eagles series. Only two die marriages are known, and they are of comparable rarity.

PCGS# 8176. NGC ID: 25S4.

2096

1840 Broad Mill. AU-55 (NGC). Satin surfaces reveal appreciable remnants of the original mint finish as the coin rotates under a light. The detail is bold to sharp over most design elements, and the color is a handsome blend of deep olive and orange-honey. The Broad Mill examples of the 1840 half eagle are far scarcer than their Narrow Mill counterparts, the diagnostic of the former variety the unusually broad rim around both sides. This issue as a whole is scarce to rare in all grades, especially those above the EF level.

PCGS# 8194. NGC ID: 25SA.

2097

1840 AU-50 (PCGS). A richly original and boldly defined AU survivor of this scarce and underrated early date Liberty Head \$5 issue. Sure to catch the eye of astute specialists in this challenging series.

PCGS# 8194. NGC ID: 25SA.

From the Fairmont Collection.

2098

1840-O Winter-2. Narrow Mill, Large O. VF-35 (PCGS). CAC. OGH. An exceptionally smooth coin for the grade, and one that is also richly original in preservation with plenty of bold detail remaining. First of the New Orleans Mint half eagles, the 1840-O is an unheralded rarity as well as historically significant. It is easily as rare as its identically dated counterparts from the Charlotte and Dahlonega mints. Despite a relatively generous mintage of 40,120 coins, survivors are elusive and typically found VF to EF. Even in these grades precious few are as PQ as this CAC-approved Choice VF. Worthy of serious pursuit by half eagle and New Orleans Mint specialists.

PCGS# 8200. NGC ID: 25SK.

2099

1841-C Winter-1, the only known dies. VF-25 (PCGS). CAC. OGH. Glints of vivid rose iridescence mingle with dominant deep honey-orange color on both sides of this handsome piece. The remaining detail is generally bold, the surfaces impressively smooth in hand to provide further appeal for discerning Southern gold collectors. Similar in overall rarity to the 1840-C, the 1841-C is one of the most elusive Charlotte Mint half eagles. Doug Winter (2008) ranks it as tied for fourth rarest of the 24 issues in this mintmarked gold series. Few circulated survivors that we have handled over the years have been as attractively original and problem free as the offered coin.

PCGS# 8203. NGC ID: 25SP.

1842-D Winter 7-E. Small Date, Small Letters. EF-45 (NGC). A bright golden example with subtle pale olive undertones. Striking detail is sharp by Dahlonega Mint standards, a feature that is easily appreciated due to there being only light wear. The 1842-D Small Date, Small Letters is a conditionally challenging half eagle with most survivors well worn and grading no higher than EF-40. This flashy Choice Extremely Fine example offers above average quality for the issue and plenty of eye appeal.

PCGS# 8210. NGC ID: 25SX.

2101

1842-D Winter 8-G. Large Date, Large Letters. VF-25 (PCGS). CAC. **OGH.** Generally detail and light honey-gold color provide strong eye appeal for the assigned grade. This is the scarcer of the two major varieties of the 1842-D half eagle, Doug Winter (2013) estimating that only 15,824 of the 59,608-piece mintage were of the Large Date, Large Letters variety. Our offerings have been few over the years, especially in comparison to its Small Date counterpart. A significant find for the specialist that would do nicely in many Southern gold cabinets.

PCGS# 8211. NGC ID: 25SY.

2102

1844-D Winter 11-G. EF-45 (NGC). An engaging honey-gold example with intermingled pale olive highlights on both sides. Detail is impressively sharp for a Dahlonega Mint gold coin, especially one that saw light commercial use. The 1844-D is one of the more frequently encountered issues in this Southern gold series, but it is still scarce in an absolute sense with no more than 500 coins believed extant in all grades. Most are well circulated and nowhere near as appealing as this sharp and lustrous Choice EF.

PCGS# 8221. NGC ID: 25T9.

2103

1844-O Winter-2. AU-50 (PCGS). Warm olive-gold color blankets surfaces that retain plenty of bold striking detail and soft mint frost.

PCGS# 8222. NGC ID: 25TA.

From the Fairmont Collection.

2104

1846-C Winter-1, the only known dies. Fine-15 (NGC). A handsome and boldly colored piece displaying deep honey-orange and reddishrose toning. The rims are distinct, all major design elements are fully outlined, and some sharper detail remains in the recesses of Liberty's portrait and the eagle's plumage. The 1846-C has a mintage of 12,995 pieces and suffered an especially high rate of attrition through circulation. Obviously the lack of an 1845-C half eagle resulted in this issue enjoying unusually strong commercial demand. The 1846-C is the rarest Charlotte Mint \$5 after only the 1842-C Small Date. Doug Winter (2008) accounts for no more than 125 survivors in all grades; the present example is sure to see spirited bidding among Southern gold enthusiasts.

PCGS# 8227, NGC ID: 25TG.

2105

1846-D/D Winter 17-J. AU-55 (NGC). This frosty deep gold example exhibits tinges of pale olive and pinkish-rose. With a bold to sharp strike and glints of original luster, it is clearly a desirable Dahlonega Mint half eagle at the Choice AU level. The 1846-D issue includes a dramatic and popular variety, a widely repunched mintmark with bold remnants of the first D readily evident above and to the right of the primary mintmark. The top of the first mintmark is lost in the olive branch. The 1846-D/D is more available than its normal mintmark counterpart, although the typical example grades no finer than EF. This is a scarce Choice AU survivor, with the first D sharp, that is sure to create excitement among advanced Southern gold enthusiasts.

PCGS# 8229. NGC ID: 25TH.

1856-D Winter-39. VF-20 (PCGS). OGH—First Generation. This piece retains an uncommon amount of frosty mint luster for the assigned grade. There is rub to the high points, especially on the obverse, but considerable sharpness remains. Pretty orange-gold color, as well, light hairlines and a curiously bright appearance suggest that the VF-20 assessment represents a net grade of a lightly cleaned coin on the part of PCGS. Still, this is a visually appealing piece and a desirable survivor of "one of the scarcest and most underrated half eagles from [the Dahlonega Mint]," as observed by Doug Winter (2013).

PCGS# 8268. NGC ID: 25UX.

2107

1857-D Winter 42-HH. VF-25 (PCGS). Glints of peripheral reddishrose blend with dominant deep honey-gold color. This is an attractively original example, and also a well defined and uncommonly smooth one in a mid grade Dahlonega Mint \$5. From a mintage of just 17,046 pieces that suffered an expectably high rate of attrition for a pre-Civil War era Southern gold issue.

PCGS# 8273. NGC ID: 25V4.

2108

1858 AU-53 (PCGS). CAC. Original honey-rose surfaces are lustrous with most design elements boldly rendered. One of only 15,136 Philadelphia Mint half eagles of the date produced — the mintage for eagles of this date was just 2,521 pieces, as Philadelphia's coinage presses were kept busy in this year churning out 211,714 double eagles. The 1858 inaugurates a run of low mintage fives from the parent mint that continues through 1860, and market appearances are usually few and far between. Prior to 2020, we last offered a circulation strike 1858 half eagle in 2013, in fact, the intervening seven years seeing several examples of the 1858-C, 1858-D and 1858-S pass through our sales. Clearly this is an underrated issue relative to the more highly regarded mintmarked issues of its era, the Fairmont specimen offered here representing a fleeting bidding opportunity for the astute gold collector.

PCGS# 8276. NGC ID: 25V7.

PCGS Population: 9; 28 finer, just 12 of which are Mint State (MS-64+ finest).

CAC Population: 13 in all AU grades.

From the Fairmont Collection.

2109

1858-D Winter 43-HH. VF-30 (PCGS). OGH—First Generation. Sharply defined in most areas, there is enough detail remaining to suggest an EF grade. The surfaces are curiously glossy in texture with light hairlining, and the VF-30 designation is obviously a net grade from PCGS to compensate for a light cleaning. Warm goldenhoney color overall, the scarcity of this low mintage (15,362 pieces) Dahlonega Mint \$5 issue is sure to result in keen bidder interest in this piece.

PCGS# 8278. NGC ID: 25V9.

1860-D Winter 46-GG. Medium D. EF-45 (NGC). Vivid medium gold surfaces with warm olive undertones evident as the coin rotates away from direct lighting. Overall detail is impressively sharp for a Dahlonega Mint half eagle, and also uncommonly so for the assigned grade. In fact, we believe that this is an essentially AU coin that was net graded to EF-45 by NGC due to faint hairlines and a somewhat

glossy texture that point to a light cleaning. Ranking 15th out of 26 Dahlonega Mint half eagles in overall rarity, the 1860-D is typically offered no finer that Choice EF. The offered coin has much to recommend it to the budget minded Southern gold enthusiast.

PCGS# 8286. NGC ID: 25VH.

Exciting Mint State 1861-C Half Eagle Rarity

2111

1861-C Winter-1, the only known dies. Die State II. Unc Details—Altered Surfaces (PCGS). Offered is a highly desirable Mint State survivor of a rare and historic Southern gold issue. Sharply to fully struck throughout the design, the detail is far superior to that seen in the typical 1861-C half eagle. Handsome medium gold color blankets surfaces that present remarkably well in light of the PCGS qualifier.

The Charlotte Mint half eagle series passed into history in 1861 with a mintage of just 6,879 pieces. Of this total, 887 pieces are believed to have been struck in May of that year under

the authority of the Confederate States of America. A middle die state example, the present coin was likely struck while the facility remained under Federal control, although there is no way of knowing for sure. The 1861-C is the eighth rarest of 24 dates in the Charlotte Mint half eagle series, there being only 200 or so coins extant in all grades. This Mint State example is an extraordinary condition rarity, especially since Doug Winter (2008) accounts for only two or three survivors at this level.

PCGS# 8289. NGC ID: 25VL.

Stack's company envelope included.

1866-S No Motto. EF Details—Cleaned (PCGS). Plenty of sharp to full striking detail remains to honey-gold surfaces that are hairlined and glossy in texture from an unfortunate cleaning. The San Francisco Mint struck only 9,000 No Motto Liberty Head half eagles in 1866 before dies for the new Motto design arrived from the mint in Philadelphia. With S-Mint gold coinage of the era seeing heavy commercial use, survivors of this issue are few and far between regardless of preservation, as most examples failed to survive exportation and eventual melting. Although not a perfect example, the offered coin represents a fleeting bidding opportunity for the specialist that deserves serious consideration.

PCGS# 8300. NGC ID: 25VY.

2113

1870-S Fine-15 (PCGS). OGH—First Generation. A bright honeyolive example with intermingled orange and pale rose highlights. The remaining detail is quite bold and suggestive of at least a Choice VF grade, although hairlines and a curiously bright texture justify the Fine-15 net from PCGS. A mintage of just 17,000 pieces, combined with heavy commercial use beginning in Reconstruction era California, created an absolute and condition rarity in the 1870-S half eagle. Fewer than 100 coins are extant (per *PCGS CoinFacts*), and these enjoy strong collector demand at all levels of preservation.

PCGS# 8321. NGC ID: 25WB.

2114

1873-S EF-45 (PCGS). CAC. This attractive Choice EF exhibits original color to bold, suitably lustrous surfaces. The S mintmark is faint and devoid of finer detail, yet still readily appreciable even without the aid of a loupe. The mintage of 31,000 coins reported for the 1873-S is on par with those of other San Francisco Mint fives from the late 1860s and early 1870s and, like those other issues, heavy commercial use on the West Coast claimed most of the coins. This issue is scarce even in well worn condition, while in the popular collector grades of EF and AU only a few small handfuls remain. With rare CAC approval, the offered coin from the extensive Fairmont holdings is sure to be of keen interest to astute collectors.

PCGS# 8332. NGC ID: 25WM.
CAC Population: 27 in all grades.
From the Fairmont Collection.

2115

1874-S EF-40 (PCGS). The S mintmark is well composed for the grade and readily appreciable even to the unaided eye. Highly elusive in numismatic circles, the 1874-S half eagle has a mintage of 16,000 coins, most of which were worn out and eventually lost in circulation on the West Coast. When we further consider that this is one of a select group of U.S. Mint issues that are currently unknown in Mint State, the PCGS-certified EF is a significant offering.

PCGS# 8335. NGC ID: 25WR.

2116

1877 AU-55 (PCGS). Here is a significant 1877 half eagle, an issue that is highly elusive at all levels of preservation. Much of the prooflike finish remains in the fields of this minimally circulated survivor, and the design elements are frosty and considerably lustrous. Bathed in vivid olive-orange and reddish-gold colors, this impressive Choice AU would serve with distinction in any advanced gold cabinet. The production of minor gold coins in the 1870s was often desultory at best. Such is the case in 1877 when only 1,132 half eagles were struck at Philadelphia, the second lowest production run for the denomination. At the time, the few numismatists of the era who were interested in gold coins preferred Proofs over pieces struck for general circulation. Entering commerce with very little notice, most 1877 half eagles were used until melted. Fewer than 100 remain in all degrees of preservation, almost all of which are circulated, even if only lightly so. This nearly Mint State example will be tremendously appealing for advanced collectors of 19th century gold.

PCGS# 8342. NGC ID: 25WZ.

PCGS Population: 10; 13 finer, just five of which are Mint State (MS-62 finest).

1880-CC Winter 2-C. EF-45 (PCGS). CAC. A pleasingly original example in a CC-Mint gold coin, both sides are richly toned in deep honey-rose. Quite smooth overall with plenty of bold detail remaining where strike allows. The mintage for this issue is 51,107 pieces, a generous total for a pre-1890 Carson City Mint half eagle. It should come as no surprise to read, therefore, that the 1880-CC is one of the more readily obtainable issues in this mintmarked gold series. On the other hand, the typical survivor is well worn, usually in VF or low end EF grades, and even at the threshold of AU preservation the 1880-CC can be difficult to locate. This is one of the nicest examples at this level that we can ever recall offering, a richly original and highly attractive coin destined for inclusion in an advanced gold cabinet.

PCGS# 8352. NGC ID: 25XB.

From the Fairmont Collection.

2118

1881/0 FS-301. MS-61 (PCGS). Lustrous satin surfaces are well struck with attractively original rose-gold color.

PCGS# 8355. NGC ID: 25XD.

From the Fairmont Collection.

2119

1881-CC Winter 1-A, the only known dies. Fine-15 (PCGS). CAC. Light honey-gold surfaces are impressively smooth at the assigned grade level. With all major design elements bold, this fully original Choice Fine is a highly collectible coin in a pre-1890 Carson City Mint \$5.

PCGS# 8356. NGC ID: 25XE.

From the Fairmont Collection.

2120

1882-CC Winter 1-A, the only known dies. EF-45 (PCGS). CAC. Attractive honey-rose surfaces are boldly to sharply defined overall. Unlike the previous year, 1882 proved to be quite productive at Carson City. A modest increase in bullion coming out of the Comstock combined with a full uninterrupted year of operation allowed the Mint to increase its output significantly. Striking quality improved, as well; the 82,817 coins produced for the 1882-CC half eagle were struck from a single pair of dies, a different story from just a decade earlier. Thanks in part to the more generous mintage figures, around 750 examples (per Rusty Goe, 2020) are believed to exist for present generations to appreciate. This Choice EF offer superior quality that will draw the attention of gold type collectors, Carson City Mint specialists, and aficionados of Western gold.

PCGS# 8359. NGC ID: 25XH.

From the Fairmont Collection.

2121

1886-S MS-65 (PCGS). Here is an exceptionally well preserved survivor of this high mintage (3,268,000 pieces) issue. It is an impressive condition rarity that would do justice to the finest Liberty Head half eagle collection. Lustrous surfaces are thickly frosted with full, beautiful deep rose-gold color. Sharply struck, expertly preserved, and worthy of the strongest bids.

PCGS# 8370. NGC ID: 25XV.
PCGS Population: 34; 2 finer (both MS-66).
From the Fairmont Collection.

2122

1887-S MS-64 (PCGS). CAC. Glowing rose-gold surfaces deliver full mint luster and crisp striking detail. Certainly an attractive coin, especially for Mint State gold type purposes.

PCGS# 8371. NGC ID: 25XW. From the Fairmont Collection.

2123

1890-CC Winter 1-A, the only known dies. MS-61 (PCGS). This satin to softly frosted example is further enhanced by pretty color in a blend of honey-orange and pale rose. Sharply struck and exceptionally smooth for the assigned grade. The 1890-CC is the first Carson City Mint half eagle produced since 1884 and, while it is one of the more readily obtainable issues in this mintmarked series, attractive Mint State survivors such as this are scarce when viewed in the wider context of U.S. numismatics.

PCGS# 8376. NGC ID: 25Y3.

From the Fairmont Collection.

2124

1891 MS-63+ (PCGS). Soft satin luster blends with pale rose-gold color. A sharply to fully struck example with above average surface preservation for the issue.

PCGS# 8377. NGC ID: 25Y4.

PCGS Population: 8; 24 finer (MS-64+ finest).

From the Fairmont Collection.

1891-CC Winter 1-A. MS-62 (PCGS). CAC. With full, frosty mint luster that blends nicely with warm honey-apricot color, this sharp and inviting BU example comes highly recommended for inclusion in a mintmarked gold type set. Originally preserved and PQ.

PCGS# 8378. NGC ID: 25Y5.

From the Fairmont Collection.

2126

1891-CC Winter 1-A. MS-61 (PCGS). Satiny light golden-honey surfaces with sharp to full striking detail throughout. An enticing BU type candidate from the popular CC-Mint half eagle series.

PCGS# 8378. NGC ID: 25Y5.

2127

1891-CC Winter 1-A. EF-45 (PCGS). Lustrous and boldly defined Choice EF quality for this popular CC-Mint type issue in the Liberty Head \$5 series. Pinkish-apricot color with blushes of bolder patina here and there around the peripheries.

PCGS# 8378. NGC ID: 25Y5.

2128

1892 MS-64+ (PCGS). CAC. A generally smooth, highly lustrous example further enhanced by beautiful color in vivid golden-rose.

PCGS# 8379. NGC ID: 25Y6.

From the Fairmont Collection.

2129

1892-CC Winter 1-A, the only known dies. Die State III. MS-61 (PCGS). CAC. Delicate pinkish-rose iridescence blends with dominant golden-honey color. With a sharp strike and full mint luster, this is an outstanding BU representative of this more readily obtainable CC-Mint half eagle issue, one that is popular for Mint State type purposes, as such.

PCGS# 8380. NGC ID: 25Y7.

From the Fairmont Collection.

2130

1893-CC Winter 1-A. MS-62 (PCGS). CAC. Lovely pinkish-honey surfaces are sharply struck overall with solid luster quality for the grade. The Carson City Mint half eagle series passed into history in 1893 with a mintage of 60,000 coins. This is the scarcest of the 1890s CC-Mint fives in AU and Mint State grades, and the historical significance of the issue guarantees continued numismatic demand.

PCGS# 8384. NGC ID: 25YB.

From the Fairmont Collection.

2131

1893-O Winter-1. MS-61 (PCGS). CAC. A lustrous and well struck BU type candidate from the later New Orleans Mint half eagle series, CAC approval is sure to result in premium bids for this handsome piece.

PCGS# 8385. NGC ID: 25YC. From the Fairmont Collection.

2132

1897 JD-1, the only known dies. Rarity-5. Proof-62 Cameo (PCGS). Brightly mirrored fields and razor sharp striking detail deliver strong eye appeal at the assigned grade level. A handsome and fully original piece, both sides exhibit pale silvery tinting to dominant olive-orange color. With a slightly lower mintage of 83 versus 103 coins, it should perhaps come as no surprise to read that the Proof 1897 half eagle is rarer than the Proof 1896. John W. Dannreuther (2018) estimates that only 40 to 55 specimens are extant in all grades for the former issue, the present example a significant find for the advanced numismatist.

PCGS# 88492. NGC ID: 28D3.

2133

1900 MS-65 (PCGS). Ideal for Gem type purposes, this satiny rose-apricot example also sports razor sharp striking detail from the rims to the centers.

PCGS# 8400. NGC ID: 25YU.

2134

1901/0-S FS-301. MS-63+ (PCGS). Bold, handsome honey-rose color adorns both sides of this satiny and smartly impressed example. A popular overdate in the Liberty Head gold series, the 1901/0-S half eagle reveals traces of an underlying 0 at the upper right corner of the final digit 1 in the date. Perhaps only 2,000 examples remain across all grades and only 500 in Mint State, few of the latter as nice as the Fairmont specimen in PCGS MS-63+ offered here.

PCGS# 8403. NGC ID: 25YX.

From the Fairmont Collection.

1901-S MS-66 (PCGS). This beautiful upper end Gem exhibits full satin luster enhanced by rich golden-rose color. The strike is sharp and the surfaces are exceptionally well preserved in all regards. With a mintage of 3.6 million pieces and a good rate of survival, the 1901-S is the most plentiful Motto Liberty half eagle in today's market in most grades. However, the certified population falls off markedly

above MS-65 and the issue emerges as a notable condition rarity in MS-66 and finer grades. This rare PCGS MS-66 1901-S represents an important opportunity for both stellar-quality gold type collectors and advanced Liberty Head half eagle specialists.

PCGS# 8404. NGC ID: 25YX.

Superb Gem 1903-S Half Eagle

2136

1903-S MS-67 (NGC). This beautiful half eagle offers strong technical quality and phenomenal eye appeal. Both sides exhibit a delightful blend of soft satin luster and vivid pinkish-orange color, as well as very faint traces of pale powder blue iridescence. The strike is razor sharp throughout with entire design fully appreciable.

One of the longest running designs in U.S. Mint history, the Liberty Head half eagle made its debut in 1839 and remained in production through 1908 when it was supplanted by the Indian type. Two major designs comprise the basic Liberty Head half eagle type, the No Motto coinage of 1839 to 1866 and its With

Motto counterpart of 1866 to 1908. Collectors seeking a single high quality example to represent this series typically gravitate to late date issues like the 1903-S for, generally speaking, they include most of the best produced and most carefully preserved Liberty head \$5s. The currently offered piece is just such a coin. The softness of gold as a coinage metal and the manner in which these issues were handled means that most Mint State survivors of even overall plentiful issues are usually confined to lower grades through MS-65 due to abrasions. The present example is an exception and is sure to sell for a premium bid.

PCGS# 8408. NGC ID: 25Z3.

NGC Census: 9; 0 finer. The corresponding PCGS Population is 1/0.

1903-S MS-65 (PCGS). Billowy mint luster blends with vivid rosegold color on both sides of this smartly impressed, expertly preserved Gem.

PCGS# 8408. NGC ID: 25Z3.

2138

1903-S MS-64 (PCGS). Lustrous satin surfaces are sharply struck overall with lovely color in original honey-apricot. An excellent coin to represent the type or issue in a Mint State gold collection.

PCGS# 8408. NGC ID: 25Z3.

From the Fairmont Collection.

2139

1906-D MS-65 (PCGS). This popular first year Denver Mint issue is a favorite with mintmarked gold type collectors. A lustrous, satiny and vivid Gem that is boldly to sharply struck throughout.

PCGS# 8414. NGC ID: 25ZA.

2140

1906-D MS-65 (PCGS). From the first year of Denver Mint coinage operations comes this lovely Gem Uncirculated half eagle. Full frosty luster throughout with a bold strike and handsome rose-gold color.

PCGS# 8414. NGC ID: 25ZA.

2141

1908 Liberty Head. MS-66 (PCGS). Drenched in vivid rose-orange color, this breathtaking upper end Gem is further enhanced by full mint luster in a smooth satin texture. The 1908 is readily obtainable at lower levels, but is scarce in the finest Mint State grades, as here. The expertly preserved surfaces and strong eye appeal of the offered coin are sure to appeal to discerning gold enthusiasts, especially final year type collectors.

PCGS# 8418. NGC ID: 25ZE.

PCGS Population: 56; 14 finer (MS-68 finest).

2142

1908 Liberty Head. MS-64 (PCGS). Popular final year type candidate from the long-running Liberty Head \$5 gold series.

PCGS# 8418. NGC ID: 25ZE.

2143

1908 Indian. MS-64 (PCGS). Lustrous orange-gold surfaces ae sharply struck and nicely preserved to tempt the quality conscious first year gold type collector.

PCGS# 8510. NGC ID: 28DE.

2144

1908 Indian. MS-63 (NGC). CAC. Smartly impressed and crisp, this handsome orange-gold example also offers full mint luster in a soft satin texture. Uncommonly smooth for the assigned grade, and worthy of a nice premium, as such.

PCGS# 8510. NGC ID: 28DE.

Stunning Superb Gem 1908-S \$5 Indian

2145

1908-S MS-67 (NGC). This is a lovely, conditionally rare Superb Gem 1908-S, one of the lowest mintage circulation strike Indian half eagles. It is expertly produced, as typical for the issue, with both sides exhibiting razor sharp striking detail and bountiful satin luster. Vivid deep orange-gold color blankets both sides. With its pleasing original appearance and superior surface preservation, this coin will be just right for an advanced collection of 20th century U.S. Mint gold coinage.

Bela Lyon Pratt's incuse design made its debut in the quarter eagle and half eagle series in 1908. The San Francisco Mint, which would produce only half eagles of this design, struck 82,000 examples during the first year of this series, the lowest

mintage among Indian half eagles after only the 1909-O and 1911-D. As a first year issue a fair number of 1908-S half eagles were set aside, and there are some extraordinary Mint State examples known. Many of the Gems and Superb Gems that have been certified by PCGS and NGC in recent decades were once part of a hoard assembled by Chicago beer magnate and numismatist Virgil Brand. In an absolute sense, however, Uncirculated survivors are scarce, and the low mintage of this issue has long made it a favorite. The present Superb Gem is sure to be of particular interest to advanced specialists.

PCGS# 8512. NGC ID: 28DG.

NGC Census: 6; with a single MS-68 finer.

Noteworthy Second Mint State 1908-S Half Eagle

2146

1908-S MS-64 (PCGS). Our multiple offers in this sale notwithstanding, the 1908-S is a scarce, low mintage Indian half eagle issue that enjoys strong demand among advanced 20th century gold enthusiasts. The present lot highlights a lovely golden-apricot example with subtle pale pink overtones. Smooth and satiny with full mint luster and a sharply executed

strike. If the Superb Gem in the preceding lot is beyond one's reach, this solidly graded and aesthetically pleasing near-Gem is an equally desirable alternative that would serve as a highlight in any cabinet.

PCGS# 8512. NGC ID: 28DG.

2147

1908-S AU-55 (PCGS). CAC—Gold Label. OGH. Original honeyrose surfaces with glints of pale silver and olive also very much in evidence. Smooth and attractive for the grade, just a touch of friction separates this PQ example from a Mint State grade. From a limited

mintage of 82,000 pieces for this first year San Francisco Mint Indian \$5 issue, and worthy of strong bids.

PCGS# 8512. NGC ID: 28DG.

Condition Rarity 1909-D Indian Half Eagle

2148

1909-D MS-66 (PCGS). Offered is an extraordinary example of this otherwise readily obtainable Indian half eagle issue. Intensely lustrous and satiny, the surfaces are enhanced by beautiful rose-apricot color. Intermingled powder blue and pale pink highlights are also evident and very attractive. Fully struck with all features crisp, even the most discerning 20th century gold enthusiast will be impressed by this exceptional upper end Gem

The 1909-D half eagle is a favorite for type collectors due to its availability. Almost three and a half million coins were struck at the Denver Mint that year, surpassing the second highest mintage in the Indian series by a factor of three. The rate of survival was above average, as well, and today the 1909-D is

far and away the most readily obtainable Indian half eagle in Mint State. As a Gem, however, this issue is scarcer than the 1908, the latter benefiting from deliberate preservation as a first year issue. In MS-66 the 1909-D has an extant population of just five to seven pieces, these special pieces making up the highest echelons of Condition Census for the issue. It has been more than 10 years since another example in this grade sold at auction, illustrative of not only the extreme rarity of such coins, but the tight hands in which they are held. Whether you are assembling a top flight Indian half eagle collection or a stellar quality type set, this significant bidding opportunity deserves undivided attention.

PCGS# 8514. NGC ID: 28DJ.
PCGS Population: 5; 0 finer.

2149

1909-D MS-64 (PCGS). Highly lustrous honey-rose surfaces exhibit razor sharp striking detail from the borders to the centers. The 1909-D half eagle is a favorite for collectors in part due to its availability. Almost three and a half million coins were struck at the Denver Mint that year, providing ample opportunities for the collector with an eye

for quality. For the assigned grade, it is difficult for us to imagine a more inviting example than the Fairmont specimen offered here.

PCGS# 8514. NGC ID: 28DJ.

Ex Fairmont Collection.

1909-D MS-64 (PCGS). Satiny rose-gold surfaces with bushes of light reddish-russet drifting across both sides. Full striking detail and original preservation will endear this Choice example to the Mint State gold type collector.

PCGS# 8514. NGC ID: 28DJ.

2151

1909-D MS-64 (PCGS). Vivid rose-orange color, full satin luster and a sharply executed strike are sure to endear this Choice Indian \$5 to Mint State gold type collectors.

PCGS# 8514. NGC ID: 28DI.

2152

1909-D MS-64 (NGC). CAC. Eagerly awaiting inclusion in a high quality gold type or date set, this premium Choice 1909-D \$5 is sharply struck with bountiful satin luster. Beautiful rose-gold color.

PCGS# 8514. NGC ID: 28DJ.

2153

1909-O VF-30 (NGC). CAC. A highly desirable level of preservation for this key date Indian half eagle, an issue that rises quickly in value as one progresses up the numismatic grading scale. This handsome mid grade example is richly original in deep honey-orange color. Well defined overall for the grade, the O mintmark is faint, yet discernible even without the aid of a loupe. Smooth and inviting in hand, CAC approval was virtually assured for this premium quality Choice VF.

PCGS# 8515. NGC ID: 25ZK.

2154

1911 MS-63 (PCGS). CAC. OGH. Lovely golden-apricot color blends with soft mint luster on both sides of this impressively smooth example. A premium offering for the Mint State type collector or discerning 20th century gold enthusiast.

PCGS# 8520. NGC ID: 28DP.

2155

1913 MS-64 (NGC). CAC. Exceptional Choice surfaces are vivid, lustrous and sharply to fully struck.

PCGS# 8525. NGC ID: 28DT.

2156

1913 MS-63 (NGC). CAC. Medium gold surfaces with full luster and a smooth enough appearance to rate near the very top of the assigned grade level.

PCGS# 8525. NGC ID: 28DT.

2157

1914 MS-63 (PCGS). CAC. OGH—**First Generation.** Lovely goldenapricot surfaces with subtle powder blue iridescence evident as the coin dips into a light. Smooth, attractive and not all that far removed from an even higher Mint State grade.

PCGS# 8527. NGC ID: 28DU.

2158

1914-D MS-64 (PCGS). CAC. Soft satin luster mingles with vivid deep rose-gold color to provide outstanding eye appeal. The technical quality of this piece is no less impressive, both sides sharply struck and so well preserved as to be not all that far from the full Gem category. A premium example that will please even the most discerning collector. A median rarity in the Indian half eagle series, the 1914-D is actually one of the more frequently encountered mintmarked issues of this type. The mintage is a respectable, if not overly generous 247,000 pieces, and enough have survived that locating a lower grade Uncirculated coin in the MS-60 to MS-63 range should prove a relatively easy task. Any finer, however, and the 1914-D develops into a notable condition rarity. In the higher Mint State grades, as here, the 1914-D is rarer than such other issues in this series as the 1908-S, 1909-D and 1910.

PCGS# 8528. NGC ID: 28DV. PCGS Population: 46; 4.

2159

1915 MS-64+ (**PCGS**). Delightful frosty surfaces are sharply struck with a full endowment of bright pinkish-honey color. Struck during the first full year of World War I, 1915 saw the conflict in Europe escalate and the United States edge closer to involvement with the sinking of the *Lusitania*. In that year 588,000 half eagles were struck at the Philadelphia Mint and overall the 1915 is one of the more available issues in lower grades. However, examples that approach the Gem Mint State level are scarce.

PCGS# 8530. NGC ID: 28DX.

2160

1915 MS-64 (NGC). CAC. Gorgeous rose-gold color blends with intense satin luster on both sides of this sharp and inviting near-Gem. PCGS# 8530. NGC ID: 28DX.

2161

1915 MS-63 (PCGS). CAC. Beautiful orange-gold surfaces are sharply struck with a full endowment of soft, satiny mint luster. Premium Choice quality for the Mint State gold type or date collector.

PCGS# 8530. NGC ID: 28DX.

EAGLES

Scarce 1799 Small Stars Eagle

2162

1799 BD-6, Taraszka-18. Rarity-5. Small Obverse Stars. AU Details—Repaired (PCGS). A more affordable, yet still overall sharp example of this classic early U.S. Mint gold type. The surfaces have a curiously bright, chrome-like appearance that helps to explain the PCGS qualifier. Among the extensive work done on this piece is smoothing of the left and right obverse field areas to remove what appears to have been graffiti. No sizable marks remain on either side, and the surfaces exhibit blushes of pale pink to dominant bright golden-yellow color. BD Die State e/b.A workhorse die, the obverse of BD-6 was previously used to strike 1799 eagles of the BD-4 and BD-5

varieties. This is its final use, the die eventually failing in the area of a substantial break from the rim, through star 8, to the back of Liberty's cap. It is the breakup of this obverse die that almost certainly explains the scarcity of the 1799 BD-6 eagle. John W. Dannreuther (2006) estimates that only 1,500 to 2,000 coins were struck from this die pairing, survivors numbering just 35 to 45 pieces in all grades. With Mint State Capped Bust Right eagles rare irrespective of date or die marriage, this relatively pleasing BD-6 will appeal to advanced gold type and early eagle variety collectors.

PCGS# 98562.

Bold Mid-Grade 1799 BD-8 \$10 Eagle

2163

1799 BD-8, Taraszka-20. Rarity-5. Small Obverse Stars. VF Details—Surfaces Smoothed (PCGS). A generally deep honey-olive example with vivid outlines of reddish-rose to most design elements. Light to moderate hairlining and a somewhat glossy texture explain the PCGS qualifier. Bold detail remains to all major features. BD Die State c/b.

The 1799 BD-8 is a median rarity among the 10 known die marriages for the 1799 eagle and represents the second of two uses for this obverse die. The most significant diagnostic of this die is the rightward leaning of the digits 17 in the date. The reverse of BD-8 is in its only use, all known examples exhibiting a sharp, jagged die break within the letter C in AMERICA.

Interestingly, all known examples of the 1799 BD-8 eagle were struck between die states of the 1799 BD-7 variety. For unknown reasons the Mint initially replaced the reverse die of the 1799 BD-7 pairing with the reverse die represented here, only to have that die break up and fail quickly, resulting in the BD-7 remarriage. The early break up of this reverse die resulted in relatively few coins being struck, which in turn explains the scarcity of the 1799 BD-8 variety. In fact, according to John W. Dannreuther (2006), only 45 to 55 examples are believed extant in all grades.

PCGS# 98562.

2164

1843-O Winter-3. AU-58 (PCGS). Plenty of lively mint luster remains on both sides, while the surfaces are enhanced by vivid light olive and warmer medium gold colors. After only the 1847-O, the 1843-O is the most available New Orleans Mint ten from the 1840s. It is much rarer than the 1847-O in high grades (AU and Mint State), however, and the present AU-58 numbers among the finest realistically obtainable for most advanced Southern gold enthusiasts.

PCGS# 8589. NGC ID: 262R.

PCGS Population: 16; 8 finer (MS-63 finest).

2165

1850-O Winter-2. AU-53 (NGC). Brilliant golden-yellow surfaces with traces of frosty luster very much evident as the coin rotates under a light. This is a poorly struck issue overall, but with minimal wear the offered coin presents as suitably bold in most areas. From a mintage of just 57,500 pieces, the vast majority of which saw heavy commercial use. Given the rarity of Mint State survivors, upper end circulated examples such as this are in high demand among serious Liberty Head eagle and New Orleans Mint enthusiasts.

PCGS# 8605. NGC ID: 2639

NGC Census (S.S. Republic provenance only): 15 in all grades.

Ex S.S. Republic.

1877-S AU-53 (NGC). Much of the original mint finish remains on both sides of this pretty olive-orange and golden-rose example. The 1877-S is a low mintage (17,000 pieces) eagle that circulated extensively in an era when gold coins enjoyed strong commercial demand on the West Cost. Straight-graded survivors such as this

are always in demand irrespective of numeric grade, although with Mint State coins all but unknown AUs are particularly attractive to advanced gold enthusiasts.

PCGS# 8679. NGC ID: 265H.

2167

1891-CC Winter 3-C, FS-501. Repunched Mintmark. MS-60 (PCGS). CAC. OGH—First Generation. Glints of powder blue and pale rose enliven otherwise golden-orange color for this wonderfully original BU example. Lustrous and fully struck, both the quality and

eye appeal are superior to what one might expect at the basal Mint State grade level. A popular CC-Mint \$10 issue represented by a thoroughly coin.

PCGS# 8720. NGC ID: 266U.

2168

1891-CC Winter 3-C, FS-501. Repunched Mintmark. AU-58 (PCGS). OGH—First Generation. With uniform vivid golden-rose color and just a trace of light wear on the high points, this is a classic example of the assigned grade. Scattered minor handling, but the

mint luster remains bold and the design elements are razor sharp. A perennially popular type issue in the Carson City Mint gold series, represented here by a desirable RPM variety.

PCGS# 8720. NGC ID: 266U.

Amazing Deep Cameo Proof 1897 Eagle

2169

1897 JD-1, the only known dies. Rarity-5+. Proof-64 Deep Cameo (PCGS). CAC. Exquisite deep golden-orange surfaces are fully struck with remarkable field to device contrast that fully deserves the Deep Cameo designation from PCGS. The fields are highly reflective, and reveal a subtle orange peel texture when viewed with the aid of a loupe. The design elements are satiny with intricate detail to even the most minor design elements. Carefully preserved and visually stunning, this phenomenal With Motto Liberty Head eagle would serve as a highlight in even the finest numismatic cabinet.

This issue hails from an era that saw the United States Mint reach the pinnacle of production quality for Cameo Proof coinage. Across all silver and gold series, from the dime to the double eagle, the Proofs of 1896, 1897 and 1898 are often characterized by full striking detail and strong field to device contrast. When carefully preserved, as here, these are truly magnificent works of numismatic art. The problem that the gold denominations present for today's collectors is their rarity. The mintage of the Proof 1897 eagle is just 79 coins. John W. Dannreuther (2018) accounts for 30 to 35 survivors across all grades, a range that is a bit more conservative than the *PCGS CoinFacts* estimate of 40 coins extant. Regardless, CAC approval confirms the offered coin as one of the finest obtainable by today's advanced gold enthusiasts. It is sure to sell for a strong bid.

PCGS# 98837. NGC ID: 28G4.

PCGS Population: 1; 2 finer in this category (Proof-66 Deep Cameo finest).

CAC Population: 2; 1.

2170

1898 MS-64 (PCGS). Lovely pinkish-gold surfaces are sharply to fully struck with full satiny mint luster. This is a plentiful 1890s ten-dollar gold eagle in an absolute sense, but at the Choice Mint State level the coin offered here is scarce.

PCGS# 8740. NGC ID: 267G.

2171

1899 MS-65 (PCGS). A handsome rose-orange Gem for the discerning gold type or date collector. Fully struck with bountiful satin luster.

PCGS# 8742. NGC ID: 267J.

1900 MS-65 (PCGS). Lovely golden-rose surfaces are smartly impressed and uncommonly well preserved for the issue. While Mint State 1900 eagles are plentiful in an absolute, Gems are surprisingly elusive relative to the generous mintage and above average rate of survival.

PCGS# 8745. NGC ID: 267M.

PCGS Population: 38; 9 finer (MS-66+ finest).

2173

1901 MS-66 (PCGS). OGH. Exceptionally vivid surfaces exhibit blended rose-gold and powder blue as well as full mint luster. Fully struck. While the 1901 is one of the most available issues of this type in Mint State, few examples are as smooth and attractive as this premium quality Gem. A find for quality conscious gold type and date collectors.

PCGS# 8747. NGC ID: 267P.

PCGS Population: 53; 11 finer (MS-67 finest).

2174

1901 MS-65+ (**NGC**). This upper end Gem is a beautiful coin in all regards, and an outstanding example of the With Motto Liberty Head \$0 gold type.

PCGS# 8747. NGC ID: 267P.

2175

1901 MS-64 (NGC). Sharply struck with lovely satin luster, this lovely rose-orange example will be just right for a high grade gold type set.

PCGS# 8747. NGC ID: 267P.

2176

1901 MS-64 (NGC). A crisply impressed, lustrous and vividly colored near-Gem representative of this popular classic U.S. Mint gold type.

PCGS# 8747. NGC ID: 267P.

Exquisite Superb Gem 1901-S \$10 Lib

2177

1901-S MS-67 (NGC). A virtually pristine 1901-S eagle that will be just right for inclusion in a high quality gold type set. Both sides of this lovely coin are fully struck with razor sharp detail from the rims to the centers. Bathed in satiny mint luster and vivid reddish-orange color, to look upon this piece is to admire both its advanced technical quality and outstanding eye appeal. Among a relatively tiny group of Superb Gem survivors from a

sizable mintage of more than 2.8 million coins, this Condition Census 1901-S ten is absolutely worthy of the assigned grade. One would be hard pressed to find a better Mint State example in today's market.

PCGS# 8749. NGC ID: 267S. NGC Census: 24; 0 finer.

2178

1907-D MS-64+ (**NGC**). **CAC.** This desirable mintmarked type candidate from the later Liberty Head \$10 series is a smartly impressed, fully lustrous near-Gem. Pretty medium gold color with highlights of pale pinkish-rose.

PCGS# 8764. NGC ID: 2689.

2179

1908 No Motto. MS-62 (NGC). Well struck for the issue, this attractive Indian eagle displays full mint luster and pretty rose-orange color. Just 33,5000 circulation strikes were made, the lowest mintage in the Indian eagle series after only the 1907 Wire Rim, 1907 Rounded Rim and 1911-D.

PCGS# 8853. NGC ID: 28GG.

Exceptional 1908 With Motto Indian Eagle

2180

1908 Motto. MS-66 (PCGS). A visually stunning example with exceptionally smooth surfaces in a survivor of this challenging 20th century gold type. Fully struck with intricate detail to all devices, both sides also sport intense mint luster in a lively satin texture. Bathed in a blend of golden-orange and lighter pinkishrose colors, this smooth and inviting premium Gem would serve with distinction in even the finest Indian eagle set.

Augustus Saint-Gaudens' original design for the Indian eagle did not include the motto IN GOD WE TRUST because President Theodore Roosevelt believed it to be sacrilegious. Congress, upset that Roosevelt took this action without their consent, demanded the motto be restored. Chief Engraver Charles Barber modified the dies in 1908 to add it before the

eagle's breast on the reverse, where it would remain until 1933. Overall, the quality of 1908 Motto eagles is very high and offers a pleasing example of the design. The Philadelphia Mint coined 341,486 eagles with the Motto added, and even though the issue suffered significant attrition due to the mass meltings of the late 1930s, it is generally available even in the lower Mint State levels. Above Choice Mint State, that situation changes dramatically and the issue rapidly becomes a notable condition rarity. Gem examples are especially scarce and the addition of a coin at this state of preservation is an achievement in and of itself. Delightful in every regard, this coin will readily find a new home in an outstanding cabinet.

PCGS# 8859. NGC ID: 28GJ.

PCGS Population: 45; 10 finer (MS-68+ finest).

2181

1909-S AU-53 (PCGS). CAC. Lustrous AU surfaces are well defined overall with handsome pinkish-honey color.

PCGS# 8864. NGC ID: 28GP. From the Fairmont Collection.

2182

1910 MS-64 (PCGS). This Philadelphia Mint type candidate from the Indian eagle series is a highly lustrous, satiny near-Gem with full striking detail throughout. Pretty rose-orange color, as well, with a faint grease streak (as made) on the reverse that adds additional character.

PCGS# 8865. NGC ID: 28GR.

2183

1910 MS-63 (PCGS). A vivid, lustrous example with razor sharp striking detail adding further appeal. PQ!

PCGS# 8865. NGC ID: 28GR.

2184

1913-S AU-53 (PCGS). With a paltry mintage of 66,000 pieces, the 1913-S eagle has long been recognized as one of the key issues of its type. As with many of the higher denomination gold issues from the early 20th century, most ended up in government melting pots during the late 1930s. As such, the issue enjoys strong collector demand in all grades, circulated as well as Mint State.

PCGS# 8874. NGC ID: 28GZ.
From the Fairmont Collection.

2185

1915 MS-64+ (**PCGS**). **CAC.** Coveted CAC approval is sure to endear this premium near-Gem Indian eagle to discerning gold type collectors. A lustrous and vivid example with sharp striking detail.

PCGS# 8878. NGC ID: 28H5.

2186

1915 MS-64 (**PCGS**). Satiny golden-rose surfaces are fully struck with swirling mint luster. A lovely near-Gem that comes highly recommended for both high grade type and date purposes.

PCGS# 8878. NGC ID: 28H5.

One of the Finest Certified 1932 Indian Eagles

2187

1932 MS-67 (NGC). It has been 10 years since we last offered a Superb Gem 1932 Indian eagle, confirming the extreme rarity of this otherwise readily obtainable issue when in this extraordinary level of preservation. Both sides of this beautiful coin exhibit wisps of pale rose and powder blue on dominant medium gold color. The texture is full, satiny and virtually pristine, with a razor sharp strike adding to the overall appeal.

It is perhaps surprising that the Philadelphia Mint delivered a staggering mintage of 4,463,000 ten-dollar gold eagles during this Depression year. While most remained undistributed in

government vaults before being melted in 1937, enough were released that the 1932 ranks as the most available Indian eagle in today' market. A considerable number of coins are known in Mint State, although we caution quality conscious collectors that almost all are below MS-65. This issue is a landmark condition rarity in Superb Gem MS-67, the present example tied for CC#1 with a handful of others at this level. It is a standout coin destined for the finest of 20th century gold collections.

PCGS# 8884. NGC ID: 28HB.

NGC Census: 8; 0 finer. The corresponding PCGS Population is 1/0.

2188

1932 MS-65+ (PCGS). Exceptional premium Gem Mint State preservation for the discerning gold type collector. Both sides are full struck with lovely rose-gold color to smooth satin surfaces. PQ!

PCGS# 8884. NGC ID: 28HB.

2189

1932 MS-64 (PCGS). Blended rose-gold and powder blue colors greet the viewer from both sides of this sharply struck, intensely lustrous example.

PCGS# 8884. NGC ID: 28HB.

2190

1932 MS-64 (PCGS). This delightful near-Gem exhibits razor sharp striking detail, intense satin luster and vivid deep orange color. Type collectors seeking a high grade Indian eagle would be wise to pursue this Choice 1932.

PCGS# 8884. NGC ID: 28HB

2191

1932 MS-64 (NGC). CAC. Here is a Choice Mint State 1932 Indian eagle of CAC-approved quality. It is lovely and will fit perfectly in a Mint State type set. It is sharply struck, intensely lustrous and displays vivid golden-yellow color.

PCGS# 8884. NGC ID: 28HB.

2192

1932 MS-64 (NGC). Mint State gold type collectors are sure to appreciate this vivid and satiny Indian eagle. Sharply struck, as well, with lovely color in a blend of pale rose and golden-apricot.

PCGS# 8884. NGC ID: 28HB.

DOUBLE EAGLES

2193

1850-O Winter-2. VF-25 (PCGS). Moderately worn, yet with all major design elements bold, this is a desirable mid grade survivor from the New Orleans Mint's premier double eagle issue. Deep khakigold color with coppery highlights around the obverse periphery.

PCGS# 8903, NGC ID: 268G.

2194

1858-S AU-58 (PCGS). OGH. A premium near-Mint example that will appeal to both advanced type collectors and Liberty double eagle specialists. Deep rose-orange surfaces retain plenty of soft satin luster. Sharply defined, as well, with eye appeal that is among the strongest that we have ever noted for the issue. With no examples included in such famous shipwreck finds as those of the S.S. Central America and S.S. Brother Jonathan, the 1858-S remains a highly elusive double eagle in Mint State. This premium Choice AU, very scarce in its own right, represents an important find in today's market.

PCGS# 8925. NGC ID: 2699.

Historic 1861-O Twenty-Dollar Gold Rarity An Issue Struck Under the Authority of Three Different Governments

2195

1861-O Winter-1, the only known dies. EF-40 (PCGS). OGH.

This is a visually appealing and highly desirable example of one of the most eagerly sought Type I Liberty Head double eagles. Handsome deep honey-rose color is seen on both sides, with more vivid highlights of reddish-orange. Faint remnants of a frosty to modestly semi-prooflike finish can be seen, most intense in the protected areas around the devices. Overall boldly defined and free of singularly mentionable handling marks. With superior quality and eye appeal for this exceptionally challenging issue, we anticipate that this coin will find its way into an advanced collection of double eagles or Southern gold coinage.

The desirability of the 1861-O double eagle is well established and stems from two important characteristics of this issue. First, the 1861-O is a scarce issue in all grades with no more than 175 coins believed extant from a mintage of 17,741 pieces. Based on this estimate Doug Winter (2020) ranks the 1861-O seventh in rarity among the 13 New Orleans Mint issues in the Liberty Head double eagle series, ahead of the 1850-O, 1851-O, 1852-O, 1853-O, 1857-O and 1858-O.

Second, the mintage for the 1861-O comprises coins that were struck under three different governments — a unique occurrence in the Liberty Head double eagle series and a circumstance that has affected few other issues throughout U.S. coinage history. The mintage for the 1861-O can be divided as follows:

- -January 1-26, 1861: 5,000 coins struck under the authority of the United States of America
- -January 26-March 31, 1861: 9,750 coins struck under the authority of the State of Louisiana after it seceded from the Union and took over control of the New Orleans Mint
- -April 1-30, 1861: 2,991 coins struck under the authority of the Confederate States of America after Louisiana joined the Southern Confederacy

Production of the 1861-O, therefore, closely followed the shifting political landscape of the nation during the months leading up to the outbreak of armed hostilities that started the Civil War. The close association of this issue with the Confederate States of America, in particular, confirms its desirability among specialized collectors, for the 1861-O double eagle is one of the few regular issue coins produced by that short lived government.

All 1861-O double eagles were struck using a single pair of dies, however, and even the pieces produced by the Southern Confederacy bear the legend UNITED STATES OF AMERICA as part of the reverse design. The staff in the New Orleans Mint simply had no other way of creating or otherwise obtaining new dies after the facility left Union control, and it was forced to use what tools were on hand to strike limited quantities of coins before the supply of bullion became exhausted.

How, then, do numismatists differentiate between those coins struck by the Union, the State of the Louisiana, and the Confederate States of America? The process is imprecise and somewhat conjectural, but Doug Winter has identified a late die state of this variety (Die State III) with a bold date and an obverse die crack (as made) from the rim outside star 2 to Liberty's chin. He believes that those late die state examples were struck by the Confederate States of America, and we see no reason to doubt that attribution.

The coin we offer here, however, is an early die state example (Die State I) with the digits in the date weakly impressed and no die crack on the obverse. This coin is almost certainly one of the 5,000 1861-O double eagles struck by the United States of America between January 1 and 26 of that year. Assigning this coin to the United States of America seems particularly appropriate since there is also an intermediate die state (Die State II) known to exist for this issue on which the base of the digit 8 in the date has been strengthened by Mint personnel. Die State II examples probably represent some (but perhaps not all) of the coins struck under the authority of the State of Louisiana.

PCGS# 8934. NGC ID: 269J.

1862-S AU-55 (PCGS). A vivid and lustrous example dressed in deep orange and golden-rose colors. While the economic repercussions of the Civil War resulted in a sharp decrease in double eagle production at the Philadelphia Mint beginning in 1862, the San Francisco Mint remained busy churning out generous numbers of these coins. Records state that 854,173 examples were struck at the California facility. These coins circulated on the West Coast in an era in which they were not seen in commerce in the East and Midwest. Although less than 1/2 of 1% of the mintage for the 1862-S is extant, circulated examples exist in such numbers — Bowers (2004) says 2,500 to 3,500 pieces — that locating one should be relatively easy under normal market conditions. With Mint State survivors of the 1862-S highly elusive in today's market, this Choice About Uncirculated example is sure to see spirited bidding among advanced double eagle collectors.

PCGS# 8938. NGC ID: 269N.

2197

1864 AU Details—Cleaned (PCGS). Bold to sharp detail and vivid medium gold color are strong suits for this scarce date Type I \$20 Lib. Federal records report that 204,235 circulation strike double eagles were coined at the Philadelphia Mint during 1864, and due to the continued problem with hoarding — which lasted until late December 1879 — none were used in regular day-to-day transactions in the eastern half of the United States. It seems that many were exported, and to the extent that this happened, most were likely melted into bullion, as examples have not turned up in European bank hoards to any great extent. We estimate a surviving population of between 300 to 450 pieces, most of which grade VF or EF. This About Uncirculated example is a more affordable alternative at its grade level with much to offer the budget minded gold enthusiast.

PCGS# 8941. NGC ID: 269S.

2198

1874-CC VF-30 (PCGS). A lovely mid grade example of the wildly popular CC-Mint double eagle series. Pretty reddish-rose highlights are associated with traces of remaining luster, the surfaces otherwise dressed in deep honey-orange color.

PCGS# 8971. NGC ID: 26AP.

2199

1875-CC Unc Details—Altered Surfaces (PCGS). As one of the most available Carson City double eagles, the 1875-CC is particularly popular with collectors desiring an example from the legendary Nevada mint. However, this issue is incredibly challenging at the finer Mint State levels. The present piece is a more affordable alternative due to moderate hairlining and a curiously glossy texture, but there are few sizable marks. What appears to have been superior luster suggest this was likely Choice Uncirculated before the impairment. Worthy of serious consideration.

PCGS# 8974. NGC ID: 26AT.

2200

1876-CC Unc Details—Improperly Cleaned (NGC). The Centennial year 1876-CC is one of the more readily obtainable Carson City Mint double eagles in low end Mint State, and it is consequently popular with mintmarked type collectors as well as series specialists. The offered example is a more affordable alternative, although one that still delivers vivid golden-orange color and prooflike reflectivity in the obverse field. Otherwise satin to softly frosted in finish, there is a lot of "coin" here for the assigned grade. Worthy of a close look.

PCGS# 8977. NGC ID: 26AW.

1876-CC AU-55 (NGC). Lustrous orange-gold surfaces also offers sharp to full striking detail for most design elements. Perennially popular CC-Mint gold issue!

PCGS# 8977. NGC ID: 26AW.

2202

1883-CC AU Details—Cleaned (PCGS). Survivors from a mintage of 59,962 pieces are among the more frequently encountered Carson City Mint double eagles in today's market, confirming the popularity of the 1883-CC for mintmarked gold type purposes.

PCGS# 8999. NGC ID: 26BH.

2203

1883-S MS-63 (PCGS). OGH. Vivid orange-rose surfaces are fully lustrous with a far smoother appearance than one might expect at the assigned grade level. Sure to sell for a strong bid commensurate with its PQ status.

PCGS# 9000.

2204

1884-CC AU-55 (PCGS). Vivid golden-apricot color is seen on both sides of this sharply struck and satiny example. One of the more popular type issues in the Carson City Mint double eagle series, the 1884-CC is still scarce in the finer circulated and all Mint State grades relative to demand for CC-Mint coinage in today's market.

PCGS# 9001. NGC ID: 26BK.

From our (Stack's) sale of June 1979, lot 700. Lot tag included.

2205

1889-CC AU-50 (PCGS). OGH—First Generation. Lustrous roegold surfaces with superior eye appeal for the assigned grade. The Carson City Mint produced a mere 30,945 double eagles in 1889. While circulated examples are still relatively obtainable by CC-Mint double eagle standards, they enjoy unflagging demand among both mintmarked type collectors and series specialists.

PCGS# 9011. NGC ID: 26BV.

2206

1889-CC EF-40 (NGC). Light khaki-gold color with glints of reddishrose evident under a light. All major design elements are bold for the grade, and the CC mintmark is sure to appeal to specialists.

PCGS# 9011. NGC ID: 26BV.

Ex Saddle Ridge Hoard

2207

1889-S Gold Label. MS-63+ (PCGS). CAC. Intense satin to semireflective luster shines forth powerfully as this beautiful example rotates under a light. Bright golden-apricot color with a blush of pale rose in the center of the reverse, razor sharp striking detail further enhances already exceptional eye appeal. The San Francisco Mint produced 774,700 double eagles during the year 1889, a typically large production figure for the West Coast facility. David W. Akers, writing in 1982, noted that prior to the 1960s, the 1889-S was rare in Mint State and that some major collections of the era such as Roach, Flanagan, Atwater, Baldenhofer, Melish, and many others had to be satisfied with circulated specimens. Beginning on an especially large scale in the 1960s, and to a much greater extent in subsequent years, Uncirculated examples from overseas hoards were imported back into the United States, so that by 2004 when Q. David Bowers penned his Guide Book of Double Eagles, he supplied a high-end estimate for Uncirculated examples at 2,500 or more coins. The typical example grades no finer than MS-63, however, and the present specimen is scarce from a condition standpoint.

This important coin entered the numismatic market as part of the famous Saddle Ridge Hoard. One of the most significant gold coin finds of recent decades, the Saddle Ridge Hoard was discovered in 2013 in the Sierra Nevada Mountains east of San Francisco. A couple were out enjoying a February walk with their dog on a trail that ran along the ridge when they spotted a metal can near an old tree. Digging with a stick, they uncovered a sealed can they originally thought was full of lead paint due to the weight. They brought it back to their residence where they found it was full of double eagles. They returned to the find site, this time armed with a metal detector. All told, the property owners found 1,427 coins contained in six cans totaling \$27,980 in face value. Preferring to remain anonymous, the finders carefully reburied the coins then contacted Tiburon, California coin dealer Donald Kagin, whose firm helped evaluate the hoard and arrange for conservation as well as the eventual disposition of those pieces not retained by the family as mementos. The coins first became available for sale through Kagin's and Amazon.com the evening of May 27, 2014, and within 72 hours, half were sold.

The Saddle Ridge Hoard will go down in the annals of numismatic and treasure hunting lore as the largest such find of buried gold ever found in the United States.

PCGS# 109012.

Ex Saddle Ridge Hoard.

2208

1890-CC AU-50 (PCGS). OGH. Abundant semi-prooflike reflectivity remains in the fields on both sides of this boldly struck, vivid goldenapricot example. The CC mintmark is sure to catch the eye of specialists.

PCGS# 9014. NGC ID: 26BY.

2209

1891-S MS-63 (NGC). Scarce to rare any finer, this MS-63 1891-S represents excellent value. A satiny golden-apricot example with full luster and razor sharp striking detail.

PCGS# 9018. NGC ID: 26C4.

2210

1891-S MS-62 (PCGS). A beautiful orange-gold example that is knocking on the door of a higher Mint State grade.

PCGS# 9018. NGC ID: 26C4.

2211

1892-CC AU Details—Repaired (PCGS). From a modest mintage for the date of 27,265 pieces, and always popular as a product of the fabled Carson City Mint.

PCGS# 9020. NGC ID: 26C6

2212

1892-S MS-63 (NGC). Intensely lustrous medium gold surfaces support razor sharp striking detail from the rims to the centers. A premium quality Choice Uncirculated survivor that is sure to please.

PCGS# 9021. NGC ID: 26C7.

2213

1894 MS-64+ (PCGS). Originally preserved with deep rose-gold color, this lovely near-Gem example also offers sharp striking detail and bountiful mint luster. The surfaces are remarkably pristine in hand, confirming this coin as among the finest known for the circulation strike 1894 double eagle. The mintage for this issue was 1,368,940 pieces, up more than one million coins over the previous year's tally of double eagles at the Philadelphia Mint. Most examples found their way overseas in banking and other transactions, and large numbers of 1894 double eagles have been repatriated in recent decades. We estimate some 15,000 to 25,000 Mint State examples of the date can be found today. However, most grade MS-60 to MS-62; premium Choice survivors, as offered here, are rare.

PCGS# 9025. NGC ID: 26CB.

PCGS Population: 24; 9 finer (MS-65 finest).

2214

1894 MS-63 (PCGS). Satiny deep rose-gold surfaces with a fully executed strike.

PCGS# 9025. NGC ID: 26CB.

2215

1894 MS-63 (PCGS). A smartly impressed, highly lustrous example enhanced by vivid deep orange and golden-rose colors. Equally well suited for Mint State type and date purposes.

PCGS# 9025. NGC ID: 26CB.

2216

1896 MS-63 (NGC). Attractive mint luster blends with vivid rosegold color on both sides of this expertly produced, carefully preserved \$20 Liberty Head.

PCGS# 9029. NGC ID: 26CF.

2217

1896-S MS-64 (PCGS). OGH. Lovely rose-orange surfaces are fully struck with smooth, lively mint luster. This piece is far finer than the typical 1896-S \$20 in the MS-60 to MS-62 grade range, and it is sure to catch the eye of discerning bidders.

PCGS# 9030. NGC ID: 26CG.

2218

1896-S MS-63 (PCGS). Gorgeous golden-orange surfaces are smartly impressed and display full lively mint luster.

PCGS# 9030. NGC ID: 26CG.

Condition Rarity 1897-S Double Eagle

2219

1897-S MS-65 (PCGS). Smartly impressed with lovely mint luster, this remarkably smooth and appealing Gem is enhanced by lovely rose-orange patina. The San Francisco Mint struck 1,470,250 double eagles in 1897, much of the bullion coming from the Klondike Gold Rush that began in mid-August 1896. Most of this mintage was used in overseas transactions, with repatriations from foreign bank hoards in recent decades

resulting in a Mint State population of some 12,000 to 18,000+coins. With the typical survivor grading somewhere in the MS-60 to basal MS-64 range, this condition rarity and visually stunning MS-65 example is sure to appeal to quality conscious double eagle enthusiasts.

PCGS# 9032. NGC ID: 26CJ.

PCGS Population: 15; 4 finer (MS-67 finest).

2220

1897-S MS-64 (PCGS). Wonderfully original deep gold surfaces display tinges of pale silvery iridescence. A sharp strike and bountiful luster provide further appeal.

PCGS# 9032. NGC ID: 26CJ.

2221

1898-S MS-62 (PCGS). OGH—First Generation. This thoroughly premium example has the appearance of a Choice Mint State grade. The surfaces are generally smooth with full, swirling mint luster and vivid orange-gold color. Sharply struck and sure to sell for a nice premium.

PCGS# 9034. NGC ID: 26CL.

1899 MS-64+ (PCGS). Original golden-rose surfaces are sharply struck with a full quota of lively satin luster. Much of the known Mint State population of this popular type issue in the Liberty Head \$20 series has returned to the United States in the past several decades. As an expertly preserved and solidly graded upper end near-Gem, the coin offered here is sure to catch the eye of discerning collectors.

PCGS# 9035. NGC ID: 26CM.

2223

1901-S MS-63 (PCGS). Wisps of powder blue and pale pink iridescence enliven otherwise orange-gold surfaces on both sides of this richly original example. Well struck, fully lustrous and sure to appeal to discerning double eagle enthusiasts.

PCGS# 9040. NGC ID: 26CT.

2224

1902-S MS-63 (PCGS). Lovely orange-apricot surfaces are sharply struck and intensely lustrous. As attractive as one is likely to find in a Type III Liberty Head \$20 at the assigned grade level.

PCGS# 9042. NGC ID: 26CV.

2225

1903 MS-65+ (NGC). Lovely golden-rose surfaces are fully lustrous and expectably smooth for the assigned grade. The 1903 is one of the lower mintage circulation strike Liberty Head double eagles from the 20th century. Only 287,270 pieces were produced, falling dramatically short of the 6.2 million that would be struck in Philadelphia the following year. Fortunately, ten of thousands of Uncirculated 1903 double eagles are available for today's collectors, though most of these are in grades of MS-64 or lower with bagmarks and similar defects. This issue becomes surprisingly scarce in Gem, and the present MS-65+ is among the finer certified.

PCGS# 9043. NGC ID: 26CW. NGC Census: 21; 13 finer (all MS-66).

2226

1903-S MS-63 (NGC). A highly lustrous, satiny example that also exhibits razor sharp striking detail and gorgeous deep gold color.

PCGS# 9044. NGC ID: 26CX.

Phenomenal Superb Gem 1904 Double Eagle

2227

1904 MS-67 (PCGS). A satiny golden-apricot 1904 double eagle with razor sharp striking detail throughout the design. The surfaces are silky smooth and impressively well preserved for both the issue and the type.

By the early 20th century gold coins no longer actively circulated within the United States, except for limited use on the West Coast, where local needs were easily met by the San Francisco Mint. As such, it seems that most 1904 Philadelphia Mint double eagles were used in international commerce, generally in the form of shipment to England or France. Hundreds of thousands of these coins returned to the United States beginning after World War Two, and the 1904 is the most available issue of its type in Mint State. At the Superb Gem Uncirculated level, as here, the 1904

is an extraordinary condition rarity. Even our recent impressive offerings from the Fairmont Collection have not yielded an example certified finer than MS-66. The Cardinal Collection specimen that sold in our November 2017 Baltimore Auction was the previous record holder for highest graded 1904 double eagle in our archives; it was certified MS-66+ by PCGS. In fact, only one of the three PCGS MS-67s has ever sold at auction. The coin that realized \$73,438 in Legend's June 2019 Regency Auction 33 was a different example than that offered here, and it sold in a different market. We would not be surprised to see this beautiful specimen sell for an even stronger bid.

PCGS# 9045. NGC ID: 26CY. PCGS Population: 3; 0 finer.

2228

1904 MS-65 (NGC). Full striking detail, smooth satin luster and lovely golden-apricot color combine to make this an irresistible Gem Mint State type candidate from the later Liberty Head double eagle series.

PCGS# 9045. NGC ID: 26CY

2229

1904 MS-64 (PCGS). CAC. OGH—First Generation. Intensely lustrous golden-orange surfaces are smooth enough to evoke thoughts of an even higher grade. A visually stunning piece that is sure to sell for a strong premium.

PCGS# 9045. NGC ID: 26CY.

2230

1904 MS-64 (PCGS). CAC. OGH—First Generation. Handsome rose-orange surfaces are fully struck, undeniably original, and far smoother overall than one might expect even at the MS-64 grade level. A virtual Gem, and worthy of the strongest bids, as such.

PCGS# 9045. NGC ID: 26CY.

2231

1904 MS-64 (PCGS). CAC. OGH—First Generation. Deep, vivid, reddish-orange color greets the viewer from both sides of this premium quality example. A fully struck, highly lustrous coin with more going for it than many 1904 \$20s certified MS-65 in recent years.

PCGS# 9045. NGC ID: 26CY.

2232

1904-S MS-64 (NGC). CAC. For the mintmarked gold type collector we offer this premium Choice Uncirculated 1904-S \$20. It is a sharply struck, highly lustrous and impressively smooth example that is sure to please.

PCGS# 9046. NGC ID: 26CZ.

2233

1904-S MS-63 (PCGS). CAC. A fully original deep gold example with tinges of pale silver and apricot iridescence. Smoother than one might expect for a double eagle at the MS-63 grade level, this is a thoroughly PQ coin worthy of the strongest bids.

PCGS# 9046. NGC ID: 26CZ.

2234

1904-S MS-63 (PCGS). OGH. This pretty light rose and deep orangegold example is sharply struck and fully lustrous. Impressively smooth for the assigned grade, astute bidders are sure to pay particularly attention to this upper end MS-63.

PCGS# 9046. NGC ID: 26CZ.

2235

1907 Liberty Head. MS-64 (PCGS). From the final year of the long-running Liberty Head double eagle series comes this beautiful near-Gem. A base of deep orange color is enhanced by spectacular iridescent overtones of powder blue and pinkish-rose. Highly lustrous and satiny with a sharply executed strike, this exquisite example is sure to sell for a strong premium. Lovely!

PCGS# 9052. NGC ID: 26D7.

2236

1907 Liberty Head. MS-64 (PCGS). Gorgeous deep rose-gold surfaces also possess sharp striking detail and bountiful mint luster. A perennially popular final year double eagle issue offered here in above average Choice Mint State preservation.

PCGS# 9052. NGC ID: 26D7.

Majestic MCMVII High Relief Double Eagle

2237

MCMVII (1907) Saint-Gaudens. High Relief. Flat Rim. MS-64 (NGC). Handsome, fully original surfaces exhibit warm honey-orange color throughout. The finish is smooth and satiny with appealing mint luster. The strike is razor sharp, and all elements of this iconic design are readily evident.

The High Relief Saint-Gaudens double eagle is one of those coins that appear on most numismatists wish lists even if 20th century American gold is not a chosen field of study. The image of Liberty striding towards the viewer holding a torch and olive branch is one of the most familiar coin motifs and is recognizable by even those with the most casual interest in coins.

The MCMVII High Relief double eagle has long been celebrated as one of the most beautiful coin designs in all of American numismatics. The story of its creation and the partnership between president and sculptor adds to the appeal of the novel design. In 1905, President Teddy Roosevelt, arguably the president who took the most active and personal interest in our coinage designs, was sadly disappointed with the mediocre appearance of America's coinage designs of the era. The president had only recently taken an interest in ancient Greek coins, having seen some on display, and he vocally lamented the fact that the coinage of his "bully pulpit" era was mainly plain and uninspired in comparison to those ancient works of numismatic art. Accordingly, Roosevelt contracted with his long time acquaintance, Augustus Saint-Gaudens, paying the sum of \$5,000 to him to redesign the entire U.S. coinage spectrum, from the small bronze cent all the way up the denominational ladder to the large gold double eagle. Saint-Gaudens, America's most admired sculptor, kept his studio and family home in Cornish, New Hampshire, where he prepared the many sketches and working models for his ideas. By the summer of 1907, Saint-Gaudens had nearly completed the work on the Indian \$10 design as well as the new \$20 design (which was based on his statue of Victory, part of the Sherman Victory Monument which stands proudly today in New York City's Central Park). On August 3, 1907, Saint-Gaudens succumbed to cancer without having seen an example of his work in its legal tender form; his stunning design was finished by his assistant, Henry Hering. Meanwhile, a great "war" of words and bombast (Roosevelt

called it his "pet crime") had broken out between the Mint and Chief Engraver Charles Barber on one side, and the "Ol' Rough Rider," President Roosevelt, on the other. Barber was gravely upset that Roosevelt had unkind words for his dime, quarter, and half dollar designs (which had circulated as current coin of the realm since 1892), and he was also incensed over the fact that an outside artist had been chosen to redesign our country's coinage. Further, Barber protested that the high relief of the dies would prevent the coins from striking, stacking at banks, and on and on, causing Roosevelt to state that the MCMVII \$20 coins would be produced if it took all day to strike just one coin!

Despite Barber's shenanigans, the MCMVII High Relief double eagles were eventually produced to the tune of several hundred pieces a day, though not without difficulties — each coin needed three blows from the dies to be rendered to its full design advantage. In time, however, some 12,867 High Relief MCMVII double eagles were produced to the president's satisfaction. Of those, at least two-thirds are of the Wire Rim variety. The Wire Rim was actually not intended as part of the overall design but rather was an artifact of the striking process. During striking, if the collar was not sufficiently tightened, metal would be pushed to where the coin's edge and collar meet. Even the slightest misalignment of the obverse and reverse dies would force metal into the gap, forming the fin (as the Mint referred to this feature). A second collar was employed that largely eliminated the Wire Rim, resulting in the scarcer Flat Rim variety offered here, but the slow nature of the minting process eventually necessitated a reworking of the entire design to reduce the relief. Barber eventually redesigned the dies, making them flatter in depth and considerably less dynamic in appearance, and swapping the Roman numerals for Arabic. This style would continue through the demise of the series in 1933.

We estimate that perhaps 6,000 coins are known for both varieties of the 1907 High Relief double eagle combined, or about half the mintage, as these were appreciated in their own time and many were saved. Premium quality examples, such as this near-Gem certified by NGC, enjoy particularly strong demand and are becomingly increasingly rare from a market availability standpoint.

PCGS# 9136. NGC ID: 26F2.

Lovely Wire Rim MCMVII High Relief \$20

2238

MCMVII (1907) Saint-Gaudens. High Relief. Wire Rim. MS-62 (PCGS). This classic double eagle rarity hails from an era that numismatic researcher Roger W. Burdette has named the Renaissance of American Coinage. Inspired by President Theodore Roosevelt and designed by famed sculptor Augustus Saint-Gaudens, the High Relief \$20 of 1907 is perhaps the

flagship issue of this important period in U.S. Mint history. With sharply rendered design elements executed in impressively high relief, the offered coin allows full appreciation of the type. Vivid golden-yellow surfaces are satiny in texture and pleasingly smooth relative to the assigned grade. A beautiful specimen eagerly awaiting inclusion in an advanced cabinet.

PCGS# 9135. NGC ID: 26F2.

2239

1907 Saint-Gaudens. Arabic Numerals. MS-64 (NGC). Satin to softly frosted surfaces are aglow with vivid golden-yellow color. Far scarcer than the 1908 No Motto, the 1907 Arabic Numerals is an ideal candidate to represent this early Saint-Gaudens double eagle design in a better date type set.

PCGS# 9141. NGC ID: 26F5.

2240

1908 No Motto. MS-66+ (NGC). Uncommonly well preserved for this otherwise readily obtainable No Motto Saint-Gaudens \$20 issue, there is much to recommend this coin to discerning gold enthusiasts. Original deep honey-apricot color blends with billowy satin luster over smooth-looking surfaces. Well struck for the type, most features are full, and none are less than bold.

PCGS# 9142. NGC ID: 26F6.

1908 No Motto. MS-65 (PCGS). CAC. While this is a common issue in an absolute sense, certified Gems with CAC approval are surprisingly scarce relative to market demand for premium quality classic U.S. Mint gold. This is a vivid and original coin with a sharp strike and impressively smooth surfaces.

PCGS# 9142. NGC ID: 26F6.

2242

1908 No Motto. MS-64 (NGC). OH. Smooth, lustrous and attractive, this thoroughly PQ example is sure to sell for a strong premium to an astute double eagle enthusiast.

PCGS# 9142. NGC ID: 26F6.

Extraordinary 1908-D Motto Double Eagle

2243

1908-D Motto. MS-66 (PCGS). Impressive Gem Mint State quality for this conditionally challenged issue. Gorgeous roseorange color blankets both sides and mingles nicely with full, satiny mint luster. Sharply struck throughout, as befits the issue, and exceptionally well preserved to outrank the vast majority of 1908-D Motto double eagles extant.

The addition of the motto IN GOD WE TRUST in 1908 by Congressional mandate resulted in the final major design change for Augustus Saint-Gaudens' inspired double eagle design. The premier Denver Mint issue of the new type, the 1908-D was once considered a major rarity even in lower Mint

State grades. Enough examples have been repatriated in recent years — starting with a particularly impressive bounty located in Central America in 1983 — that less discerning collectors will have little difficulty obtaining a coin in the MS-60 to MS-64 range. This issue remains a median rarity for the type in the finest Mint State grades, however, and it is rarer as a Gem than such other Saint-Gaudens twenties as the 1909-S, 1911-S, 1913-D, 1923 and even the vaunted MCMVII (1907) High Relief. This is truly an impressive survivor of the issue that would do justice to the finest collection of 20th century U.S. Mint gold.

PCGS# 9148. NGC ID: 26F9.

PCGS Population: 32; 7 finer (MS-67 finest).

2244

1911-D MS-65 (NGC). CAC. This satin to softly frosted Gem would make a fitting addition to a high quality double eagle set. Medium gold color overall with a sharply executed strike that has imparted full detail to virtually all design elements.

PCGS# 9158. NGC ID: 26FK.

2245

1911-D MS-64 (PCGS). CAC. OGH—First Generation. Pretty golden-orange surfaces are sharply struck with a full quota of soft, satiny luster. PQ Choice quality for this popular type issue from the early Saint-Gaudens double eagle series.

PCGS# 9158. NGC ID: 26FK.

2246

1912 MS-64 (PCGS). CAC. A gorgeous example with pale rose and orange highlights to both sides. The Philadelphia Mint is the only coinage facility that struck double eagles in 1912, comprised of a circulation strike delivery of just 149,750 coins. While several small hoards have been discovered in Europe beginning in the late 1960s, this issue remains scarce in all Uncirculated grades and is seldom offered any finer than MS-63.

PCGS# 9160. NGC ID: 26FM.

2247

1914-D MS-64 (PCGS). CAC. OGH. Crisply impressed and lustrous, this premium MS-64 also offers richly original color in warm orangehoney.

PCGS# 9165. NGC ID: 26FT.

2248

1914-S MS-65 (PCGS). Lovely rose-gold and deep orange features are sharply impressed and bathed in full satin luster. With nearly one and a half million pieces struck, the 1914-S double eagle is fairly common, but can be prone to heavy bag marks. This full Gem example offers a superb chance for the quality minded collector.

PCGS# 9166. NGC ID: 26FU.

2249

1915 MS-64+ (PCGS). CAC. This sharply struck golden-apricot example also sports full mint luster with a soft satin texture. With a limited mintage of 152,000 circulation strikes and relatively few examples included in modern repatriations of double eagles from foreign bank hoards, the 1915 is scarce in an absolute sense and rare in grades above the basal MS-64 level.

PCGS# 9167. NGC ID: 26FV.

PCGS Population: 28; 61 finer (MS-66 finest).

CAC Population: 44; 10.

The former total includes coins certified both MS-64 and MS-64+.

1915-S MS-65 (NGC). Beautiful rose-orange surfaces are lustrous, sharply struck and deliver strong eye appeal. While the 1915-S double eagle is among the most available early Saint-Gaudens issues, examples are relatively scarce in MS-65 and higher grades. This is a solidly graded coin at the MS-65 level that is sure to appeal to astute bidders.

PCGS# 9168. NGC ID: 26FW.

2251

1915-S MS-65 (NGC). Vivid rose-gold and deep orange colors greet the viewer from both sides of this smartly impressed, intensely lustrous example. Our multiple offerings of MS-65s in this sale does not deny the scarcity of this early date Saint-Gaudens \$20 issue in the finest Mint State grades.

PCGS# 9168. NGC ID: 26FW.

2252

1916-S MS-65 (PCGS). A pretty pinkish-honey Gem with wisps of pale wheat and undertones of deep orange-gold. Sharp, lustrous and as nice as would be expected for the assigned grade.

PCGS# 9169. NGC ID: 26FX.

2253

1916-S MS-65 (NGC). CAC. A handsome pinkish-apricot example with sharp striking detail and captivating mint luster. The 1916-S is the only double eagle of its date, and the final one produced prior to 1920. It is one of the more underrated early date issues in the Saint-Gaudens series. The mintage is 796,000 pieces, and Mint State survivors are rarer than those of the 1911-D, 1914-D, 1914-S and 1915-S issues. This is a desirable NGC-certified, CAC-verified Gem that is worthy of strong bids.

PCGS# 9169. NGC ID: 26FX.

2254

1923 MS-64 (PCGS). An uncommonly smooth-looking example for the assigned grade that is sure to see spirited bidding among astute gold enthusiasts.

PCGS# 9175. NGC ID: 26G5.

2255

1923-D MS-66+ (PCGS). CAC. This beautiful example exhibits subtle powder blue highlights to dominant rose-gold surfaces. Fully struck and highly lustrous with captivating eye appeal. The 1923-D is the most available mintmarked double eagle from the Roaring Twenties. Obviously many of the 1,702,250 coins struck were used in international transactions, and thus spared from the widespread melting of gold coins during the late 1930s. Even so, upper end Gems such as this are scarce from a condition standpoint. An ideal candidate for an advanced type set or double eagle collection.

PCGS# 9176. NGC ID: 26G6.

2256

1923-D MS-66 (PCGS). Frosty deep rose-gold surfaces are sharply struck with a silky smooth texture that borders on pristine. Subtle olive highlights at the borders further confirm the originality of this premium quality piece.

PCGS# 9176. NGC ID: 26G6.

2257

1923-D MS-66 (NGC). CAC. A lovely example of both the type and issue, this Denver Mint Saint-Gaudens \$20 is at the uppermost reaches of the assigned grade level. Both sides are silky smooth in appearance with intense golden-rose color. Lustrous and fully struck, as well, and sure to sell for a strong bid.

PCGS# 9176. NGC ID: 26G6.

2258

1923-D MS-65 (NGC). A sharp and lustrous rose-gold Gem with solid technical quality and abundant eye appeal.

PCGS# 9176. NGC ID: 26G6.

2259

1924 MS-66 (NGC). Appealing satiny luster blends with rose-orange color over surfaces that are impressively smooth in preservation. Ideally suited for inclusion in a top flight gold type set or Saint-Gaudens double eagle collection.

PCGS# 9177. NGC ID: 26G7.

2260

1924 MS-65 (NGC). CAC. Coveted CAC approval is sure to result in strong bidder competition for this premium quality Gem \$20 Saint. PCGS# 9177. NGC ID: 26G7.

2261

1924-D MS-63 (NGC). Here is a highly desirable Choice Mint State example of this key date double eagle issue. Vivid rose-orange color dominates the appearance and delivers strong eye appeal. Well struck overall, the focal features are near-fully rendered and there is full, frosty mint luster. Far scarcer than a mintage of 3,049,500 pieces might imply, the 1924-D is one of many late date Saint-Gaudens double eagles that suffered a high rate of attrition through melting during the late 1930s. Several thousand examples were exported, however, and repatriations in recent decades account for the vast majority of survivors. With Gems prohibitively rare, this upper end MS-63 represents a particularly significant opportunity for advanced gold enthusiasts.

PCGS# 9178. NGC ID: 26G8.

2262

1925 MS-66 (PCGS). The 1925 is one in a string of accessible Philadelphia Mint double eagles from the mid to late 1920s, claiming a mintage of just over 2.8 million coins. Many examples were exported, as well, thereby escaping the fate of melting in the United States in 1937. This exquisite upper end Gem is smartly impressed and bathed in a bold blend of reddish-gold color and lively satin luster.

PCGS# 9180. NGC ID: 26GA.

2263

1926 MS-66 (NGC). Handsome honey-olive and deep rose surfaces are undeniably original in preservation. Carefully preserved, as well, satiny luster remains full and impressively smooth over both sides. Despite its status as one of the more frequently encountered Saint-Gaudens double eagles in today's market, the 1926 is underrated compared to the truly common issues of the type (1924, 1927, 1928).

PCGS# 9183. NGC ID: 26GD.

2264

1927 MS-66 (PCGS). This premium Gem type candidate from the later Saint-Gaudens double eagle series exhibits pretty powder blue and pale rose highlights to dominant orange-gold color. Highly lustrous with eye appeal to spare.

PCGS# 9186. NGC ID: 26GG.

2265

1927 MS-66 (PCGS). Luxurious satin luster blends with soft goldenapricot color on both sides of this silky smooth Gem. Sharply struck with strong eye appeal.

PCGS# 9186. NGC ID: 26GG.

2266

1927 MS-65 (**PCGS**). **CAC. OGH.** Impressively smooth with full, colorful mint luster, this premium quality example is knocking on the door of an even higher Gem Mint State grade.

PCGS# 9186. NGC ID: 26GG.

2267

1927 MS-65 (NGC). CAC. OH. This conservatively graded Gem is sure to catch the eye of astute gold enthusiasts. It is a vivid orange-gold coin with a full strike and smooth, intense mint luster.

PCGS# 9186. NGC ID: 26GG.

2268

1927 MS-65 ★ (NGC). CAC. Beautiful golden-apricot surfaces are smartly impressed with full, swirling satin luster. PQ!

PCGS# 9186. NGC ID: 26GG.

COMMEMORATIVE SILVER COINS

2269

1935 Connecticut Tercentenary. MS-67 (NGC). A lustrous and satin Superb Gem whose otherwise silver-tinged surfaces exhibit pale pink highlights, the upper obverse rim with a splash of warmer rose-russet patina.

PCGS# 9299. NGC ID: BYGH.

2270

1918 Lincoln-Illinois Centennial. MS-67 (PCGS). An originally and carefully preserved example whose otherwise brilliant satin surfaces exhibit wisps of rose-russet iridescence on the obverse.

PCGS# 9320. NGC ID: BYGU.

1926-S Oregon Trail Memorial. MS-67+ (NGC). Among the more vividly toned examples of the type that we have ever handled. Snowywhite luster at the centers is framed by intense bands of rainbow color on each side. Truly spectacular to examine in hand and worthy of the strongest bids.

Authorized by Act of Congress dated May 17, 1926, commemorative half dollars of this type were intended to honor those who made the Westward journey via the Oregon Trail and to raise funds to preserve points along the trail. The work of James Earle and Laura Gardin Fraser, this design has become a classic. A Native American superimposed over a map of the United States and with hand outstretched in an attempt to halt Westward migration is on one side, while the other exhibits a team of oxen pulling a Conestoga wagon over a hill. Mintages and distribution were generous at first, especially in 1926, but dwindled considerably toward the series' end in 1939. The 1926-S, represented here, was produced to the extent of 100,055 pieces but 17,000 were eventually melted in 1933, leaving a net distribution of 83,055. In the finest Mint State grades, the 1926-S is elusive and few exhibit the breathtaking color of this superior specimen.

PCGS# 9341. NGC ID: BYH7.

NGC Census: 25; 23 finer (MS-68+ ★ finest).

2272

1936 Robinson—Arkansas Centennial. MS-67 (PCGS). CAC. OGH. Satiny, smooth and sharply struck with a touch of russet toning along the lower left obverse border.

PCGS# 9369. NGC ID: BYHX.

2273

1935 Old Spanish Trail. MS-66 (PCGS). Wisps of champagne-gold and coppery-rose iridescence to satiny, uncommonly smooth-looking surfaces.

PCGS# 9376. NGC ID: BYJ5.

2274

1935 Old Spanish Trail. MS-65 (PCGS). OGH—First Generation. Untoned apart from wisps of pale silver and gold that are not readily evident at all viewing angles.

PCGS# 9376. NGC ID: BYJ5.

COMMEMORATIVE GOLD COINS

2275

1915-S Panama-Pacific Exposition Gold Dollar. MS-65 (NGC). CAC. Satiny medium gold surfaces with tinges of pale rose iridescence.

PCGS# 7449. NGC ID: BYLH.

2276

1915-S Panama-Pacific Exposition Quarter Eagle. MS-62 (PCGS). CAC—Gold Label. OGH. As PQ as they come at the BU grade level, this virtually Choice example is sure to sell for an appropriate premium. Fully original in preservation with good luster and a pleasingly smooth appearance overall.

PCGS# 7450. NGC ID: BYLP.

2277

1922 Grant Memorial Gold Dollar. Star. MS-67 (PCGS). CAC. Beautiful golden-apricot surfaces exhibit pale rose highlights as the coin rotates under a light. Full, smooth satin luster and a boldly executed strike deliver further quality and eye appeal.

PCGS# 7459. NGC ID: BYPS.

2278

1922 Grant Memorial Gold Dollar. No Star. MS-67 (PCGS). Virtually pristine surfaces possess a smooth, vivid appearance. Satiny in finish with a well executed strike for this challenging commemorative type.

PCGS# 7458. NGC ID: BYLN.

1922 Grant Memorial Gold Dollar. No Star. MS-65 (NGC). CAC. OH. A satiny, fully lustrous Gem with wisps of reddish-rose to otherwise deep golden-yellow surfaces.

PCGS# 7458. NGC ID: BYLN.

2280

1926 Sesquicentennial of American Independence Quarter Eagle. MS-66 (PCGS). Captivating premium Gem surfaces are smooth and inviting with eye appeal to spare. Bathed in a bold blend of satiny mint luster and vivid rose-gold patina, this is an exceptional coin that borders on pristine for the issue. Through the Act of March 3, 1925, Congress authorized the Mint to produce 200,000 quarter eagles and 1,000,000 half dollars of this commemorative, and the Philadelphia Mint struck these coins during May and June of 1926. (Additional examples of both denominations were produced for assay purposes.) These mintage figures proved wildly optimistic, with 154,207 quarter eagles and 859,408 half dollars eventually being melted as unsold. The resultant net mintage is 46,019 and 141,120 pieces, respectively (totals include 226 and 528 assay coins). In today's market, both Sesquicentennial issues are regarded as conditionally challenging, upper end Gems such as this rare and eagerly sought by advanced collectors.

PCGS# 7466. NGC ID: BYLT.

2281

1926 Sesquicentennial of American Independence Quarter Eagle. MS-66 (PCGS). A second premium Gem example of this conditionally challenging commemorative issue. Lustrous and satiny, the vivid golden-rose surfaces are impressively smooth with strong eye appeal. Boldly struck.

PCGS# 7466. NGC ID: BYLT.

Bullion

2282

1995-W Silver Eagle. Proof-69 Ultra Cameo (NGC). A virtually perfect specimen. Both sides are brilliant with a full strike and profound field to device contrast. The 1995-W is the first silver eagle to bear the distinct W mintmark of the West Point Mint. Only 30,125 pieces were produced to commemorate the 10th anniversary of the silver eagle bullion coin program. With the lowest mintage among Proof silver eagles, the 1995-W has long been in demand among collectors specializing in this popular modern Mint series.

PCGS# 9887. NGC ID: CFWX.

PATTERN AND EXPERIMENTAL COINS

2283

1859 Pattern Indian Cent. Judd-228, Pollock-272. Rarity-1. Copper-Nickel. Plain Edge. MS-63 (PCGS). OGH—First Generation. Obv: The regular issue design of 1859 with pointed bust. Rev: The Oak Wreath with Shield design adopted for regular issue Indian cent production in 1860. The matte-like luster of this Gem is complemented by varying shades of deep coppery-tan and more vivid reddish-rose patina across both sides. Fully struck and free of notable defects.

PCGS# 2052. NGC ID: 227E.

2284

1859 Pattern Indian Cent. Judd-228, Pollock-272. Rarity-1. Copper-Nickel. Plain Edge. MS-63 (NGC). OH. Obv: The regular issue design of 1859 with pointed bust. Rev: The Oak Wreath with Shield design adopted for regular issue Indian cent production in 1860. Premium quality for this popular transitional issue, satiny surfaces are smartly impressed with medium rose highlights to dominant sandy-tan color.

PCGS# 11932. NGC ID: 29C8

1870 Pattern Dime. Judd-860, Pollock-941. Rarity-8. Aluminum. Plain Edge. Proof-64 Cameo (NGC). Obv: Standard Silver design with a bust of Liberty facing right, the legend UNITED STATES OF AMERICA around the border and the motto IN GOD WE TRUST on a scroll below. Liberty is wearing a cap ornamented with three stars, a plain ribbon crosses her shoulder. **Rev:** A wreath of laurel and oak encircles the denomination 10 CENTS with the inscription STANDARD SILVER above and the date 1870 below. Bright, brilliant surfaces allow full appreciation of cameo contrast between satiny design elements and mirrored fields. The 10th edition of the Judd reference on pattern coinage states that only two examples of this number are extant, but the *uspatterns.com* website reports fewer than a half dozen known. Either way, this aluminum pattern is a major rarity.

PCGS# 535043. NGC ID: 29W5.

Combined PCGS and NGC Population: 4 in all grades and categories.

2286

1873 Pattern Trade Dollar. Judd-1281, Pollock-1423. Rarity-4. Silver. Reeded Edge. Proof-63 (NGC). Obv: A bust of Liberty faces left with 13 stars around the border and the date 1873 below. Liberty is wearing a wreath of leaves, her hair coiled and braided at the back of her head. Rev: An eagle with spread wings supports a shield with its left talon and clutches a group of three arrows in its right talon. A scroll crossing the shield carries the motto IN GOD WE TRUST, while the Latin motto E PLURIBUS UNUM is inscribed in the field above the eagle. The legend UNITED STATES OF AMERICA is inscribed along the upper border, the inscription 420 GRAINS, 900 FINE is in the field below the eagle, and the denomination TRADE DOLLAR is inscribed along the lower border. Sharply defined in most areas, blushes of mauve and olive blend with dominant pearl-gray patina. This pattern trade dollar is among the more available dollarsized patterns, listed as being Rarity-4. The obverse was designed by J.A. Bailly and is mated to one of Barber's Standing Eagle reverse dies, which is essentially the same motif as the eagle on his famous Amazonian patterns. It is very interesting to note that while the Bailly Head trade dollar pattern in silver with a reeded edge is only Rarity-4, the off-metal strikings in copper and aluminum are Rarity-7- and Rarity-8 respectively. This obverse die was also combined with another variant of Barber's Standing Eagle and struck only in copper and aluminum (Judd-1285 and 1286) and both are also rated as Rarity-8. This, then, is the only realistic way for a pattern collector to obtain an example with this portrait of Liberty.

PCGS# 61566.

2287

1896 Pattern Cent. Judd-1768, Pollock-1983. Rarity-5. Bronze. Plain Edge. Proof-64 RD (PCGS). CAC. Obv: A shield with thirteen stripes, having the motto E \star PLURIBUS \star UNUM above and the date 1896 below. Behind the shield are two crossed poles bearing a liberty cap on the viewer's left side and an eagle on the right. A scroll passing in front of the shield is inscribed LIBERTY. There are 13 stars at the border arranged seven left, six right. The border is beaded. On this obverse, the head of the eagle is under the center of the letter S in PLURIBUS, and the bottom forks of the scroll point between the fifth and sixth stars on the left and between the ninth and 10th stars on the right. Rev: The denomination 1 CENT is centered within a curved olive sprig with the legend UNITED STATES OF AMERICA around. The border is beaded. On this reverse, the upright of the letter T in CENT points to the base of the upright of 1 in the denomination. Satiny pinkish-apricot surfaces deliver superior quality and eye appeal. A scarce survivor from an experimental issue that the Mint produced in search of a potentially better alloy for cent coinage than that in use at the time.

PCGS# 82222.

PCGS Population: 2; 0 finer in this category. CAC Population: 1; 0.

MINT ERRORS

2288

1964-D Lincoln Cent—Struck on a Silver Dime Planchet—MS-65 (PCGS). Well centered in strike, virtually the entire Lincoln design is evident despite the slight size differential between the cent dies and dime planchet. Only at the borders do we note a touch of softness, but even there at least partial detail is evident to the design elements. Satiny and smooth with a dusting of pale gold to otherwise light silver-gray surfaces. This rare wrong planchet error hails from a chaotic period of coinage operations at the United States Mint, for the following year would see the introduction of copper-nickel to the regular issue dime and quarter series. Sure to see spirited bidding among advanced specialists.

From Heritage's sale of the Mahal Collection, Part IV, September 2020 Signature Auction, lot 7721.

1991 Lincoln Cent—Overstruck on a 1991-P Roosevelt Dime—MS-66 (NGC). Brilliant silver-gray surfaces with plenty of the undertype discernible on both sides, the obverse of the cent overstruck on the reverse of the dime. Faint traces of the dime's date are discernible, and its P mintmark is clear when observed with the aid of a loupe. A scarce double denomination error from the modern U.S. Mint.

2290

1965 Washington Quarter—Struck on a 90% Silver Planchet—AU Details—Rim Damage (NCS). A transitional wrong-planchet error that is the result of an old standard 90% silver planchet intended for the coinage of 1964 getting into the production cycle for the 1965 coins that were to be struck on the new copper-nickel clad blanks. Scarce and always in demand.

PRIVATE AND TERRITORIAL GOLD COINS AND RELATED

2291

Undated (1831-1834) Christopher Bechtler \$1. K-1. Rarity-4. 30.G., Star. Reeded Edge. EF-45 (NGC). Light honey-olive surfaces are a bit soft at the upper obverse and lower reverse borders, yet boldly defined elsewhere. All major design elements are fully appreciable, and the frosty surfaces retain faint traces of the original finish. The Bechtlers were one of the earliest and most significant private minters in U.S. coinage history. Operating their establishment in Rutherford County, North Carolina, Christopher Bechtler, his son August and his nephew Christopher serviced the Piedmont region of North Carolina and Georgia — the nation's principal source of native gold prior to the California Gold Rush of the late 1840s and 1850s. This is an attractive and desirable example of one of the firm's first gold dollar issues that would do equally well in an advanced gold type or date set.

PCGS# 10064. NGC ID: 2B94.

2292

Undated (1842-1852) August Bechtler \$1. K-24. Rarity-3. 27.G., 21.C. Plain Edge. AU-50 (PCGS). CAC. OGH—First Generation. A smooth and satiny example with a dusting of pale silvery tinting to otherwise deep honey-olive surfaces. Lightly circulated survivors of this issue seldom offer both the undeniable originality and carefully preserved surfaces that define this PQ example. We suspect that this coin will have no difficulty finding its way into an advanced cabinet, in which it will certainly serve as a highlight.

PCGS# 10040

2293

"1852" (2008) Augustus Humbert \$50. Commemorative "Restrike." Struck September 12, 2008 from Kellogg & Humbert Gold Ingots 830 and 555. #115/375. Gem Proof (NGC). This gorgeous specimen was struck on September 12, 2008 from gold obtained from Kellogg & Humbert ingots 830 and 555, salvaged from the shipwreck of the S.S. Central America. Fully struck with bright golden surfaces and bold field to device contrast.

From the Cardinal Collection Educational Foundation.

1860 Clark, Gruber & Co. \$2.50. K-1. Rarity-4. AU Details—Repaired (PCGS). In 1857, gold was discovered in Colorado sparking a new gold rush in the West. In Leavenworth, Kansas, brothers Austin and Milton Clark and merchant Emmanuel Gruber each started out provisioning Colorado-bound miners. Hearing tales from returning prospectors about the difficulties in conducting trade with gold dust, they realized that a profitable enterprise could be had providing banking and assay services in the gold fields. In early 1860 they formed Clark, Gruber & Company as a bank, assay office and mint. While Milton Clark obtained dies and equipment in Philadelphia and New York, his partners headed to Denver to establish their office and mint. On July 5, they began striking coins in \$2.50, \$5, \$10, and \$20 denominations made of gold dust of high purity.

The coins were quickly accepted by the miners and soon Clark, Gruber & Co. became the most prolific of the Colorado coiners. The gold alloy initially used proved to be soft and prone to wear. In 1861, they added a higher concentration of silver to the alloy, all the while ensuring that the total gold content was roughly 1% higher than their federal equivalents. All told, Clark, Gruber & Co. coined just under \$600,000 face value by the time they ceased their minting operation in 1862. In April of 1863 the partners sold their facility and equipment to the government who then used it as an assay office for the next 43 years before building a full-fledged branch mint that opened in 1906. Clark, Gruber & Co. gold coins are generally scarce and are usually found in lower circulated grades, especially the softer alloy 1860-dated coins. An uncommonly sharp AU specimen such as this would be an important addition to any territorial gold cabinet.

PCGS# 10135.

2295

1853-DERI Octagonal \$1. BG-518. Rarity-5. Liberty Head. MS-62 (NGC). Beautiful golden-wheat surfaces with tinges of light honey and olive. Frosty to semi-prooflike in finish, a sharply executed strike enhances the appeal of this above average Uncirculated example. From maker M. Deriberpie, this variety shares its reverse with the firm's BG-517, although it seems to have been struck first despite the later BG number.

PCGS# 10495. NGC ID: 2BLG.

2296

1866 Round 25 Cents. BG-804. Rarity-4. Liberty Head. MS-67 PL (NGC). Intense golden-yellow surfaces combine reflective fields with satiny, smartly impressed design elements. An exceptionally well produced and preserved Superb Gem that will appeal to even the most discerning specialists.

PCGS# 10665. NGC ID: 2BSS.

NGC Census: 2; 0 finer. There are as yet no PL examples certified by PCGS.

Photo Reduced

2297

1946 Philadelphia Mint Cast Silver Ingot. Type III Hallmark. Ingot No. 161, Lot No. 10. 27.88 Ounces. 999 Fine. 41.5 mm x 103.5 mm x 20.5 mm. An attractive pearl-gray example with subtle pale pink and light olive iridescence. All stamps are on the front face except for the melt number, which is on the top edge. Stamps on the front face are 1946 / NO. 161 / FINE / 999. / (hallmark) / OZS 27.88. Light and moderate casting perfections are prevalent, although as made; a ding on the left edge of the front face and several smaller nicks along the left side are noted. Writing on the silveringots.com website, Ken Conaway observes that Philadelphia Mint ingots as a class are extremely rare. Apparently few were produced, and distributions may have been limited to licensed dealers and jewelers. Most survivors are dated, as here, and in addition to 1946, examples dated 1956 and 1960 are also known. The 20 to 30-ounce class silver ingots are rarer than their 5 to 10-ounce class counterparts, with only a dozen or so confirmed. All display the Type III hallmark and are from melt 10, again as here. In fact, this exact ingot No. 161 is included in the Conaway registry. An exciting offering that will surely see spirited bidding among specialists.

Photo Reduced

1949 United States Assay Office at New York Cast Silver Ingot. Round Dated Type IV Hallmark. Ingot No. 6, Lot No. 1. 49.59 Ounces. 999.75 Fine. 49.2 mm x 97 mm x 32.5 mm. The front face is stamped (hallmark) / FINE / 999 3/4, the ingot number on the top edge, the melt number on the bottom edge, and the weight OZS. 49.59 on the right edge. A bit of light toning is evident on the lower half of the front face, otherwise we note even silver-gray color overall. Well produced with only a few minor casting imperfections, this impressive piece is also well preserved with no troublesome blemishes. The 45-ounce class is the most prevalent in Ken Conaway's registry of New York Assay Office ingots (silveringots.com), and the present example is included in that listing. Examples are known dated 1908 through 1957, and all are rare in an absolute sense and eagerly sought by specialists in this discipline.

Photo Reduced

2299

Undated San Francisco Mint Cast Silver Ingot. Type I Oval Hallmark. Large Font, Straight-Stem 9s. Ingot No. 1752, Lot No. 6. 5.13 Ounces. 999.5 Fine. 31.5 mm x 51 mm x 10.5 mm. Essentially as made with minimal toning and all stamps clear, although of particular note is the fact that the digit 7 in the ingot number has been purposely altered to represent an 8 (the ingot number, therefore, looks like 1852). The weight is located on the back, lot number on the bottom edge, with all other stamps concentrated on the face. According to Ken Conaway, author of the outstanding website *silveringots.com*, this style constitutes the second series of 5-ounce class silver ingots from the San Francisco Mint. The present example is included in the Conaway registry. These San Francisco Mint silver ingots have been quite popular of late, and we suggest a solid bid is in order when this one crosses the auction block.

From our Philadelphia Auction of September 2013, lot 3323. Lot tag included.

Photo Reduced

2300

Undated Consolidated Mines & Metals Silver Ingot. No. 715081. 10.00 Troy Ounces. 999.0 Fine. 31 mm x 59 mm x 19 mm (greatest dimensions). Top face with round company logo impression at top, CONSOLIDATED MINES & METALS around a central depiction of a mountain range, sun above, ingot and crossed shovel and pickaxe

below, 10.00 / TROY OUNCES / SILVER / 999.0 on four lines beneath company logo. The edges are blank, bottom face with ingot number 715081 impressed. Bright and lustrous with solid heft.

From our Philadelphia ANA Auction of August 2012, lot 360.

Large Native Gold Specimen in Quartz Matrix

2301

Native Gold Specimen. Approximately 136.6 mm x 56.4 mm x 25.2 mm. 672.0 grams. A large and interesting specimen of nice heft. While an estimated 60% of the surface area of this piece is made up of the natural quartz matrix through which this vein of natural gold ran, both sides exhibit considerable gold ore. Most

of the specimens we see with large quartz content have only a few flakes of gold or a small formation of gold extending from one side. This one seems to have a lot of gold running through it, and thus we suspect it was more central to the vein of gold ore, and thus likely has a substantial amount of gold within it.

Attractive Large Gold Nugget

2302

Native Gold Specimen. Approximately 44.9 mm x 17.7 mm x 31.0 mm. 171.21 grams. An essentially ideal nugget of very desirable size and form. Smooth greenish gold surfaces give away its history as water-worn, as most nuggets, however

some of the rough natural texture is still visible in the crevices. Virtually free of any visible non-gold matrix material, so this is probably a fairly pure gold nugget. The shape is fantastic, with a flattened pyramidal form that is suggestive of some of the finest natural gold crystals. A very handsome specimen

Native Gold Specimen. Approximately 45.6 mm x 33.2 mm x 7.2 mm. 73.6 grams. Smooth medium gold surfaces with some recesses that still show traces of rough texture. A very flattened form, but angular features speak to the internal crystalline structure. Gold forms in many different shapes in nature, often clear octahedrons or variations thereof. However, sometimes those basic structures are found flattened, intertwined, elongated or even in seemingly hollowed out forms. All are natural formations which give natural specimens a great deal of individual character. A small scratch is noted on one side, but is not distracting.

2304

Lot of (14) Native Gold Specimens. 78.5 grams, total weight. The largest example measures approximately 28.5 mm x 18.5 mm x 14.5 mm, the smallest less than 4 mm. Several examples have significant quartz inclusions.

HAWAIIAN COINS, MEDALS, TOKENS AND RELATED

2305

1847 Hawaii Cent. Medcalf-Russell 2CC-2. Crosslet 4, 15 Berries. MS-62 BN (PCGS). Original deep copper-rose patina and sharp-to-full features. Faint traces of original faded-red luster are discernible around several of the design elements on the reverse.

PCGS# 10965. NGC ID: 2C52.

CRYPTOCURRENCY

BITCOIN

Gem MS-66 (PCGS) Casascius 0.5 BTC Purchased Directly from Mike Caldwell Loaded and Active with Signed Sale Certificate

2306

2013 Casascius 0.5 Bitcoin (BTC). Loaded. Firstbits 124mH2v9. Series 2. Brass. 25.4 mm. MS-66 (PCGS). This is an active and loaded cryptocurrency coin containing 0.5 BTC, equivalent to roughly US\$19,000 at the time of cataloging (May 2022). It is incredibly handsome with a medley of rich olive gold and honey gold coloration. Overall satiny in texture with a strong strike and beautiful reflectivity in the fields. At a grade of MS-66, it is notably superior to the Choice MS-64 (PCGS) example that sold for \$31,200 in our April 2022 sale. We expect even great competition and a strong premium when this piece crosses the auction block in the June event.

This superior Gem example was purchased directly from Mike Caldwell (Casascius) by our consignor in May 2013 as part of an original roll of 50 0.5 BTC coins. The same purchase also included a roll of 50 1 BTC coins and the total purchase price was 100 BTC, which was at the time equivalent to roughly US\$12,000. Many of these coins were later peeled and redeemed in 2014 and 2015 when the price of Bitcoin was around \$300 to \$400 on average. This MS-66 (PCGS) 0.5 BTC is accompanied in this sale by an incredible MS-68 (PCGS) 1 BTC that was acquired as part of the same order from Caldwell. We suggest the possibility that a collector may purchase both lots to keep them together and continue to build upon this shared legacy. Both of these coins feature signed sale certificates from Mike Caldwell that can be provided to the winning bidder by request at the close of the auction.

According to researcher Elias Ahonen, the Series 2 0.5 BTC were released on February 17th 2013 in response to the significant increase in the price of bitcoin, from around US\$14 to around US\$30, in just a few weeks. Issued on a 25.4mm brass planchet, the obverse features the Bitcoin currency symbol at center surrounded by a legend listing the date, denomination, and the Latin phrase "VIRES IN NUMERIS" that translates as "Strength in Numbers." The reverse features a holographic sticker with the firstbits address printed at the center. Beneath the holographic sticker is the private address that allows the owner to redeem the value of the bitcoin once the sticker is peeled away.

PCGS# 899205.

PCGS Population: 1; just 1 finer.

Acquired directly from Mike Caldwell (Casascius) in May 2013. A signed sale certificate from Caldwell can be provided to the winning bidder upon request at the close of the auction.

Scarce Redeemed Casascius 0.5 Bitcoin

2307

Redeemed 2013 Casascius 0.5 Bitcoin (BTC). Firstbits 12CGakU. Series 2. Brass. 25.4 mm. MS-64 (ICG). This is an unfunded and non-active cryptocurrency coin that is not loaded with any cryptocurrency. A similarly redeemed 1 Bitcoin sold for \$1,740 in our April 2022 sale and the present 0.5 Bitcoin denomination is significantly scarcer. This is a visually stunning example with rich honey-gold color and strong reflectivity in the outer fields. As a redeemed piece, the holographic sticker on the reverse has been peeled away and replaced, revealing the honey-comb pattern that serves as a security feature. The firstbits address remains visible at the center.

According to researcher Elias Ahonen, the Series 2 0.5 BTC were released on February 17th 2013 in response to the significant increase

in the price of bitcoin, from around US\$14 to around US\$30, in just a few weeks. While a staggering increase in value at the time, bitcoin has more recently achieved a high of around \$68,000 in 2021.

Top Pop MS-67 (PCGS) 2011 Casascius 1 BTC Error Variety The First Funded Physical Bitcoin Ever Produced

2308

2011 Casascius 1 Bitcoin (BTC). Loaded. Firstbits 1B2Q7Cyc. Series 1. CASACIUS Error. Brass. 28.5 mm. MS-67 (PCGS).

This is an active and loaded cryptocurrency coin containing 1 BTC, equivalent to roughly US\$38,000 at the time of cataloging (May 2022). The 2011 Casascius 1BTC Series 1 is the very first funded physical bitcoin produced and it served as a successful prototype for the overall category of physical crypto. The surfaces of this piece are virtually flawless and offer rich olivegold luster throughout.

At a grade of MS-67, this piece ranks among the very finest examples graded by PCGS. It is superior even to the Gem MS-66 (PCGS) example that sold for \$78,000 in our April 2022 sale and we expect another price record to be set once this piece crosses the auction block. It is readily identified as the CASACIUS Error variety by the misspelling of Casascius at the right and left borders of the hologram. A parallel could be drawn to the misspelling of CURRENCY as "CURENCY" on the historic "1776" Continental Dollar, indicating the relative importance of this variety.

Issued on a 28.5mm brass planchet, the obverse features the Bitcoin currency symbol at center surrounded by a legend listing the date, denomination, and the Latin phrase "VIRES IN NUMERIS" that translates as "Strength in Numbers." This phrase is also featured on the popular Lealana coin series but is listed there in Hawaiian as "IKAIKA I HELU NUI". The reverse features a holographic sticker with the firstbits address printed at the center. Beneath the holographic sticker is the private address that allows the owner to redeem the value of the bitcoin once the sticker is peeled away.

Stunning Superb Gem 2011 Casascius 1 BTC Among the Finest Known

2309

2011 Casascius 1 Bitcoin (BTC). Loaded. Firstbits 1BFbetd6. Series 1. CASACIUS Error. Brass. 28.5 mm. MS-67 (PCGS).

This is an active and loaded cryptocurrency coin containing 1 BTC, equivalent to roughly US\$38,000 at the time of cataloging (May 2022). A nearly pristine rarity with untouched surfaces and superior production quality. This 2011 Casascius 1 Bitcoin is a truly historic piece, representing the very first funded physical bitcoin ever produced. Announced on September 6th, 2011, the issue served as the prototype for the category which would eventually expand to over 60 different iterations of physical cryptocurrency.

This piece is one of the very finest graded by PCGS and it is tied with only four others at MS-67. It is readily identified as the CASACIUS Error variety by the misspelling of Casascius at the right and left borders of the hologram. A parallel could be drawn to the misspelling of CURRENCY as "CURENCY" on the historic "1776" Continental Dollar, indicating the relative importance of this variety. It ranks even finer than the MS-66 (PCGS) example that sold for \$78,000 in our April 2022 sale, equivalent to a 70% premium above the face value. The present MS-67 (PCGS) is sure to attract tremendous attention from both crypto specialists and traditional numismatic collectors.

Issued on a 28.5mm brass planchet, the obverse features the Bitcoin currency symbol at center surrounded by a legend listing the date, denomination, and the Latin phrase "VIRES IN NUMERIS" that translates as "Strength in Numbers." This phrase is also featured on the popular Lealana coin series but is listed there in Hawaiian as "IKAIKA I HELU NUI". The reverse features a holographic sticker with the firstbits address printed at the center. Beneath the holographic sticker is the private address that allows the owner to redeem the value of the bitcoin once the sticker is peeled away.

Historic Gem 2011 Casascius 1 BTC The First Funded Physical Bitcoin Ever

2310

2011 Casascius 1 Bitcoin (BTC). Loaded. Firstbits 16nHSDxK. Series 1. CASACIUS Error. Brass. 28.5 mm. MS-66 (PCGS). This is an active and loaded cryptocurrency coin containing 1 BTC, equivalent to roughly US\$38,000 at the time of cataloging (May 2022). A truly captivating Gem with radiant golden surfaces and undisturbed luster throughout. It ranks among the nicest examples known and is tied with the MS-66 (PCGS) specimen that sold for \$78,000 in our April 2022 sale, equivalent to a 70% premium above the face value. We certainly expect much excitement and a strong premium when this piece crosses the auction block in June.

This rare inaugural issue is marked by a misspelling of the series name "Casascius" at the right and left borders of the hologram. It is widely known as the "CASACIUS Error" variety and it is one of the most popular varieties among all physical cryptocurrency. Traditional numismatic collectors will recognize parallels with the misspelling of CURRENCY as "CURENCY" on the historic "1776" Continental Dollar, which have sold for as much as \$1.5 million.

Issued on a 28.5mm brass planchet, the obverse features the Bitcoin currency symbol at center surrounded by a legend listing the date, denomination, and the Latin phrase "VIRES IN NUMERIS" that translates as "Strength in Numbers." This phrase is also featured on the popular Lealana coin series but is listed there in Hawaiian as "IKAIKA I HELU NUI". The reverse features a holographic sticker with the firstbits address printed at the center.

Gem MS-65 (PCGS) 2011 CASACIUS Error 1 BTC Loaded and Active

2311

in June.

2011 Casascius 1 Bitcoin (BTC). Loaded. Firstbits 13iKRGjj. Series 1. CASACIUS Error. Brass. 28.5 mm. MS-65 (PCGS). This is an active and loaded cryptocurrency coin containing 1 BTC, equivalent to roughly US\$38,000 at the time of cataloging (May 2022). An ideal blend of superior production quality and exceptional preservation, bathed in rich golden color. It ranks distinctly superior to the MS-63 (PCGS) that sold for \$69,000 in our April 2022 sale, reflecting a strong premium of nearly 50% above the face value. We expect an even stronger premium when this MS-65 (PCGS) is hammered to the winning bidder

As the first funded physical bitcoin ever produced, the spelling error on the holographic sticker is paralleled by many similar spelling errors among early United States coinage. A variety of silver half-dimes struck in 1796 were made with a broken B punch so that the word LIBERTY appears to be misspelled LIKERTY. This variety has become even more popular because of the error and examples have sold for over \$400,000. The present CASACIUS error variety has developed a similarly strong following and they often bring strong premiums whenever they appear at auction.

Issued on a 28.5mm brass planchet, the obverse features the Bitcoin currency symbol at center surrounded by a legend listing the date, denomination, and the Latin phrase "VIRES IN NUMERIS" that translates as "Strength in Numbers." This phrase is also featured on the popular Lealana coin series but is listed there in Hawaiian as "IKAIKA I HELU NUI". The reverse features a holographic sticker with the firstbits address printed at the center.

Important Gem 2011 Casascius 1 BTC Loaded and Active

2312

2011 Casascius 1 Bitcoin (BTC). Loaded. Firstbits 155gAYPX. Series 1. CASACIUS Error. Brass. 28.5 mm. MS-65 (PCGS).

This is an active and loaded cryptocurrency coin containing 1 BTC, equivalent to roughly US\$38,000 at the time of cataloging (May 2022). It showcases stunning quality and eye appeal, captivating the viewer with strong luster and intense golden color. As the first funded physical bitcoin ever produced, the spelling error on the holographic sticker is paralleled by many similar spelling errors among early United States coinage. A variety of silver half-dimes struck in 1796 were made with a broken B punch so that the word LIBERTY appears to be misspelled LIKERTY. This variety has become even more popular because of the error and examples have sold for over \$400,000.

The present CASACIUS error variety has developed a similarly strong following and they often bring strong premiums whenever they appear at auction. An MS-63 (PCGS) sold for \$69,000 in our April 2022 sale, reflecting a strong premium of nearly 50% above the face value. This MS-65 (PCGS) ranks distinctly finer and surely deserves and even stronger premium.

Issued on a 28.5mm brass planchet, the obverse features the Bitcoin currency symbol at center surrounded by a legend listing the date, denomination, and the Latin phrase "VIRES IN NUMERIS" that translates as "Strength in Numbers." This phrase is also featured on the popular Lealana coin series but is listed there in Hawaiian as "IKAIKA I HELU NUI". Historic Near-Gem 2011 Casascius 1 BTC Loaded and Active

2313

2011 Casascius 1 Bitcoin (BTC). Loaded. Firstbits 13FvPEep. Series 1. CASACIUS Error. Brass. 28.5 mm. MS-64 (PCGS).

This is an active and loaded cryptocurrency coin containing 1 BTC, equivalent to roughly US\$38,000 at the time of cataloging (May 2022). Boldly struck with intense luster and vibrant golden color. The present CASACIUS error variety has developed a strong following among specialists and it often brings strong premiums whenever they appear at auction. This example ranks distinctly superior to the MS-63 (PCGS) that sold for \$69,000 in our April 2022 sale, reflecting a strong premium of nearly 50% above the face value. It is likely this MS-64 (PCGS) will encourage an even greater premium.

As the first funded physical bitcoin ever produced, the spelling error on the holographic sticker is paralleled by many similar spelling errors among early United States coinage. A variety of silver half-dimes struck in 1796 were made with a broken B punch so that the word LIBERTY appears to be misspelled LIKERTY. This variety has become even more popular because of the error, just as with these CASACIUS errors, and examples have sold for over \$400,000.

Issued on a 28.5mm brass planchet, the obverse features the Bitcoin currency symbol at center surrounded by a legend listing the date, denomination, and the Latin phrase "VIRES IN NUMERIS" that translates as "Strength in Numbers." This phrase is also featured on the popular Lealana coin series but is listed there in Hawaiian as "IKAIKA I HELU NUI". Choice MS-63 (PCGS) 2011 CASACIUS Error 1 BTC Loaded and Active

2314

2011 Casascius 1 Bitcoin (BTC). Loaded. Firstbits 176cKZbo. Series 1. CASACIUS Error. Brass. 28.5 mm. MS-63 (PCGS).

This is an active and loaded cryptocurrency coin containing 1 BTC, equivalent to roughly US\$38,000 at the time of cataloging (May 2022). A handsome Choice Mint State specimen showcasing intense golden color and bold definition throughout. An attractive survivor from this popular error issue which is paralleled by many similar spelling errors among early United States coinage, some of which have sold for over \$1.5 million. The word CURRENCY is misspelled as "CURENCY" on the historic "1776" Continental Dollar, while a variety of silver half-dimes struck in 1796 were made with a broken B punch so that the word LIBERTY appears to be misspelled LIKERTY.

The present CASACIUS error variety has developed a similarly strong following among seasoned cryptocurrency specialists and they often bring strong premiums whenever they appear at auction. At MS-63 (PCGS), it is tied with the example that sold for \$69,000 in our April 2022 sale, reflecting a strong premium of nearly 50% above the face value. We expect an even stronger premium for this example in our June sale as interest in this category continues to grow.

Issued on a 28.5mm brass planchet, the obverse features the Bitcoin currency symbol at center surrounded by a legend listing the date, denomination, and the Latin phrase "VIRES IN NUMERIS" that translates as "Strength in Numbers." This phrase is also featured on the popular Lealana coin series but is listed there in Hawaiian as "IKAIKA I HELU NUI". Rare 2012 Casascius 1 BTC Purchased Directly from Mike Caldwell Loaded and Active

2316

2012 Casascius 1 Bitcoin (BTC). Loaded. Firstbits 1CsdmwE5. Series 2. Brass. 28.5 mm. MS-66 (PCGS). This is an active and loaded cryptocurrency coin containing 1 BTC, equivalent to roughly US\$38,000 at the time of cataloging (May 2022). Deep honey and golden wheat shades compliment the intensely lustrous surfaces. This offering represents the very first appearance of a loaded 2012 1 BTC at live auction and it is sure to generate tremendous excitement for advanced specialists. It ranks as one of only two examples of this rare issue graded by PCGS.

While the 2011 and 2013 Casascius 1 BTC appear with relative frequency, the 2012 1 BTC is incredibly elusive on the market. According to researcher Elias Ahonen, only 4,089 2012 1 BTC were issued, which was less than half of the 8,352 that would be issued for the 2013 1 BTC. Over 30% of the 2012 1 BTC have since been peeled and redeemed, making this untouched and loaded example a true prize for collectors. This particular example was purchased directly from Mike Caldwell, the creator of the Casascius series. Notably, this piece was not funded until April 2013 due to an administrative delay, despite being dated 2012 and purchased that year.

Issued on a 28.5mm brass planchet, the obverse features the Bitcoin currency symbol at center surrounded by a legend listing the date, denomination, and the Latin phrase "VIRES IN NUMERIS" that translates as "Strength in Numbers." The reverse features a holographic sticker with the firstbits address printed at the center. Beneath the holographic sticker is the private address that allows the owner to redeem the value of the bitcoin once the sticker is peeled away.

Acquired directly from Mike Caldwell, creator of the Casascius series.

Incredible MS-68 Casascius 1 BTC Acquired Directly from Mike Caldwell The Sole Finest at PCGS

2317

2013 Casascius 1 Bitcoin (BTC). Loaded. Firstbits 13ENRUBt. Series 2. Brass. 28.5 mm. MS-68 (PCGS). This is an active and loaded cryptocurrency coin containing 1 BTC, equivalent to roughly US\$38,000 at the time of cataloging (May 2022). It is a truly impressive example of this historic issue which represents the final year of production by Casascius (Mike Caldwell). It displays a vibrant honey-gold patina with hints of bronze and olive color throughout. The complexion remains overall lustrous and without any notable abrasions, showcasing incredible reflectivity in the peripheral obverse fields. At a grade of MS-68, this is the sole finest example certified by PCGS across any Casascius 1 BTC date or variety. It is superior even to the Gem MS-66 (PCGS) example that sold for \$66,000 in our April 2022 sale and we expect another price record to be set once this piece crosses the auction block.

This virtually perfect specimen was purchased directly from Mike Caldwell (Casascius) by our consignor in May 2013 as part of an original roll of 50 1 BTC coins. The same purchase also included a roll of 50 0.5 BTC coins and the total purchase price was 100 BTC, which was at the time equivalent to roughly US\$12,000. Many of these coins were later peeled and redeemed in 2014 and 2015 when the price of Bitcoin was around \$300 to \$400 on average. This MS-68 (PCGS) 1 BTC is accompanied in this sale by a MS-66 (PCGS) 0.5 BTC that was acquired as part of the same order from Caldwell. We suggest the possibility that a collector may purchase both lots to keep them together and continue to build upon this shared legacy. Both of these coins feature signed sale certificates from Mike Caldwell that can be provided to the winning bidder by request at the close of the auction.

One of the most popular issues of the entire Casascius series, just about 8,350 of the 2013 Series 2 1 BTC were funded in 2013 and 2014. Researcher Elias Ahonen notes that a "2014 [dated] version would have surely been even more numerous had Casascius not ended the sale of pre-funded coins." Issued on a 28.5mm brass planchet, the obverse features the Bitcoin currency symbol at center surrounded by a legend listing the date, denomination, and the Latin phrase "VIRES IN NUMERIS" that translates as "Strength in Numbers." The reverse features a holographic sticker with the firstbits address printed at the center. Beneath the holographic sticker is the private address that allows the owner to redeem the value of the bitcoin once the sticker is peeled away.

PCGS# 892615.

PCGS Population: 1; none finer. The sole finest Casascius 1 BTC at PCGS.

Acquired directly from Mike Caldwell (Casascius) in May 2013. A signed sale certificate from Caldwell can be provided to the winning bidder upon request at the close of the auction.

Exciting Unfunded Casascius "Bitnickel"

2318

Unfunded 2012 Casascius "Bitnickel" 5 Bitcoin (BTC). Series 1 and Series 2 Type. Nickel Brass. 28.5 mm. MS-67 (ICG). This is an unfunded and non-active cryptocurrency coin that is not loaded with any cryptocurrency. Nonetheless, it remains an exciting opportunity to own this large denomination issue with a face value of 5 BTC. The surfaces display satiny luster and a blend of pewter-gray and platinum-white coloration depending on the lighting. Interestingly, the weakness at the motto VIRES IN NUMERIS on the obverse is seen on virtually all examples from these series. An MS-65 example sold for \$4,800 in our April 2022 sale and we expect even stronger interest in this Superb Gem MS-67 example.

According to researcher Elias Ahonen, the Series 1 Casascius 5 BTC funded coins were released in January 2012 with an issue price of 6 BTC, amounting to around US\$33 at the time. They were initially released with a gold-colored hologram but a silver-colored hologram was introduced for Series 2 circa April 2012. Mike Caldwell, the creator of the Casascius series, eventually released an unreported quantity of unfunded "bitnickel" planchets for enthusiasts to fund on their own. This example can likely be traced back to this later release.

PCGS# 888960.

★Loaded cryptocurrency coins will be reserved at their intrinsic cryptocurrency value on the day of the sale. Lots realizing \$25,000 or more will be delivered via armored carrier ONLY. An additional shipping charge of five hundred dollars [\$500] will be applied to domestic armored carrier deliveries, with additional fees for remote and international deliveries. Winning bidders may also pay their invoice via BitPay for a 1% fee after authorization by Stack's Bowers Galleries prior to the sale. Additional terms and conditions apply.

Popular 5K Bits "Poker Chip" Loaded and Active

2319

2016 BTCC 5K Bits "Poker Chip" 0.005 Bitcoin (BTC). Loaded. Firstbits 1DizuZQv. Serial No. E00639. Series C. Clay Composite. 39 mm. Genuine (ICG). This is an active and loaded cryptocurrency coin containing 0.005 BTC, equivalent to roughly US\$195 at the time of cataloging (May 2022). This series of 5K chips debuted in November 2016 and only 1,500 were issued that year, making it among the more scarce physical cryptocurrency coins available. The obverse features the denomination boldly printed at the center and the reverse features a holographic sticker with the public "firstbits" address visible through a rectangular window. Beneath the sticker is a QR code with a private address that allows the cryptocurrency to be redeemed and added to a wallet.

These "poker chips" were first issued in 2016 by the bitcoin exchange BTCC in six denominations ranging 1K to 500K "bits". Each denomination is color-coded and represents a fraction of a bitcoin including white 1K (0.001 BTC), red 5K (0.005 BTC), blue 10K (0.01 BTC), green 25K (0.025 BTC), black 100K (0.1 BTC), and purple 500K (0.5 BTC). Most were offered as part of six-coin sets containing one of each denomination, though customers also had the option of ordering custom configurations or bulk 20-chip rolls. Intended as an affordable and fun way of participating in the cryptocurrency market, these BTCC poker chips remain incredibly popular among both sophisticated bitcoin collectors and those just dipping their toes into this exciting category.

The issuer BTCC was founded in June 2011 as BTCChina and it was the first bitcoin exchange in that country. By October 2014 it had become the world's second largest bitcoin exchange by volume and it was official rebranded as BTCC in 2015. It remains the longest-running cryptocurrency exchange in the world and is now headquartered in London, UK. Famed bitcoin entrepreneur Bobby Lee currently serves as CEO.

Popular Satori "Poker Chip" Loaded and Active

2320

2017 Satori "Poker Chip" 0.001 Bitcoin (BTC). Loaded. Serial No. 34337. Plastic. 40 mm. MS-69 (ANACS). This is an active and loaded cryptocurrency coin containing 0.001 BTC, equivalent to roughly US\$40 at the time of cataloging (May 2022). A virtually flawless and visually exciting example of this popular "poker chip" issue. The obverse features an ornamental Bitcoin currency symbol at the center with decorative patterns surrounding. Cryptocurrency researcher Elias Ahonen, a.k.a Cryptonumist, reveals the symbolism in these patterns in explaining that "the outer blue bars and teal knots circling the inner square represent the blockchain, and the sunrays reaching through the central 'box' allude to 'thinking outside the box." Also featured is the quote "Value does not exist outside the consciousness of man" from Austrian Economist Carl Menger. The reverse features a holographic sticker which shows the denomination and the serial number. Once peeled, the holographic sticker reveals a QR code which will allow the owner to redeem the cryptocurrency and load it onto their digital wallet.

Satori Coin is named after the Buddhist term for "awakening" or "enlightenment", referring to the life-altering potential of cryptocurrency and digital money. It was launched in 2016 by brothers Motonori Kan and Yoshi Kan, executives at the Japanese importing company Raimu Inc. They intended to create an affordable cryptocurrency token that would "spread the understanding of bitcoin among Japanese people" and yet be too impractical for illegal markets like the drug trade or terrorism.

LITECOIN

Historic "First Run" Non-Serialized Variety Loaded and Active

2323

2013 Lealana 1 Litecoin (LTC). Loaded. Firstbits LiRE6qgY. Black Address, Non-Serialized. "First Run" Variety. Nickel Brass. 30 mm. MS-67 (ANACS). This is an active and loaded cryptocurrency coin containing 1 LTC, equivalent to roughly US\$100 at the time of cataloging (May 2022). This Black Address, Non-Serialized "First Run" variety is an historic issue, representing a pivotal experiment in physical cryptocurrency that served as a prototype for the varieties to follow. Just 2,000 examples were issued, though many of these have since been peeled and redeemed. In many ways, it is comparable to the scarce "Casacius Error" 1 BTC from the Casascius series—one of which sold for \$78,000 in our April 2022 sale.

Specialist Elias Ahonen indicates that these "First Run" Lealana 1 LTC coins are "generally the most desired by collectors." Issued on a 30 mm Nickel-plated Brass planchet, the obverse features the Litecoin symbol, date, and denomination while the reverse features a holographic sticker with the firstbits address visible near the center. This Superb Gem MS-67 example is surely one of the finest know of this prized variety, and this offering represents the first time one has been featured in a live auction.

2013 Lealana 1 Litecoin (LTC). Loaded. Firstbits LUSCZJyk. Serial No. 7433. Black Address, Serialized. Nickel Brass. 30 mm. MS-68 (ANACS). This is an active and loaded cryptocurrency coin containing 1 LTC, equivalent to roughly US\$100 at the time of cataloging (May 2022). At MS-68, this is surely one of the finest survivors of just 2,960 coins issued. Handsomely preserved with lustrous silver-gray surfaces.

The Lealana Litecoin series was first released to collectors and investors in June 2013 as a counterpart to the Casascius physical bitcoins introduced in 2011. It was invented and issued by Noah Luis of Honolulu, Hawaii, who is perhaps better recognized within the crypto community by his internet handle "smoothie." This popular LTC series was intended to be a "friendly competitor" to the Casascius BTC series produced by Mike Caldwell, according to researcher Elias Ahonen.

★Loaded cryptocurrency coins will be reserved at their intrinsic cryptocurrency value on the day of the sale. Lots realizing \$25,000 or more will be delivered via armored carrier ONLY. An additional shipping charge of five hundred dollars [\$500] will be applied to domestic armored carrier deliveries, with additional fees for remote and international deliveries. Winning bidders may also pay their invoice via BitPay for a 1% fee after authorization by Stack's Bowers Galleries prior to the sale. Additional terms and conditions apply.

Nearly Flawless Lealana 1 LTC Loaded and Active

2325

2013 Lealana 1 Litecoin (LTC). Loaded. Firstbits LKLAmcUf. Serial No. 7455. Black Address, Serialized. Nickel Brass. 30 mm. MS-68 (ANACS). This is an active and loaded cryptocurrency coin containing 1 LTC, equivalent to roughly US\$100 at the time of cataloging (May 2022). This incredible Ultra Gem is a nearly perfect specimen with pearly silver-gray coloration. It is representative of the scarcer serialized black address variety with a mintage of only 2,960 pieces.

At the time of issue, the price of Litecoin was around \$3 and it was viewed as a more practical cryptocurrency for everyday transactions, according to Elias Ahonen. Now worth over 30 times more, these Lealana 1 LTC pieces have caught the eyes of astute investors as well.

Superb Gem MS-67 Lealana 1 LTC Loaded and Active

Superior Gem 2013 Lealana 1 LTC Loaded and Active

2326

2013 Lealana 1 Litecoin (LTC). Loaded. Firstbits LSqjM7h9. Serial No. 7472. Black Address, Serialized. Nickel Brass. 30 mm. MS-67 (ANACS). This is an active and loaded cryptocurrency coin containing 1 LTC, equivalent to roughly US\$100 at the time of cataloging (May 2022). The surfaces of this Superb Gem 1 LTC are intensely lustrous and accented by subtle champagne-gold toning throughout.

Issued on a 30 mm Nickel-plated Brass planchet, the obverse features the Litecoin symbol, date, and denomination while the reverse features a holographic sticker with the firstbits address visible near the center and the serial number above. These serialized black address pieces represent the earliest issues of this series and will always be prized as historic relics from the early years of physical cryptocurrency.

2327

2013 Lealana 1 Litecoin (LTC). Loaded. Firstbits LN8RtX3J. Serial No. 7451. Black Address, Serialized. Nickel Brass. 30 mm. MS-66 (ICG). This is an active and loaded cryptocurrency coin containing 1 LTC, equivalent to roughly US\$100 at the time of cataloging (May 2022). Exceptional lustrous surfaces showcase attractive silver-grey coloration and no traces of friction whatsoever.

Perhaps the most popular issue from the Lealana Litecoin series, this variety is subject to incredible demand among both expert cryptocurrency specialists and traditional numismatic collectors alike.

Transitional Green Address 2013 Lealana 1 LTC Loaded and Active

2328

2013 Lealana 1 Litecoin (LTC). Loaded. Firstbits LQjnG73v. Serial No. 7379. Green Address, Serialized. Nickel Brass. 30 mm. MS-67 (ICG). This is an active and loaded cryptocurrency coin containing 1 LTC, equivalent to roughly US\$100 at the time of cataloging (May 2022). This coin features Superb Gem quality with virtually flawless surfaces. It is an exciting example of the transitional Buyer Funded variety first issued in May 2014, indicated by the green address on the hologram. This type was produced in response to federal requirements from the Financial Crimes Enforcement Network (FinCEN) related to Money Services business and only 5,000 were minted.

Under the new Buyer Funded format, buyers of these Lealana coins were responsible for sending the cryptocurrency to the coin's address themselves at a later time. Though dated 2013, the present piece was actually funded with cryptocurrency in 2017. This type was actually the final variety produced by Lealana founder Noah Luis, aka "Smoothie". They remain historic artifacts from this important development in the cryptocurrency market.

1875 Octagonal \$1. BG-1125. Rarity-5-. Indian Head. MS-65 DPL (NGC).

PCGS# 811899. NGC ID: 2C3T.

3595

Hart's "Coins of the Golden West." 1909 Alaska-Yukon-Pacific Exposition. 1/4 DWT. MS-64 (NGC). 0.38 grams.

3596

Hart's "Coins of the Golden West." 1909 Alaska-Yukon-Pacific Exposition. 1/2 DWT. MS-65 (NGC). 0.76 grams.

3597

"1862" (ca. 1910) Alaska 2 TooWah Token. Original Strike by Nathan Joseph. Bruce-Tn5. 5-Star Reverse. AU Details—Ex Jewelry (PCGS). Although dated 1862 and erroneously called a "restrike" by PCGS on their insert, the originals were issued in 1910.

3598

Lot of (11) Different California Gold Charms. A lovely little collection comprised of all different sizes, dates, shapes and types. Most examples are Mint State.

GOLD NUGGETS

3599

Native Gold Specimen. Approximately 16.5 mm x 10.4 mm x 10.3 mm. 13.2 grams. A compact nugget that appears to be solid gold, as there is no visible evidence of matrix material. An attractive piece still showing much of its rough natural character.

3600

Native Gold Specimen. Approximately 29.1 mm x 10.4 mm x 14.8 mm. 8.5 grams. A fascinating and scarce native gold crystal. The overall form is that of a flattened, roughly pyramidal form, though it is constructed of flat planes, each consisting of multitude of tiny octahedral crystals. A really complex and interesting natural formation with traces of matrix within some of the protected recesses. While nuggets are relatively common, only a small fraction of native gold specimens are in a natural crystal formation and they are very much desired by mineral collectors.

3601

Native Gold Specimen. Approximately 15.2 mm x 7.3 mm x 10.0 mm. 7.0 grams. Medium gold surfaces with a couple of small quartz crystals retained in the recesses. A pleasing little nugget.

3602

Natural Gold Specimen. Approximately 19 mm x 14.2 mm x 8.2 mm. 5.6 grams. Small piece of crystalline gold intertwined in a quartz matrix. Close inspection of the gold reveals light wear, but the crystalline structure is quite visible. It is difficult to ascertain just how much gold is present, but it is a very attractive piece in a very native form

3603

Lot of Approximately (24) Native Gold Specimens. 324.1 grains total weight.

END of Session 3

SESSION 4
U.S. COINS PART 2
Internet Only
Medals, Tokens, Early American Coins
& Half Cents - Half Dollars

Numismatic Americana

4001

"1776" (ca. 1880-1910) Washington Before Boston Medal. Fifth Paris Mint Issue. First Issued Obverse (In Repaired State) / Third Issued Reverse (In Repaired State). By Pierre Simon DuVivier. Adams-Bentley 3, Musante GW-09-P4, Baker-48H. Bronze. Mint State. 68.8 mm. Edge marked (cornucopia) BRONZE at 11:30 relative to the obverse. Reverse with no breaks over the letters HOS in HOSTIBUS, pointing to an early striking during the listed time frame.

4002

1893 Maryland at the World's Columbian Exposition Medal. Eglit-138, Rulau-X46A. Bronze. About Uncirculated. 44 mm. Much scarcer than the white metal variants, this bronze example is complete with its MARYLAND pinback suspender and SOUVENIR bar. Also present is the orange and black silk ribbon inscribed on the back DESIGN COPYRIGHT / 1893 / BY FRANK BROWN / GOVERNOR. Rulau indicates that similar copyright information is on the reverse of the medal itself, if that is correct, this is an unlisted variety, as the copyright information is not present on the medal.

4003

1893 Maryland at the World's Columbian Exposition Medal. Eglit-138, Rulau-X46A. White Metal. About Uncirculated. Complete with its MARYLAND pinback suspender and SOUVENIR bar, though the actual pin mechanism is missing. Also present is the orange and black silk ribbon inscribed on the back DESIGN COPYRIGHT / 1893 / BY FRANK BROWN / GOVERNOR. Rulau indicates that similar copyright information is on the reverse of the medal itself; if that is correct, this is an unlisted variety, as the copyright information is not present on the medal.

4004

1892 Columbian Exposition Badge worn by those who accompanied the Liberty Bell to the Exposition. Gold and Enamels. About Uncirculated, missing bell. 32 mm x 35 mm. 10.12 grams. Ornate badge with inscription PHILADELPHIA COUNCILS around the periphery of a white and blue enameled gold badge. In the center is a medallion with the Philadelphia City Arms topped with keystone with a clear jewel at its center. Thirteen stars surround the arms. A miniature representation of the Liberty Bell would have been suspended below, but is missing here and not included. The reverse has a hinged pin for wear as well as the inscription WORLD'S COLUMBIAN / EXPOSITION / CHICAGO. / 1892 on the back of the central medallion. There are no maker's or fineness marks, but the piece seems to be made mostly of gold, and that is the fabric that would be expected for an item of this sort at that time.

4005

1832 Philadelphia Civic Procession Medal. Original. Musante GW-130, Baker-160A. White Metal. AU-55 (PCGS). 33.0 mm. 193.2 grains.

From the Kessler Collection of Washingtonia. Earlier ex our sale of the E Pluribus Unum Collection, November 2020 Auction, lot 4348. Collector envelope with attribution notation included.

4006

"1832" (ca. 1858) Civic Procession Medal. Second Restrike. Musante GW-130-R2, Baker-160H. Lead. Thick Planchet. MS-62 (PCGS). 32 mm.

From the Kessler Collection of Washingtonia. Earlier ex our sale of the Ralph A. Edson Collection, October 2018 Baltimore Auction, lot 10023.

4007

Undated (ca. 1856) Eight Presidents Medal without Signature. Restrike. Musante GW-153R, Baker-221D. White Metal. Mint State. 46.4 mm.

4008

Undated (ca. 1862) Washington and Jackson Medalet. Paquet P Obverse - Paquet Jackson Reverse. Musante GW-448, Baker-223A, Julian PR-29. Silver. MS-64 (NGC). 18 mm.

From the Kessler Collection of Washingtonia. Earlier ex our Spring 2019 Baltimore Auction, March, lot 10024.

4009

1876 Jersey City Sunday Schools Medal. First Obverse. By David Proskey. Musante GW-858, Baker-372. Silver. MS-63 (NGC). 28 mm.

From the Kessler Collection of Washingtonia.

4016

Undated (ca. 1876) New York Medal Club Medal No. 1. Musante GW-960, Baker-200. Silver. MS-64 (NGC). 31 mm.

From the Kessler Collection of Washingtonia. Earlier ex Thompson Collection.

4011

1883 Inaugural Centennial - Newburgh Headquarters Medal. Musante GW-991, Baker-455. White Metal. About Uncirculated. 31 mm. Pierced for suspension.

4012

1883 Sons of the American Revolution Badge. Musante GW-1007, Baker-CA678. Gold and Gilt Brass. Choice Uncirculated. Medallion: 44 mm x 30 mm. with eagle; Overall: approximately 75 mm x 39 mm. Boldly lustrous golden central medallion. The gold and enameled frame is in superb condition, with no signs of damage or losses to the enameling. The original pin bar is still connected via the original blue and gold ribbon and the ribbon is especially crisp and fresh. Though unmarked as to karat, the Rulau-Fuld reference states these to be 14kt. Engraved "3364" on the back of one of the eagle's wings, indicating the member's number. These were probably issued for the December 4, 1883 event held at Fraunce's Tavern in commemoration of Washington's farewell to his officers held there a century before.

From the Kessler Collection of Washingtonia.

4013

1889 Inaugural Centennial Soldier's Medal. Musante GW-1122, Douglas-45. White Metal. Extremely Fine. 40 mm. Pierced for suspension.

4014

1889 Republique Centenaires, Salut Medal. Musante GW-1123, Douglas-41A. Bronze. About Uncirculated. 44.5 mm.

4015

1889 Inaugural Centennial New York Badge. Musante GW-1144, Douglas-40. Bronze. Mint State, Damaged. Approximately 61.5 mm x 79 mm overall (greatest dimensions). The shield at the right end of the hanger and the lower right point of the star are bent.

Lot of (3) Washington and Hatchet Stick Pins. (2) 59 x 35 mm examples are nearly identical apart from color, one bright brass while the other is well-toned brass with blue and red paint on the axe head, both of these with Washington's bust within a wreath attached to the hatchet handle; the third example is 71 x 30 mm and has WASHINGTON on the hatchet head with a small sprig of foliage below. All retain their original stick pin reverses.

From the Kessler Collection of Washingtonia.

4017

1860 Abraham Lincoln Campaign Medal. Cunningham 1-490W, King-35, DeWitt-AL 1860-38. White Metal. MS-62 (NGC). 31 mm.

4018

1864 Abraham Lincoln Campaign Medal. Cunningham 3-050W, King-75, DeWitt-AL 1864-4. White Metal. About Uncirculated, Bent. 34 mm. Pierced for suspension.

4019

"1809-1865" (1929) Lincoln Mortuary Plaque. By J. Henri Ripstra, struck by Meyer & Wilhelm, Stuttgart, Germany. Cunningham 9-060S, King-1006. Silver. About Uncirculated. 39 mm x 51 mm. 46.48 grams, .950 fine.

4020

1927 Lincoln Token by Thomas L. Elder. Cunningham 10-370X, King-1043, DeLorey-48. Gold. MS-66 (NGC). 15 mm.

4021

1844 Henry Clay Campaign Medal. DeWitt-HC 1844-2. White Metal. About Uncirculated, Spots. 51 mm.

4022

"1852" Henry Clay Memorial Medal. Bronze. MS-66 BN (NGC). 34 mm. **Obv:** Bust of Clay right, name HENRY CLAY above, life dates at left and right. **Rev:** Continuous wreath encloses inscription THE / CONSTITUTION, / THE / UNION / AND PROTECTION / TO / HOME INDUSTRY.

Ex John J. Ford, Jr.

4023

Undated (1860) John C. Breckenridge Campaign Medal. DeWitt-JCB 1860-1. Lead. AU-58 (NGC). 38 mm. Pierced for suspension.

4024

Undated (1868) Ulysses S. Grant Campaign Medal. DeWitt-USG 1868-18. White Metal. Mint State, PVC Residue. 32 mm.

4025

1868 Horatio Seymour Campaign Medal. DeWitt-HS 1868-4. Copper. MS-63 RB (NGC). 31 mm.

4026

Undated (1896) William McKinley and Garret Hobart Campaign Medal. Brass. Mint State, Light Residue. 25.5 mm, medal only. Obv: Facing busts of McKinley and Hobart within beaded ovals, names above and below. Rev: Multi-line inscription PATRIOTISM / PROTECTION / PROSPERITY. Pierced for suspension and suspended from thin brass, pinback, eagle-mounted shield hanger inscribed WANAMAKER / CLOTHING on front.

4027

1900 Republican National Convention Souvenir Badge. Tin and Lead. Extremely Fine. 108 x 51 mm total, 42 mm (scalloped hanging badge only). Lead badge with two glued photographs suspended from a faded teal ribbon and simple tin hangar. The badge shows a picture of incumbent President McKinley on the obverse while the reverse bears a picture of the chairman and secretary of the Republican National Committee. Thought the ribbon is torn and faded, the full text can be read with some effort.

4028

Undated Theodore Roosevelt - Republican Party Campaign Badge. Brass. About Uncirculated. Approximately 32 mm x 146 mm, greatest dimensions. A most unusual item, and the first of its kind that we can recall offering. This is a five-part hanging badge, both sides depicting the same designs on each component. At the bottom is a circular medal with a seemingly hand-engraved facing bust of Theodore Roosevelt within a stippled field, border composed of broad denticles. The four links above the medal consist of triangular-shaped components at top and bottom, rectangular-shaped components in the middle. From top to bottom these component links depict: GOP-inscribed elephant; TRADE / (American flag) / FOLLOWS THE / FLAG; PROTECTION / PROSPERITY / AND / PANAMA; (ocean waves) / ATLANTIC - PACIFIC. A simple hanger is attached at top for suspension.

4029

Great Britain. Undated Thomas Attwood, Founder of Political Unions Medal. Brass—Overstruck—Mint State, Lightly Cleaned. 24 mm. Obv: Bust right with name THOMAS ATTWOOD ESQR. above, inscription FOUNDER / OF POLITICAL UNIONS below. Rev: Rays emanating out from center with inscription REFORM / UNION / IS STRENGTH.

4030

"1881" James A. Garfield Presidential Medal. By Charles E. Barber. Julian PR-20. Bronze. About Uncirculated, Cleaned, Edge Damage. 77 mm.

4031

1896 Garfield Club Annual Banquet Badge. Brass. About Uncirculated. 86 x 50 mm total, 41 mm (scalloped badge only). Picture of President Garfield affixed to scalloped frame and hanging from a red, white and blue ribbon and simple brass suspension bar. The reverse of the badge reads J.H. SHAW / 1326 ARCH ST. / PHILA. The lettering on the ribbon is generally bold and easily legible, though the date at bottom takes a bit of patience.

4032

1897 William McKinley - Garret Hobart Inaugural Badge. Dusterberg pp. 17-19, MacNeil-WMcK 1897-3. Bronze. Mint State, PVC Residue. 44.3 mm, medal only. The yellow silk ribbon is inscribed ILLUMINATION above a woven-in U.S. flag. The ribbon is stained and the upper hanger is missing.

1921 Warren G. Harding Unofficial Inaugural Medal. Bronze. Mint State. 76 mm. Obv: Bust of the president left with name WARREN G. HARDING around periphery. Rev: Eagle and PEACE on rising sun with wreath behind, oil lamp left, book right, all above multi-line inscription INAUGURATED / PRESIDENT / OF THE / UNITED STATES / MAR. 4. 1921, shield and wreath below. This is not the ultra rare official inaugural medal, but an early version of the Mint Presidential series produced from 1921 to 1923 when a new reverse was prepared noting his death during his third year of presidency. Housed in the original black leather, purple felt-interior fitted case, which is in nice About Uncirculated preservation. (Total: 1 medal; 1 case)

4034

"1929" American Society of Mechanical Engineers Hoover Medal. By John Flanagan. Gilt Bronze. Mint State. 69.8 mm. Obv: Bust of Hoover right, inscription HOOVER MEDAL / FOUNDED 1929 around. Rev: Antique foundry scene above the inscription AWARDED BY ENGINEERS / TO A FELLOW ENGINEER / FOR DISTINGUISHED / PUBLIC SERVICE. Below the inscription, on a raised cartouche, is the awardee's name JAMES B. FISK. Edge: Stamped (copyright) MEDALLIC ART CO. N.Y. BRONZE at 6 o'clock. This rare medal has been issued sporadically by the American Society of Mechanical Engineers since 1929 to honor outstanding engineers from around the world. The first awardee was Herbert Hoover himself, then the president of the United States.

4035

1896 Bryan Dollar. Schornstein-817, Zerbe-90. Type Metal, Cast. About Uncirculated, Rough, Damaged. 88 mm.

4036

Undated (1900) William McKinley, Anti-Bryan Mechanical Dollar. Schornstein-908, Zerbe-135. Brass. About Uncirculated. 38.5 mm. Looped for suspension, as issued.

4037

"1897" (1900) William McKinley, Anti-Bryan Mechanical Dollar. Schornstein-909, Zerbe-135. Brass. About Uncirculated. 38.2 mm. Looped for suspension, as issued.

4038

Lot of (2) 1896 Bryan Dollars. Cast. Included are: Schornstein-718, Zerbe-71, Babbitt metal, Extremely Fine; and Schornstein-852, Zerbe-118, type metal, About Uncirculated, environmental damage.

4039

Undated (ca. 1862) Avoid the Extremes of Party Spirit Medal. By John Adams Bolen. Musante JAB-6, Musante GW-563, Baker-258B. Brass. MS-65 (NGC). 28 mm.

Ex Rev. Dr. James G.K. McClure Collection.

4040

Undated (ca. 1867) Jackson / The Stern Old Soldier Medal. By John Adams Bolen. Musante JAB-27. Copper. MS-64 (NGC). 25 mm.

4041

Undated (ca. 1867) Lincoln / Emancipation Medal. By John Adams Bolen. Musante JAB-28, Cunningham 29-120C, King-237. Copper. MS-64 BN (NGC). 25 mm.

4042

Undated (ca. 1881) Pynchon House Medal. By John Adams Bolen. Musante JAB-39. Copper. MS-65 BN (NGC). 25 mm. The edge has a small letter B at 3 o'clock relative to the obverse, suggesting that this piece was part of a group that came from Bolden's granddaughter in 1948.

4043

Undated (ca. 1867) Lincoln / Franklin & Co. Store Card. By John Adams Bolen. Musante JAB K-10, Cunningham 29-150C, King-606. Copper. MS-65 RB (NGC). 25 mm.

4044

1909 Abraham Lincoln Centennial Medal Plaque. By J. Edouard Roine. Miller-24, Cunningham 11-030C, King-302, Baxter-300. Bronze. Edge No. 102. About Uncirculated, Reverse Scrapes. 73 mm x 101 mm.

4045

1939 Washington Sesquicentennial Medal. By Albert Stewart. Miller-47, Baker-3000A. Bronze. Edge No. 72. Mint State, PVC Residue. 63 mm.

From Presidential Coin and Antique Co., Inc.'s Robert J. Centola Collections sale, November 1999, lot 190. Lot tag included.

4046

1959 Apache Buffalo Hunt and Dance Medal. By Allan Houser. Alexander-SOM 59.1. Bronze. About Uncirculated. 73 mm.

4047

1931 United States Assay Commission Medal. By John R. Sinnock and Adam Pietz. JK AC-75. Rarity-3. Bronze. Mint State. 51 mm.

4048

Undated (ca. 1861) Dr. Frederick Rose Medal. By Anthony C. Paquet. Julian PE-29. Silver-Plated. About Uncirculated, Harshly Cleaned. 76 mm.

4049

Two-Piece Set of "1776" (2013) United States Diplomatic Medals. Modern Paris Mint Dies. Silver. Proof-70 Deep Cameo (PCGS). 38 mm each, 1 ounce each. Both examples are housed together in a single large size PCGS holder, each side of which shows the obverse and reverse designs. (Total: 2 medals)

From the Cardinal Collection Educational Foundation.

4050

Lot of (2) State Commemorative Medals. Struck by Medallic Art Co. Bronze. Choice Mint State. Included are: 1927 Vermont Sesquicentennial, by Charles Keck, 64 mm; and 1935 Connecticut Tercentenary, by Henry Kreis, 76 mm. Both medals are housed in the original box as issued by Medallic Art Co. Also included in this lot is stamped and postmarked envelope for the Bennington (Vermont) Centennial medal, First Day of Issue, Extremely Fine. (Total: 2 medals; 1 envelope)

4051

1876 U.S. Centennial Exposition. Official Medal. HK-22, Julian CM-10. Rarity-4. Gilt. Mint State. 38 mm.

1876 U.S. Centennial Exposition. Official Medal. HK-22, Julian CM-10. Rarity-4. Gilt. Mint State, Cleaned, Obverse Scratch. 38 mm.

4053

1909 Hudson-Fulton Celebration. Hendrik Hudson Daalder. HK-369, DeLorey-74. Rarity-7. Silver. MS-66 (NGC). 38 mm.

4054

1915 Panama-Pacific International Exposition. State Fund Dollar—Kentucky. HK-410b. Rarity-7. Bronze. Unc Details—Damaged (NGC). 38 mm. Looped for suspension.

4055

1896 Bryan Dollar. HK-780, Schornstein-6. Rarity-5. Silver. MS-62 (PCGS). 52 mm.

4056

1933 Nevada Dollar. HK-821. Rarity-6. Silver. Unc Details—Obverse Damage (NGC). 38 mm.

4057

1933 Pedley-Ryan Dollar. Type IV. HK-825. Rarity-5. Silver. MS-62 (PCGS). 38 mm.

4058

1866 School(?) Award Medal for Conduct and Allegiance. Silver. About Uncirculated. 50 mm. 42.92 grams. **Obv:** Latin motto PALMAM QUI MERUIT FERAT on scroll above, CLARKSBURG WEST VA on scroll below, center inscribed JUNIOR / DIVISION / FEB'Y 1,, 1866. **Rev:** Multi-line inscription PRESENTED BY / REV ROBT W. WOLSELEY MA / TO / EMMA LINK / FOR EXEMPLARY CONDUCT / AND DILIGENCE. An elaborately engraved piece, the exact origin of which eludes us.

4059

Undated Gardner Institute Department Scholarship Medal. Silver. Extremely Fine, Polished. 37.5 mm. 13.64 grams. Pierced for suspension. **Obv:** Engraved inscription GARDNER INSITUTE. **Rev:** Engraved inscription DEPARTMENT / SCHOLARSHIP within engraved wreath.

4060

Lot of (3) Engraved Masonic Pieces. Silver. 58.79 grams, total weight. All are pierced for suspension. One is circular, 38.5 mm, another is 43 mm x 55 mm, and the last is arrowhead-shaped, 55 mm x 83.8 mm. The engraving on the oval piece is particularly ornate and extensive.

4061

1915 Panama-Pacific International Exposition Award Medal. Bronze. Choice About Uncirculated. 38 mm. Obv: High relief eagle superimposed on a Federal shield, legends PANAMA-PACIFIC INTERNATIONAL EXPOSITION above and 1915 / SAN FRANCISCO below. Rev: Above a small representation of the obverse of so-called dollar HK-409, the legends COMMEMORATIVE MEDAL / AWARDED / BY THE / PANAMA-PACIFIC / INTERNATIONAL / EXPOSITION. Below this, on a cartouche, this piece is engraved to the recipient E HORE FERRARI. This type of award medal appears infrequently in bronze, even so less in silver.

4062

1933 Century of Progress International Exposition Official Medal. Bronze. Golden-Brown Finish. MS-66 (NGC). 70 mm. Obv: Nude male standing on a base inscribed 1833 - 1933 with the words RESEARCH left and INDUSTRY right. Rev: Name and year of the exposition around an aerial view of the grounds with compass points. From the Martineit Family Collection.

4063

1971 Western Reserve Numismatic Club Countermark on a 1921 Morgan Silver Dollar. MS-60 (ICG). According to the article, "Western Reserve Numismatic Club Counterstamps", one 1921 Morgan dollar was countermarked for each member of the club at the time, somewhere on the order of 50 to 100 pieces, but the exact number is unknown. The majority are Philadelphia Mint coins, as here, but a few Denver and San Francisco pieces are also known.

4064

1997 American Numismatic Association Countermarks on a 1936 Cleveland Centennial/Great Lakes Exposition Commemorative Half Dollar. Mint State (Uncertified). With two countermarks, one on each side of the host coin. The obverse countermark exhibits "The Money Tree," the reverse countermark is inscribed CLEVELAND, OHIO / ANA / MARCH 20-22, 1997.

4065

Undated (1861-1865?) Indian Head / Grant Portrait. Fuld-96/144 b. Rarity-9. Brass. Plain Edge. Mint State. 19 mm.

4066

1864 Lincoln Portrait / NO COMPROMISE WITH TRAITORS. Fuld-125/432 a, Cunningham 5-450C, King-205, DeWitt-AL 1864-52. Rarity-7. Copper. Plain Edge. About Uncirculated. 19 mm.

Ex W. Evans, January 25, 1980. Cardboard 2x2 with attribution and provenance notes included

4067

1864 Lincoln Portrait / C.L.R. Fuld-127/428 a, Cunningham 5-620C, King-217, DeWitt-AL 1864-61F. Rarity-9. Copper. Plain Edge. Extremely Fine, Rim Bruise. 19.5 mm.

Ex Virgil Brand; Harmer Rooke; Henry South Collection. Cardboard 2x2 with attribution and provenance notes included.

4068

Undated (1864) Lincoln Portrait / Johnson Portrait. Fuld-132A/149 a, Cunningham 5-950C, King-226, DeWitt-AL 1864-68. Copper. Plain Edge. EF-45 (NGC). 19 mm.

4069

1861 Soldier Portrait / All-Seeing Eye. Fuld-147/228 a, DeWitt-C 1861-7. Rarity-7. Copper. Plain Edge. Mint State, Cleaned. 31 mm.

Ex Virgil Brand; Steve Hayden's Sale #46, lot 066. Lot tag and NGC insert #2684157-034 with a grade of Unc Details—Improperly Cleaned and Brand provenance included.

4070

1863 Monitor / UNION FOR EVER. Fuld-240/341 a. Rarity-1. Copper. Plain Edge. About Uncirculated, Damaged. 18.5 mm.

4071

Pennsylvania—Pittsburgh. Undated (1861-1865) Henry Miner. Fuld-765M-1b. Rarity-5. Brass. Plain Edge. Extremely Fine. 19 mm.

Tennessee—Nashville. Undated (1866-1868) R.H. Singleton. Rulau Tn-Na 25, Cunningham 28-2230C, King-628. Copper. Plain Edge. Extremely Fine. 22 mm.

Cardboard 2x2 with attribution notation included.

4073

Montana—Washington Gulch. Undated (early 20th Century) John A. Meade. 5 Cents. Brass. Extremely Fine. 26 mm, octagonal. Obv: Inscription JOHN A. MEADE / 5C / IN TRADE. Rev: Blank. An unlisted type. According to our consignor, John A. Meade was a general store proprietor in Washington Gulch, Montana just after the turn of the 20th century. The Token Store website featured a copy of Meade's listing in the 1904 *R.L. Polk Montana Gazetteer*.

From the Martineit Family Collection.

4074

New York—Buffalo. SAGE'S / CANDY / COIN on the obverse of an 1874 Arrows Liberty Seated half dollar. Brunk S-86, Rulau NY-Bf 19. VF-30 (NGC).

4075

Lot of (4) Hobo Nickels. A charming group of men with banded hats and beards. One is on an 1913 Type I Buffalo nickel, another on an undated Type I, then a 1936 and finally an undated Type II. The example with the simplest engraving style is signed "ABIE".

4076

Oct-5. engraved on an 1871 Liberty Seated silver dollar. Host Coin About Uncirculated. Oct 5. is engraved in the right obverse field of this rather attractive piece with lustrous fields and original gold and powder blue iridescence over antique silver toning.

4077

SOUVENIR love token pinback on an 1887 Liberty Head quarter eagle. SOUVEIR with decorative background quite finely engraved. The pinback remains functional.

4078

Skillfully enameled 1883 Hawaii dollar. Multicolored coat of arms on a royal blue background greet the viewer from the reverse of this lovely piece. A visually appealing example on a Fine dollar, the obverse of which is scratched with a mount removed. This coin is clearly an ex jewelry piece, as are many survivors of this scarce type.

4079

1883 Kingdom of Hawaii pin with hanging dime, quarter and half dollar. Extremely Fine. 109 x 37.5 mm. Suspended from a plain and functional bar pin marked STERLING on the reverse are an 1883 Dime, Quarter and Half Dollar, each connected to the other from two chains affixed at 11 and 1 o'clock. A cute and still wearable item.

4080

Jewelry piece fashioned out of (2) 1909 Hart's "Coins of the Golden West" Alaska-Yukon-Pacific Exposition 1/4 DWT tokens. The tokens have been soldered together with a loupe mounted to one.

4081

Pair of trade dollar buttons. One host coin is dated 1873, the other 1874. The reverses of both have been planed off and replaced with the same ornate initial engraving. Shanks have been mounted to the reverses. (Total: 2 items)

4082

Pair of "D" love tokens on Liberty Head gold dollars. Included are: (2) finely engraved and black enameled "D" dollars with broken clasps on the reverse. Perhaps they could be turned into earrings or maybe even a small pair of cufflinks?

4083

Pair of Indian quarter eagle cuff links. Extremely Fine. 27.42 grams. Two 1927 quarter eagles fashioned into a pair of cuff links. The coins are mounted into bezels showing the entire obverse, and part of the reverse, each bezel measuring approximately 23 mm. The shanks are marked FJG 363 14 K. A very attractive set of cuff links housed in a Jobe Rose jewelry case. (Total: 2 items)

4084

Lot of (2) pictorial love tokens on gold coins. Included are: Owl with decorative border on the obverse of an 1853 gold dollar, with jump ring attached and Finely executed steam engine on the obverse and FROM M TO L on the reverse of a lower gold purity, reeded edge, 17 mm planchet.

4085

Lot of (3) love tokens on 1851-dated gold dollars. Two examples have an identical monogram, NB or BN engraved onto the obverse with broken pinback reverses, The third example appears to be WWE on the obverse with a broken stickpin reverse.

4086

Lot of (4) love tokens on gold and silver coins. Included are: engraved and blue enameled monogram on a Liberty Seated silver quarter; NEWBERY on a New Orleans minted quarter eagle; DMJ on an 1878 Liberty Head quarter eagle and an indecipherable monogram on an 1881 Liberty Head half eagle. The quarter does not appear to have been part of any jewelry item, the quarter eagles have either a loop or a hole for suspension and the half eagle has a broken pinback.

4087

Lot of (7) engraved love tokens on small gold coins. Included are: (6) Liberty Head gold dollars and (1) 1870-G Octagonal 50 cent California fractional. The California fractional is on a functional pinback, (4) others are holed for suspension and (2) have had their loops fall off. Engravings are either initials or monograms, though one piece has an addition of a swan and flowers and is well accomplished.

4088

Lot of (8) love tokens on Liberty Head gold dollars. Each example has either a loop attached or a jump ring added to serve as a charm in some type of jewelry. One is dated 1849, the others have all been engraved on the reverse. Engravings are of initials or monograms, some quite nicely done.

4089

Lot of (9) love tokens on Indian Princess gold dollars. Included are: (2) Small Head and (7) Large Head. All examples have had a loop added or a jump ring added for use in jewelry. One example is dated 1854, the others are not. All engravings are initials or monograms, some very finely done. Also included in this lot is a lower gold purity reeded-edge charm of the same diameter as a gold dollar but increased thickness. It has an initial on one side and SOUVENIR on the other. (Total: 10 pieces in lot).

Lot of (9) engraved love tokens on Indian Princess gold dollars. Included are: (1) Small Head and (8) Large Head. All examples have been holed for suspension or have had an loop fall off. Engravings are either initials or monograms, some of which are finely done.

4091

Box Dollar Fashioned out of the Obverse of an 1877-Dated Trade Dollar and the Reverse of a Philadelphia Mint Trade Dollar. Extremely Fine. A pleasing piece with no picture or glass inside, however, the original frame is present. Very clean inside and quite wholesome.

COLONIAL COINS AND RELATED

4092

1783 Nova Constellatio Copper. Crosby 1-A, W-1860. Rarity-4. CONSTELLATIO, Pointed Rays, Large U.S. EF-45 (PCGS). 135.7 grains.

PCGS# 804.

From an unnamed sale of February 12, 1961, lot 210. Clipped lot tag with attribution notation included.

4134

1785 Nova Constellatio Copper. Crosby 1-B, W-1880. Rarity-4. CONSTELATIO, Blunt Rays. Very Fine, Cuts. 118.81 grains.

DCGS# 810

From the Rancocas Creek Collection. Collector envelope with attribution notation included.

4135

1785 Nova Constellatio Copper. Crosby 4-C, W-1900. Rarity-5. CONSTELLATIO, Pointed Rays, Large Date. Very Fine, Corroded. 120.35 grains.

PCGS# 813.

From the Rancocas Creek Collection. Collector envelope with attribution notation included

4136

1785 Nova Constellatio Copper. Crosby 4-D, W-1910. Rarity-4+. CONSTELLATIO, Pointed Rays, Large Date. VF-30 (PCGS).

PCGS# 813

From Abner Kreisberg's sale of June 1963, lot 25. Kreisberg company tag with attribution and provenance notes included.

4137

1787 Massachusetts Half Cent. Ryder 4-C, W-5940. Rarity-2. Very Fine. 77.15 grains.

PCGS# 296. NGC ID: 2B22.

From the Rancocas Creek Collection. Collector envelope with attribution notation included

4138

1788 Massachusetts Half Cent. Ryder 1-B, W-6010. Rarity-2. Very Fine. 81.8 grains.

PCGS# 308.

From the Rancocas Creek Collection. Collector envelope with attribution notes included.

4139

1787 Massachusetts Cent. Ryder 2b-A, W-6040. Rarity-2. Arrows in Left Talon, Horned Eagle. Extremely Fine, Cleaned. 151.21 grains.

PCGS# 305. NGC ID: 2B26.

 $From \ the \ Ranco cas \ Creek \ Collection. \ Collector \ envelope \ with \ attribution \ notation \ included.$

4140

1787 Massachusetts Cent. Ryder 6-G, W-6140. Rarity-3+. Stout Indian, Arrows In Left Talon. Fine, Granular. 152.75 grains.

PCGS# 302. NGC ID: 2B25

From the Rancocas Creek Collection. Collector envelope with attribution notation included.

1788 Massachusetts Cent. Ryder 3-E, W-6220. Rarity-4. Slim Indian, Period After MASSACHUSETTS. EF-40 (PCGS).

PCGS# 948. NGC ID: 2B27.

Acquired February 6, 1965, source not recorded. Collector envelope with provenance notation included.

4142

1788 Massachusetts Cent. Ryder 3-E, W-6220. Rarity-4. Slim Indian, Period After MASSACHUSETTS. Fine, Environmental Damage, Cleaned. 155.84 grains.

PCGS# 948. NGC ID: 2B27.

From the Rancocas Creek Collection. Collector envelope with attribution notation included.

4143

1788 Massachusetts Cent. Ryder 7-M, W-6250. Rarity-4. Period After MASSACHUSETTS. VF-30 (PCGS).

PCGS# 688961

From our (Stack's) sale of the George O. Walton Collection, October 1963, lot 11. Lot tag included.

4144

1788 Massachusetts Cent. Ryder 11-F, W-6310. Rarity-5-. Slim Indian, Period After MASSACHUSETTS. VF Details—Obverse Scratched (NGC).

PCGS# 948. NGC ID: 2B27.

4145

1785 Connecticut Copper. Miller 2-A.1, W-2305. Rarity-5-. Bust Right, Roman Head. VF-20 (PCGS).

PCGS# 685149.

Collector envelope with attribution notation included.

4146

1785 Connecticut Copper. Miller 3.4-F.1, W-2340. Rarity-3. Bust Right. Fine, Corroded. 141.95 grains.

PCGS# 685156.

From the Rancocas Creek Collection. Collector envelope with attribution notation included.

4147

1785 Connecticut Copper. Miller 4.1-F.4, W-2355. Rarity-1. Bust Right, African Head—Struck Off Center—Fine. 120.35 grains.

PCGS# 685159

From the Rancocas Creek Collection. Collector envelope with attribution and provenance notes included.

4148

1785 Connecticut Copper. Miller 4.3-A.2, W-2365. Rarity-3. Bust Right. Extremely Fine. 138.87 grains.

PCGS# 685161.

From the Rancocas Creek Collection. Collector envelope with attribution notation included

4149

1786 Connecticut Copper. Miller 2.1-A, W-2465. Rarity-3. Mailed Bust Right, Round Head, ETLIB INDE. Extremely Fine, Cleaned. 98.75 grains.

PCGS# 686823.

From the Rancocas Creek Collection. Collector envelope with attribution and provenance notes included.

4150

1786 Connecticut Copper. Miller 5.3-N, W-2575. Rarity-2. Mailed Bust Left, Hercules Head. Fine, Granular. 115.72 grains.

PCGS# 686351.

From the Rancocas Creek Collection. Collector envelope with attribution notation included.

4151

1786 Connecticut Copper. Miller 5.11-R, W-2660. Rarity-5. Mailed Bust Left. VF-30 (PCGS).

PCGS# 686366

From Pine Tree's sale of the Elizabeth Morton Collection, October 1975 GENA '75 Sale, Part I, lot 492. Lot tag with attribution notation included.

4152

1787 Connecticut Copper. Miller 1.2-C, W-2720. Rarity-3. Mailed Bust Right, Muttonhead. Fine. 118.8 grains.

DCGS# 686403

From the Rancocas Creek Collection. Collector envelope with attribution notes included.

4153

1787 Connecticut Copper. Miller 10-E, W-2865. Rarity-5. Mailed Bust Left. Very Fine, Environmental Damage. 160.47 grains.

PCGS# 686416

From the Rancocas Creek Collection. Collector envelope with attribution notation included.

4154

1787 Connecticut Copper. Miller 11.1-E, W-2870. Rarity-2. Mailed Bust Left. Extremely Fine, Granular. 140.41 grains.

PCGS# 68641

From the Rancocas Creek Collection. Collector envelope with attribution notation included.

4155

1787 Connecticut Copper. Miller 11.2-K, W-2875. Rarity-2. Mailed Bust Left. Fine, Planchet Flaws, Scratches. 115.72 grains.

PCGS# 686418

From the Rancocas Creek Collection. Collector envelope with attribution notation included.

4156

1787 Connecticut Copper. Miller 19-g.4, W-3050. Rarity-2. Draped Bust Left—Struck Off Center—Extremely Fine, Porous. 137.32 grains.

PCGS# 685120.

From the Rancocas Creek Collection. Collector envelope with attribution notation included.

4157

1787 Connecticut Copper. Miller 31.1-r.4, W-3200. Rarity-2. Draped Bust Left. Very Fine, Damaged, Cleaned. 131.15 grains.

PCGS# 685383.

From the Rancocas Creek Collection. Collector envelope with attribution notation included.

4158

1787 Connecticut Copper. Miller 31.1-gg.1, W-3205. Rarity-3. Draped Bust Left, ETLIR. Fine, Porous, Cleaned. 129.61 grains.

PCGS# 685384

From the Rancocas Creek Collection. Collector envelope with attribution notation included.

1787 Connecticut Copper. Miller 31.2-r.3, W-3210. Rarity-1. Draped Bust Left. Very Fine. 124.98 grains.

PCGS# 685385.

From the Rancocas Creek Collection. Collector envelope with attribution notation included.

4160

1787 Connecticut Copper. Miller 32.5-aa, W-3260. Rarity-4. Draped Bust Left, FNDE. VF-30 (PCGS).

PCGS# 370. NGC ID: 2B2X.

From our (Bowers and Ruddy's) sale of the Springfield Collection, Part I, September 1981, lot 983. Lot tag with attribution notation included.

4161

1787 Connecticut Copper. Miller 33.1-Z.13, W-3310. Rarity-5-. Draped Bust Left. Fine, Porous. 128.06 grains.

PCGS# 685202

From the Rancocas Creek Collection. Collector envelope with attribution notation included.

4162

1787 Connecticut Copper. Miller 33.2-Z.12, W-3360. Rarity-1. Draped Bust Left. Fine, Planchet Flaw, Corroded. 124.98 grains.

PCGS# 685205

From the Rancocas Creek Collection. Collector envelope with attribution notation included.

4163

1787 Connecticut Copper. Miller 33.6-KK, W-3425. Rarity-2. Draped Bust Left, Triple Ribbon Ends. Fine, Corroded. 146.58 grains.

PCGS# 685172.

 $From \ the \ Ranco cas \ Creek \ Collection. \ Collector \ envelope \ with \ attribution \ notation \ included.$

4164

1787 Connecticut Copper. Miller 33.7-r.2, W-3440. Rarity-1. Draped Bust Left. Fine, Bent, Porous. 137.32 grains.

PCGS# 685713.

From the Rancocas Creek Collection. Collector envelope with attribution notation included.

4165

1787 Connecticut Copper. Miller 33.19-Z.1, W-3645. Rarity-4. Draped Bust Left, INDE/INDN. Fine, Porous. 100.2 grains.

PCGS# 685143.

From the Rancocas Creek Collection. Earlier from McCawley and Grellman's sale of the Jesse Patrick Collection of Connecticut Coppers, November 2002 Eighth Annual C-4 Convention Sale, lot 157. Clipped C-4 lot description and collector envelope and tags with attribution and provenance notes included.

4166

1787 Connecticut Copper. Miller 33.29-gg.1, W-3810. Rarity-5. Draped Bust Left, ETLIR. Fine, Corrosion Spot. 115.7 grains.

PCGS# 686391

From the Rancocas Creek Collection. Collector envelope with attribution notation included.

4167

1787 Connecticut Copper. Miller 33.37-Z.9, W-3915. Rarity-5-. Draped Bust Left. Fine, Light Porosity. 146.58 grains.

PCGS# 686341.

From the Rancocas Creek Collection. Collector envelope with attribution notation included.

4168

1787 Connecticut Copper. Miller 33.37-Z.9, W-3915. Rarity-5-. Draped Bust Left. Very Good, Scratches. 128.0 grains.

PCGS# 686341.

From the Rancocas Creek Collection. Collector envelope with attribution notation included.

4169

1787 Connecticut Copper. Miller 37.4-k.1, W-4115. Rarity-3. Draped Bust Left. Very Good, Cleaned. 143.49 grains.

PCGS# 687368

From the Rancocas Creek Collection. Collector envelope with (incorrect) attribution notation included.

4170

1787 Connecticut Copper. Miller 38-l.2, W-4200. Rarity-4. Draped Bust Left, AUCIORI. Very Fine. 124.98 grains.

PCGS# 687279

From the Rancocas Creek Collection. Collector envelope included.

4171

1787 Connecticut Copper. Miller 38-GG, W-4205. Rarity-4. Draped Bust Left, AUCIORI. Very Good. 143.49 grains.

PCGS# 687280.

 $From \ the \ Ranco cas \ Creek \ Collection. \ Collector \ envelope \ with \ attribution \ notation \ included.$

4172

1787 Connecticut Copper. Miller 39.1-h.1, W-4210. Rarity-5. Draped Bust Left, AUCTOBI. Fine, Pitted, Cleaned. 149.67 grains.

PCGS# 687271.

From the Rancocas Creek Collection.

4173

1787 Connecticut Copper. Miller 42-kk.2, W-4245. Rarity-5-. Draped Bust Left, AUCTOPI, ET IIB. Very Fine, Granular. 131.15 grains.

PCGS# 687373.

From the Rancocas Creek Collection. Collector envelope with attribution notation included.

4174

1787 Connecticut Copper. Miller 42-kk.2, W-4245. Rarity-5-. Draped Bust Left, AUCTOPI, ET IIB. Very Good, Corroded. 137.3 grains.

PCGS# 687373

 $From \ the \ Ranco cas \ Creek \ Collection. \ Collector \ envelope \ with \ attribution \ notation \ included.$

4175

1787 Connecticut Copper. Miller 44-W.4, W-4260. Rarity-4+. Draped Bust Left. VF-30 (PCGS).

PCGS# 370. NGC ID: 2B2X.

1788 Connecticut Copper. Miller 2-D, W-4405. Rarity-1. Mailed Bust Right. Fine, Cleaned. 112.63 grains.

PCGS# 687248.

 $From \ the \ Rancocas \ Creek \ Collection. \ Collector \ envelope \ with \ attribution \ notation \ included.$

4177

1788 Connecticut Copper. Miller 13-A.1, W-4535. Rarity-4+. Mailed Bust Left, CONNLC—Struck Off Center—Very Good, Granular. 128.06 grains.

PCGS# 687232.

From the Rancocas Creek Collection. Collector envelope with attribution notation included.

4178

1788 Connecticut Copper. Miller 15.1-L.1, W-4585. Rarity-4. Draped Bust Left. Good, Porous. 100.29 grains.

PCGS# 687235

From the Rancocas Creek Collection. Collector envelope with attribution notation included.

4179

1788 Connecticut Copper. Miller 16.1-D, W-4595. Rarity-3. Draped Bust Left. EF-45 (PCGS).

PCGS# 409.

Collector envelope with attribution notation included.

4180

1788 Connecticut Copper. Miller 16.1-H, W-4600. Rarity-4. Draped Bust Left. Fine, Corroded. 132.69 grains.

PCGS# 687238.

From the Rancocas Creek Collection. Collector envelope with attribution notation included.

4181

Lot of (7) Connecticut Coppers. Included are: 1785 Bust Right; (2) 1787 Mailed Bust Left; and (4) 1787 Draped Bust Left. All examples are well circulated, and all are impaired, mostly due to surfaces and/or environmental damage. **This is a must see, sold as is, no return lot**.

From the Rancocas Creek Collection. Collector envelopes with our consignor's attribution notes included.

4182

1787 Machin's Mills Halfpenny. Vlack 17-87B, W-7910. Rarity-2. GEORGIVS III, Group II. Very Fine, Corroded. 117.26 grains.

PCGS# 826956.

From the Rancocas Creek Collection.

4183

1787 Machin's Mills Halfpenny. Vlack 18-87C, W-7930. Rarity-4. GEORGIVS III, Group III. Very Fine. 114.18 grains.

PCGS# 826958

From the Rancocas Creek Collection. Collector envelope with attribution notation included.

4184

1787 Machin's Mills Halfpenny. Vlack 19-87C, W-7940. Rarity-2—Planchet Cutter Impression—Very Fine, Light Porosity. 118.8 grains.

PCGS# 826959.

From the Rancocas Creek Collection. Collector envelope with attribution notes included.

4185

1787 Machin's Mills Halfpenny. Vlack 21-87D, W-7970. Rarity-4. GEORGIVS III, Group III. Good, Corroded. 103.38 grains.

PCGS# 826960

From the Rancocas Creek Collection. Collector envelope with attribution notation included.

4186

1787 Nova Eborac Copper. W-5755. Rarity-3. Medium Bust, Seated Figure Left. Very Fine, Granular. 123.44 grains.

PCGS# 478. NGC ID: 2B4A.

From the Rancocas Creek Collection. Collector envelope with attribution notation included.

4187

1787 Nova Eborac Copper. W-5755. Rarity-3. Medium Bust, Seated Figure Left. Fine, Damaged. 100.3 grains.

PCGS# 478. NGC ID: 2B4A.

From the Rancocas Creek Collection. Collector envelope with attribution notation included.

4188

1786 New Jersey Copper. Maris 18-M, W-4890. Rarity-2. Wide Shield, Bridle. Very Fine, Obverse Marks. 152.7 grains.

PCGS# 498

From the Rancocas Creek Collection. Collector envelope with attribution notes included.

4189

Lot of (4) 1787 New Jersey Coppers. A well circulated quartet, all examples are impaired, mostly extensively so. This is a must see, sold as is, no return lot.

From the Rancocas Creek Collection. Collector envelopes with our consignor's attribution notes included.

4190

1786 Vermont Copper. RR-9, Bressett 7-F, W-2040. Rarity-3. Baby Head—Planchet Clip—Fine, Heavy Porosity. 180.0 grains.

PCGS# 548. NGC ID: 2B58.

From the Rancocas Creek Collection. Collector envelope with attribution notation included.

4191

1786 Vermont Copper. RR-11, Bressett 9-H, W-2050. Rarity-4. Bust Left. Fine, Flawed Planchet. 100.29 grains.

PCGS# 551. NGC ID: 2B59.

From the Rancocas Creek Collection. Collector envelope with attribution notation included.

4192

1787 Vermont Copper. RR-13, Bressett 17-V, W-2255. Rarity-1. BRITANNIA. Very Fine, Heavy Porosity. 114.18 grains.

PCGS# 554. NGC ID: 2B5C.

From the Rancocas Creek Collection. Collector envelope with attribution notation included.

4193

1788 Vermont Copper. RR-16, Bressett 15-S, W-2120. Rarity-1. Bust Right. Very Good, Environmental Damage. 108.01 grains.

PCGS# 563, NGC ID: 2B5D.

From the Rancocas Creek Collection. Henry Chapman tag and "No. 70" envelope included, both undated, as well as collector envelope with attribution notation.

1788 Vermont Copper. RR-24, Bressett 16-S, W-2200. Rarity-3. Bust Right—Planchet Clip—Very Good, Corroded. 101.83 grains.

PCGS# 563. NGC ID: 2B5D.

From the Rancocas Creek Collection. Collector envelope with attribution notation included.

4195

"1781" (ca. 1820) North American Token. W-13980. Rarity-2. Very Fine. 121.89 grains.

PCGS# 589. NGC ID: 2B5H.

From the Rancocas Creek Collection. Collector envelope with attribution notation included.

4196

1787 Auctori Plebis Token. W-8770. Rarity-3. EF-45 (PCGS).

PCGS# 601. NGC ID: 26XG.

Acquired from "JCS," November 29, 1974. Collector envelope with provenance notes included.

4197

1787 Auctori Plebis Token. W-8770. Rarity-3. Extremely Fine, Bent. 120.4 grains.

PCGS# 601.

From the Rancocas Creek Collection. Collector envelope with attribution notes included.

4198

From the Rancocas Creek Collection. Collector envelope with attribution notes included.

4223

1787 Fugio Cent. Pointed Rays. Newman 15-Y, W-6915. Rarity-2. STATES UNITED, 4 Cinquefoils, 8-Pointed Stars on Label. VF Details—Environmental Damage (PCGS).

PCGS# 898

Tattered collector envelope and Picker pouch with attribution notation included.

4224

1787 Fugio Cent. Pointed Rays. Newman 15-Y, W-6915. Rarity-2. STATES UNITED, 4 Cinquefoils, 8-Pointed Stars on Label. Fine, Bent. 115.72 grains.

PCGS# 878505.

From the Rancocas Creek Collection. Collector envelope with attribution notation included.

4225

1787 Fugio Cent. Pointed Rays. Newman 15-Y, W-6915. Rarity-2. STATES UNITED, 4 Cinquefoils, 8-Pointed Stars on Label. Very Good, Corrosion. 132.69 grains.

PCGS# 878505

From the Rancocas Creek Collection. Collector envelope with attribution notation included.

4226

Netherlands—West Friesland. 1670 48 Stuivers, or Lion Daalder. KM-14.2, Dav-4870. VF Details—Cleaned (PCGS).

4227

Lot of (4) Colonial and Early Federal Era Coppers. Included are: 1788 Massachusetts cent; 1778 Machin's Mills halfpenny; 1788 Vermont copper; and 1781 North American token. All examples are well circulated, and all are extensively impaired. This is a must see, sold as is, no return lot.

From the Rancocas Creek Collection. Collector envelopes with our consignor's attribution notes included.

4228

Lot of (4) Washington Pieces. Included are: 1783 Unity States cent; (2) "1783" (ca. 1820) Military Bust copper, Large Military Bust; and undated (ca. 1820) Double-Head cent. All examples are circulated, and all are impaired due to cleaning, environmental or surface damage. This is a must see, sold as is, no return lot.

From the Rancocas Creek Collection. Collector envelopes with attribution notes included.

December 11, 1899 letter from Treasury Department employee W.R. Russell to Treasurer D.N. Morgan concerning the initial distribution of the 1900 Lafayette commemorative silver dollars. The letter is on "No. 17 TREASURY DEPARTMENT" stationary and is handwritten in cursive:

"US TREASURERS OFFICE

"DEC 11, 1899

"HON. D.N. MORGAN

"DEAR SIR

"I HAVE YOURS 9TH [illegible] ENCLOSING \$1. IN PAYMENT OF ASSESSMENT [illegible]. THE ENCLOSED CIRCULAR MEMORANDUM WHICH MS. MELINE HAD PRINTED WILL GIVE YOU THE DESIRED INFORMATION IN REGARD TO THE LAFAYETTE DOLLARS. THEY HAVE ALL BEEN DELIVERED TO THE COMMISSION, AND ARE FOR SALE AT \$2. EACH, IN CHICAGO.

"VERY TRULY YOURS

"WR RUSSELL"

Also included in this lot is a copy of *The Commemorative Trail*, Fall 2003, Vol. 20, No. 3, that contains an article by Anthony J. Swiatek concerning this letter and observing that the date of delivery of these coins to the Commission suggested by Russell (prior to December 11, 1899) is incorrect. The article is on pages 28 and 29 of the publication, and a photocopy of this letter is on page 30. The letter is in Fine to Very Fine condition with several light folds, minor scuffing and foxing, but no significant flaws. (Total: 2 items)

5782

1936-S Bay Bridge Opening, MS-66 (PCGS), certified as the 82th coin struck by accompanying letter from San Francisco Mint Superintendent Peter J. Haggerty. The supporting materials included not only the letter, but what appears to be the mailing envelope, as well as the small manila envelope stamped 82 that once housed the coin. All are presented together in a single custom black plastic holder, printed at top 1936 BAY BRIDGE / U.S. COMMEMORATIVE HALF DOLLAR / OFFICIAL PRESENTATION PIECE - NOVEMBER 4, 1936 / (AMONG FIRST 100 STRUCK, TOTAL MINTAGE 71,424). The typed letter is dated November 4, 1936, is signed by Superintendent Haggerty, and states:

"This is the certify that the accompanying SAN FRANCISCO-OAKLAND BAY BRIDGE COMMEMORATIVE HALF DOLLAR was the eighty-second piece struck of this coinage at the Mint of the United States at San Francisco, California, on November 4, 1936."

PCGS# 9288. NGC ID: BYGB.

5806

1936 Cleveland Centennial/Great Lakes Exposition, Mint State (Uncertified), housed in original Wynette leatherette single holder with notarization on back as 96th example struck. The holder and notarization are as pictured on page 318 of the 2012 Swiatek reference on commemorative coins. The coin is number 96, the signatures of treasurer and notary public are crisp, and a third name is penciled in the middle of the notarization (possibly HOWARD H. HOLT). The corners of the holder are taped and it has a few scuffs on both the front and back, but otherwise there are no significant flaws. (Total: 1 coin; 1 holder)

PCGS# 9288. NGC ID: BYGB.

PCGS# 9293. NGC ID: BYGE

1936 Columbia, South Carolina Sesquicentennial Wooden Nickel Money recovered from the "Time Capsule" of the Sesquicentennial Celebration. The wooden nickel is in the shape of a piece of paper money and measures 120.2 mm x 53.5 mm. It is accompanied by a typed letter on Century III Columbia Bicentennial Celebration stationary signed by John W. Flitter, Coin and Wooden Money Historian, Columbia Bicentennial Committee. The letter certifies this wooden money as one of 400 from the original 24,000 pieces produced that were recovered from the "Time Capsule" of the 1936 Sesquicentennial Celebration. There are no coins in this lot. (Total: 1 wooden nickel money; 1 letter)

5823

1892 Columbian Exposition, Mint State (Uncertified), with Wells, Fargo & Company distribution holder and envelope. This holder type is mentioned, although not pictured in the 2012 Swiatek reference on U.S. Mint commemorative coinage. The present example has a few light vertical bends and a bump at one corner, but otherwise the card is in excellent condition. A black manila envelope is also included, which is quite tattered. (Total: 1 coin; 1 holder; 1 envelope)

PCGS# 9296. NGC ID: BYGF.

5824

1892 Columbian Exposition, About Uncirculated, Environmental Damage (Uncertified), with original round leather purselike holder issued by Merchants and Manufacturers National Bank, Pittsburgh, Pennsylvania. This is the holder type pictured at right at the bottom of page 43 in the 2012 Swiatek reference on U.S. commemorative coinage, the front printed in gold lettering MERCHANTS AND / MANUFACTURERS / NATIONAL BANK, / PITTSBURGH, PA. The holder is in Extremely Fine condition, gently used with no significant blemishes. (Total: 1 coin; 1 holder)

5847

Taylor, Albert Price. Sesquicentennial Celebration of Captain Cook's Discovery of Hawaii (1778-1928) / Held in the Hawaiian Islands August 15 to 21, 1928. Published by the Captain Cook Sesquicentennial Commission and the Archives of Hawaii Commission, 1929. Approximately 7 inches x 10.5 inches x 0.5 inches. 105 pages, liberally illustrated. First page with inscription plate to Viola Rose Lilly, Honolulu, Hawaii, October 7, 1929, signed C. SCHARK. Much information is included, such as a two-page listing of medallic tributes to Captain Cook and a section about a Captain Cook postage stamp issue. Front and back covers with considerable chipping and folds around edges, and moderate foxing. Inside front and back covers also with foxing, final blank page torn. The actual pages of the book are very nicely preserved with no blemishes of note.

1925 Stone Mountain Memorial, Mint State (Uncertified), housed in original cellophane sleeve with original Citizens & Southern National Bank card. Housed in the original cellophane sleeve and accompanied by a card of the type illustrated on page 181 of the 2012 book Encyclopedia of the Commemorative Coins of the United States by Anthony Swiatek. On the card is the printing: STONE MOUNTAIN MEMORIAL / HALF DOLLAR / FROM THE COLLECTION OF / BARNARD BARUCH / PRICE / \$3.25 / SOLD FOR THE BENEFIT OF / THE UNITED DAUGHTERS OF THE / CONFEDERACY / SALES AGENT / THE CITIZENS & SOUTHERN NATIONAL BANK / BROAD AND MARIETTA STREET BRANCH / ATLANTA, GEORGIA. The card is in excellent condition apart from a horizontal hold through the upper third. The staple that once attached the coin's cellophane sleeve still attached to the card, but the sleeve itself is broken and no longer affixed with the coin. According to the Swiatek-Breen commemorative reference, the distribution of Bernard Baruch's coins took place in 1928. (Total: 1 coin; 1 card)

PCGS# 525157.

5944

1925 Stone Mountain Memorial—Counterstamped D.T.—About Uncirculated (Uncertified). This is an enigmatic counterstamp in the series, although Charles B. Rogers (*Unlocking the Mystery of the Counterstamp Stone Mountain Confederate Memorial Half Dollar*, 2019) observes that the D and periods match those of the D.C. counterstamped coins, with the T matching the style of others counterstamped with this letter.

5985

(possibly ca. 1930s) Leather Case for a Five-Piece of Panama-Pacific Exposition Commemorative Coins. An intriguing item, the first of its kind that your cataloger (JLA) can ever recall handling. The black leather case measures 127 mm x 128 mm x 27 mm, and is modeled loosely on the original boxes of issue from the 1915 Exposition. The top lid of the case is printed PANAMA PACIFIC / EXPOSITION / 1915. There is no printing on the interior, which is cream-colored plush inside the lid with a red felt display area that contains slots for each of the five Panama-Pacific Exposition commemorative coins: half dollar; gold dollar; quarter eagle; \$50 round; and \$50 octagonal. The case is in excellent condition with a fully functional clasp and no notable flaws. Obviously an after-market production, but an early one, although our dating to the 1930s is without supporting evidence. There are no coins in this lot.

For Foreign Banks*, please direct your bank wire transfer to:

Bank Name: CIBC Bank USA Account Name: Stacks-Bowers Numismatics LLC International Swift Code: PVTBUS44 Address: 120 South LaSalle Street. Chicago, IL 60603 Account Number: 2612038

*Bank wires sent from a foreign bank are subject to an international bank wire fee of \$35. If an international order will be settled using a different form of payment, please contact us by phone or email to have the wire fee removed. If the wire will be sent in any currency other than USD, Stack's Bowers Galleries needs to be contacted prior to the transfer in order to arrange for an intermediary bank.

IMPORTANT: Please have your bank add the <u>Invoice Number</u> or <u>Your Name</u> on the wire information.

Terms & Conditions – Showcase and Collectors Choice Auctions

- 1. Auction Basics. This is a public auction sale ("Auction Sale") conducted by bonded auctioneers, Stack's Bowers Galleries or Stack's Bowers and Ponterio (hereinafter referred to as "Auctioneer" and at times as "Stack's Bowers"). Bidding in this Auction Sale constitutes acceptance by you ("Bidder") of all the Terms of Sale stated herein. Bidders may include consignors who may bid and purchase lots in the Auction Sale consigned by the consignor or by other consignors pursuant to their consignment agreement with Stack's Bowers ("Consignor" or "Consignors"). A Consignor that bids on their own lots in the Auction Sale may pay a different fee than the Buyer's Premium charged to all other Buyers. Stack's Bowers reserves the right to include in any auction sale its own material as well as material from affiliated or related companies, principals, officers or employees. Stack's Bowers may have direct or indirect interests in any of the lots in the auction and may collect commissions. THE TWO PRECEDING SENTENCES SHALL BE DEEMED A PART OF THE DE-SCRIPTION OF ALL LOTS CONTAINED IN THE CATALOG. Where the Consignor has repurchased a lot and the lot is either returned to the Consignor or otherwise dealt with or disposed of in accordance with the Consignor's direction, or pursuant to contractual agreement, Stack's Bowers reserves the right to so note in the prices realized or to omit a price from the prices realized. Stack's Bowers and its affiliates may bid for their own account at any auction. Stack's Bowers and its affiliates may have information about any lot that is not known publicly, and Stack's Bowers and its affiliates reserves the right to use such information, in a manner determined solely by them and for their benefit, without disclosing such information in the catalog, catalog description or at the auction. Bidder acknowledges and agrees that Stack's Bowers and its affiliates are not required to pay a Buyer's Premium, or other charges that other Bidders may be required to pay and may have access to information concerning the lots that is not otherwise available to the public. Any claimed conflict of interest or claimed competitive advantage resulting therefrom is expressly waived by all participants in the Auction Sale. Lots may carry a reserve ("Reserve"). A Reserve is a price or bid below which the Auctioneer will not sell an item or will repurchase on behalf of the Consignor or for Stack's Bowers. Reserves may be confidential and not disclosed. The Buyer is the Bidder who makes the highest bid accepted by the Auctioneer, and includes the principal of any Bidder acting as an agent.
- 2. Descriptions and Grading. Bidder acknowledges that grading of most coins, currency and cryptocurrency tokens in this Auction has been determined by independent grading services, and those that are not may be graded by Stack's Bowers. Grading of rare coins, currency and crypto tokens is subjective and, even though grading has a material effect on the value of the coins, currency and cryptocurrency tokens, grading may differ among independent grading services and among numismatists. Stack's Bowers is not responsible for the grades assigned by independent grading services, and makes no warranty or representation regarding such grades. Bidder further acknowledges and agrees that grades assigned by Stack's Bowers and lot descriptions are based solely upon an examination of the coins, currency and cryptocurrency tokens and are intended to identify coins, currency and cryptocurrency and note any perceived characteristics. However, coin grading and descriptions are subjective. Stack's Bowers does not warrant the accuracy of such grading or descriptions, nor do they in any way form the basis for any bid. All photographs in this catalog are of the actual items being sold but may not be the actual size or to scale.
- 3. The Bidding Process. The Auctioneer shall have the right to open or accept the bidding on any lot by placing a bid on behalf of the Consignor or his or her agent; a Bidder by mail, telephone, Internet or telefax; or any other participant in the Auction Sale. Bids must be for an entire lot and each lot constitutes a separate sale. All bids must be on increment as established by the Auctioneer, or half increment (a cut bid). Non-conforming bids will be rounded down to the nearest half or full increment and this rounded bid will be the bidder's high bid. No lot will be broken up unless otherwise permitted by the Auctioneer. Lots will be sold in their numbered sequence unless Auctioneer directs otherwise. All material shall be sold in separate lots to the highest Bidder as determined by the Auctioneer. Auctioneer shall have the right in its sole and absolute discretion to accept or decline any bid, establish bid increments, challenge any bid or bidding increment, to reduce any mail bid received, adjudicate all bidding disputes, to exclude any bidder and to determine the prevailing bid. The Auctioneer shall have the right, but not the obligation, to rescind the acceptance of any bid and place the lot(s) for Auction Sale again. Auctioneer's decision on all bidding disputes shall be binding and final. For the mail and Internet Bidder's protection, no "unlimited" or "buy" bids will be accepted. When identical bids are received for a lot, preference is given to the first bid received as determined by the Auctioneer. A mail bid will take precedence over an identical floor bid; a Floor Bidder, Telephone Bidder and Live Internet Bidder must bid higher than the highest mail bid to be awarded any lot. Cut bids are only accepted on bids greater than \$500 and each bidder may only execute one cut bid per lot. Bids will not be accepted from persons under eighteen (18) years of age without

a parent's written consent which acknowledges the Terms of Sale herein and agrees to be bound thereby on behalf of the underage Bidder. The auction sale is complete when the Auctioneer so announces by the fall of the hammer or in any other customary manner.

THIS IS NOT AN APPROVAL SALE. Bidders who physically attend the Auction sale, either personally or through an agent ("Floor Bidders") should carefully examine all lots which they are interested in purchasing. Bidders who bid by telephone, either personally or through an agent, or through our live auction software receive a similar benefit as Floor Bidders in being able to actively participate in the live Auction Sale ("Telephone Bidders" and "Live Internet Bidders"). Except as otherwise expressly provided in these Terms of Sale, NO PURCHASED ITEMS MAY BE RETURNED FOR ANY REASON. All prospective Bidders who examine the lot(s) prior to the Auction Sale personally assume all responsibility for any damage that Bidder causes to the lot(s). Stack's Bowers shall have sole discretion in determining the value of the damage caused, which shall be promptly paid by such Bidder.

Certain auctions or auction sessions, will be conducted exclusively over the Internet, and bids will be accepted only from pre-registered Bidders.

STACK'S BOWERS IS NOT RESPONSIBLE FOR ANY ERRORS IN BIDDING. All Bidders should make certain to bid on the correct lot and that the bid is the bid intended. Once the hammer has fallen and the Auctioneer has announced the Buyer, the Buyer is unconditionally bound to pay for the lot, even if the Buyer made a mistake. Stack's Bowers reserves the right to withdraw any lot at any time, even after the hammer has fallen, until the Buyer has taken physical possession of the lot. No participant in the Auction Sale shall have a right to claim any damages, including consequential damages if a lot is withdrawn, even if the withdrawal occurs after the Auction Sale.

- 4. Bidder Registration Required. All persons seeking to bid must complete and sign a registration card either at the auction or online, or otherwise qualify to bid, as determined in the sole discretion of the Auctioneer. By submitting a bid, the Bidder acknowledges that Bidder has read the Terms and Conditions of Auction Sale, the descriptions for the lot(s) on which they have bid, and that they agree to be bound by these Terms of Sale. This agreement shall be deemed to have been made and entered in California. The Bidder acknowledges that the invoice describing a lot by number incorporates the catalog and Terms of Sale. Person appearing on the OFAC list are not eligible to bid.
- 5. Buyer's Premiums. A premium of twenty percent (20%) based upon the total amount of the hammer (minimum of \$20), will be added to all purchases of individual lots, regardless of affiliation with any group or organization (the "Buyer's Premium"). A reacquisition charge may apply to Consignors pursuant to a separate agreement, which may be higher or lower than the Buyer's Premium.
- 6. Payment. Payment is due immediately upon the fall of the auctioneer's hammer. Payment is delinquent and in default if not received in full, in good funds, within fourteen (14) calendar days of the Auction Sale (the "Default Date"), without exception, time being of the essence. Unless otherwise agreed in writing prior to the Auction Sale, all auction sales are payable strictly in U.S. Dollars or Hong Kong Dollars. All invoices will be made in United States Dollars. If paying in Hong Kong Dollars, Buyer's invoices will be credited with the amount of U.S. Dollars at the rate established by the Auctioneer at the time of the Auction Sale. Payments may be made by credit card, Paypal, Union Pay, check, wire transfer, money order and cashier's check. Cash transactions will be accepted in the sole discretion of Stack's Bowers, and if accepted, for any cash transaction or series of transactions exceeding \$10,000, a Treasury Form 8300 will be filed. Contact Stack's Bowers for wiring instructions before sending a wire. Bank wires sent from a foreign bank are subject to an international bank wire fee of \$35. We accept payment by Visa, Mastercard, American Express, Discover or Paypal for invoices up to \$2,500, with a maximum of \$10,000 in any 30 day period. All payments are subject to a clearing period. Checks drawn on U.S. banks will be subject to up to a 10 business day hold, and checks drawn on foreign banks will be subject to a 30 day hold. Stack's Bowers reserves the right not to release lots for which good funds have not yet been received. On any past due accounts, Stack's Bowers reserves the right, without notice, to extend credit and impose carrying charges (as described below). Buyers agree to pay reasonable attorney's fees and cost incurred to collect past due accounts. Any invoice not paid by the Default Date will bear a five percent (5%) late fee on the invoice amount. Buyers personally and unconditionally guarantee payment in full of all amounts owed to Stack's Bowers. Any person submitting bids on behalf of a corporation or other entity, by making such bid, agrees to be personally jointly and severally liable for the payment of the purchase price and any related charges and the performance

Terms & Conditions - Showcase and Collectors Choice Auctions (cont.)

of all Buyer obligations under these Terms of Sale and Stack's Bowers reserves the right to require a written guarantee of such payments and obligations. Bidders who have not established credit with Stack's Bowers must furnish satisfactory information and credit references and/or deposit at least twenty-five percent (25%) of their total bids for that Auction Sale session(s) or such other amount as Stack's Bowers may, in its sole and absolute discretion require before any bids from such Bidder will be accepted. Deposits submitted will be applied to purchases. Any remaining deposits will be promptly refunded, upon clearance of funds.

7. Sales Tax. Buyers will be charged all applicable sales tax unless a valid Resale Certificate has been provided to the Auctioneer prior to the auction. Should state sales tax become applicable in the delivery state prior to delivery of the property on the invoice, the Buyer agrees to pay all applicable state sales tax as required by the delivery state as of the shipping date. In the event any applicable sales tax is not paid by Buyer that should have been paid, even if not such tax was not charged or collected by Stack's Bowers by mistake, error, negligence or gross negligence, Buyer nonetheless acknowledges responsibility to pay such sales tax and remains fully liable for and agrees to promptly pay such taxes on demand, together with any interest or penalty that may be assessed by the taxing authority and agrees to indemnify and hold Auctioneer harmless from any applicable sales tax, interest or penalties due. Lots from different Auctions may not be aggregated for sales tax purposes.

8. Financial Responsibility. In the event any applicable conditions of these Terms of Sale herein are not complied with by a Buyer or if the Buyer fails to make payment in full by the Default Date, Stack's Bowers reserves the right, in its sole discretion, in addition to all other remedies which it may have at law or in equity to rescind the sale of that lot or any other lot or lots sold to the defaulting Buyer, retaining all payments made by Buyer as liquidated damages, it being recognized that actual damages may be speculative or difficult to compute, and resell a portion or all of the lots held by Stack's Bowers, in a commercially reasonable manner, which may include a public or private sale, in a quantity sufficient in the opinion of Stack's Bowers to satisfy the indebtedness, plus all accrued charges, and Stack's Bowers may charge a seller's commission that is commercially reasonable. More than one such sale may take place at the option of Stack's Bowers. If Stack's Bowers resells the lots, Buyer agrees to pay for the reasonable cost of such sale, together with any incidental costs of sale, including reasonable attorney's fees and costs, cataloging and any other reasonable charges. Notice of the sale shall be by U.S.P.S. Certified Mail, Return Receipt Requested to the address utilized on the Bid Sheet, Auction Consignment and Security Agreement or other last known address by Stack's Bowers. The proceeds shall be applied first to the satisfaction of any damages occasioned by Buyer's breach, then to any other indebtedness owed to Stack's Bowers, including without limitation, commissions, handling charges, carrying charges, the expenses of both sales, seller's fees, reasonable attorneys' fees, costs, collection agency fees and costs and any other costs or expenses incurred. Buyer shall also be liable to Stack's Bowers for any deficiency if the proceeds of such sale or sales are insufficient to cover such amounts.

Buyer grants to Stack's Bowers, its affiliates and assignees, the right to offset any sums due, or found to be due to Stack's Bowers, and to make such offset from any past, current, or future consignment, or purchases that are in the possession or control of Stack's Bowers; or from any sums due to Buyer by Stack's Bowers, its affiliates and assignees. In addition, defaulting Buyers will be deemed to have granted to Stack's Bowers, its affiliates and assignees, a security interest in: (x) the purchased lots and their proceeds, and (y) such sums or other items and their proceeds, in the possession of Stack's Bowers, its affiliates or assignees, to secure all indebtedness due to Stack's Bowers and its affiliated companies, plus all accrued expenses, carrying charges, seller's fees, attorney fees, and costs, until the indebtedness is paid in full. Buyer grants Stack's Bowers the right to file a UCC-1 financing statement for such items, and to assign such interest to any affiliated or related company or any third party deemed appropriate by Stack's Bowers. If the auction invoice is not paid for in full by the Default Date, a carrying charge of one-and-one-half percent (1-1/2%) per month may be imposed on the unpaid amount until it is paid in full. In the event this interest rate exceeds the interest permitted by law, the same shall be adjusted to the maximum rate permitted by law, and any amount paid in excess thereof shall be allocated to principal. Buyer agrees to pay all reasonable attorney's fees, court costs and other collection costs incurred by Stack's Bowers or any affiliated or related company to collect past due invoices or to interpret or enforce the terms hereof or in any action or proceeding arising out of or related to the Auction Sale. Stack's Bowers reserves the right to assign its interest to any third party. To the extent that the Buyer for any lot consists of more than one person or entity, each such person or entity is jointly and severally liable for all obligations of the Buyer, regardless of the title or capacity of such person or entity. Stack's Bowers shall have

all the rights of a secured creditor under Article 9 of the California Commercial Code and all rights of the consignor to collect amounts due from the Buyer, whether at law or equity.

9. Shipping. It is the Buyer's responsibility to contact Stack's Bowers after the sale to make shipping and packaging arrangements. Due to the fragile nature of some lots, Stack's Bowers may elect not to assume responsibility for shipping or packing, or may charge additional shipping and handling. Stack's Bowers, in its sole discretion, may not ship to select countries. Lots indicated as being "framed" or that are specifically identified in the catalog are shipped at Buyer's risk. All taxes, postage, shipping, if applicable, handling, insurance costs, the Buyer's Premium, and any other fees required by law to be charged or collected will be added to the invoice for any lots invoiced to Buyer. All lots shipped to foreign countries will be billed an additional one-half percent (1/2%) for insurance (minimum of \$10). For any lots delivered outside the country where the auction is hosted, the declaration value shall be the item'(s) hammer price plus its buyer's premium. Auctioneer shall not be liable for any loss caused or resulting from seizure or destruction under quarantine or customs regulation or confiscation by order of any government or public authority. Buyer shall be responsible for paying all applicable taxes, duties and customs charges for all lots delivered outside the country where the auction is hosted. All lots will be shipped FOB Destination, freight prepaid and charged back. Title and risk of loss pass to the Buyer at the destination upon tender of delivery. Acceptance of delivery constitutes acceptance of the purchased lots. Inspection of the purchased lots is not required for acceptance. Any and all claims based upon Buyer's failure to receive a purchased lot, Buyer's receipt of a lot in damaged condition, or otherwise related to delivery, must be received in writing by Stack's Bowers no later than the earlier of thirty (30) days after payment, or the date of the Auction Sale (the "Outside Claim Date"). As Buyers may not receive notification of shipment, it is Buyer's responsibility to keep track of the Outside Claim Date and make timely notification of any such claim. The failure to make a timely claim, time being of the essence, shall constitute a waiver of any such claim. Orders paid by credit card will only be shipped to the verified address on file with the credit card merchant.

10. DISCLAIMER AND WARRANTIES. NO WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE IS MADE OR IMPLIED ON ANY LOT. NO WARRANTY, WHETHER EXPRESSED OR IMPLIED, IS MADE WITH RESPECT TO ANY LOT EXCEPT FOR WARRANTY OF TITLE, AND IN THE CASE OF TITLE, AUCTIONEER IS SELLING ONLY THAT RIGHT OR TITLE TO THE LOT THAT THE CONSIGNOR MAY HAVE AS OF THE AUCTION SALE DATE. ALL LOTS ARE SOLD "AS IS" AND WITH ALL FAULTS. PURCHASER HEREBY ASSUMES ALL RISKS CONCERNING AND RELATED TO THE GRADING, QUALITY, DESCRIPTION, CONDITION, AND PROVENANCE OF A LOT.

a. COINS, CURRENCY AND CRYPTOCURRENCY TOKENS LISTED IN THIS CATALOG AS GRADED AND ENCAPSULATED BY PCGS, NGC, ANACS, ICG, PCGS CURRENCY, PMG, PCGS BANKNOTE GRADING, CMC OR ANY OTHER THIRD PARTY GRADING SERVICE ARE SOLD "AS-IS" EXCEPT AS EXPRESSLY SET FORTH HEREIN AND MAY NOT BE RETURNED FOR ANY REASON WHATSOEVER BY ANY BUYER. ALL THIRD PARTY GRADING SERVICE GUARANTEES, INCLUDING AUTHENTICITY, ARE THE SOLE RESPONSIBILITY OF THE THIRD PARTY GRADING SERVICE AND NOT WARRANTIES OR GUARANTEES OF THE AUCTIONEER. BUYERS SHOULD CONTACT THESE THIRD PARTY GRADING SERVICES DIRECTLY WITH RESPECT TO ANY CLAIMS OR QUESTIONS THEY MAY HAVE CONCERNING THEIR GUARANTEES AND WARRANTIES. BUYERS ACKNOWLEDGE AND AGREE THAT AUCTIONEER IS NOT BOUND BY OR LIABLE FOR ANY OPINION OR CERTIFCATION BY ANY THIRD PARTY GRADING SERVICE.

b. In the case of non-certified coins, currency and cryptocurrency tokens that have neither been examined by the Buyer prior to the Auction Sale, nor purchased by the Buyer or Buyer's agent at the Auction Sale, if it is determined in a review by Stack's Bowers that there is a material error in the catalog description of a non-certified coin, currency, or cryptocurrency token such lot may be returned, provided written notice is received by Stack's Bowers no later than seventy-two (72) hours of delivery of the lots in question, and such lots are returned and received by Stack's Bowers, in their original, sealed containers, no later than fourteen (14) calendar days after delivery, in the same condition the lot(s) were delivered to the Buyer, time being of the essence. Non-certified coins, currency and cryptocurrency tokens that have been either examined by the Buyer prior to the Auction Sale or purchased by the Buyer or Buyer's agent at the Auction Sale, will not be granted return privileges, except for authenticity.

Terms & Conditions – Showcase and Collectors Choice Auctions (cont.)

- c. All non-certified coins and currency are guaranteed to be genuine.
- d. All certified and non-certified cryptocurrency tokens are guaranteed to be genuine only. Auctioneer disclaims any guaranty of any kind with respect to cryptocurrency tokens, including, but not limited to: face value, the contents or existence of any accounts, wallets, or other physical, digital or other receptacles of value, the existence of a cryptographic private key, or the ability to fund any cryptocurrency. Actual cryptocurrency value is neither confirmed nor guaranteed by Auctioneer.

If an item or items are returned pursuant to the terms herein, they must be housed in their original, sealed and unopened container.

- e. Late remittance or removal of any item from its original container or third party graded holder, or altering a coin constitutes just cause for revocation of all return privileges.
- f. Grading or condition of rare coins, currency and cryptocurrency tokens may have a material effect on the value of the item(s) purchased, and the opinion of others (including independent grading services) may differ with the independent grading services opinion or interpretation of Stack's Bowers. Stack's Bowers shall not be bound by any prior, or subsequent opinion, determination or certification by any independent grading service.
- g. Questions regarding the minting of a coin as a "proof" or as a "business strike" relate to the method of manufacture and not to authenticity.
- h. All oral and written statements made by Stack's Bowers and its employees or agents (including affiliated and related companies) are statements of opinion only, and are not warranties or representations of any kind, unless stated as a specific written warranty, and no employee or agent of Stack's Bowers has authority to vary or alter these Terms and Conditions of Auction Sale. Stack's Bowers reserves the right to vary or alter the Terms of Sale, either generally or with respect to specific persons or circumstances, in its sole discretion. Any variation or alteration shall be effective only if in writing and signed by an officer of Stack's Bowers authorized to do so.
- i. Stack's Bowers is acting as an auctioneer. Title to the lots purchased passes directly from the Consignor to the Buyer. Accordingly, Stack's Bowers is not making, and disclaims, any warranty of title.
- j. Bidders shall have no recourse against the Consignor for any reason whatsoever.
- k. Bidder acknowledges that the numismatic and cryptocurrency token market is speculative, unregulated and volatile, and that prices may rise or fall over time. Stack's Bowers does not guarantee or represent that any customer buying for investment purposes will be able to sell for a profit in the future.
- I. Bidder acknowledges and agrees that neither Stack's Bowers, nor its employees, affiliates, agents, third-party providers or consignors warrant that auctions will be unimpaired, uninterrupted or error free and accordingly shall not be liable for such events.
- 11. Waiver and Release. Bidder, for himself, his heirs, agents, successors and assignees, generally and specifically waives and releases, and forever discharges Stack's Bowers, and its respective affiliates, parents, officers, directors, shareholders, agents, subsidiaries, employees, managers and members and each of them, and their respective successors and assignees from any and all claims, rights, demands and causes of actions and suits, of whatever kind or nature, including but not limited to claims based upon Auctioneer's negligence, whether in law or equity, tort or otherwise, whether known or unknown, suspected or unsuspected (a "Claim"), which Bidder may assert with respect to and/or arising out of, or in connection with any challenge to the title to or authenticity

of any goods purchased, the sale itself, any lot bid upon or consigned, and/or the auction, except where such Claim is otherwise expressly authorized in these Terms of Sale. It is the intention of Bidder that this waiver and release shall be effective as a bar to each and every Claim that may arise hereunder or be related to the Auction Sale, and Bidder hereby knowingly and voluntarily waives any and all rights and benefits otherwise conferred upon him by the provisions of Section 1542 of the California Civil Code, which reads in full as follows:

"A GENERAL RELEASE DOES NOT EXTEND TO CLAIMS WHICH THE CREDITOR OR RELEASING PARTY DOES NOT KNOW OR SUSPECT TO EXIST IN HIS OR HER FAVOR AT THE TIME OF EXECUTING THE RELEASE, WHICH IF KNOWN BY HIM OR HER MUST HAVE MATERIALLY AFFECTED HIS OR HER SETTLEMENT WITH THE DEBTOR OR RELEASED PARTY."

12. Disputes. If a dispute arises concerning ownership of a lot or concerning proceeds of any sale, Stack's Bowers reserves the right to commence a statutory inter-pleader proceeding at the expense of the Consignor and Buyer and any other applicable party, and in such event shall be entitled to its reasonable attorneys' fees and costs. Stack's Bowers reserves the right to cancel or postpone the Auction Sale or any session thereof for any reason whatsoever. No Bidder shall have any claim as a result thereof, including for incidental or consequential damages. Neither Stack's Bowers nor any affiliated or related company shall be responsible for incidental or consequential damages arising out of any failure of the Terms of Sale, the auction or the conduct thereof and in no event shall such liability exceed the purchase price, premium, or fees paid. Rights granted to Bidders under the within Terms and Conditions of Auction Sale are personal and apply only to the Bidder who initially purchases the lot(s) from Stack's Bowers. The rights may not be assigned or transferred to any other person or entity, whether by sale of the lot(s), operation of law or otherwise. Any attempt to assign or transfer any such rights shall be absolutely void and unenforceable. No third party may rely on any benefit or right conferred by these Terms and Conditions of Auction Sale.

Any dispute arising out of or related to these Terms of Sale, the Auction Sale or any lot, with the sole exception of actions by Stack's Bowers to collect amounts owed to it and other damages, shall be submitted to binding arbitration pursuant to the commercial arbitration rules of the American Arbitration Association, with any arbitration hearing to occur in Orange County, California. Absent an agreement of the parties, the arbitrator shall limit discovery to that which is necessary to enable the hearing to proceed efficiently. The arbitrator shall not have the power to award punitive or consequential damages, nor alter, amend modify any of the terms of this Agreement. The award by the arbitrator, if any, may be entered in any court having jurisdiction thereof. Each

party shall pay one-half the costs of the arbitration. Bidder acknowledges and agrees that the competent courts of the State of California shall have exclusive in personam jurisdiction, subject to the requirement to arbitrate, over any dispute(s) arising hereunder, regardless of any party's current or future residence or domicile. Bidder further agrees that venue of the arbitration proceeding shall be in Orange County, California; and any court proceeding shall be in the Orange County Superior Court, in the State of California, and in each case waive any claim of Forum Non Conveniens. Bidder agrees that any arbitration or legal action with respect to this Auction Sale is barred unless commenced within one (1) year of the date of this Auction Sale. AUCTION PARTICIPANTS EXPRESSLY WAIVE ANY RIGHT TO TRIAL BY JURY.

- 13. General Terms. These Terms and Conditions of Auction Sale and the auction shall be construed and enforced in accordance with, and governed by, the laws of the State of California, regardless of the location of the Auction Sale. These Terms of Sale and the information on the Stack's Bowers' website constitute the entire agreement between the parties hereto on the subject matter hereof and supersede all other agreements, understandings, warranties and representations concerning the subject matter hereof. If any section of these Terms of Auction Sale or any term or provision of any section is held to be invalid, void, or unenforceable by any court of competent jurisdiction, the remaining sections or terms and provisions of a section shall continue in full force and effect without being impaired or invalidated in any way. Stack's Bowers may at its sole and absolute discretion, make loans or advances to Consignors and/or Bidders.
- 14. Chinese Translation. The Chinese translations are provided as a matter of convenience. In the event of a conflict, all English Terms and Conditions and lot descriptions take precedence and are binding.

Bidding in this auction sale constitutes unconditional acceptance by the Bidder of the foregoing Terms of Sale.

Please note: Transparent holders in which the auction lots are stored are to facilitate viewing and inspection of the lots and ARE NOT for long-term storage.

PCGS and NGC numbers provided are for bidder convenience only, we do not guarantee their accuracy. An incorrect PCGS or NGC number is not grounds to return a lot.

For PRICES REALIZED after the sale, call 1-800-458-4646. Preliminary prices realized will also be posted on the Internet soon after the session closes.

Consign Now to the

Stack's Bowers Galleries Global Showcase Auction

An ANA World's Fair of Money® Auctioneer Partner • August 2022

Now is the time for you to capitalize on this amazing market and the unmatched expertise of Stack's Bowers Galleries. Our firm is realizing record prices and near record prices at every turn, not just exceeding pre-sale estimates but in some instances, doubling and tripling them. Our nearly 90 years of experience and our cutting-edge auction technology create the perfect environment for you to realize top market price for your United States and world coins, currency, tokens and medals across all categories and price levels. Generous cash advances upon request.

Call 800-458-4646 to speak to a consignment specialist who can help you with all aspects of the process.
